Any further requirements will be specified in a work order forwarded to the address of the owner(s) and/or occupier.

FAILURE TO COMPLY

Where the owner and/or occupier of the land fails or neglects to comply with the requisitions of this Notice within the specified time, the Shire of Chittering may, by its Authorised Officers and such servants, workmen and contractors enter upon the land and carry out the requisitions of this Notice which have not been complied with. 1. ALL PROPERTIES OF ANY SIZE

- Maintain grassed areas to a height of no more than 50 millimetres by slashing / mowing or grazing by livestock, as far as reasonably practicable.
- You must create an Asset Protection Zone (APZ) by installing and maintaining a 20 metre fuel reduced zone around all buildings or an asset of value. "Fuel reduced" is a reduction in the vegetation so as to reduce the impact of a bushfire on that asset.
- Trees over 5 metres in height within the APZ, must be under pruned to a clearance of 2 metres from the ground and should not overhang the asset..
- Trees and shrubs within 2 metres of the asset, must not exceed 2 metres in height.
- Ensure the roofs, gutters and walls of all buildings on the land are free of flammable matter.
- Properties that have haystacks or fuel storage areas must ensure there is a bare earth firebreak, not less than 5 metres wide, with a 4 metre vertical clearance completely surrounding haystacks and/or fuel storage areas. This requirement is in addition to firebreak requirements inside property boundaries. Firebreaks may be constructed by one or more of the following methods: ploughing, cultivating, scarifying, raking, burning, chemical spraying or other approved method.

2. PROPERTIES 5000M² (½ HECTARE) AND LARGER

- Install and/or upgrade firebreaks.
- Clear a bare earth firebreak by removing all flammable material. The firebreak should be 3 metres wide, with a 4 metre vertical clearance (trafficable) along the inside of all the property boundaries.

Firebreaks should be located as close as possible to all the property boundaries. Firebreaks should be located as close as possible to the property boundaries.

If for any reason it is not possible to comply with any of the requirements of the Firebreak and Bushfire Hazard Reduction Notice, you will need to apply for a 'variation'. All variation requests must be received and approved by the Shire of Chittering before 1 October in any given year. Applications must be in writing and provide details or a map of the proposed alternative measures. If approved, the firebreak variation will form an individual notice for the property and remain in place until revoked.

All properties with a Bushfire Management Plan, Emergency Management Plan, or an approved Bushfire Attack Level assessment (BAL), approved as part of a Local Planning Scheme, subdivision approval, development approval or a building permit for an individual, or group of properties, shall comply with the plan in its entirety.

All bushfire management plan requirements are in addition to the requirements of this notice. Compliance is required throughout the year, each and every year.

4. PLANTATIONS

In accordance with the requirements of a Fire Management Plan approved in writing by the Shire; Install and maintain external perimeter and internal firebreaks that form compartment cells, and engage in hazard reduction measures that reduce fuel loads so as to protect neighbouring communities and essential infrastructure, Or;

Meet requirements and specifications set out within the Department of Fire and Emergency Services Guidelines for Plantation Fire Protection 2011 publication.

If, for any reason, it is considered impractical to carry out the requirements as outlined above, plantation owners and managers may apply in writing to the Shire for permission to implement an alternative plan. A Fire Management Plan may be required to be developed and submitted.
