

Supplement to Government Gazette

OF

WESTERN AUSTRALIA.

[Published by Authority.]

No. 22. }
P.O. No. 15. }

PERTH: FRIDAY, APRIL 13.

[1900.

CONTENTS:

SUBJECT.	PAGE
Complete Specifications accepted	1287
Alphabetical list of Patentees, Quarter ending 31st March, 1900	1292
Alphabetical list of Inventions for which Patents have been granted, Quarter ending 31st March, 1900	1295
Applications for Registration of Trade Marks	1297
Alphabetical list of Registrants of Trade Marks, Quarter ending 31st March, 1900	1305
Alphabetical list of Goods in respect of which Trade Marks have been registered, Quarter ending 31st March, 1900	1307

Note.—Throughout this Gazette the names in Italics within parentheses are those of Communicators of Inventions.

Complete Specifications.

Patent Office, Perth,
13th April, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 2891.—DAVID NABLE, of 80 Castlereagh Street, Redfern, in the Colony of New South Wales, Tailor, "*An improved Detachable Coat Adjustment.*"—Dated 9th March, 1900.

Claims:—

1. A coat adjustment consisting of one or more pairs of springs provided with studs, buttons, or other suitable fasteners of the nature and for the purpose herein set forth.
2. In a coat or jacket the combination and arrangement of one or more pairs of removable springs provided with studs or other catches, with a corresponding pair of stud-holes in the coat material of the nature and for the purpose herein set forth.
3. In a coat or jacket the combination and arrangement of one or more pairs of removable springs (with or without stud attachments), with the corresponding sheaths thereto secured to the material of the garment of the nature and for the purpose herein set forth.

Specification, 4s. 6d. Drawings on application.

Application No. 2892.—EDWARD SMETHURST, of 183 Hereford Street, Christchurch, New Zealand, Commission Agent, "*Improved Hanging Dropper for Wire Fencing.*"—Dated 9th March, 1900.

Claims:—

1. A hanging dropper for wire fencing constructed, arranged and operating substantially as and for the purpose herein specified and illustrated in the drawing.
2. A hanging dropper for wire fencing formed of two strips of sheet metal each bent so that in cross section it is of U shape the open side of one part fitting into the open side of the other corresponding slots being formed in both parts to receive the wires of the fence substantially as and for the purposes herein described and illustrated in the accompanying drawing.

Specification, 3s. Drawings on application.

Application No. 2894.—ARNOLD GEORGE BLACK WELL, of Wynyard (a post town), in the Colony of Tasmania, Miller, "*Improvements in Railway Car Couplings.*"—Dated 12th March, 1900.

Claims:—

1. In a railway coupling of the class set forth, the combination with a draw bar, having an eye of a hook pivoted in a bifurcation of the said draw bar, and provided with a tail a^2 , the draw bar having cheeks to which is pivoted a suspended lock bar as b , which is under forward pressure, all substantially as and for the purposes set forth.
2. In a railway coupling of the class set forth, the combination with a draw bar having eye x , pivoted hook a , and suspended lock bar b , of a cam or recessed plate as c , which is movable so as to push back, lock, or release the said lock bar, all substantially as and for the purposes set forth.
3. In a railway coupling of the class set forth, the lever d in combination with handles, spring catches, racks, and a connection to the cam or recessed plate c , whereby the said part c is movable, substantially as and for the purposes set forth.
4. In a railway coupling of the class set forth, the combination with a draw bar of the parts hereinafore referred to and designated a , a^1 , a^2 , a^3 , g , x , b , b^1 , b^2 , and c , all substantially as and for the purposes set forth.

Specification, 6s. Drawings on application.

Application No. 2895.—EDWIN ORLANDO BLACKWELL, of Wynyard, in the Colony of Tasmania, Miller, "*Improvements in Door Stops.*"—Dated 12th March, 1900.

Claims:—

1. A door stop composed of a piece of metal bent to form three main members, two of which form a compressible wedge, the third acting as a spring resisting compression of the said wedge, substantially as and for the purposes set forth.
2. In combination, in a door stop formed of a piece of metal, members forming a wedge, and having means (as roughening or projection), for gripping the door (or the door and floor), and a spring to resist the compression of the wedge substantially as for the purposes set forth.
3. As an improved article of manufacture a door stop, constructed to form a compressible wedge, having a spring to resist compression, a front and rear foot, and projections for gripping, all as herein before set forth and as illustrated.

