**T**HE following Report from the Inspector of Pearl Shell Fisheries, on Balla Balla Creek, is published for general information.

JOHN FORREST,  
Colonial Treasurer.

SIR,—With reference to Balla Balla Creek, inside Depuch Island, I visited it at the beginning of last month during spring tides. I found the schooner "Harriet," about 60 tons register, inside the Creek, loading copper ore; she was moored in a hole or gutter, having two fathoms at low water spring tides. The creek is about a mile in length and about from 80 to 150 yards wide.

There would be nothing to prevent a flat-bottomed vessel from going alongside the bank and taking cargo straight on board, as there are 12 to 14 feet of water alongside the bank at high water, with a soft muddy bottom.

A vessel drawing 16 feet could go up the Creek at high water; of course she would require to moor, as it's a tidal Creek, with a sand and muddy bottom, and no reefs or rocks.

Large vessels have good anchorage in 5 to 9 fathoms of water, on the North-east side of Depuch Island, between Depuch and the Forester Islands; and about two miles

from the mouth of the Creek, good shelter from the prevailing winds, so that vessels can depend upon having smooth water at nearly all times.

I consider it one of the best places along the coast for a vessel to load.

The Chart is wrong as regards the rise at springs: it gives 14 feet, and I found a rise of 18 feet of water.

I have, &c.,  
THOS. W. SMITH,  
Inspector Pearl Shell Fisheries.

THE following Notice to Mariners is published for general information.

JOHN FORREST,  
Colonial Treasurer.

NOTICE TO MARINERS.

THE attention of Masters of vessels bound for either Champion Bay, or Fremantle, is directed to a chart published by Wilson (late Norie) of Leadenhall Street, London, dated 1882, and they are warned against some gross mistakes it contains.

The chart in question shows a revolving light on some position of the Pelsart Group of the Abrolhos Islands, probably meant for Hummock island, where there is a beacon, but no light has ever been erected on any of the Abrolhos Islands.

The Revolving Light on Moore Point (Champion Bay) is on the same chart shown as a fixed light, instead of revolving.

The Bluff leading Lights (Champion Bay) are noted on the chart as Red instead of White, as should be the case.

Some extraordinary directions for vessels bound to Fremantle are added in a footnote to the chart, which are altogether and entirely erroneous and misleading.

The chart contains two small plans of King George's Sound and Princess Royal Harbor, of which one shows Point King Light in its proper position, but the other has it placed wrongly on Point Possession.

Colonial Treasurer.

CORAL REEF IN TRACK OF VESSELS FROM ROEBUCK BAY OR DERBY TO WYNDHAM AND PORT DARWIN.

"Orlando," at Melbourne,  
19th June, 1891.

Hydrographic Notice, No. 5.

Jamieson Reef.—Owing to information given by Captain R. Jamieson of the Adelaide S.S. Company's vessel "Otway" a coral reef has been found by H.M.S. "Penguin" in the track of vessels bound from Roebuck Bay or Derby to Wyndham and Port Darwin.

This reef is 2½ miles long north and south, and one mile broad east and west. It is mostly covered at all times of tide with from 12 to 24 feet water; but there is one small part three quarters of a mile from the north end of the reef which dries 5 feet at low water spring tide. This spot is in latitude 14° 4' 32" S., longitude 125° 21' 11" E. From

it, the centre of the flat-topped summit of Condillac bears S. 78° E., distant 12·2 miles.

The water in this locality is much discolored at all times; and there is nothing in the appearance of the sea over the reef to indicate danger, except at nearly low water when the shallowest part breaks. The lead gives no warning.

Charts affected. No. 1047, VIII., 90 Cape Ford to Buccaneer Archipelago.
