SUBJECT.	PAGE	SUBJECT.	PAGE
Complete Specifications accepted	1045	Alphabetical list of Inventions for which Patents have been granted	1052
Applications for Patents	1050	Notices of Application for Amendment	1053
Provisional Specifications accepted	1050	Applications for Registration of Trade Marks	1053
Alphabetical list of Applicants for Patents	1051	Special Notice	1061
Alphabetical list of Inventions for which Patents have been applied for	1051	Alphabetical list of Registrants of Trade Marks	1062
Alphabetical list of Patentees	1052	Alphabetical list of Goods in respect of which Trade Marks have been registered	1062

Note.—Throughout this Gazette the names in Italics within parentheses are those of Communicators of Inventions.

Complete Specifications.

Patent Office, Perth,
5th March, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 3153.—ASKIN MORRISON NICHOLAS, of Peak Hill, Western Australia, Mining Manager, "*An improved Rotating Filtering Apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like.*"—Dated 17th October, 1900.

Claims:—

1. The herein described rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like consisting essentially of a comparatively large annular horizontally rotating trough provided with a filter bed of sand preferably resting upon filter cloth the lower part of said trough being connected with a vacuum pump substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

2. In a rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like an annular horizontally rotating trough provided with a filtering material such as sand, and connected with a vacuum pump substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

3. In a rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like a horizontally rotating filter bed of sand resting upon a layer of filter cloth or other support, the lower part of the trough containing such sand connected with a vacuum pump together with means for feeding slimes on to said filter bed and subsequently removing them therefrom, substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

4. In a rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like an annular horizontally rotating trough containing a bed of filter sand in combination with a vertical hollow shaft with which the bottom or lower part of said trough is connected by a series of radial pipes said hollow shaft being connected with a vacuum pump substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

5. In a rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like a slimes supply launder delivering into a feed hopper discharging on to an inclined adjustable platform whereby the slimes are conducted on to the surface of the filter bed, substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

6. In a rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like an inclined adjustable slimes supply platform in combination with a curved baffle plate on to which the slimes are discharged by said platform for delivery on to the surface of the filter bed, substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

7. In a rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like, an inclined adjustable scraper for the removal of the slimes from the filter bed after the gold and silver-bearing solutions have been withdrawn in combination with a screw or other conveyor substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

8. In a rotating filtering apparatus principally for the separation of gold and silver-bearing solutions from slimes and the like a sand-hopper having an adjustably sliding door situated immediately behind the apparatus used for removing the slimes from the filter bed for the purpose of replenishing the sand removed by the scraper substantially as and for the purposes herein described and explained and as illustrated in the accompanying drawings.

Specification, 9s. Drawings on applications.

Application No. 3272.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*Benjamin Garver Lamme*), "*Improvements in Dynamo Electric Generators.*"—Dated 16th January, 1901.

Claims:—

1. For an alternating current generator an armature having a plurality of closed coil windings symmetrically disposed on the core, corresponding points in the several windings being connected in parallel at the terminals, substantially as described.

2. For a two-phase generator an armature constructed as described with reference to the accompanying drawings.

Specification, 2s. Drawings on application.

Application No. 3275.—EDWARD WATERS, of 131 William Street, Melbourne, Victoria (*Linotype Company, Limited*), "*Improvements in Linotype Machines.*"—Dated 16th January, 1901.

Claims:—

1. The hereinbefore described combination of a series of magazines, magazine carriage, and bearing surfaces for it to move on.

2. The hereinbefore described combination of a series of magazines capable of a horizontal motion to effect change of fount and register; flat plate to close the top mouths of the series; and slot therein to establish communication between the magazine entrance and the magazine in register.

3. The hereinbefore described combination of series of magazines capable of a horizontal motion to effect change of fount and register; flat plate to close the top mouths of the series; slot therein to establish communication between the magazine entrance and the magazine in register; and the improved front and back plates of the said magazine entrance.

4. The hereinbefore described combination of a series of magazines capable of a horizontal motion to effect change of fount and register; pivoted guide to engage with the mouths of the magazine in register; hand lever and connections by which the operator can place any magazine in the series in register; means for rocking the said guide out of the way in time and for returning it and means for automatically locking the series in the selected position.

