#### Complete Specifications.

Patent Office, Perth, 15th February, 1901.

OTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 3255 .- EDWIN CLAYTON POHLE, 2521 Vine Street, Denver, U.S.A., Assayer, and STUART CROASDALE, 1574 York Street, Deuver, U.S.A., Chemist, "Process for the Reduction of Refractory Ores."—Dated 3rd January, 1901.

- Claims:—

  1. The process which consists in effecting a mixture containing the ore, sulphur and a haloid of an alkaline or alkaline earth metal, the relative proportions of the materials being substantially those quantitatively requisite to produce, when heated in the presence of oxygen, a haloid of the metal or metals to be extracted from the ore and a sulphate of the alkaline or alkaline earth metal; subjecting the mixture to an oxidising roast with agitation at a temperature sufficient to effect the reaction mentioned; and volatilising and recovering the metal values as haloids or oxyhaloids, substantially as described.
- alloids or oxylahoids, substantially as described.

  2. The process which consists in preparing a charge containing the ore, sulphur and a chloride of an alkaline or alkaline carth metal, the relative proportions of the materials being substantially those quantitatively requisite to produce, when heated in the presence of oxygen, a chloride of the netal or metals to be extracted from the ore, and a sulphate of the alkaline or alkaline earth metals; subjecting the charge to an oxidising roast with agitation at a temperature sufficient to effect the re-action mentioned; and volatilising and recovering the metal values as chlorides or oxychlorides, substantially as described.

  3. The process which consists in preparing a charge containing the ore, sulphur and a chloride or an alkaline or alkaline carth metal, the relatively requisite to produce, when heated in the presence of oxygen, a chloride of the metal or metals to be extracted from the ore and a sulphate of the alkaline or alkaline carth metal; subjecting the mixture to an oxidising roast with agitation at a temperature sufficient to effect the reaction mentioned; and volatilising and recovering the metallic values as chlorides and oxychlorides from the funes liberated by subjecting them to the action of water, substantially as described.

  4. The process which consists in preparing a charge containing the
- 4. The process which consists in preparing a charge containing the ore, sulphur and a chloride of an alkaline or alkaline earth metal, the relative proportions of the materials being substantially those quantitatively requisite to produce, when heated in the presence of oxygen, a chloride of the metal or metals to be extracted from the ore and a sulphate of the alkaline or alkaline earth metal; subjecting the mixture to an oxidising roast with agitation at a temperature sufficient to effect the reaction mentioned; and volatilising and recovering the metallic values as chlorides or oxychlorides from the funes liberated by subjecting them to filtration and to the action of water, substantially as decribed.

5. The process which consists in preparing a charge containing the ore, sulphur, and a chloride of an alkaline or alkaline earth metal, the relative proportions of the materials being substantially those quantitatively requisite to produce, when heated in the presence of oxygen, a chloride of the metal or metals to be extracted from the ore and a sulphate of the alkaline or alkaline earth metal; subjecting the mixture to an oxidising roast with agitation at a temperature above 900 degrees Centigrade; and volatilising and recovering the metallic values as chlorides and oxychlorides from the fumes liberated, substantially as described.

Specification, 7s. 6d.

Application No. 3258.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (Frank Clarence Newell), "Improvements relating to Electric Railways."—Dated 3rd January, 1901.

- 1. In an electro-magnetic brake apparatus, a brake magnet provided with a plurality of coils whereby the magnetic force and braking force may be varied by varying the effectiveness of one or more coils.
- 2. An electro-magnetic brake apparatus provided with a plurality of shoes and a plurality of coils which coils possess different numbers of turns, so that they will saturate the shoes at different current strengths whereby the number of shoes which are effectively operative varies according to the current.
- 3. In a brake apparatus, the combination of a magnetic brake shoe with a brake shoe adapted to be mechanically applied, and a connection between them whereby the magnetic brake shoe may by its movement apply the other one.
- 4. A magnetic track brake device having shoes adapted to bear on a track rail and a flexible connection between them to enable the shoes to conform to irregularities in the rail.
- 5. The method of heating electric cars by connecting electric heaters in the local braking circuit to which current is supplied by the motor when driven as a generator by the momentum of the cars.
- 6. In an electric heating system for cars, the combination with an electrical generator on the car, which is adapted to be operated by the momentum of the car, of a local braking circuit to which current is supplied by the generator and an electric heater within the car which is connected with the local braking circuit so as to receive current from the generator. the generator.
- The several forms of brake apparatus constructed and operating substantially as hereinbefore described with reference to the accom-panying drawings.
- The various improvements in electric heating apparatus sub-stantially as hereinbefore described with reference to the accompanying