Specification, 5s. Drawings on application.

Application No. 2896.—AUSTIN DOUGLAS GRAHAM, of Queen Street, Brisbane, in the Colony of Queensland, Solicitor (assignee of JAMES CHARLES BARNES), "*An improved Appliance for sharpening the Combs and Cutters of Machine Sheep-shears, Horse-clippers, and the like.*"—Dated 14th March, 1900.

Claims:—

1. In an improved appliance for sharpening the combs and cutters of machine sheep-shears, horse-clippers, and the like, the combination of the parts forming my parallel motion, consisting of bars such as C and C^1 , and links such as D and D^1 as herein described and illustrated by drawings.
2. The several modifications or their equivalents of the foundation plate such as A , slide such as B and pin such as E , in combination with the above claimed motion, forming my improved appliance for sharpening the combs and cutters of machine sheep-shears, horse-clippers, and the like as herein described and illustrated by drawings.

Specification, 4s. Drawings on application.

Application No. 2899.—EDWARD WATERS, of 131 William Street, Melbourne, Victoria, Patent Agent (*Charles Alfred Carles de Caudenberg*), "*A New Composition of Matter more especially adapted for use in Paving Roads, Footways, and the like.*"—Dated 20th March, 1900.

Claim:—

The manufacture and production of a new composition especially suitable for paving roads, footways and the like, and consisting of bituminous matter and rubber, combined as hereinbefore described.

Specification, 5s.

Application No. 2900.—JOHN RICHARD WALL-BANK, of Regent Street, Parkside, South Australia, Sailmaker, "*An improved Combination Cooler.*"—Dated 20th March, 1900.

Claims:—

1. A cooling chamber surmounted by a canvas water-containing tray and surrounded by a water-jacket and so constructed that a current of air is admitted to pass through the said chamber as and for the purpose described.

2. In combination a cooling chamber, having a metal wall, surmounted by a water-jacket with a porous exterior wall, and surmounted by a water-containing tray, the chamber being formed to allow access of air for ventilation, and the water-jacket being provided with a tap whereby water may be drawn for drinking purposes as described, and for the purposes set forth.

3. In combination with a cooling chamber of the kind described, a water-containing pad forming a covering to the door of the said chamber, with means for the supply of water from the tray into the said pad as and for the purposes described.

4. In a cooling appliance, the combination of the canvas outer wall with the metal top and bottom and inner wall forming a water containing jacket, said inner wall with a metal door enclosing a chamber having suitable provision for ventilation in its top and bottom, a superimposed canvas water-containing tray and the suspended door-cooling pad, all substantially as described and for the purposes set forth.

Specification, 7s. Drawings on application.

Application No. 2902.—DAVID NABLE, of 80 Castlereagh Street, Redfern, in the Colony of New South Wales, Tailor, "*An improved Apparatus for cleaning the Rails of Tramways.*"—Dated 20th March, 1900.

Claims:—

1. In an apparatus for cleaning the rails of tramways, a brush having a raised rib fitting into the flange groove of the nature and for the purposes herein set forth.

2. In an apparatus for cleaning the rails of tramways, the combination and arrangement of a scoop such as A with a brush such as herein described for the purpose herein set forth.

3. In an apparatus for cleaning the rails of tramways the combination and arrangement of a brush such as described with or without a raised rib, a scoop such as A, and a rear wheel such as H, substantially as herein described and as illustrated.

Specification, 4s. Drawings on application.

Application No. 2903.—ALBERT EARNEST MILLS, of Branhholme, in the Colony of Victoria, Mechanical Engineer, "*Improvements in Car Couplings.*"—Dated 20th March, 1900.

Claims:—

1. In a car coupling, in combination, a draw bar ending in a hook having a convex or plane inclined outer edge, the back wall of the hook recess also being a convex or plane incline, a shaft passing through said draw bar, a link *a* attached to the said shaft and having an enlarged fore end, a secondary shaft journaled in bearings attached to the car, the two shafts being connected so as to move together, a lever or the like at each side of the car attached to the secondary shaft and adapted to be secured in required positions, all substantially as and for the purposes set forth.

2. In a car coupling the combination with each end of the cars, of a series of draw bars *a*, having hooks as *b*, recess wall as *c*, jointed shaft as *e*, so connected to a parallel shaft *d*, that both shafts will move together, links as *f* secured to shaft *e*, spring as *g*, a lever or wheel as *h* or *k* at each end of shaft *d*, a projection as *j*, and a recessed plate as *m*, all substantially as and for the purposes set forth.