5. The hereinbefore described combination of a series of magazines capable of a horizontal motion to effect change of fount and register; pivoted guide to engage with the mouths of the magazine in register; hand lever and connection by which the operator can place any magazine in the series in register; means for rocking the said guide out of the way in time and for returning it; means for automatically locking the series in the selected position; flat plate to close the top mouths of the magazines; slot therein to establish communication between the magazine entrance and the magazine in register; and the improved front and back plates of the said magazine entrance.

6. The hereinbefore described combination of fount distinguisher and series of magazines.

7. The hereinbefore described combination of fount distinguisher; series of magazines; magazine carriage; and means for moving the said carriage to effect change of fount and register.

8. The hereinbefore-described combination of escapements; escapement spring and levers; escapement rods; slotted horizontal bar through which they pass; and keyboard.

9. The hereinbefore described combination with the vice, assembler gong, and line shifter of a linotype machine, of means by which the adjustment of the vice for length of linotype automatically adjusts the said gong and shifter for the same length.

10. The combination in a linotype machine, of the backing-up nut of the adjustable vice jaw; gong mechanism; continuous rod connecting the said vice jaw and gong mechanism; assembler bar dog to actuate the gong; arm pivoted on the said bar to hold back the shifter finger and connection between the said arm and the assembler box to actuate the said arm.

11. The combination in a linotype machine of the adjustable vice jaw; gong mechanism; continuous rod connecting the said vice jaw and gong mechanism; assembler dog to actuate the gong; stop on the continuous rod to stop the assembler bar; arm pivoted on the said bar to hold back the shifter finger; and connection between the said arm and the assembler box to actuate the said arm.

12. The hereinbefore described combination with the line shifter of a linotype machine, of arm adapted to be rocked into the assembler box to adjust the shifter arm and to be disengaged therefrom by the assembler box.

13. The hereinbefore described combination with the adjustable jaw of the vice of a linotype machine, of gong mechanism; continuous rod connecting the two; assembler bar; and dog thereon to actuate the gong.

14. The hereinbefore described combination with the adjustable jaw of the vice of a linotype machine, of gong mechanism; continuous rod connecting the two; assembler bar; dog thereon to actuate the gong, and stop on the continuous rod to stop the assembler bar.

Specification, £1 10s. Drawings on application.

Application No. 3281.—DAVID LAIRD, of Forfar, North Britain, Engineer and Metallurgist, "*An Improved Assay Furnace.*"—Dated 25th January, 1901.

Claims:—

1. A furnace for the assaying of ore and the cupellation of precious metals in which the crucibles or cupels are subjected to the flame and hot gases generated from hot air under pressure and liquid fuel or gas in the manner and substantially as described and shown.

2. In furnaces of the indicated nature an inclined hearth formed with ribs radiating towards the centre and an annular trough to carry away slag, a perforated plate arranged above the hearth to carry the crucibles or cupels, and a skeleton frame with spacing ribs to separate and support the crucibles substantially as described and illustrated.

3. In furnaces for the indicated purposes a chamber in communication with the hot spent gases of the furnace, a coil arranged within the chamber through which air under pressure is passed, and combustion chambers in which a flame of heated air and fuel is generated and directed to the interior of the furnace substantially as described and shown.

4. The general arrangement construction and combination of parts comprising the improved furnace for the assaying of ore and the cupellation of precious metals substantially as described and illustrated.

Specification, 7s. Drawings on application.

Application No. 3283.—WALTER McDERMOTT, of London, England, Mining Engineer (assignee of FRANCIS EDWARD ELMORE), "*Improvements in Ore Concentrating Machines.*"—Dated 26th January, 1901.

Claims:—

1. In a concentrator of the class described the combination of two shaking travelling belts with a common shaft substantially as and for the purpose described.

2. In a concentrator of the class described the arrangement of a common crank shaft driving two shaking frames supporting the travelling belts and held together or held apart (or held independently) by springs or equivalent devices so that the cranks or eccentrics communicate their motion by constant thrust or constant draw as the case may be, substantially as and for the purpose described.