Specification, £15s. Drawings on application.

Application No. 3271.—Ernest Rowland Hill, of 814 Maple Avenue, Wilkinsburg, Allegheny, Pennsylvania, United States of America, Electrical Engineer, "Improvements in control-ling Mechanism especially applicable for use with Pumps."—Dated 16th January, 1901.

1. For making and breaking an electric circuit, a pneumatically operated electric switch, the operation of which is controlled by electro-magnetic means governed by another switch which is operated in accordance with the degree of air pressure in an air reservoir, substantially as described.

- An electro-pneumatic system in which a number of electrically-driven pumps and corresponding interconnected air reservoirs are provided, each pump motor having a switching device so arranged that the operation of any switch in one direction will cause all the pumps teat working and that the stoppage of the pumps will not occur until the last one of the switches has been operated in the opposite direction substantially as and for the purpose specified.
   A pneumatically operated switch in which lost motion occurs between the movable member of the switch and the operating piston, so that the switch is not operated until the piston has not completed its stroke in either direction substantially as described.
   For making and breaking an electric circuit a switching device constructed and operated as described and shown in Figure 1 of the accompanying drawings.
   A system for controlling the operation of a plurality of air pumps in accordance with the air pressure as described with reference to Figure 2 of the accompanying drawings.
   Specification, 7s. Drawings on application.

Specification, 7s. Drawings on application.

Application No. 3273.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (Cyrus Robinson), "Improvements in Oil Pumping Apparatus."—Dated 16th January,

- 1. In a lubricating pump for steam engines, means located in the pipe or passage leading from the oil reservoir to the parts requiring lubrication for affording a visible indication of the flow of oil, substantially as
- cescribed.

  2. A lubricating pump having an adjustable connection between the pump piston and its operating means so that the length of the piston stroke may be varied, for the purpose specified.

  3. A lubricating pump having means for providing more or less lost motion between its piston and the operating mechanism therefor, for the purpose specified.

  4. For steam engines, a lubricating pump constructed and operating substantially as described with reference to the accompanying drawings.

Specifications, 4s. 6d. Drawings on application.

Application No. 3274.—RICHARD SPARROW, of Western Australia, Licensed Patents Agent (Frank Clarence Newell) "Improvements in Electric Brake Mechanism."—Dated 16th January, 1901.

- 1. An electric brake mechanism having a magnetic rail shoe and wheel shoes applied by longitudinal movement of the rail shoe relatively to the car, part of the connection between the rail shoe and wheel shoes being formed of non-magnetic material for the purpose
- 2. In an electric brake mechanism a magnetic rail-shoe suspended directly by a yielding connection such as a tension spring and adapted to move freely in a direction transverse to the track, substantially as described.
- 3. In a brake mechanism of the kind described the extensible or telescopic thrust-rod connection between the rail-shoe and wheel-shoe substantially as described.
- 4. In a car brake apparatus a direct connection between the levers operating the brake-shoes so that when the lever of either brake-shoe is operated pressure is transmitted directly from said lever to the other brake-shoe, substantially as described.
- $5.\,$  An electric brake mechanism constructed and operating substantially as described and shown in the accompanying drawings.

Specification, 4s. Drawings on application.

Application No. 3276.—John Sketchley Morton. of 121 Lake Street, Oakland, Alameda, California, United States of America, Gentleman, "Improvements in Pumps."—Dated 19th January, 1901.