Specification, 8s. Drawings on application.

Application No. 2906.—CARL KUNZELMANN, of 4 Schulhausstrasse, Sickingen, in the Grand Duchy of Baden, Germany, Mechanic, "*An improved Safety Lock.*"—Dated 23rd March, 1900.

Claims:—

1. A safety lock for safes, strong rooms and the like, having several bolts operating in different directions, and which are dependent on each other, so that after the disengagement of various safety devices by the operation of an organ provided on one of the bolts the catch of the lock is engaged with the operating organs of the other bolts so that the catch can be drawn back by the handle and other devices for operating the other bolts.

2. A safety lock for safes, strong rooms and the like, having a bolt 50 operated by a key and a bolt 51, operated by a rotary or other handle which are connected to and dependent on each other so that when the safety device of the rotary handle 3 has been disengaged in the manner of Bramah locks, and the key hole in the door 1 has been set free by the handle 3, and the key after the setting free of the key hole of the casing 2, has effected the disengagement of the safety devices of the tumblers and bolts 50, by the pins A, B, the pressure of the bit of the key on a lever 88 hinged to the bolt 50, engages a movable piece 99 of the catch 90 by mechanism operated by the rotary handle 3, so that by turning the latter the withdrawal of the catch 90 can be effected when the bolts 0, 51 have been unlocked.

3. A safety lock for safes, strong rooms and the like as claimed in claim 1, having a bolt 24, attached in the casing 23 on the rotary piece, and adapted to be acted on by a cam 39 fixed to the shaft 16 of the rotary handle 3, in order to engage in the recesses 27 of the shaft 22 of the device 21 to hold the latter in the position for closing the key hole, so that when the bolt 26 is disengaged the spring 25 arranged in the shaft of the device 21, effects the removal of the latter from the key hole.

4. A safety lock for safes, strong rooms and the like, as claimed in claim 1, having a plate 24, carried in the casing 23, and closing the key hole 39 of the lock casing, which plate 24 is operated, after a spring 41 has been disengaged therefrom, in such a manner that the key hole 39 in the lock casing to allow of the insertion of the key, a pin 45 in the plate 24 securing the mechanism in the final position.

5. A safety lock for safes, strong rooms and the like as claimed in claim 1, having a sleeve 31 fixed to the shaft of the rotary handle and having at its lower side two pins 95 arranged concentrically which engage in recesses of the parts of the bolt 51, placed against each other arranged oppositely to each other the recesses 96 of one part commencing where the recesses 96 of the lower part end, so that when the rotary handle is rotated the parts of the bolt 51 diverge or converge.

6. A safety lock for safes, strong rooms and the like, as claimed in claim 1, having a double lever 88 hinged to the bolt 50 and adapted to be acted on at its end by the key, the other end turning a piece 99 movable in the catch 90 in such a manner that when the handle 3 and with it the sleeve 31 are turned, a projection 100 provided between flanges 93, 94, bears against pin 105 of the pin 99 to effect the withdrawal of the catch 90.

7. A safety lock for safes, strong rooms, and the like, as claimed in claim 1, having a disc 74 with a bevelled edge carrying the guiding pin 73 and arranged in the plate 70, on which are so arranged the safety devices for the tumblers and bolts 51, so that the pin B entering through the hole 75 of the plate 74 allows a movement of the lever 64 and the safety device 66 of the tumblers 49 and the operation of the safety devices 85 of the bolt.

8. A safety lock for safes, strong rooms and the like as claimed in claims 1 and 6 having an arm 76, fixed to the disc 74, which arm when rotated operates a safety lever 85 subjected to spring pressure so that one end of the lever sets free the bolt 51.

9. A safety lock for safes, strong rooms and the like as claimed in claim 1 having a safety device of the Bramah class for the rotary handle of the lock, in which discs are arranged on a sleeve 4 having a flange 5, and serving as guide for the shaft 5 and supporting the rotary handle by the arrangement of a bolt 19 guided in the flange 5 and engaging in a circular groove 18 of the shaft.

Specification, £1. Drawings on application.