3. In a concentrator of the class described the arrangement of a common crank shaft with two cone pulleys connected by gearing or the like with separate driving rollers on shaking frames so that the two belts on said frames may be independently regulated with reference to a fixed speed of the crank shaft substantially as and for the purpose described.

4. In a concentrator of the class described and in combination transverse foundation beams centrally arranged pedestals on same for supporting a crank shaft, two shaking frames and supporting toggles for same substantially as and for the purpose described.

5. In a concentrator of the class described the combination of a single crank shaft with two independent shaking frames supported on toggles adjustable by movable bearings so as to permit of independent levelling of the frames transversely and of independent alteration of inclination of the frames longitudinally, substantially as described.

6. In a concentrator of the class described the method of driving the shaking frame supporting a travelling flanged belt by a crank or eccentric shaft supplemented by springs or equivalent devices so as to secure the absence of jar or percussive motion in the rotary movement of the shaft, substantially as and for the purpose described.

Specification, 10s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
1st March, 1901.

NOTICE is hereby given that the undermentioned Application for the Grant of Letters Patent, and the Complete Specification annexed thereto, has been *accepted*, and is now open to public inspection at this Office.

Any person or persons intending to oppose the application must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 9, 1st March, 1901.*

Application No. 3222.—JOHN JAMES CHRISTMAS, of 697 Hay Street, Perth, Western Australia, Mining Agent, "*An improved Concentrating and Gold-saving Table.*"—Dated 8th December, 1900. Specification, 2s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
22nd February, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 8, 22nd February, 1900.*

Application No. 3111.—JOSEPH ADDISON FRANCIS, of Norwood, South Australia, Irrigation Engineer, "*An improved 'Buzz' Fly or Insect Trap.*"—Dated 25th September, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 3287.—WILLIAM STEPNEY RAWSON, of 25 Victoria Street, Westminster, London, England, Engineer, and ROBERT DEXTER LITTLEFIELD, of 30 Bensham Manor Road, Thornton Heath, Surrey, England, Analytical Chemist, "*Manufacture of Refractory Bricks, Furnace Linings, Crucibles, and other articles.*"—Dated 29th January, 1901.

Specification, 4s.

Application No. 3289.—WILLIAM SPENCER, of Lothersdale, near Keighley, York, England, Gentleman, "*Improvements in Kilns for Burning or Calcining Limestone or like Substances.*"—Dated 29th January, 1901.

Specification, 8s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
15th February, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from

the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 7, 15th February, 1900.*

Application No. 3255.—EDWIN CLAYTON POHLE, 2521 Vine Street, Denver, U.S.A., Assayer, and STUART CROSSDALE, 1574 York Street, Denver, U.S.A., Chemist, "*Process for the Reduction of Refractory Ores.*"—Dated 3rd January, 1901.

Specification, 7s. 6d.

Application No. 3258.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Frank Clarence Newell*), "*Improvements relating to Electric Railways.*"—Dated 3rd January, 1901.

Specification, £1 5s. Drawings on application.

Application No. 3271.—ERNEST ROWLAND HILL, of 814 Maple Avenue, Wilkesburg, Allegheny, Pennsylvania, United States of America, Electrical Engineer, "*Improvements in controlling Mechanism especially applicable for use with Pumps.*"—Dated 16th January, 1901.

Specification, 7s. Drawings on application.

Application No. 3273.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Cyrus Robinson*), "*Improvements in Oil Pumping Apparatus.*"—Dated 16th January, 1901.

Specifications, 4s. 6d. Drawings on application.

Application No. 3274.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*Frank Clarence Newell*) "*Improvements in Electric Brake Mechanism.*"—Dated 16th January, 1901.

Specification, 4s. Drawings on application.

Application No. 3276.—JOHN SKETCHLEY MORTON, of 121 Lake Street, Oakland, Alameda, California, United States of America, Gentleman, "*Improvements in Pumps.*"—Dated 19th January, 1901.

Specification, 9s. Drawings on application.

Application No. 3277.—WILLIAM H. SMYTH, of Berkeley, Alameda, California, United States of America, Mechanical Engineer, "*Improvements in Mechanical Stokers.*"—Dated 19th January, 1901.

