

Supplement to Government Gazette

OF

WESTERN AUSTRALIA.

[Published by Authority.]

No. 17. }
P.O. No. 13. }

PERTH: FRIDAY, MARCH 30.

[1900.]

CONTENTS:

SUBJECT.	PAGE
Complete Specifications accepted	1099
Applications for Registration of Trade Marks	1104

Note.—Throughout this Gazette the names in *Italics* within parentheses are those of Communicators of Inventions.

Complete Specifications.

Patent Office, Perth,
30th March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 2372.—CHARLES SCHENCK BRADLEY, Electrical Engineer, and CHARLES BORROWS JACOBS, Chemist, residing respectively at Avon, in the County of Livingston, State of New York, and at East Orange, in the County of Essex, State of New Jersey, U.S.A., "*Improvements in the process of manufacturing Soluble Salts of Barium and other Metals, and of utilizing the same in the production of Oxide of such metals, together with Hydrocarbons.*"—Dated 17th January, 1899.

Claims:—

1. The process of converting barytes into soluble barium salts consisting in mixing it with carbon and subjecting it to the heat of an electric furnace and permitting the reaction to continue until the mass is converted into barium oxide and barium sulphide.
2. The process of making an oxide from a sulphate consisting in heating in an electric furnace a mixture of carbon and sulphate.
3. The process of making barium oxide from barytes consisting in heating in an electric furnace a mixture of barytes and carbon.
4. The process of producing barium oxide from barytes which consists in heating barytes with carbon in an electric furnace, to effect a partial conversion of the sulphate into sulphide, and causing this sulphide to re-act upon the unconverted sulphate to form barium oxide together with sulphur-dioxide.
5. The process of producing hydrocarbons consisting in treating a mixture of a metallic carbide with a hydrate in fusion.
6. The process of producing hydrocarbons consisting in mixing together a metallic carbide and a fusible hydrate and subjecting the mass to a heat sufficient to fuse the hydrate.
7. The process of producing hydrocarbons consisting in decomposing a metallic carbide by a compound containing oxygen and hydrogen under a temperature sufficient to produce the polymerized products of acetylene.
8. The process of producing benzene and its homologues consisting in subjecting in a closed retort a mixture of a metallic carbide and a hydrate to a temperature sufficient to fuse the hydrate, and then condensing the hydrocarbons evolved in the reaction.
9. The herein described process of producing an oxide consisting in fusing together a carbide of the base whose oxide is to be made and a fusible hydroxide.
10. The process of making an oxide consisting in fusing together a carbide of the base whose oxide is to be made and a hydroxide of the same base.

11. The herein described process of making barium oxide consisting of fusing together barium carbide and barium hydrate.
 12. The herein described process of making porous barium oxide consisting of fusing together barium carbide and barium hydrate.
- Specification, 12s. 6d. Drawings on application.

Application No. 2572.—JACOB BROWN and ARTHUR BROWN, both of 2 Downing Street, Manchester, Lancashire, England, Special Apparatus Manufacturers, "*Improvements in and relating to Saucepans and other Receptacles for Heating and Boiling Milk and other Liquids.*"—Dated 20th June, 1899.

Claim:—

1. In saucepans for boiling milk and other liquids, the combination of an outer and inner receptacle, the upper edge of the inner receptacle being considerably below the upper edge of the outer receptacle and the inner receptacle near its bottom formed with a hole or holes, whereby a constant circulation of the liquid over the top of the inner vessel is obtained through the said receptacles, all substantially as set forth.
- Specification, 3s. Drawings on application.

Application No. 2573.—WILLIAM DABB, of Croydon, Victoria, Mechanical Engineer, "*An improved Mop for Household and other purposes having a rotatable head.*"—Dated 20th June, 1899.

Claims:—

1. In a mop for household and other purposes, the combination with a socket adapted to be secured upon a handle and provided at one end with a bearing at an angle to said socket of a spindle rotatable in said bearing and a hand-wheel mounted on said bearing and arranged to rotate said spindle.
 2. In a mop for household and other purposes, in combination a sleeve, a bearing in which said sleeve is rotatable, hand-operated gear for driving said sleeve and a spindle passing therethrough and carrying the head of the mop.
 3. In a mop for household and other purposes, having a rotatable head, the combination with a tapering sleeve of a bearing in which said sleeve is rotatable, a hand-wheel carrying a bevel gear, a spindle for carrying the mop head and a bevel pinion on the end of the sleeve nearest said mop head and meshing with the gear on the hand-wheel.
 4. In a mop, the combination with a bearing, of a sleeve rotatable therein, a spindle passing through said sleeve, a hand-wheel for actuating the sleeve and spindle, and a set screw in the wheel adapted to bear against the side of said bearing to lock said wheel and prevent the mop head from turning.
- Specification, 6s. 6d. Drawings on application.