- 1. A pump comprising a casing, a rotatable helix therein and a plate located concentrically in said casing abutting the helix adapted to form with the casing and between them a discharge opening.

  2. A pump comprising a helical runner within a suitable casing, a plate concentric therewith, occupying less than the full area of the casing and a plate longitudinally disposed within the casing adapted to stop the rotary motion of the water within the casing.
- 3. A pump comprising a series of helical runners secured upon a rotatable shaft in combination with a substantially similar series of reversely formed helical runners, each element of each series being separated from its adjacent element and being provided with a plate upon one of its faces of less than its own diameter and means adapted to prevent the rotation of the fluid between the adjacent elements of each series of runners.
- 4. A pump comprising a series of helical runners of uniform diameters secured upon a rotatable shaft in combination with a substantially similar series of reversely formed helical runners, each element of each series being separated from its adjacent element and being provided with a plate upon one of its faces of less than its own diameter and means adapted to prevent the rotation of the study between the adjacent elements of each series of runners.

  5. A numn adjusted to provel passels comprising a rotatable helic
- 5. A prump adapted to propel vessels comprising a rotatable helix within a easing located within the hull of a vessel, said casing provided with a discharge pipe and a supply pipe which communicate with the water of flotation and which point in substantially the same direction.
- 6. A pump adapted to propel vessels comprising a rotable helix within a easing located within the hull of a vessel, said easing provided with a discharge pipe and a supply pipe which communicate with the water of flotation, the supply pipe surrounding the discharge pipe at the point of communication with the water of flotation.

Specification, 9s. Drawings on application.

Application No. 3277.—WILLIAM H. SMYTH, of Berkeley, Alameda, California, United States of America, Mechanical Engineer, "Improvements in Mechanical Stokers."—Dated 19th January, 1901.

### Claims :-

- 1. A mechanical stoker comprising a rotating horizontal device having radiating blades within a casing and a deflecting plate in the path of the fuel thrown by the blades, adapted by its oscillation to distribute the material to a greater or less distance.
- 2. A mechanical stoker comprising a rotating horizontal device within a casing and a deflecting plate in the path of the material thrown by the rotating device adapted by its oscillation to deflect said material at various angles, and a feed hopper provided with breaking rolls.
- 3. A mechanical stoker comprising a rope-driven rotating fuel-throwing horizontal device with means for holding the rope out of working contact therewith, a plate in the path of the material thrown adapted by its movement to distribute the material, a feed device provided with breaking rolls and driving connection engaging with the rotating device to effect the motion of the moving parts.
- 4. A mechanical stoker comprising a rotating fuel-throwing hori zontal device having a grooved rope pulley and a spring actuated pressure pulley adapted to bear upon the rope travelling in contact with the grooved rope pulley and means adapted to engage with said pressure device to hold it out of working contact and a deflecting plate in the path of the material thrown adapted to distribute the material.

Specification, 7s. 6d. Drawings on application.

#### MALCOLM A. C. FRASER,

Registrar of Patents.

Patent Office, Perth, Sth February, 1901.

OTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 6, 8th February, 1901.

Application No. 3262.—Robert Aikins, of Dean Street, Albury, New South Wales, Secretary, "An improved Cooling Case or Chamber for Perishable Goods."—Dated 8th January, 1901. Specification, 3s. Drawings on application.

Application No. 3263.—Philip Diehl, of Elizabethport, New Jersey, United States of America, Inventor, "Improvements in Sewing Machines."-Dated 11th January, 1901.

Specification, £2. Drawings on application.

Application No. 3264. — FREDERICK FARGO CHURCH, of Rochester, New York, U.S.A., Lawyer (Alfred J. Gillespie), "Improvements in Voting Machines."—Dated 11th January, 1901.

Specification, £6 12s. Drawings on application.

Application No. 3265.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (Frank Clarence Newell), "Improvements in Electric Brakes."—Dated 11th January, 1901.

Specification, 11s. Drawings on application.