Specification, 7s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
5th February, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 6, 8th February, 1901.*

Application No. 3262.—ROBERT AIKINS, of Dean Street, Albury, New South Wales, Secretary, "*An improved Cooling Case or Chamber for Perishable Goods.*"—Dated 8th January, 1901.

Specification, 3s. Drawings on application.

Application No. 3263.—PHILIP DIEHL, of Elizabethport, New Jersey, United States of America, Inventor, "*Improvements in Sewing Machines.*"—Dated 11th January, 1901.

Specification, £2. Drawings on application.

Application No. 3264.—FREDERICK FARGO CHURCH, of Rochester, New York, U.S.A., Lawyer (*Alfred J. Gillespie*), "*Improvements in Voting Machines.*"—Dated 11th January, 1901.

Specification, £6 12s. Drawings on application.

Application No. 3265.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Frank Clarence Newell*), "*Improvements in Electric Brakes.*"—Dated 11th January, 1901.

Specification, 11s. Drawings on application.

Application No. 3266.—WILLIAM MCLAREN, of Moorfields, London, England, Manufacturer, and JOHN RONALD GREG, of Oxenholme, Westmoreland, England, Railway Carriage Builder, "*Improvements in and applicable to seat backs convertible into sleeping berths for railway carriages, steamships, and the like.*"—Dated 11th January, 1901.

Specification, 5s. Drawings on application.

Application No. 3267.—CHARLES ALGERNON PARSONS, of Newcastle-on-Tyne, Northumberland, England, "*Improvements in and relating to Screw Propellers.*"—Dated 12th January, 1901.

Specification, 7s. 6d. Drawings on application.

Application No. 3268.—ADA DEBAUN, wife of John DeBaun, of Perth, Western Australia, Licensed Victualler, "*A Coin Freed Marking Board for registering the scores and checking the takings at Billiards and other Analogous Games.*"—Dated 15th January, 1901.

Specification, 7s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
1st February, 1901.

NOTICE is hereby given that the undermentioned applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 5, 1st February, 1901.*

Application No. 3228.—WILLIAM EDWARD CLIFTON, of St. George's Terrace, Perth, Western Australia, Accountant (*Gustav Adolph Wayss*), "*Improvements in reinforced concrete construction.*"—Dated 14th December, 1900.

Specification, 6s. Drawings on application.

Application No. 3230.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*The Ampere Electro-Chemical Company*), "*Improvements in process for the production of Camphor.*"—Dated 14th December, 1900.

Specification, 5s.

Application No. 3231.—JOSEPH SAMUEL BEEMAN, of 182 Earl's Court Road, London, England, Engineer, "*Improvements in or relating to Machinery for applying Tips to Cigarettes.*"—Dated 14th December, 1900.

Specification, £1 13s. Drawings on application.

Application No. 3233.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Frank Clarence Newell*), "*Improvements in Electric Brakes.*"—Dated 21st December, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 3234.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Frank Clarence Newell*), "*Improvements in Electric Brake Shoes.*"—Dated 21st December, 1900.

Specification, 2s. 6d. Drawings on application.

Application No. 3235.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Frank Clarence Newell*), "*Improvements in Automatic Regulators for Electric Brakes.*"—Dated 21st December, 1900.

Specification, 3s. Drawings on application.

Application No. 3236.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Cyrus Robinson*), "*Improvements in Fluid-pressure Engines.*"—Dated 21st December, 1900.

Specification, 7s. Drawings on application.

Application No. 3237.—ARTHUR CONSTANT AUCHER, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "*An improved Corkscrew.*"—Dated 27th December, 1900.

Specification, 2s. Drawings on application.

Application No. 3238.—ARTHUR CONSTANT AUCHER, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "*An Improved Vaporised Oil Burner for heating purposes.*"—Dated 27th December, 1900.

Specification, 3s. Drawings on application.

Application No. 3239.—ARTHUR CONSTANT AUCHER, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "*Improvements in Automatic Gas Igniters.*"—Dated 27th December, 1900.

Specification, 4s. Drawings on application.