Application No. 2908.—THOMAS EDWARD LANE, of 108 Drayton Gardens, South Kensington, Distiller; GEORGE THEODORE TEMPLE, of 109 Leadenhall Street, London, Gentleman; and JAMES McRAE, of 7 Fenchurch Avenue, London, Engineer, "*Improvements relating to Bottles for Beer, Wine, Sedimentary and other Liquids, and apparatus for use therewith.*"—Dated 27th March, 1900.

Claims:—

1. The combination of a bottle having at the upper end a perfectly closable and easily adjustable air inlet such as a screw stopper and at the lower end an outlet the interior lip of which is raised to a more or less sharp edge above the level of the interior of the bottom of the bottle so that sediment may be retained in the bottle when the liquor is drawn off through said outlet upon the removal of the means for stopping the latter and when air is admitted above the liquor in the bottle.

2. In bottles and apparatus of the class herein described, in combination, a bottle having an aperture in the bottom thereof, closed by a plug or cork; a holder adapted to clip said bottle, a striking piece or hollow plug for forcing the plug or cork into the interior of the bottle; a washer or the like upon said striking piece or hollow plug or otherwise for ensuring a tight joint between said bottle and striking piece or hollow plug of the holder; and an outlet in said holder for the purpose of the withdrawal of the contents, substantially as described and illustrated herein for the purpose set forth.

3. In bottles and apparatus of the class herein described, in combination, a bottle having an aperture in the bottom thereof closed by a plug or cork, a holder adapted to clip said bottle, a washer for ensuring a tight joint between said bottle and holder; and a stand for supporting the holder, the said stand being either rigid or rotary or formed with a prolongation upon said holder adapted to slide upon a hollow support with a spring enclosed in said hollow support and prolongation, and a rod or pillar attached to the base of the stand having a shoulder or projection engaging upon a seating formed in the hollow sleeve aforesaid the said stand having recesses for the reception of glasses or receptacles upon its base, and an outlet for carrying the liquor to the said glasses in rotation.

4. In the bottle having an outlet in its base for the purpose described, a screw cap, carrying a rotatable plug or cork, said cap being adapted to engage upon a screw thread upon the neck of the bottle substantially as described and illustrated herein for the purpose set forth.

Specification, 9s. Drawings on application.

Application No. 2909.—HENRY HERBERT HENNING, of 14 Q. D. Bank Chambers, Adelaide Street, Brisbane, in the Colony of Queensland, Electrical Engineer, "*A new or improved Automatic Pump for Pneumatic-tired Wheels.*"—Dated 27th March, 1900.

Claim:—

A single acting air pump connected to the inlet valve of the tire and having a safety valve interposed, said pump articulated to a clip fitting over the rim, a spring interposed between the top of the pump case and the end of piston rod, end of rod provided with wheel carried in cleek hinged to rod and to a stay articulated to a clip fitting over the rim, a cam secured to the frame and having a track grooved for the reception of the wheel on end of piston rod as herein described and illustrated in the accompanying drawings.

Specification, 6s. Drawings on application.

Application No. 2910.—MARTIN KOECK, Inventor, of 260 Dearborn Street, Chicago, Illinois, United States of America, "*Woven Fabric*."—Dated 27th March, 1900.

Claims:—

1. As a new article of manufacture, a fabric composed of stalks of grass twisted together and served to form a continuous strand, said strand doubled back and forth upon itself, such doubled portions being held together by interwoven binding strands or stays, as and for the purpose set forth.

2. As a new article of manufacture, a fabric, the body of which is composed of stalks of grass twisted together and spirally wrapped to form a continuous strand, said strand doubled back and forth upon itself and having interspersed throughout transverse binding stays or strands interwoven therewith, such binding strands or stays being duplicated along the edges of the fabric, as and for the purpose set forth.

3. As a new article of manufacture, a mat, the body of which is composed of stalks of grass twisted together and spirally wrapped to form a continuous strand, said strand bent or doubled back and forth upon itself, and having interwoven therewith binding strands interspersed throughout such body portion, and a selvage binding for the edges thereof, as and for the purpose set forth.

4. As a new article of manufacture, a fabric consisting of a main body portion formed of parallel layers or strands of twisted grass, each strand being encircled spirally by a thread, in combination with transverse binding threads traversing the entire body but alternately under and over adjacent parallel grass strands, as and for the purpose set forth.

Specification, 5s. 6d. Drawings on application.

Application No. 2912.—HUBERT BARTLETT DAY, of Northam, in the Colony of Western Australia, Pharmaceutical Chemist, "*An Anti-door Slammer*."—Dated 28th March, 1900.