Application No. 3266.—WILLIAM McLAREN, of Moorfields, London, England, Manufacturer, and John Ronald Gree, of Oxenholme, Westmoreland, England, Railway Carriage Builder, "Improvements in and applicable to railway carriages, steamships, and the like."— Dated 11th January 1991 seat backs convertible into sleeping berths Dated 11th January, 1901.

Specification, 5s. Drawings on application.

Application No. 3267. — Charles Algernon Parsons, of Newcastle-on-Tyne, Northumberland, England, "Improvements in and relating to Screw Propellers."—Dated 12th January, 1901. Specification, 7s. 6d. Drawings on application.

Application No. 3268.—Ada DeBaun, wife of John DeBaun, of Perth, Western Australia, Licensed Victualler, "A Coin Freed Marking Board for registering the scores and checking the takings at Billiards and other Analogous Games.' —Dated 15th January, 1901.

Specification, 7s. 6d. Drawings on application.

#### MALCOLM A. C. FRASER,

Registrar of Patents.

Patent Office, Perth, 1st February, 1901.

OTICE is hereby given that the undermentioned applications for the Grant of Letters Patent. and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 5, 1st February, 1901.

Application No. 3228. — WILLIAM EDWARD Clifton, of St. George's Terrace, Perth, Western Australia, Accountant (Gustav Adolph Wayss), "Improvements in reinforced concrete construction."—Dated 14th December, 1900.

Specification, 6s. Drawings on application.

Application No. 3230. -RICHARD SPARROW, of Perth, Western Australia, Licensed Patent (The Ampere Electro-Chemical Company), "Improvements in process for the production of Camphor."—Dated 14th December, 1900.

Specification, 5s.

Application No. 3231 .-- Joseph Samuel Beeman, of 182 Earl's Court Road, London, England, Engineer, "Improvements in or relating to Machinery for applying Tips to Cigarettes."—Dated 14th December, 1900.

Specification, £1 13s. Drawings on application.

Application No. 3233.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (Frank Clarence Newell), "Improvements in Electric Brakes."—Dated 21st December, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 3234.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent provements in Electric Brake Shoes."—Dated 21st December, 1900.

Specification, 2s. 6d. Drawings on application.

Application No. 3235.—RICHARD SPARROW, of Western Australia, Licensed Patent Agent (Frank Clarence Newell), "Improvements in Automatic Regulators for Electric Brakes."-Dated 21st December, 1900.

Specification, 3s. Drawings on application,

Application No. 3236.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (Cyrus Robinson), "Improvements in Fluid-pressure Engines."—Dated 21st December, 1900.

Specification, 7s. Drawings on application.

oplication No. 3237.—Arthur Constant Aucher, of McDonnell Street, Toowong, 3237.—Arthur Application Queensland, Bachelor of Arts, "An improved Corkscrew."—Dated 27th December, 1900.

Specification, 2s. Drawings on application.

pplication No. 3238.—ARTHUR CONSTANT AUCHER, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "An Improved Application Vaporised Oil Burner for heating purposes."— Dated 27th December, 1900.

Specification, 3s. Drawings on application.

3239.—Arthur Application | No. Constant Aucher, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "Improvements in Automatic Gas Igniters."—Dated 27th December, 1900.

Specification, 4s. Drawings on application.

Application 3240.—Arthur Constant No. Aucher, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "Improved means for Electrically Igniting Oil or Gas Burners."— Dated 27th December, 1900.

Specification, 4s, 6d. Drawings on application.

Application No. 3241. — ARTHUR CONSTANT AUCHER, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "Improvements in or relating to Gas Lighting."—Dated 27th December, 1900.

Specification, 3s. 6d. Drawings on application.

Application No. 3243.—John Long, of Springfield, Ohio, United States of America, Machinist, "An improved Mechanic's Bench Vise."—Dated 27th December, 1900.

Specification, 4s. Drawings on application.

Application No. 3245.—Andrew Jackson Beard, of East Lake, United States of America, Farmer, "Car Coupler."—Dated 27th December, 1900.

Specification, 8s. Drawings on application.