Application No. 3240.—ARTHUR CONSTANT AUCHER, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "*Improved means for Electrically Igniting Oil or Gas Burners.*"—Dated 27th December, 1900.

Specification, 4s. 6d. Drawings on application.

Application No. 3241.—ARTHUR CONSTANT AUCHER, of McDonnell Street, Toowong, Queensland, Bachelor of Arts, "*Improvements in or relating to Gas Lighting.*"—Dated 27th December, 1900.

Specification, 3s. 6d. Drawings on application.

Application No. 3243.—JOHN LONG, of Springfield, Ohio, United States of America, Machinist, "*An improved Mechanic's Bench Vise.*"—Dated 27th December, 1900.

Specification, 4s. Drawings on application.

Application No. 3245.—ANDREW JACKSON BEARD, of East Lake, United States of America, Farmer, "*Car Coupler.*"—Dated 27th December, 1900.

Specification, 8s. Drawings on application.

Application No. 3246.—ABEL GODEFROY PELLENC, of 32 Rue de l'Orillon, Paris, France, Tinsmith, "*Improvements in means for closing preserve tins or boxes and the like.*"—Dated 27th December, 1900.

Specification, 5s. Drawings on application.

Application No. 3247.—EDWARD WATERS, jun., of 131 William Street, Melbourne, Victoria, Patent Agent (*The Linotype Company, Limited*), "*Improvements in Linotype Machines.*"—Dated 27th December, 1900.

Specification, £5. Drawings on application.

Application No. 3248.—EDWARD WATERS, jun., of 131 William Street, Melbourne, Victoria, Patent Agent (*The Linotype Company, Limited*), "*Improvements in the Mould of Linotype Machines.*"—Dated 27th December, 1900.

Specification, 7s. Drawings on application.

Application No. 3249.—EDWARD WATERS, jun., of 131 William Street, Melbourne, Victoria, Patent Agent (*The Linotype Company, Limited*), "*Improvements in the Matrices of Linotype Machines and in apparatus for applying the said improvements thereto.*"—Dated 27th December, 1900.

Specification, 15s. Drawings on application.

Application No. 3252.—GEORGE RENNER, Journalist, and WILLIAM HENRY BOYENS, Mechanical Engineer, both of Kaikoura, South Marlborough, New Zealand, "*An improved Apparatus for Branding Animals and Packages.*"—Dated 2nd January, 1901.

Specification, 3s. Drawings on application.

Application No. 3257.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Frank Clarence Newell*), "*Improvements in Electric Brakes.*"—Dated 3rd January, 1901.

Specification 12s. Drawings on application.

Application No. 3259.—THE CONCENTRATED BEER COMPANY, LIMITED, of 28 Bush Lane, Cannon Street, London, England (Assignee of HERBERT AMOS HOBSON), "*Improvements in and connected with the Production of Beer and other Beverages, and of Alimentary Substances.*"—Dated 3rd January, 1901.

Specification, 9s. 6d.

Application No. 3260.—BETHLEHEM STEEL COMPANY, of South Bethlehem, Pennsylvania, United States of America (Assignee of FREDERICK WINSLOW TAYLOR), "*Metal Cutting Tool, and method of making and treating the same.*"—Dated 3rd January, 1901.

Specification, 18s.

Application No. 3261.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*Francis Ludlow Clark*), "*Improvements in Electro-magnetic Brakes.*"—Dated 3rd January, 1901.

Specification, 9s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth.
25th January, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first

appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 4, 25th January, 1901.

Application No. 2939.—AUGUST GÜRBER, of Würzburg, Bavaria, Germany, "An improved process for Producing Condensed Milk."—Dated 28th April, 1900.

Specification, 6s. 6d. Drawings on application.

Application No. 2995.—AUGUSTINE JOHN MADDEN, of 187 Little Collins Street, Melbourne, Victoria, Metal Worker, "Improved automatically Cleansing Filter."—Dated 12th June, 1900.

Specification, 14s. Drawings on application.

Application No. 3134.—JOHN DARLING, of Gallowflats, Rutherglen, Lanark, North Britain, Engineer, "Improvements in and connected with the Windows of Railway Carriages, Cabs, Omnibuses, Ships, and such like."—Dated 9th October, 1900.