Claims:—

1. A lever A, Rod C, spring G, and gutta percha foot or cushion H, as noted in a manner substantially as shown and described for the purpose of regulating the opening and closing of doors, or fixing them at any angle when opened.

2. The combination of the above appliances with door handles generally in use for the purpose of securing the object stated in my first claim.

Specification, 3s. 6d. Drawings on application.

Application No. 2915.—HORACE FINLAY MALCOLM, of Sydney, in the Colony of New South Wales, Watchmaker, "*An Improved Mailbag Fastener*."—Dated 31st March, 1900.

Claims:—

1. A secure mailbag fastener, requiring only a paper seal or a seal made of other material of a similar thickness, to detect if it has been tampered with in transit, and being so arranged that the seal is protected from being accidentally injured or soiled, by means of a glass or other covering of a transparent nature, substantially as and for the purpose specified, and as illustrated in the accompanying drawings.

2. The construction and arrangement of parts constituting an improved mailbag fastener, said parts being constructed and arranged substantially as and for the purpose aforesaid and as illustrated in the accompanying drawings.

Specification, 2s. 6d. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
6th April, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 14, 6th April, 1900.

Application No. 2463.—HUGH DUNLOP, of 43 Sloane Street, Summer Hill, in the Colony of New South Wales, Gentleman, "*Improvements in the method of Top-dressing for Wood Blocks for Streets, Footpaths, and the like*."—Dated 11th April, 1899.

Specification, 3s.

Application No. 2571.—THOMAS BALLANTINE, of Grant Street, South Melbourne, in the Colony of Victoria, Engineer, "*Improvements in Carriages or Perambulators for Children*."—Dated 20th June, 1898.

Specification, 9s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
30th March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 13, 30th March, 1900.

Application No. 2372.—CHARLES SCHENCK BRADLEY, Electrical Engineer, and CHARLES BORROWS JACOBS, Chemist, residing respectively at Avon, in the County of Livingston, State of New York, and at East Orange, in the County of Essex, State of New Jersey, U.S.A., "*Improvements in the process of manufacturing Soluble Salts of Barium and other Metals, and of utilizing the same in the production of Oxide of such metals, together with Hydrocarbons*."—Dated 17th January, 1899.

Specification, 12s. 6d. Drawings on application.

Application No. 2572.—JACOB BROWN and ARTHUR BROWN, both of 2 Downing Street, Manchester, Lancashire, England, Special Apparatus Manufacturers, "*Improvements in and relating to Saucepans and other Receptacles for Heating and Boiling Milk and other Liquids*."—Dated 20th June, 1899.

Specification, 3s. Drawings on application.

Application No. 2573.—WILLIAM DABB, of Croydon, Victoria, Mechanical Engineer, "*An improved Mop for Household and other purposes, having a rotatable head*."—Dated 20th June, 1899.

Specification, 6s. 6d. Drawings on application.

Application No. 2770.—CHARLES CAMPBELL, of Kelly's Basin, Macquarie, Tasmania, Carpenter, "*An improved Ballast Truck*."—Dated 16th November, 1899.

Specification, 7s. Drawings on application.

Application No. 2878.—HENRY ALONZO BUCK, of Russell Square, London, England, Engineer, "*An Improved Rotary Engine*."—Dated 24th February, 1900.

Specification, 11s. Drawings on application.

Application No. 2879.—HENRY ALONZO BUCK, of Russell Square, London, England, Engineer, "*A new method of and means for Generating Steam in Steam Engines*."—Dated 24th February, 1900.

Specification, 9s. Drawings on application.

Application No. 2884.—KARL MILLER, of 291 Burdett Road, Bow, London, England, Metallurgical Chemist, "*An improved Process for Rendering Ore Friable*."—Dated 27th February, 1900.

Specification, 5s. 6d.

Application No. 2887.—ALBERT TAYLOR, of Daisy Croft, Hipperholme, near Halifax, in the County of York, England, Engineer; WILLIE BROOKE and NEWTON BROOKE, both of Lightcliffe, near Halifax aforesaid, and ASPINALL BROOKE, of Hipperholme, aforesaid, Quarry Owners, "*Improvements in and connected with Hydraulic Presses, and in the Manufacture of Artificial Stone Slabs or the like*."—Dated 1st March, 1900.

Specification, 18s. Drawings on application.