Application No. 2770.—CHARLES CAMPBELL, of Kelly's Basin, Macquarie, Tasmania, Carpenter, "*An improved Ballast Truck.*"—Dated 16th November, 1899.

Claims:—

1. A ballast truck constructed with a removable cone-shaped bottom placed above the floor of the truck and having hinged extensions which are secured to the dependent doors of the truck, substantially as and for the purpose of building embankments as specified herein and illustrated in the accompanying drawings.
2. A ballast truck constructed with an inverted cone-shaped bottom placed underneath the floor of the truck and the side or sides of which bottom are opened and closed by a screw and ratchet and pawl mechanism substantially as and for the purpose of railway ballasting as specified herein and as illustrated in the accompanying drawings.
3. A ballast truck having operative mechanism for opening and closing the hopper doors and consisting of the combination of a lever having arms as J and J3 pivoted as at J2 with another arm J5 which is also pivoted to a screwed block as L3 which runs along a screwed rod as L1 said rod being directly operated by ratchet and pawl mechanism as L4 substantially as and for the purpose herein set forth and as illustrated in the accompanying drawings.

4. A ballast truck having dependent doors which overhang the line of rail so as to obtain a clear overshoot discharge of ballast in the building of embankments substantially as herein set forth and as illustrated in Figure 1 of the accompanying drawings.

5. A ballast truck constructed with a bolster-piece as D, secured by the king-bolt as D3 for the purpose of carrying poles, long timbers and such like as herein set forth and as shown in Figure 1 of the attached drawings.

6. A ballast truck having a hopper bottom as M2 with extensions as M3 and provided with removable doors or hatches as M4 for the purposes herein set forth and as shown on the attached drawings.

7. A ballast truck constructed with the peculiar arrangement and combination of parts whereby it may be converted for the separate uses of:—Embankment building of ballasting and of a bolster, or timber truck, and of a flat hopper bottomed truck, or of an ordinary truck, by means of the hatches M4 substantially as and for the separate purposes herein set forth and as illustrated in the accompanying drawings.

Specification, 7s. Drawings on application.

Application No. 2878.—HENRY ALONZO BUCK, of Russell Square, London, England, Engineer, "*An Improved Rotary Engine.*"—Dated 24th February, 1900.

Claims:—

1. A rotary engine, consisting of an outer case provided with an annular channel or cylinder in which travels a piston under steam or other pressure, the admission of which to the said cylinder is governed by valves actuated by projections formed upon a collar or the like attached to the piston spindle or shaft, all acting and constructed substantially as herein described and illustrated by the appended drawings.

2. In a rotary engine of the kind above specified the combination of a piston (10) having its ends wedge-shaped, as shown by the drawings, with the traps or doors (12 and 13) adapted and operated by levers (45 and 46) so as to allow of the same beginning to close the bore of the cylinder as soon as the body of the piston has passed beyond said doors, thereby decreasing the amount of clearance behind the piston substantially as herein described and illustrated by the appended drawings.

3. In a rotary engine of the class herein specified a means for readily reversing the direction of motion of the same, consisting of a plate (55b) capable of being rocked to either right or left hand acting in conjunction with the steam cock or valve, so as to throw into action an admission valve and trap to cause steam to be admitted to the cylinder upon the opposite side of the piston, at the same time withdrawing the opposite trap and shutting off the steam supply upon that side substantially as described and illustrated by the appended drawings.

4. In a rotary engine the combination of a cylinder (1) piston (10) with admission valves (16, 17) with levers (23 and 24), doors (12 and 13), and their actuating levers (45 and 46) with the collar (32) upon the shaft (8), and projections (33, 34 and 35) thereon, all acting and operated substantially as herein described and illustrated by the appended drawings.

5. The improved rotary engine substantially as herein described and illustrated by the appended drawings.

Specification, 11s. Drawings on application.

