Notice to Mariners.

Colonial Secretary's Office, Perth,
24th September, 1861.

THE following Notice is published for general information.

By His Excellency's command,
FRED. P. BARLEE,
Colonial Secretary.

Hobart Town, 20th August, 1861.

LIGHT-HOUSE, CAPE WICKHAM, KING'S ISLAND, TASMANIA.

NOTICE is hereby given, that a Circular Stone Tower, one hundred and forty-five feet high, and painted white, has been erected for a Light-house on the hill near Cape Wickham, at the north end of King's Island, in Bass's Straits, and from which a *fixed White Light* will be exhibited on or after the 1st day of November next.

The Light is of a first class Catadioptric

description, at an elevation of two hundred and eighty feet above the level of the sea, and, in clear weather, will be visible on the deck of a vessel about eight leagues on an arc of the horizon to seaward from S.S.W. $\frac{1}{2}$ W. round the compass northerly to E.S.E.

The attention of Mariners is also earnestly called to the following extract from the Report of the Light-house Commissioners appointed by the Governments of New South Wales, Victoria, South Australia and Tasmania:—

“In advising the erection of a Light-house on this Island, the Commissioners wish to guard themselves from affording the public any reasonable supposition that this Light can at all be considered in the position of a great highway Light for the navigation of the Straits. The south coast of New Holland, at the Western entrance of Bass's Straits, being free from danger, affords, in their opinion, the safest shore for the prudent Mariner to approach; and they conceive that the Light on King's Island is only to be regarded as a Beacon for warning Navigators of danger, rather than as a leading Light to a great thoroughfare.”

The bearings following were taken in 1855, by Commander Ross, R.N., from the site of the Light-house:—

Western extremity of Harbinger Reef, N. 69° W.; distance, $4\frac{1}{2}$ miles.

Eastern extremity, N. $54\frac{1}{2}^{\circ}$ E.; distance $4\frac{1}{2}$ miles.

Navarino Shoal, N. $34\frac{1}{2}^{\circ}$ E.; distance, $2\frac{1}{2}$ miles.

Southern extremity of New Year's Island, S. 39° W.; distance 9 miles.

Northern ditto, S. $49\frac{1}{2}^{\circ}$ W.; distance, $7\frac{1}{2}$ miles.

The bearings are magnetic; variation 10° east.

C. M. MAXWELL,
Chairman Marine Board.

Notice to Mariners.

Colonial Secretary's Office, Perth,

THE following Notice is published for general information.

By His Excellency's command,
FRED. P. BARLEE,
Colonial Secretary.

GOVERNMENT NOTICE.—No. 185,
1861.

Colonial Office, Cape of Good Hope,
17th June, 1861.

HIS Excellency the Governor has directed the publication of the following notice of the new Roman Rock Light, at the entrance of Simon's Bay, which will be exhibited on the 16th of September, 1861.

By command of His Excellency the
Governor,
RICHARD SOUTHEY,
Acting Colonial Secretary.

NOTICE TO MARINERS.—ROMAN ROCK LIGHT, FALSE BAY, CAPE OF GOOD HOPE.

The bearings are by Compass, and the distances in Nautical Miles.

Notice is hereby given, that a Light will be exhibited from the new Light-house on the Roman Rocks on the 16th of September next, which will supersede that shewn at the Light-vessel now moored a cable's length north of the rocks. It will be a revolving white Light, showing a bright face for the space of twelve seconds twice every minute, which will serve to distinguish it from the Cape Point Light in thick weather, as that Light revolves only once every minute. The Light will be fifty-four feet above the sea, and visible in clear weather from a ship's deck thirteen miles distant.

The Light-tower is forty-eight feet high, the lower half of which will be painted black and the upper half white. From the Light-house Noah's Ark bears S. 56° , W. 7-10ths miles, and the Dock-yard clock W. by N. 1.65 miles.

N.N.E. $\frac{2}{3}$ E., $2\frac{3}{4}$ cables from the Light-house, lies the *Castor Rock*, with only fifteen feet on it at low-water springs: its position is marked by a beacon, with a flag having the word "rock" painted on it. There are patches of nineteen and twenty-four feet between the *Castor Rock* and the Light-house, which renders it necessary for large ships to give the Light-house a berth of at least three and a half cables, when passing to the N.E., before hauling in for Simon's Bay.

In sailing for Simon's Bay, by keeping the Light-house in line with Elsey Peak, bearing N. $\frac{1}{4}$ W., a ship will pass mid-way between the Whittle Rock and Miller's Point.

F. SKEAD, Master R.N.
Admiralty Surveyor.