Application No. 3246.—Abel Godefroy Pellenc, of 32 Rue de l'Orillon, Paris, France, Tinsmith, "Improvements in means for closing preserve tins or boxes and the like."—Dated 27th December, 1900.

Specification, 5s. Drawings on application.

Application No. 3247.—EDWARD WATERS, jun., of 131 William Street, Melbourne, Victoria, Patent Agent (The Linotype Company, Limited), "Improvements in Linotype Machines."—Dated 27th December, 1900.

Specification, £5. Drawings on application.

Application No. 3248.—Edward Waters, jun., of 131 William Street, Melbourne, Victoria, Patent Agent (The Linotype Company, Limited), "Improvements in the Mould of Linotype Machines."—Dated 27th December, 1900.

Specification, 7s. Drawings on application.

Application No. 3249.—EDWARD WATERS, jun., of 131 William Street, Melbourne, Victoria, Patent Agent (The Linotype Company, Limited), "Improvements in the Matrices of Linotype Machines and in apparatus for applying the said improvements thereto."—Dated 27th December, 1900.

Specification, 15s. Drawings on application,

Application No. 3252.—George Renner, Journalist, and William Henry Boyens, Mechanical Engineer, both of Kaikoura, South Marlborough, New Zealand, "An improved Apparatus for Branding Animals and Packages."—Dated 2nd January, 1901.

Specifications, 3s. Drawings on application.

Application No. 3257.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (Frank Clarence Newell), "Improvements in Electric Brakes."—Dated 3rd January, 1901.

Specifications, 12s. Drawings on application.

Application No. 3259.—The Concentrated Beer Company, Limited, of 28 Bush Lane, Cannon Street, London, England (Assignee of Herbert Amos Hobson), "Improvements in and connected with the Production of Beer and other Beverages, and of Alimentary Substances."—Dated 3rd January, 1901.

Specifications, 9s. 6d.

Application No. 3260.—Bethlehem Steel Company, of South Bethlehem, Pennsylvania, United States of America (Assignee of Frederick Winslow Taylor), "Metal Cutting Tool, and method of making and treating the same."—Dated 3rd January, 1901.

Specification, 18s.

Application No. 3261.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (Francis Ludlow Clark), "Improvements in Electro-magnetic Brakes."—Dated 3rd January, 1901.

Specification, 9s. Drawings on application.

MALCOLM A. C. FRASER, Registrar of Patents.

> Patent Office, Perth, 25th January, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 4, 25th J. muary, 1901.

Application No. 2939.—August Gürber, of Würzburg, Bavaria, Germany, "An improved process for Producing Condensed Milk."-- Dated 28th April, 1900.

Specification, 6s. 6d. Drawings on application.

Application No. 2995.—Augustine John Madden, of 187 Little Collins Street, Melbourne, Victoria, Metal Worker, "Improved automatically Cleansing Filter."—Dated 12th June, 1900.

Specifications, 14s. Drawings on application.

Application No. 3134.—John Darling, of Gallowflats, Rutherglen, Lanark, North Britain, Engineer, "Improvements in and connected with the Windows of Railway Carriages, Cabs, Omnibuses, Ships, and such like."—Dated 9th October, 1900.

Specifications, 2s. 6d. Drawings on application.

MALCOLM A. C. FRASER, Registrar of Patents. Patent Office, Ferth, 18th January, 1901.

OTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 3, 18th January, 1901.

Application No. 3212.—John Collins Clancy, Analytical Chemist and Metallurgist, and Luke Wagstaff Marsland, Solicitor, both of Martin Place, Sydney, New South Wales, "An improved process for the Elimination of Zinc from sulphide ores, and the extraction and recovery of lead, silver, gold, and other metals therefrom, and from other sulphide ores."—Dated 4th December, 1900.

Specifications, 12s. Drawings on application.

Application No. 3217.--Francis James Odling, of No. 3 Queen's Mansions, Beaconsfield Parade, St. Kilda, in the Colony of Victoria, Mining Engineer, and William Jamieson, of Broken Hill Chambers, 31 Queen Street, Melbourne, Victoria, Gentleman, "An improved Apparatus for the Separation of the Magnetically Attractible Mineral or Particles from Pulverised Ores."—Dated 5th December, 1900.