Specification, 2s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
18th January, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 3, 18th January, 1901.

Application No. 3212.—JOHN COLLINS CLANCY, Analytical Chemist and Metallurgist, and LUKE WAGSTAFF MARSLAND, Solicitor, both of Martin Place, Sydney, New South Wales, "An improved process for the Elimination of Zinc from sulphide ores, and the extraction and recovery of lead, silver, gold, and other metals therefrom, and from other sulphide ores."—Dated 4th December, 1900.

Specification, 12s. Drawings on application.

Application No. 3217.—FRANCIS JAMES ODLING, of No. 3 Queen's Mansions, Beaconsfield Parade, St. Kilda, in the Colony of Victoria, Mining Engineer, and WILLIAM JAMIESON, of Broken Hill Chambers, 31 Queen Street, Melbourne, Victoria, Gentleman, "An improved Apparatus for the Separation of the Magnetically Attractible Mineral or Particles from Pulverised Ores."—Dated 5th December, 1900.

Specification, 12s. Drawings on application.

Application No. 3223.—W. D. and H. O. WILLS, LIMITED, of Ashton Gate, Bristol, England, Manufacturers of Tobacco, Cigarettes, Cigars, and Snuff (assignee of HENRY RANKIN and HENRY HERBERT WILLS), "Apparatus for Filling Cases with Cigarettes."—Dated 11th December, 1900.

Specification, £1 10s. Drawings on application.

Application No. 3226.—WILLIAM NEPEAN HUTCHISON, Commercial Traveller, of Sydney; HENRY SCOTT HARDEN, Solicitor, of Sydney, and HUGH COLLEY, Dairy Farmer, of Kiama, all in the Colony of New South Wales, "An Improved Garbage and Night-soil Cart."—Dated 11th December, 1900.

Specification, 4s. Drawings on application.

Application No. 3227.—ARTHUR HENRY BENNETT, of 44 Swan Street, Richmond, in the Colony of Victoria, Gasfitter, and STEPHEN JONES, of 51 Athol Street, Moonee Ponds, in the Colony of Victoria, Gasfitter, "A system of automatically Lighting Gas Burners and Novel Apparatus for use therein."—Dated 11th December, 1900.

Specification, 13s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
11th January, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 2, 11th January, 1901.

Application No. 3203.—WILLIAM McARTHUR STEWART, of Unwin's Bridge Road, St. Peters, near Sydney, New South Wales, Manufacturer, "Improvements in Incubators."—Dated 27th December, 1900.

Specification, 3s. 6d. Drawings on application.

Application No. 3205.—EDWARD WATERS, jun., a member of the firm of Edward Waters & Son, of No. 131 William Street, Melbourne, Victoria, Patent Agent (*Frank Lemont Dodgson*), "Improvements in Railway Switches and Semaphore Apparatus."—Dated 20th November, 1900.

Specification, £3 2s. 6d. Drawings on application.

Application No. 3211.—THOMAS DANIELLS MERTON, of Spottiswoode, near Melbourne, Victoria, Metallurgist, "An Improved Ore-roasting Furnace."—Dated 4th December, 1900.

Specification, 6s. Drawings on application.

Application No. 3215.—MARCONI'S WIRELESS TELEGRAPH COMPANY, LIMITED, of 18 Finch Lane, Threadneedle Street, London, England (Assignee of GUGLIELMO MARCONI), "Improvements in Apparatus for Wireless Telegraphy."—Dated 4th December, 1900.

Specification, 16s. Drawings on application.

Application No. 3219.—JOSEPH SAMUEL BEEMAN, Engineer, of 182 Earl's Court Road, London, England, "Improvements in or relating to Automatic Feed Apparatus."—Dated 6th December, 1900.

Specification, 5s. 6d. Drawings on application.

Application No. 3221.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patent Agent (*William Andrew Bole*), "Improvements in Gasifiers for Internal Combustion Engines."—Dated 6th December, 1900.

Specification, 5s. Drawings on application.