Application No. 2879.—HENRY ALONZO BUCK, of Russell Square, London, England, Engineer, "*A new method of and means for Generating Steam in Steam Engines.*"—Dated 24th February, 1900.

Claims:—

1. The hereinbefore described method of introducing water at a high temperature under pressure into the preferably heated cylinder of a steam engine, for the purpose of conversion of the water into steam in the cylinder itself.

2. The combination of an hydraulic ram and feed-pump for the purpose of automatically adjusting the feed and pressure of the water, substantially as described and shown.

3. In a steam engine working according to the general method described, the use of a measuring admission-valve for regulating the charge of water introduced into the cylinder.

4. The form of admission-valve substantially as described, and shown more particularly in Fig. 4.

5. The general combination and arrangement of parts hereinbefore described and shown in the appended drawings.

Specification, 9s. Drawings on application.

Application No. 2884.—KARL MILLER, of 291 Burdett Road, Bow, London, England, Metallurgical Chemist, "*An improved Process for Rendering Ore Friable.*"—Dated 27th February, 1900.

Claims:—

1. In a process for the disintegration of ores by chilling them when red-hot in a liquid bath, the employment of a chemical or chemicals in the said bath adapted to readily evolve free gases, by or during contact of the red-hot ore therewith, to thoroughly permeate the said ore and widen fissures therein, and thus to render it easily friable, substantially as described.

2. In a process for the disintegration of ores by chilling them when red-hot in a liquid bath, the composition of the said bath consisting of a solution of soda and caustic soda in about equal quantities to a density of 15° Beaumé with about 1½ per cent. of peroxide of hydrogen or peroxide of sodium added thereto, immediately before the introduction of the red-hot ore, substantially as described.

3. In a process for the disintegration of ores by chilling them when red-hot in a liquid bath, the composition of the said bath consisting of a solution of soda and caustic soda in about equal quantities to a density of 15° Beaumé and about 5 per cent. of permanganate of potash added thereto immediately before the introduction of the red-hot ore, substantially as described.

Specification, 5s. 6d.

Application No. 2887.—ALBERT TAYLOR, of Daisy Croft, Hipperholme, near Halifax, in the County of York, England, Engineer; WILLIE BROOKE and NEWTON BROOKE, both of Lightcliffe, near Halifax aforesaid, and ASPINALL BROOKE, of Hipperholme, aforesaid, Quarry Owners, "*Improvements in and connected with Hydraulic Presses, and in the Manufacture of Artificial Stone Slabs or the like.*"—Dated 1st March, 1900.

Claims:—

1. A hydraulic press for use in the manufacture of artificial stone slabs or the like, comprising one or more downwardly acting pressure cylinders having its ram or their rams connected at the lower end to a crosshead provided with a die for pressing the slab material into a mould and also with lifting catches adapted to engage the said mould, holding up catches connected to the stationary press head and adapted to engage with and hold up the mould when the same has been raised, and means whereby a trolley or other carrier, placed beneath the partly raised die, mould and slab can be raised with the latter and lowered together therewith the arrangement being such that after a finished slab has been raised together with the mould, die and trolley or other carrier, a downward pressure of the main ram or rams will gradually force the slab from the mould and cause it to descend together with the trolley or other carrier, substantially as described.

2. In a press of the kind herein referred to, the combination of a grooved plate or surface arranged below the main ram or rams, a perforated table adapted to reciprocate above the said plate to carry away the empty moulds and bring freshly charged moulds into pressing position, a pressing die having a grooved lower surface and a perforated plate provided upon the said grooved lower surface, means for preventing the slab material from being pressed into the perforations in the said table and plate, and means for holding the charged mould upon the table, substantially as described for the purpose specified, whether the grooves in the pressing die are provided or not with non-return flap valves for the purpose set forth.

3. Apparatus constructed, arranged, and operating substantially as hereinabove described with references to and shown in Figs. 1 to 5 inclusive of the accompanying drawings for the purpose set forth.

4. The manufacture or production of slabs or blocks of artificial stone of any form or shape from the substances and in the manner and by the means hereinbefore set forth.

Specification, 18s. Drawings on application.

Application No. 2889.—HENRY JAMES KIMMAN, of 1235 Lawndale Avenue, Chicago, Cook County, Illinois, United States of America, Machinist, "*Improvements relating to Pneumatic Riveting Apparatus.*"—Dated 6th March, 1900.

