January 1st, 1859.*

A CONDITIONAL Pardon has been this day signed for:—

Reg No.
3199 James Masker

By His Excellency's command,
FRED. P. BARLEE,
Colonial Secretary

NOTICE TO MARINERS.

*Colonial Secretary's Office, Perth,
7th January, 1859.*

HIS EXCELLENCY the Governor has been pleased to direct the publication of the following notices, regarding the Mac Donnell Lighthouse on Cape Northumberland: And Pencarrow Lighthouse, in Cook's Strait, for general information.

By His Excellency's command,
FRED. P. BARLEE,
Colonial Secretary.

MacDonnell Lighthouse, Cape Northumberland.

THE BEARINGS ARE MAGNETIC.
VARIATION 5° EAST.

THE MASTER and WARDENS of the TRINITY HOUSE, PORT ADELAIDE, hereby give notice that the "MACDONNELL LIGHT," on Cape Northumberland, in lat. 38° 3' 6" S., long. 140° 37' 45" E., will be exhibited nightly on and after the 1st of January, 1859, from Sunset to Sunrise.

The Lighthouse Tower, which is 28 feet in height, stands on a rocky headland elevated 103 feet above high-water mark.

The Light, which is catoptric and revolving, consists of three faces, and exhibits alternately EVERY MINUTE a White, Red, and Green Light, on an arc visible from seaward from N. 74° E. to N. 66° W. round by south (by compass.)

The White Light may be seen from the deck of a moderate sized vessel about 18 miles, and from aloft at a distance proportionate to the elevation attained.

The Red Light will not be seen, under the most favourable circumstances, at a greater distance than 15 miles.

The Green Light will not generally be distinguished beyond a range of 8 miles.

During hot weather and N.E. Winds, when there is often much refraction, the White Light will frequently be observed at a great distance.

Vessels approaching from the eastward should not bring the White or Red Light to bear to the westward of W.N.W., and when the Green Light becomes visible on that bearing should steer more southerly, in order to give the reef, which stretches to the eastward of Cape Northumberland, a wide berth.

Vessels from the northward, should never sight the White or Red Light on a bearing more southerly than E. $\frac{1}{2}$ S., and on distinguishing the Green Light should immediately alter the course so as to give the outlying reefs, to the westward of the Cape running parallel to the coast a mile from the shore, an offing.

In bad weather with the wind hanging from the southward, it will be advisable to give the Cape such an offing as will enable a ship to pass the Lighthouse without sighting the Green Light, and should the weather, which is occasionally the case, be thick, or it be blowing hard, it will be prudent not to sight the Red Light, which, under such circumstances, would not be seen at the distance first given.

The coast to the north-westward of the Cape soon becomes low, and owing to the heavy ocean swell, which sets directly on the shore, should be very carefully avoided.

To the eastward of the Cape is a deep bight, which offers no shelter from the prevailing winds and swell, or inducement to enter.

The Lightkeepers are provided with a nine-ponnder carronade, and a code of Marryat's Signals, which will be used to warn vessels if observed to be standing into danger.

B. DOUGLAS,

Master of the Trinity House, South Australia.

Trinity House, Port Adelaide, South Australia,

30th November, 1858.

Pencarrow Light House, Cook's Strait, New Zealand.

Notice is hereby given that on and after the first day of January next, a new light will be exhibited on Pencarrow Head at the entrance of Port Nicholson, (Wellington) Cook's Strait, New Zealand.

The new light will be of the second order, (Catadioptric system) with eclipses at intervals of two minutes; it will be 420 feet above high water mark, and visible in ordinary weather at a distance of thirty English miles.

The following are the magnetic bearings and distances of the site of the new Light House.

From Baring Head, N. W. by N., $3\frac{1}{4}$ miles.

From Sinclair Head, E. by N. $\frac{1}{2}$ N., $6\frac{1}{2}$ miles.

From Outer Rock of Barretts' Reef, S.E. by E. $\frac{1}{2}$ E., 1 mile.

From Steeple rock, S. S. E. 2 miles.

From Cape Campbell, N. N. E. $\frac{1}{4}$ E., 33 miles.

The Lighthouse is in Latitude $41^{\circ} 22' 0''$ S.

Longitude $174^{\circ} 51' 15''$ E.