Application No. 2889.—HENRY JAMES KIMMAN, of 1235 Lawndale Avenue, Chicago, Cook County, Illinois, United States of America, Machinist, "*Improvements relating to Pneumatic Ricting Apparatus.*"—Dated 6th March, 1900.
Specification, 6s. 6d. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
23rd March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 12, 23rd March, 1900.

Application No. 2862.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in Presses for Printing or Embossing.*"—Dated 19th July, 1899.

Specification, £1 8s. Drawings on application.

Application No. 2865.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in Means for Holding Paper or other Material whilst being operated upon in printing or embossing Presses.*"—Dated 20th July, 1899.

Specification, 10s. Drawings on application.

Application No. 2866.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in or relating to the Dies, or the like, and Inking Devices of Presses for Printing or Embossing.*"—Dated 20th July, 1899.

Specification, 8s. 6d. Drawings on application.

Application No. 2867.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in Presses for Printing or Embossing.*"—Dated 20th July, 1899.

Specification, £2 10s. Drawings on application.

Application No. 2877.—JOSEF LUDWIG HAWLICZEK, of Linnet Lane, Liverpool, in the County of Lancaster, United Kingdom of Great Britain and Ireland, Manufacturing Chemist, and HENRY LLOYD SNAPE, of Aberystwith College, Aberystwith, in the County of Cardigan, United Kingdom aforesaid, Doctor of Science, "*Improvements connected with Gold Extraction by the Cyanide Process.*"—Dated 22nd February, 1900.

Specification, 12s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
16th March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections

thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 11, 16th March, 1900.

Application No. 2863.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in Inking Apparatus for Printing Presses.*"—Dated 18th July, 1899.

Specification, 15s. 6d. Drawings on application.

Application No. 2864.—JOSEPH YARDLEY JOHNSTON, of 22 Bride Lane, London, England, Manufacturer of Steel Die and Plate Presses, "*Improvements in means for Wiping or Removing Superfluous Ink from the Dies of Printing Presses.*"—Dated 20th July, 1899.

Specification, £1 1s. Drawings on application.

Application No. 2868.—HURRY AND SEAMAN'S PATENTS, LIMITED, of London, England (Assignee of EDWARD HENRY HURRY and HARRY JOHN SEAMAN), "*New or improved Process and Apparatus for the manufacture of Portland and other similar Cement.*"—Dated 16th February, 1900.

Specification, 16s. Drawings on application.

Application No. 2869.—HURRY AND SEAMAN'S PATENTS, LIMITED, of London, England (Assignee of EDWARD HENRY HURRY and HARRY JOHN SEAMAN), "*Improvements in Process and Apparatus for the manufacture of Portland Cement, parts of which are applicable to other purposes.*"—Dated 16th February, 1900.

Specification, £1 15s. Drawings on application.

Application No. 2870.—HURRY AND SEAMAN'S PATENTS, LIMITED, of London, England (Assignee of EDWARD HENRY HURRY and HARRY JOHN SEAMAN), "*Improvements in the Refractory Lining of Rotary Cement Furnaces and in the method of applying the same.*"—Dated 16th February, 1900.

Specification, 6s.

Application No. 2871.—JOHN COATES, of 23 Sparks Street, Ottawa, Canada, Civil Engineer (Assignee of GEORGE ROSCOE COTTRELL), "*Apparatus for Measuring and Mixing Gas and Air.*"—Dated 20th February, 1900.

Specification, 17s. 6d. Drawings on application.

Application No. 2876.—ROBERT REID, Engineer, and REGINALD LEWIS BENNETT, gentleman, both of 290A Little Collins Street, Melbourne, Victoria, "*Improvements in and connected with Punks.*"—Dated 22nd February, 1900.

Specification, 10s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
9th March, 1900.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 10, 9th March, 1900.

Application No. 2684.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Benjamin Garver Lamme*), "*Improvements in Alternating Current Induction Motors.*"—Dated 16th September, 1899.

Specification, 3s. Drawings on application.

Application No. 2830.—HARRY EDWARD GRESHAM, of Manchester, England, "*Improvements in or applicable to Mechanism for actuating Brakes for Railway Wagons or Vehicles.*"—Dated 20th January, 1900.

Specification, 15s. Drawings on application.

Application No. 2833.—JOSEPH SMITH, of Salt Lake City, U.S.A., Inventor, "*Improvements in the Treatment of Gold and Silver Ores.*"—Dated 23rd January, 1900.