Claims:—

1. In a pneumatic riveter, a clamping device additional to the hammer and operating independently thereof; substantially as described for the purpose specified.

2. In pneumatic riveting apparatus, forming the end of the hammer into an air chamber, substantially as herein described for the purpose specified.

3. In pneumatic riveting apparatus extending the coupling sleeve to form a cylinder, the inner wall being the outside of the hammer cylinder, and a circular clamping device the latter adapted to be moved forward by the admission of air with the said cylinder, substantially as described.

Specification, 6s. 6d. Drawings on application.

R. G. FERGUSON,

Acting Registrar of Patents.

Patent Office, Perth,

23rd March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, *vide Gazette No. 12, 23rd March, 1900.*

Application No. 2862.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England. Manufacturer of Steel Die and Plate Presses, "*Improvements in Presses for Printing or Embossing.*"—Dated 19th July, 1899.

Specification, £1 8s. Drawings on application.

Application No. 2865.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in Means for Holding Paper or other Material whilst being operated upon in printing or embossing Presses.*"—Dated 20th July, 1899.

Specification, 10s. Drawings on application.

Application No. 2866.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in or relating to the Dies, or the like, and Inking Devices of Presses for Printing or Embossing.*"—Dated 20th July, 1899.

Specification, 8s. 6d. Drawings on application.

Application No. 2867.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in Presses for Printing or Embossing.*"—Dated 20th July, 1899.

Specification, £2 10s. Drawings on application.

Application No. 2877.—JOSEF LUDWIG HAWLICZEK, of Linnet Lane, Liverpool, in the County of Lancaster, United Kingdom of Great Britain and Ireland, Manufacturing Chemist, and HENRY LLOYD SNAPE, of Aberystwith College, Aberystwith, in the County of Cardigan, United Kingdom aforesaid, Doctor of Science, "*Improvements connected with Gold Extraction by the Cyanide Process.*"—Dated 22nd February, 1900.

Specification, 12s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
16th March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 11, 16th March, 1900.

Application No. 2863.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in Inking Apparatus for Printing Presses.*"—Dated 18th July, 1899.

Specification, 15s. 6d. Drawings on application.

Application No. 2864.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in means for Wiping or Removing Superfluous Ink from the Dies of Printing Presses.*"—Dated 20th July, 1899.

Specification, £1 1s. Drawings on application.

Application No. 2868.—HURRY AND SEAMAN'S PATENTS, LIMITED, of London, England (Assignee of EDWARD HENRY HURRY and HARRY JOHN SEAMAN), "*New or improved Process and Apparatus for the manufacture of Portland and other similar Cement.*"—Dated 16th February, 1900.

Specification, 16s. Drawings on application.

Application No. 2869.—HURRY AND SEAMAN'S PATENTS, LIMITED, of London, England (Assignee of EDWARD HENRY HURRY and HARRY JOHN SEAMAN), "*Improvements in Process and Apparatus for the manufacture of Portland Cement, parts of which are applicable to other purposes.*"—Dated 16th February, 1900.

Specification, £1 15s. Drawings on application.

Application No. 2870.—HURRY AND SEAMAN'S PATENTS, LIMITED, of London, England (Assignee of EDWARD HENRY HURRY and HARRY JOHN SEAMAN), "*Improvements in the Refractory Lining of Rotary Cement Furnaces and in the method of applying the same.*"—Dated 16th February, 1900.

Specification, 6s.

Application No. 2871.—JOHN COATES, of 23 Sparks Street, Ottawa, Canada, Civil Engineer (Assignee of GEORGE ROSCOE COTTRELL), "*Apparatus for Measuring and Mixing Gas and Air.*"—Dated 20th February, 1900.

Specification, 17s. 6d. Drawings on application.

Application No. 2876.—ROBERT REID, Engineer, and REGINALD LEWIS BENNETT, gentleman, both of 290A Little Collins Street, Melbourne, Victoria, "*Improvements in and connected with Punks.*"—Dated 22nd February, 1900.

Specification, 10s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
9th March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 10, 9th March, 1900.

Application No. 2684.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Benjamin Garver Lamme*), "*Improvements in Alternating Current Induction Motors.*"—Dated 16th September, 1899.

Specification, 3s. Drawings on application.

