APPLICATION DETAILS

It is essential that the guidelines—

- WA Petroleum Guideline for Acreage Release Criteria for Assessment and
- WA Petroleum and Geothermal Guideline for Exploration Permit Management

searchable on the Department's website www.dmp.wa.gov.au/Petroleum/ and included in the release information package be read in concert with this invitation. Applicants should familiarise themselves with the stringent regulatory framework in place by which permittees must conduct petroleum exploration operations within permit boundaries.

Where there is more than one applicant to the application, the percentage of participating interest of each party to the application is to be supplied including evidence that a satisfactory settlement has been, or can be reached. Copy of a Heads of Agreement document will generally suffice.

ACCESS CONSIDERATIONS

Insofar as reserved land, declared land, and land dedicated under any written law is concerned, entry for petroleum exploration purposes is subject to the consent and approval of the Minister and should not be presumed. The consent of the Minister, in accordance section 15A of the PGERA67, may be subject to conditions stipulated by the Minister vested with the responsibility of managing the specified lands. It should be understood that land access arrangements must be in place before on ground activities can commence.

Successful applications over onshore areas, including islands, administered under the PGERA67 will be subject to the provisions of the *Native Title Act 1993* (Cth) (NTA93) and applicants should be prepared to negotiate with Native Title parties pursuant to the right to negotiate provisions of the NTA93. Plans showing these claim boundaries are available from the Department's website as part of the information package supporting this release.

Applicants are required to make themselves aware of the existence of any areas that have the potential to restrict exploration activities and any associated obligations to acquire approvals under other legislation to obtain access to or conduct activities in proximity to these areas. These may include but not limited to National Parks, Nature Reserves, Water Reserves, World Heritage Areas, National Heritage Areas, Conservation Reserves, Defence Areas and Mining Titles where additional land access constraints and environmental assessment are likely to be required and applicants are advised to take this into consideration. Early consultation with stakeholders that have an interest in the area is strongly advised and recognition of this requirement forms part of the criteria under which applications will be considered.

In all instances applicants will need to consider their obligations under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) administered by The Department of the Environment,

the *Environmental Protection Act 1986* WA administered by the Office of Environmental Protection Authority and *Conservation and Land Management Act 1984* (WA) when planning activities. Environment maps are available as part of the release package through the Department of Mines and Petroleum's website www.dmp.wa.gov.au.

Applicants should note that they will be required to initiate contact with relevant State and Commonwealth departments and industry bodies concerning their exploration activities at the earliest possible phase when planning operations. Applicants should familiarise themselves with the relevant policies and guidelines available when considering whether to refer proposals.

ONLINE LODGEMENT OF APPLICATIONS

An information package on the release areas detailing the criteria for assessment of applications, how to apply in the approved manner, native title and environment maps, in addition to geological and geotechnical information is available on the Departments website www.dmp.wa.gov.au/Acreage_Release/

For the purposes of section 31 of the PGERA67, the approved manner for submission of applications and payment of the prescribed fee is via online lodgement through the Department's secure Petroleum and Geothermal Register (PGR) online system.

Applicants will be required to register for PGR online lodgement and PGR online payments at least two business days in advance of the acreage closing time and date to ensure access to the system, if not already registered.

Access to the PGR online system is available at—

www.dmp.wa.gov.au/PGR/.

The Schedule of Fees is available at—

www.dmp.wa.gov.au/Documents/Petroleum/PD-PTLA-ALS-100D.pdf.

Applications may **no longer** be submitted by post or by hand delivery.

PLEASE NOTE: Applicants need to strictly observe the closing time and date published in this invitation. The PGR online system will not permit lodgement of applications after the closing time and date.