Specification, 12s. Drawings on application.

Application No. 3223.—W. D. and H. O. Wills, Limited, of Ashton Gate, Bristol, England, Manufacturers of Tobacco, Cigarettes, Cigars, and Snuff (assignee of Henry Rankin and Henry Herbert Wills), "Apparatus for Filling Cases with Cigarettes."—Dated 11th December, 1900.

Specifications, £1 10s. Drawings on application.

Application No. 3226. — WILLIAM NEPEAN HUTCHISON, Commercial Traveller, of Sydney; HENRY SCOTT HARDEN, Solicitor, of Sydney, and HUGH COLLEY, Dairy Farmer, of Kiama, all in the Colony of New South Wales, "An Improved Garbage and Night-soil Cart."—Dated 11th December, 1900.

Specification, 4s. Drawings on application.

Application No. 3227.—ARTHUR HENRY BENNETT of 44 Swan Street, Richmond, in the Colony of Victoria, Gasfitter, and Stephen Jones, of 51 Athol Street, Moonee Ponds, in the Colony of Victoria, Gasfitter, "A system of automatically Lighting Gas Burners and Novel Apparatus for use therein."—Dated 11th December, 1900.

Specification, 13s. Drawings on application.

### MALCOLM A. C. FRASER,

Registrar of Patents.

Patent Office, Perth, 11th January, 1901.

OTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 2, 11th January, 1901.

Application No. 3203.—WILLIAM MCARTHUR STEWART, of Unwin's Bridge Road, St. Peters, near Sydney, New South Wales, Manufacturer, "Improvements in Incubators."—Dated 27th December, 1900.

Specifications, 3s. 6d. Drawings on application.

Application No. 3205.—Edward Waters, jun., a member of the firm of Edward Waters & Son, of No. 131 William Street, Melbourne, Victoria, Patent Agent (Frank Lemont Dodgson), "Improvements in Railway Switches and Semaphore Apparatus."—Dated 20th November, 1900.

Specifications, £3 2s. 6d. Drawings on application.

Application No. 3211. — Thomas Daniells Merton, of Spottiswoode, near Melbourne, Victoria, Metallurgist, "An Improved Oreroasting Furnace."—Dated 4th December, 1900. Specifications, 6s. Drawings on application.

Application No. 3215.—Marconi's Wireless Telegraph Company, Limited, of 18 Finch Lane, Threadneedle Street, London, England (Assignee of Guglielmo Marconi), "Improvements in Apparatus for Wireless Telegraphy."
—Dated 4th December, 1900.

Specifications, 16s. Drawings on application.

Application No. 3219.—Joseph Samuel Beeman, Engineer, of 182 Earl's Court Road, London, England, "Improvements in or relating to Automatic Feed Apparatus."—Dated 6th December, 1900.

Specifications, 5s. 6d. Drawings on application.

Application No. 3221.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (William Andrew Bole), "Improvements in Gasifiers for Internal Combustion Engines."— Dated 6th December, 1900.

Specification 5s. Drawings on application.

Application No. 3225.—RICHARD FREDERICK BRADSHAW and WILLIAM EDWARD HARDING, both of Boulder, Western Australia, Engineer and Engine Driver respectively, "The Bradshaw-Harding' High Pressure Tap for Filter Presses and other purposes."—Dated 11th December, 1900.

Specifications, 2s. 6d. Drawings on application.

#### MALCOLM A. C. FRASER,

Registrar of Patents.

Paient Office, Perth, 4th January, 1901.

OTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections

thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 1, 4th January, 1901.

Application No. 3199.—RICHARD SPARROW, of Perth, Western Australia, Patent Agent (Herbert Samuel Elworthy), "An improved process for the Manufacture of Carbonic Acid, and apparatus therefor."—Dated 20th November, 1900.

Specification, £13s. Drawing on application.