Application No. 2830.—HARRY EDWARD GRESHAM, of Manchester, England, "*Improvements in or applicable to Mechanism for actuating Brakes for Railway Wagons or Vehicles.*"—Dated 20th January, 1900.

Specification, 15s. Drawings on application.

Application No. 2833.—JOSEPH SMITH, of Salt Lake City, U.S.A., Inventor, "*Improvements in the Treatment of Gold and Silver Ores.*"—Dated 23rd January, 1900.

Specification, 10s.

Application No. 2842.—JOSEF DIETHER, Engineer, Niederlahnstein, and MAXIMILIAN MERZ, Mining Engineer, Aulendorf, Germany, "*Process for the treatment of Refractory Gold Ores.*"—Dated 30th January, 1900.

Specification, 7s. 6d.

Application No. 2855.—WILLIAM KINGSLAND, of London, England, Electrical Engineer, "*Improvements in and connected with Electrical Traction on a Sectional Conductor System.*"—Dated 9th February, 1900.

Specification, 14s. 6d. Drawings on application.

Application No. 2856.—WILLIAM KINGSLAND, of London, England, Electrical Engineer, "*Improvements in or connected with surface contact studs for Electric Traction.*"—Dated 9th February, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 2857.—MANETHO CORTES JACKSON, Manufacturer; JOHN McDONOUGH, Mining, and ARTHUR JOHN CLARK, Mining, all of Denver, Colorado, U.S.A., "*Improvements in Rock-drilling Machines.*"—Dated 10th February, 1900.

Specification, 18s. Drawings on application.

Application No. 2858.—WILLIAM JAMES DAVY, of East Finchley, England, Engineer, and CHARLES WILLIAMSON MILNE, of London, England, Gentleman, "*Improvements in Electric Arc Lamps.*"—Dated 13th February, 1900.

Specification, 14s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
2nd March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 9, 2nd March, 1900.*

Application No. 2849.—HENRY BOWEN HAIGH, of 265 McDonough Street, Brooklyn, U.S.A., President, "*Improvements in Elastic Heels for Shoes.*"—Dated 3rd February, 1900.

Specification, 6s. Drawings on application.

Application No. 2850.—WRIGHT'S TAPER-ROLLER BEARINGS SYNDICATE, LIMITED, of London, England (Assignee of WILLIAM HAMILTON WRIGHT)—"*Improvements in or relating to Roller Bearings.*"—Dated 3rd February, 1900.

Specifications, 6s. Drawings on application.

Application No. 2851.—FREDERICK WILLIAM BRAUN, of Los Angeles, California, U.S.A., Merchant Chemist (Assignee of ALBERT CHAMPLIN CALKINS), "*An improved Cupel Compressing Machine.*"—Dated 5th February, 1900.

Specification, 8s. 6d. Drawings on application.

Application No. 2852.—ALEXANDER FORIN, of Nelson, Canada, Medical Doctor, "*An improved Sash Fastener and Holder.*"—Dated 9th February, 1900.

Specification, 4s. Drawings on application.

Application No. 2853.—JOSEPH ROSS, Engineer, and WILLIAM DOUGLAS CAIRNEY, Chartered Accountant, both of Glasgow, Scotland, "*Improvements in Explosives.*"—Dated 9th February, 1900.

Specification, 3s. 6d.

Application No. 2854.—DARLING'S PATENT AUTOMATIC COUPLING, LIMITED, of Glasgow, Scotland (Assignee of JOHN DARLING and JOHN DARLING, JUNIOR), "*Improvements in automatically Coupling and Uncoupling Railway Carriages, Waggon, and other Vehicles.*"—Dated 9th February, 1900.

Specification, 8s. 6d. Drawings on application.

Application No. 2859.—DAN LICHTENBERG-MADSEN, of 31 Nødergade, Odense, in the Kingdom of Denmark, Printer, "*Improvements relating to the reproduction of Cliches, Stamps, and the like in Cellulose.*"—Dated 13th February, 1900.

Specification, 4s.

Application No. 2860.—GEORGE RENWICH ROBERTSON, of Sydney, New South Wales, Engineer, "*An improved Fastening for Hoop Irons, with which bales containing wool and other soft produce are secured.*"—Dated 13th February, 1900.

