**BUSH FIRES ACT 1954***Shire of Bridgetown-Greenbushes*

## 2015/16 FIREBREAK ORDER

Notice to all owners and/or occupiers of land in the Shire of Bridgetown-Greenbushes

In accordance with Section 33 of the Bush Fires Act 1954, you are required to carry out fire prevention work on land owned or occupied by you as set out in this Order by the date specified.

If the requirements of this notice are not done by the due date, or not done to the satisfaction of an inspecting officer, an on the spot fine of **\$250** will be issued. The maximum fine for failure to carry out the work is **\$5000**. Council can also enter upon the land and carry out required works at the owner/occupier's expense.

**1. DEFINITIONS**

**Firebreak** means ground from which all flammable material has been removed and on which no flammable material is permitted to accumulate during the period specified in this notice.

**Flammable Materials** means accumulated fuel (living or dead) such as leaf litter, twigs, bark, dead trees and grass over 50mm or 100mm (depending upon type of property as described in Parts 2, 3 and 4 of this Order) capable of carrying a running fire but excludes living standing trees and shrubs.

**Harvested Plantation** means a plantation that has been clear felled but evidence of the former use of the plantation remains in the form of tree stumps, pruning, limbs and other accumulated tree refuse and logging residue.

**Hay Stack** means a collection of hay including fodder rolls placed or stacked together.

**Managed Land** means land over 4 hectares that is being *actively* used for agriculture, viticulture, horticulture etc and that such use is clearly evident, but excludes plantations.

**Plantation** means any area planted in pine, eucalypt or other commercial value trees (excluding orchards and vineyards) which have been planted for commercial gain, and requires approval under the Town Planning Scheme.

**2. ALL LAND UNDER 4 HECTARES (10 ACRES)****By 1 December 2015 Until 26 April 2016**

- (a) Remove all flammable material from the property except living trees and shrubbery and maintain throughout the required period, **unless used for cropping or pasture**. Height of grass not to exceed 50mm.

- (b) If the land is used for cropping or pasture, you are required to construct and maintain a 2 metre firebreak inside and along the boundary of the property as well as a 3 metre firebreak around all buildings and haystacks.

*If choosing to forego firebreaks and instead remove flammable materials from the property it is the responsibility of the property owner for active fuel reduction to be completed on the property by 1 December and maintained throughout the period of this notice by means such as slashing, baling and grazing by an appropriate number of livestock. If choosing to carry out fuel reduction by grazing of stock it is the responsibility of the property owner to ensure that sufficient stock is used to ensure that all grass is reduced to a maximum height of 50mm by **1 December and retained at that height until 26 April**.*

*In order to guide property owners of land holdings suggested livestock rates are—1 cow and calf per 3 acres or 1 dry cattle per 1.5 acres or 5 dry sheep per 1 acre. These are suggestions only and it is the responsibility of the property owner to determine the required number of stock in order to achieve compliance by 1 December and to contain the flammable materials until 26 April.*

### **3. MANAGED LAND OVER 4 HECTARES (10 ACRES)**

#### **By 1 December 2015 Until 26 April 2016**

Managed land is not required to have perimeter firebreaks, although land owners and occupiers are encouraged to install them in strategic places to protect their property in the event of a fire.

Managed land must however comply with the following requirements—

There must be active fuel reduction done on the property throughout the period of this notice, by means such as grazing by an appropriate number of livestock, slashing and baling etc.

All buildings must have an access track not less than 4 metres in width and vertical clearance of 3 metres to allow access by fire appliances.

Around all buildings, haystacks and fuel storage areas, slash and remove all flammable materials likely to create a fire hazard, except living trees and shrubbery for at least 20 metres around the building, haystack and fuel storage area. Height of grass not to exceed 100mm.

### **4. UNMANAGED LAND OVER 4 HECTARES (10 ACRES)**

#### **By 1 December 2015 Until 26 April 2016**

Remove all flammable materials from the property except living trees and shrubbery and maintain throughout the required period. Height of grass not to exceed 100mm.

#### **Or Alternatively**

Construct and maintain a **3 metre** firebreak inside and along the boundary of the property and around all buildings and haystacks.

### **5. PLANTATIONS**

#### **By 1 November 2015 Until 26 April 2016**

The first row of trees must be a minimum of 15 metres from all formed public roads.

A 10 metre firebreak to be constructed on the internal boundaries of the Plantation, along the boundaries of separate ownership, and all formed public roads.

A firebreak 6 metres wide shall be provided in such a position that no compartment of a plantation exceeds 30 hectares.

Where power lines pass through the plantation the clearing of vegetation must be in accordance with power supplier's specifications.

Trees adjoining the firebreak progressively pruned to a minimum height of 4 metres to maintain an effective width of firebreak.

### **6. PINE PLANTATIONS PLANTED PRIOR TO 1 MAY 1990**

#### **By 1 November 2015 Until 26 April 2016**

A firebreak not less than 10 metres to be constructed on the internal boundaries of the Plantation, along the boundaries of separate ownership, and all formed public roads.

A firebreak at least 6 metres wide shall be provided in such a position that no compartment of a plantation should exceed 30 hectares.

### **7. EUCALYPT PLANTATIONS PLANTED PRIOR TO 1 MAY 1990**

#### **By 1 November 2015 Until 26 April 2016**

A 5 metre firebreak to be constructed on the boundaries of the plantation, including the boundaries of each separate location and all formed public roads.

No planting will be allowed within a distance of 20 metres on either side of all power lines, and a 6 metre firebreak shall be provided as near as practical either side of the power lines.

Trees adjoining the firebreak progressively pruned to a minimum height of 4 metres to maintain an effective width of firebreak.

### **8. HARVESTED PLANTATIONS**

Firebreak requirements for harvested plantations are the same as for plantations.

**9. TIMBER MILLS****By 1 November 2015 Until 26 April 2016**

Construct and maintain a **3 metre** firebreak inside and along the boundary of the property as well as a **10 metre** firebreak around all piles of sawdust, woodchips, bark and waste material.

**10. HARVESTING OPERATIONS**

In addition to the above requirements, a drivable fire unit of at least 400 litres in operational condition (full of water and in good working order) must be on site during harvesting operations in plantations.

**11. ALTERNATIVES**

If you consider it impracticable or environmentally damaging to carry out the requirements set out above, you can apply to Council by 1 October for permission to provide alternative firebreaks or other fire prevention measures. In the absence of written approval for alternative measures, the requirements of this Order must be adhered to.

**12. SPECIAL REQUIREMENTS**

The requirements of this Order are considered the **minimum** standard of fire protection required to protect not only the individual property but the community as a whole. Council can impose additional requirements to remove or abate hazards if it considers it necessary.

By Order of the Council.

Dated 25 June 2015.

T. P. CLYNCH, Chief Executive Officer.