Application No. 3225.—RICHARD FREDERICK BRADSHAW and WILLIAM EDWARD HARDING, both of Boulder, Western Australia, Engineer and Engine Driver respectively, "The Bradshaw-Harding' High Pressure Tap for Filter Presses and other purposes."—Dated 11th December, 1900.

Specification, 3s. 6d. Drawings on application.

No.	Date.	Name.	Address.	Title.
*3308	19th Feb., 1901	Merriman, H. and S. D. ...	Melbourne, Vict. ...	An improved apparatus for treating the gold in slimes.
3309	19th Feb., 1901	MacVean, D. (assignee of T. A. Irvine)	London, England	Improvements in and relating to the extraction of copper by the wet method.
3310	19th Feb., 1901	Waters, E., jun. (<i>Linotype Co., Ltd.</i>)	Melbourne, Vict. ...	Improvements in and connected with printing music typographically
3311	19th Feb., 1901	Williams, J. T. ...	North Adelaide, S.A.	Improvements in mechanism for sounding bells.
3312	22nd Feb., 1901	Sparrow, R. (<i>B. G. Lamme</i>) ...	Perth, W.A. ...	Improvements in systems of electrical distribution.
3313	22nd Feb., 1901	Sparrow, R. (<i>B. G. Lamme</i>) ...	Perth, W.A. ...	Improvements in systems of electrical distribution.
3314	22nd Feb., 1901	Sudre, C. G., and Thierry, C. V.	Paris, France ...	Improvements in the treatment of oxides of metals or metalloids or compounds of same, for obtaining new products therefrom.
*3315	25th Feb., 1901	Barr, A. ...	Doodlekin, W.A.	An improved method of conveying passengers and merchandise on ordinary roads or over rough country.
3316	26th Feb., 1901	Anschau, J. ...	Glen Innes, N.S.W.	An improved sealed buckle.
3317	26th Feb., 1901	Pupin, M. I. ...	Yonkers, U.S.A. ...	Art of reducing attenuation of electrical waves and apparatus therefor.
3318	26th Feb., 1901	Brake, A. ...	Wellington, N.Z. ...	Apparatus for measuring and delivering liquids.
3319	26th Feb., 1901	Dunn, H. ...	Bendigo, Vict. ...	Improvements in discs for the shanks of stampers for crushing quartz and the like.
3320	26th Feb., 1901	Glade, H. ...	North Fitzroy, Vict.	A new or improved velocipede.
3321	26th Feb., 1901	Jackson, A. G. ...	Brisbane, Q. ...	An improved attachment for bicycles for securing thereto rifles, sporting guns, and other articles.
3322	27th Feb., 1901	Campbell, J. H. and C. H. ...	New York, U.S.A.	Improved condensed or desiccated milk, and process and apparatus for preparing the same.
3323	28th Feb., 1901	Riley, F. J. ...	Kalgoorlie, W.A. ...	An apparatus for precipitation and amalgamation of gold and silver from cyanide solutions as contained in slimes.
3324	28th Feb., 1901	American Tobacco Co. (assignee of R. L. Patterson)	New York, U.S.A.	Improvements in containing vessels.
3325	28th Feb., 1901	Sparrow, R. (<i>British Motor Traction Company, Ltd.</i>)	Perth, W.A. ...	Improvements in or relating to railway cars propelled by explosion engines or the like.
3326	28th Feb., 1901	Empire Cash Register, Ltd. (assignee of N. Collins)	London, England ...	Improvements in cash registering machines.
*3327	1st March, 1901	Easton, A. F. ...	Perth, W.A. ...	An improved contrivance for collecting the crystallised salts from the water in condenser boilers during the process of distilling fresh water from salt water, and for other purposes.

Provisional Specifications.

Patent Office, Perth, 8th March, 1901.

A PPLICATIONS for Letters Patent, accompanied by Provisional Specifications, which have been accepted from the 16th February to the 2nd March, 1901:—

Application No. 3284.—FRANCIS ZIMMERLI, of 99 Connor Street, London, E.C., "*A new or improved Fluid for washing Clothes and other Materials.*"—Dated 26th January, 1901.