Specification, 10s.

Application No. 2842.—JOSEF DIETHER, Engineer, Niederlahnstein, and MAXIMILIAN MERZ, Mining Engineer, Aulendorf, Germany, "*Process for the treatment of Refractory Gold Ores.*"—Dated 30th January, 1900.

Specification, 7s. 6d.

Application No. 2855.—WILLIAM KINGSLAND, of London, England, Electrical Engineer, "*Improvements in and connected with Electrical Traction on a Sectional Conductor System.*"—Dated 9th February, 1900.

Specification, 14s. 6d. Drawings on application.

Application No. 2856.—WILLIAM KINGSLAND, of London, England, Electrical Engineer, "*Improvements in or connected with surface contact studs for Electric Traction.*"—Dated 9th February, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 2857.—MANETHO CORTES JACKSON, Manufacturer; JOHN McDONOUGH, Mining, and ARTHUR JOHN CLARK, Mining, all of Denver, Colorado, U.S.A., "*Improvements in Rock-drilling Machines.*"—Dated 10th February, 1900.

Specification, 18s. Drawings on application.

Application No. 2858.—WILLIAM JAMES DAVY, of East Finchley, England, Engineer, and CHARLES WILLIAMSON MILNE, of London, England, Gentleman, "*Improvements in Electric Arc Lamps.*"—Dated 13th February, 1900.

Specification, 14s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

*Patent Office, Perth,
2nd March, 1900.*

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 9, 2nd March, 1900.

Application No. 2849.—HENRY BOWEN HAIGH, of 265 McDonough Street, Brooklyn, U.S.A., President, "*Improvements in Elastic Heels for Shoes.*"—Dated 3rd February, 1900.

Specification, 6s. Drawings on application.

Application No. 2850.—WRIGHT'S TAPER-ROLLER BEARINGS SYNDICATE, LIMITED, of London, England (Assignee of WILLIAM HAMILTON WRIGHT)—"*Improvements in or relating to Roller Bearings.*"—Dated 3rd February, 1900.

Specifications, 6s. Drawings on application.

Application No. 2851.—FREDERICK WILLIAM BRAUN, of Los Angeles, California, U.S.A., Merchant Chemist (Assignee of ALBERT CHAMPLIN CALKINS), "*An improved Cupel Compressing Machine.*"—Dated 5th February, 1900.

Specification, 8s. 6d. Drawings on application.

Application No. 2852.—ALEXANDER FORIN, of Nelson, Canada, Medical Doctor, "*An improved Sash Fastener and Holder.*"—Dated 9th February, 1900.

Specification, 4s. Drawings on application.

Application No. 2853.—JOSEPH ROSS, Engineer, and WILLIAM DOUGLAS CAIRNEY, Chartered Accountant, both of Glasgow, Scotland, "*Improvements in Explosives.*"—Dated 9th February, 1900.

Specification, 3s. 6d.

Application No. 2854.—DARLING'S PATENT AUTOMATIC COUPLING, LIMITED, of Glasgow, Scotland (Assignee of JOHN DARLING and JOHN DARLING, JUNIOR), "*Improvements in automatically Coupling and Uncoupling Railway Carriages, Waggon, and other Vehicles.*"—Dated 9th February, 1900.

Specification, 8s. 6d. Drawings on application.

Application No. 2859.—DAN LICHTENBERG-MADSEN, of 31 Nedergade, Odense, in the Kingdom of Denmark, Printer, "*Improvements relating to the reproduction of Cliches, Stamps, and the like in Cellulose.*"—Dated 13th February, 1900.

Specification, 4s.

Application No. 2860.—GEORGE RENWICH ROBERTSON, of Sydney, New South Wales, Engineer, "*An improved Fastening for Hoop Irons, with which bales containing wool and other soft produce are secured.*"—Dated 13th February, 1900.

Specifications, 3s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

*Patent Office, Perth,
23rd February, 1900.*

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 8, 23rd February, 1900.

Application No. 2584.—ALEXANDER JAMES SMITH, Merchant, of 11 Gladstone Place, and ALEXANDER GEORGE SMITH, Optician, 9 Forest Road, both of Aberdeen, "*Improvements in Acetylene Gas Generators.*"—Dated 27th June, 1899.

Specification, 12s. Drawings on application.

Application No. 2689.—CHARLES BREZZO, of Menzies Hotel, Melbourne, Victoria, Professional Chef, “*An improved Refrigerator.*”—Dated 19th September, 1899.
Specification, 5s.

