W. E. MARMION,
Commissioner of Crown Lands.

That Sub-section (4.) read as follows:—

The applicant shall, previously to making application for a lease, mark the land intended to be applied for, at each corner, by a post standing three feet out of the ground, and four inches in diameter, such post to be kept uncovered, and set in L trenches three feet long and six inches deep along each boundary line; and shall at the same time post a notice in the form of No. 20A, hereto annexed, on a conspicuous part of the land intended to be applied for; and shall, at the time of lodging his appli-

cation at the Warden's Office, post a notice thereat in the form of Schedule 20. Applications for leases shall be heard by the Warden not less than thirty days after the date of lodging of the application at the Warden's Office.

That Sub-section (5.) read as follows:—

Each application must be signed by the party or parties applying for a lease, or by his or their accredited agent or agents, and must be accompanied by a sketch plan of the land intended to be applied for, showing its position and one boundary line thereof, which line shall be considered as the datum line.

That Sub-section (6.) read as follows:—

The applicant shall, within three months after lodging the application, or within such other extended period of time as the Warden may see fit to allow, furnish to the Warden a plan in duplicate and description showing the boundaries of the land as actually surveyed and marked. Such surveying and marking shall be performed by a licensed surveyor specially appointed by the Minister to perform mining surveys. The plan and description of a gold-mining lease shall be executed in accordance with the general directions issued by the Minister, provided that the Minister may at any time cancel the special appointment of any such licensed surveyor.

That Sub-section (7.) read as follows:—

That Sub-section (8.) read as follows:—

All leases shall be marked by the surveyor according to the applicant's posts. Provided that should the area of the land marked by the applicant's posts be in excess of the area applied for, the applicant may either amend his application to include the excess area (provided that the total area of the land applied for does not exceed twenty-five acres), or in the event of the area of the land marked by his posts exceeding twenty-five acres, he may amend his application and retain twenty-five acres extending from the line shown in his application as the datum line; and should the area of the land marked by the applicant's posts be less than the area applied for, such less area only shall be granted. Should the applicant, however, show that by increasing the area to the quantity applied for there would be no interference with adjoining rights, the surveyor may make the required alteration.

Notice of Request to amend Specification.

Patent Office, Perth,
10th December, 1894.

A REQUEST to be allowed to amend the complete Specification and Drawings accompanying the undermentioned application for Letters Patent, has been received, and is open to public inspection at this Office. Any person may, at any time within one month from the date of this *Gazette*, give me notice in writing, in duplicate, of opposition to the amendment, stating in such notice the particular grounds of objection:—

Application No. 598, P. $\frac{9}{138}$.—ROBERT WILLIAM HEADS, of Fremantle, in the Colony of Western Australia, Engineer, "A New and Improved Dry-blower."

The nature of the proposed amendments is as follows, viz.:—

[Reference being had to amended copies of Specification and drawings lodged in the Patent Office. Perth.]

Page 2, line 17.

To insert after the word "purposes," "I have also devised an alternative method of operating my invention, whereby a swinging motion is imparted to the riddles. Said motion may be either transverse to, or longitudinal with their length; this swinging motion is obtained by means of hinged or pivotted rods which are suitably centred in bearings affixed to the foundation frame of the machine. Said pivotted rods are placed on one side, the riddles being supported on the opposite side by vertical flat springs which assist in bringing the riddles and attached mechanism back to their normal or 'home' positions."

Page 3, line 10.

To insert after the word "valves," "Figure 4 shows in red the alternative means of operation."

Page 4, line 19.

To insert after the words "holes P 3," "Referring to figure 4, R represents the pivotted rod, which is shown in one continuous piece; this rod is hinged or centered in the bearings R 2, bolted to the foundation frames R 3. R 4 is the crank lever for operating the bellows G 2. On the cross bar R 5 of rod R, collars T are affixed, into which are placed the staples T 2 for holding the riddle C, which latter rests on the arms T 3. V are the flat vertically curved springs, bolted at V 2 and V 3, to riddle C and to foundation frames R 3, respectively. W is the operating handle."

Page 5, line 18.

To insert after the word "purposes," "The alternative method of working is as follows:—The operator takes hold of the handle W, and swings the machine to and fro, which rides on the hinged rods R and springs V, the latter having the tendency to bring back the apparatus to its home position, or starting point, which assists the operator to a great extent, and so making the machine easy to work."

Page 6, line 12.

To insert after the word "drawings," 3. "In a dry-blowing machine: Riddles and shoots being affixed to a hinged or pivotted rod, or rods, which are centred in any suitable manner to the body frame, and said riddles at their opposite side or end having vertical supports of a spring or flexible nature, whereby a longitudinal or transverse, oscillating, or swinging motion is imparted to said riddles and shoots, substantially as herein specified, and illustrated in figure 4 of the drawings."

The applicant states as his reasons for the request:—

1. To make the specification to more particularly describe and fully ascertain the nature of the invention as at present existing, as same is more effective and complete than that as described in the original or complete specification.
2. The proposed amendments are in no way foreign to the subject matter of the invention as described and illustrated in the complete specification and drawings respectively.
3. The proposed amendments do not constitute in themselves subject matter on which to base an application for valid Letters Patent.
4. Said proposed amendments are not detrimental to the interests of any person."