Application No. 3201.—Thomas Rowland Jordan, of 47 West 42nd Street, New York, United States of America, Mining Engineer, "Improvements in and relating to Amalgamating Apparatus."—Dated 20th November, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 3202.—Thomas Rowland Jordan, of 47 West 42nd Street, New York, United States of America, Mining Engineer, "Improvements in and relating to Crushing Machines."—Dated 20th November, 1900.

Specifications, 4s. 6d. Drawings on application,

Application No. 3204.—Hugh Victor McKay, of Yuille Street, Ballarat, Victoria, Machinery Merchant, "Improvements in Stripper Harvesters." —Dated 20th November, 1900.

Specification, £1. Drawings on application.

Application No. 3209.— ASKIN MORRISON NICHOLAS, of Peak Hill, Western Australia, Mining Manager, "An improved Rotating Filtering Apparatus, principally for the Separation of Gold and Silver-bearing Solutions from Slimes and the like."—Dated 24th November, 1900.

Specification, 6s. Drawings on application.

Application No. 3210.—ELECTRIC LIGHTING BOARDS, LIMITED, of 7 Pall Mall, Loudon, England, Manufacturers (Assignee of Ernest Greil and Emile Audiger), "Improvements in Contact Appliances for Electric Glow Lamps."—Dated 29th November, 1900.

Specification, 6s. Drawings on application.

### MALCOLM A. C. FRASER,

Registrar of Patents.

Patent Office, Perth, 28th December, 1900.

OTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 52, 28th December, 1900.

Application No. 3198.—Reeves Patent Filters Company, Limited, of 9 Fenchurch Avenue, London, England, Manufacturers (Assignee of Wilfred Reeves), "Improvements in Filters for Liquids."—Dated 20th November, 1900.

Specification, 4s. Drawings on application.

Specifications, 9s. 6d, Drawings on application.

### MALCOLM A. C. FRASER,

Registrar of Patents.

### Notice of Application for Amendment.

IN the matter of Application for Letters Patent, No. 3211, dated 27th November, 1900, by Thomas Daniells Merton, the Spottiswoode Refinery and Metallurgical Works, Spottiswoode, near Melbourne, in the State of Victoria, Metallurgist, for an invention for "An improved Ore Roasting Furnace."

Notice is hereby given that the above Thomas Daniells Merton has applied for leave to amend the complete specification of his invention, alleging as his reasons for so doing "that through an oversight he has not described how the revolving finishing cylinder G discharges its contents."

The amendments proposed are as follows, viz.:—
[Reference being had to amended copy of specification and drawings lodged in Patent Office, Perth.]

### Page 3, line 33.

After the words "finishing cylinder G" insert the words "whence it will be delivered through a discharge opening "g which can be automatically opened when approaching "the lower part of its travel by the withdrawal of a slide or "valve g¹, operated by a curved guideway g²."

"A single coupling device or connection may be provided for the purpose of disconnecting the slide or valve
so that it will not be operated by the curved guideway
g² at each revolution, but will remain shut until it is
desired to again start discharging the contents of the
cylinder, or said guide can be moved back out of the path
of the valve spindle to effect this object."

Any person or persons intending to oppose the said application for amendment must leave particulars, in writing (on Form G), of his or their objections thereto, within one calendar month from the date hereof. A fee of Ten shillings (10s.) is payable with such notice.

Dated this 1st day of February, 1901.

#### MALCOLM A. C. FRASER,

Registrar of Patents.

Trade Marks.

Patent Office, Trade Marks Branch, Perth, 15th February, 1901.

Patent Office, Trade Marks Branch, Perth, 1st February, 1901.

Re Application No. 2056, Henry Clay and Bock & Co., Limited.

NOTICE is hereby given that the statement of goods in respect of which the above-mentioned application for the registration of a Trade Mark was filed at this Office on the 24th of November, 1900, and advertised in the Patent Supplement to the Government Gazette of 11th of January, 1901, has been amended to read "Cigars and Cigarettes" in place of "Manufactured Tobacco."

MALCOLM A. C. FRASER, Registrar of Designs and Trade Marks.