Application No. 2723.—DAVID GILMOUR, of Dundas Street, Trenton, Canada, Manufacturer, “*Improvements in the manufacture of Lumber.*”—Dated 10th October, 1899.
Specification, 6s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Patent Office, Perth,
16th February, 1900.

NOTICE is hereby given that the undermentioned applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 7, 16th February, 1900.

Application No. 2618.—WILLIAM TAMO, JOSEPH EMBLETON, and JOHN BALLANTYNE, all of Burbanks, near Coolgardie, Western Australia, Miners, “*Improved Stage Support Bar for use in Mines.*”—Dated 28th July, 1899.
Specification, 2s. 6d. Drawings on application.

Application No. 2771.—DAVID HATT, of Broad Arrow, Western Australia, Plumber, “*An Improved Construction of Condenser for Evaporating Salt or Impure Water.*”—Dated 16th November, 1899.
Specification, 2s. 6d. Drawings on application.

Application No. 2844.—THOMAS ALVA EDISON, of Llewellyn Park, in the County of Essex and State of New Jersey, U.S.A., Inventor, “*An Improved Method of and Apparatus for Breaking Rock.*”—Dated 30th January, 1900.
Specification, 7s. Drawings on application.

Application No. 2845.—THOMAS ALVA EDISON, of Llewellyn Park, in the County of Essex and State of New Jersey, U.S.A., Inventor, “*Improvements in Elevators and Conveyors.*”—Dated 30th January, 1900.
Specification, 6s. Drawings on application.

R. G. FERGUSON,
Acting Registrar of Patents.

Index of Patentees.

Trade Marks.

Patent Office, Trade Marks Branch,
Perth, 13th April, 1900.

IT is hereby notified that I have received the under-mentioned Applications for the Registration of Trade Marks.

Any person or persons intending to oppose any of such applications must leave particulars in writing, in duplicate (on Form F), of his or their objections thereto, within two months of the first advertisement of the applications in the Western Australian Government Gazette.

A fee of £1 is payable with such notice.

R. G. FERGUSON,
Acting Registrar of Designs and Trade Marks.

Application No. 1840, dated 6th February, 1900.—ABEL MORRALL, LIMITED, of Clive Works, Redditch, in England, Needle Manufacturers, to register in Class 13, in respect of Needles, Pins, Hair-pins, and other articles known in the soft goods trade as “Small Wares,” a Trade Mark, of which the following is a representation :—

This Mark was first advertised in the Western Australian Government Gazette of the 16th February, 1900—vide notice at head of Trade Mark advertisements.

Application No. 1841, dated 6th February, 1900.—ABEL MORRALL, LIMITED, of Clive Works, Redditch, in England, Needle Manufacturers, to register in Class 13, in respect of Needles, Pins, Hair-pins, and other articles known in the soft goods trade as “Small Wares,” a Trade Mark, of which the following is a representation :—

This Mark was first advertised in the Western Australian Government Gazette of the 16th February, 1900—vide notice at head of Trade Mark advertisements.

Application No. 1842, dated 6th February, 1900.—T. C. WILLIAMS COMPANY, of Richmond, Virginia, United States of America, Tobacco Manufacturers, to register in Class 45, in respect of Manufactured Tobacco, a Trade Mark, of which the following is a representation :—

The said Trade Mark having been used by the applicants and their predecessors in business in respect of the article mentioned for fifteen years before the 1st day of January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of the 16th February, 1900—vide notice at head of Trade Mark advertisements.

Application No. 1843, dated 6th February, 1900.—T. C. WILLIAMS COMPANY, of Richmond, Virginia, United States of America, Tobacco Manufacturers, to register in Class 45, in respect of Manufactured Tobacco, a Trade Mark, of which the following is a representation :—

GOLDEN EAGLE.

This Mark was first advertised in the Western Australian *Government Gazette* of the 16th February, 1900—*vide* notice at head of Trade Mark advertisements.

Application No. 1844, dated 6th February, 1900.—T. C. WILLIAMS COMPANY, of Richmond, Virginia, United States of America, Tobacco Manufacturers, to register in Class 45, in respect of Manufactured Tobacco, a Trade Mark, of which the following is a representation :—

The said Trade Mark having been used by the applicants and their predecessors in business in respect of the article mentioned for 15 years before the 1st day of January, 1885.