Specifications, 3s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
23rd February, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 8, 23rd February, 1900.*

Application No. 2584.—ALEXANDER JAMES SMITH, Merchant, of 11 Gladstone Place, and ALEXANDER GEORGE SMITH, Optician, 9 Forest Road, both of Aberdeen, "*Improvements in Acetylene Gas Generators.*"—Dated, 27th June, 1899.

Specification, 12s. Drawings on application.

Application No. 2689.—CHARLES BREZZO, of Menzies Hotel, Melbourne, Victoria, Professional Chef, "*An improved Refrigerator.*"—Dated 19th September, 1899.

Specification, 5s.

Application No. 2723.—DAVID GILMOUR, of Dundas Street, Trenton, Canada, Manufacturer, "*Improvements in the manufacture of Lumber.*"—Dated 10th October, 1899.

Specification, 6s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
16th February, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 7, 16th February, 1900.

Application No. 2618.—WILLIAM TAMO, JOSEPH EMBLETON, and JOHN BALLANTYNE, all of Burbanks, near Coolgardie, Western Australia, Miners, "*Improved Stage Support Bar for use in Mines.*"—Dated 28th July, 1899.

Specification, 2s. 6d. Drawings on application.

Application No. 2771.—DAVID HATT, of Broad Arrow, Western Australia, Plumber, "*An Improved Construction of Condenser for Evaporating Salt or Impure Water.*"—Dated 16th November, 1899.

Specification, 2s. 6d. Drawings on application.

Application No. 2844.—THOMAS ALVA EDISON, of Llewellyn Park, in the County of Essex and State of New Jersey, U.S.A., Inventor, "*An Improved Method of and Apparatus for Breaking Rock.*"—Dated 30th January, 1900.

Specification, 7s. Drawings on application.

Application No. 2845.—THOMAS ALVA EDISON, of Llewellyn Park, in the County of Essex and State of New Jersey, U.S.A., Inventor, "*Improvements in Elevators and Conveyors.*"—Dated 30th January, 1900.

Specification, 6s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

*Patent Office, Perth,
9th February, 1900.*

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 6, 9th February, 1900.

Application No. 2831.—CHARLES HENRY WATERMAN, of Pompton Plains, Morris County, New Jersey, United States of America, Manager, "*Process for Enamelling.*"—Dated 20th January, 1900.

Specification, 7s. Drawings on application.

Application No. 2839.—JOHN VAUGHAN SHERRIN, of 28 Victoria Street, Westminster, in the County of Middlesex, England, Electrical Engineer, "*Improvements in the Manufacture of Varnishes, Drying Oils, Enamel Paints, and Wool Washes, applicable also as Insecticides and other purposes.*"—Dated 30th January, 1900.

Specification, 8s.

Application No. 2840.—THE "N.L." SYNDICATE, LIMITED, of Finsbury House, Blomfield Street, London, England (Assignee of FRANZ GATZSCHE), "*Improvements in Floorcloth and in the method of manufacturing the same.*"—Dated 30th January, 1900.

Specification, 3s. 6d.

Application No. 2841.—THE "N.L." SYNDICATE, LIMITED, of Finsbury House, Blomfield Street, London, England (Assignee of FRANZ GATZSCHE), "*Improvements in Soles and Heels for Boots and Shoes and in the method of manufacturing the same.*"—Dated 30th January, 1900.

Specification, 3s.

Application No. 2843.—ESTHER NABLE, of Castle-reagh Street, Redfern, in the Colony of New South Wales, Married Lady, "*Improvements in Garment Pockets.*"—Dated 30th January, 1900.

Specification, 2s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

*Patent Office, Perth,
2nd February, 1900.*

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 5, 2nd February, 1900.

Application No. 2579.—HARRY PHILLIPS DAVIS, of Pittsburgh, Pennsylvania, U.S.A., Electrical Engineer; GILBERT WRIGHT, of Wilkesburg, Pennsylvania, U.S.A., Electrical Engineer, and ALEXANDER JAY WURTS, of Pittsburgh, Pennsylvania, U.S.A., Engineer, "*Improvements in Controllers for Electric Motors.*"—Dated 26th June, 1899.

Specification, 10s. Drawings on application.

Application No. 2602.—LAMBERT ALLAN MURDOCH MCKAIL, of Auburn, in the Colony of Victoria, Cashier, "*An Improved Sash-fastener.*"—Dated 18th July, 1899.

Specification, 6s. Drawings on application.

Application No. 2642.—BADISCHE ANILIN and SODA FABRIK, of Ludwigshafen-on-Rhine, German Empire (Assignee of RUDOLF KNIETSCH), "*Improvements in the Manufacture of Sulphuric Anhydride.*"—Dated 16th August, 1899.

Specification, £1 12s. Drawings on application.

Application No. 2681.—RICHARD FRANCIS MARSH, of East Maitland, New South Wales, Engineer, "*An improved Rotary Moir, to be operated by fluid pressure.*"—Dated 16th September, 1899.

Specification, 8s. Drawings on application.

Specification, 13s. Drawings on application.

Application No. 2704.—DAVID GILMOUR, of Trenton, Canada, Lumber Manufacturer, "*Improvements in the Manufacture of Lumber.*"—Dated 26th September, 1899.

Specification, 7s. Drawings on application.

Application No. 2818.—ALEXANDER IMSCHEN-ETZKY, of No. 20 Snamenskaia, St. Petersburg, Russia, Colonel, "*Improvements in and relating to the manufacture of Fire-resisting Materials.*"—Dated 12th January, 1900.

Specification, 6s. 6d.

Application No. 2819.—WILHELM SCHMIDT, of Wilhelmshöhe, near Cassel, German Empire, "*Improved Arrangement for Drying and Superheating Wet Steam.*"—Dated 12th January, 1900.

Specification, 2s. 6d. Drawings on application.

Application No. 2820.—WILHELM SCHMIDT, of Wilhelmshöhe, near Cassel, German Empire, Engineer, "*Arrangement for Regulating Superheated Steam in Compound Engines.*"—Dated 12th January, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 2821.—WILHELM SCHMIDT, of Wilhelmshöhe, near Cassel, German Empire, Engineer, "*Improvements in Compound Machines.*"—Dated 12th January, 1900.

Specification, 2s. 6d. Drawings on application.

Application No. 2822.—JAMES GALLOWAY, of 20 Leith Walk, Leith, Scotland, and WILLIAM WORK SLATER, of 13 Rutland Square, Edinburgh, Scotland, "*Improvements in Apparatus for the economical treatment of Auriferous Matters.*"—Dated 12th January, 1900.

Specification, 7s. 6d. Drawings on application.

Application No. 2823.—HENRY NIELD BICKERTON, Engineer, and HENRY WENTWORTH BRADLEY, Engineer, both of Wellington Works, Ashton-under-Lyne, Lancashire, England, "*Improvements in Oil and Gas Engines.*"—Dated 12th January, 1900.

Specification, 6s. Drawings on application.

Application No. 2824.—BERNHARD HOFFMANN, Engineer, of 1 rue Marché aux Herbes, Luxembourg (Assignee of QUINTIN MARINO), "*Improvements in the Composition of Baths for Electrolysis.*"—Dated 13th January, 1900.

Specification, 6s. 6d.

Application No. 2825.—ROBERT TINDALE, of 384 Murray Street, Perth, Modeller, "*An Improved Ventilator.*"—Dated 16th January, 1900.

Specification, 1s. Drawings on application.

Application No. 2826.—HENRY BRABY, of Ayr, Queensland, Consulting Engineer, "*Improvements in Steam Generators.*"—Dated 16th January, 1900.

Specification, 8s. Drawings on application.

Application No. 2827.—GEORGE WEBSTER, of Parramatta, New South Wales, Engineer, "*Improvements in machines for extracting gold from finely divided metalliferous materials.*"—Dated 16th January, 1900.

Specification, 6s. Drawings on application.

Application No. 2828.—HENRY JAMES KIMMAN and EDWARD NASH HURLEY, both of Chicago, Illinois, U.S.A., Manufacturers, "*Improvements in direct-acting Engines, principally for use in connection with pneumatic hammers.*"—Dated 18th January, 1900.

Specification, £1 2s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Trade Marks.

Patent Office, Trade Marks Branch,
Perth, 30th March, 1900.

IT is hereby notified that I have received the under-mentioned Applications for the Registration of Trade Marks.

Any person or persons intending to oppose any of such applications must leave particulars in writing, in duplicate (on Form F), of his or their objections thereto, within two months of the first advertisement of the applications in the Western Australian Government Gazette.

A fee of £1 is payable with such notice.

R. G. FERGUSON,
Acting Registrar of Designs and Trade Marks.