Application No. 3285.—GEORGE McMULLEN, of 19 Cowle Street, Perth, Western Australia, Architect, "*An improved method of and Apparatus for drawing Sweeps and similar results.*"—Dated 26th January, 1901.

Application No. 3286.—JOHN ALFRED MILLANE, of Mount Paradise, Pakenham, Victoria, Farmer, "*An improved contrivance for enabling Horses to conveniently carry their own Forage.*"—Dated 29th January, 1901.

The Patents Acts, 1884-1894.

Notice of Application for Amendment.

IN the matter of Application for Letters Patent, No. 3212, dated 4th December, 1900, by John Collins Clancy, Analytical Chemist and Metallurgist, and Luke Wagstaff Marsland, Solicitor, both of Martin Place, Sydney, in the State of New South Wales.

Notice is hereby given that the above John Collins Clancy and Luke Wagstaff Marsland have applied for leave to amend the complete specification of their invention, alleging as their reasons for so doing "that they are errors which crept into the specification in its preparation by inadvertence."

The amendments proposed are as follows, viz. :— [Reference being had to amended copy of specification and drawings lodged in Patent Office, Perth.]

Page 2, line 7.

Instead of the words "the atmosphere" read "a hot blast."

Page 2, line 20.

Instead of the words "atmospheric air" read "the oxygen of the hot blast."

Page 2, line 36.

After the words "thereabouts in" insert the words "the before-mentioned muffle furnace or in."

Page 2, line 43.

Instead of the figures "40" read "4."

Page 4, line 25.

Instead of the word "latter" read "first mentioned."

Page 5, line 25.

Erase the words "by electrolysing the same."

Any person or persons intending to oppose the said application for amendment must leave particulars, in writing (on Form G), of his or their objections thereto, within one calendar month from the date hereof. A fee of Ten shillings (10s.) is payable with such notice.

Dated this 22nd day of February, 1901.

MALCOLM A. C. FRASER,

Registrar of Patents.

The Patents Acts, 1888-1894.

Notice of Application for Amendment.

IN the matter of Letters of Registration, No. 189, dated 10th April, 1889, The Australian Gold Recovery Company, Limited, of the City of London, England, for an invention for "Improvements in obtaining gold and silver from ores and other compounds."

Notice is hereby given that The Australian Gold Recovery Company, Limited, above mentioned, has applied for leave to amend the complete specification of its invention, alleging as reasons for so doing, "In order that the claims may not be held to include strengths of solutions other than those described in the body of the specification. We are the assignees of the Cassel Gold Extracting Company, Limited, to whom the said letters of Registration or Patent were granted, on the 10th April, 1889."

The amendments are as follows, viz. [Reference being had to amended copy of specification lodged in Patent Office, Perth] :—

Page 3, line 15.

After the words "we declare that" insert the words "we disclaim the use of any solution of a strength greater than that given in the above example, that is to say, greater than one to four parts of cyanogen in 500 parts of water, but"

Page 3, line 20.

After the word "described" insert the words "and subject to the above disclaiming note."

Page 3, line 25.

After the word "described" insert the words "and subject to the above disclaiming note."

Any person or persons intending to oppose the said application for amendment must leave particulars, in writing (on Form G), of his or their objections thereto, within one calendar month from the date hereof. A fee of Ten shillings (10s.) is payable with such notice.

Dated this 22nd day of February, 1901.

MALCOLM A. C. FRASER,

Registrar of Patents.

Trade Marks.

Patent Office, Trade Marks Branch,

Perth, 5th March, 1901.

IT is hereby notified that I have received the under-mentioned Applications for the Registration of Trade Marks.

Any person or persons intending to oppose any of such applications must leave particulars in writing, in duplicate (on Form F), of his or their objections thereto, within two months of the first advertisement of the applications in the Western Australian Government Gazette.

A fee of £1 is payable with such notice.

In the case of an Application in which have been inserted a statement and disclaimer (or a disclaimer only), a copy of the same is printed in *italics* in connection with the advertisement.

MALCOLM A. C. FRASER,

Registrar of Designs and Trade Marks.

Application No. 2007, dated 4th September, 1900.—THE JOHN HUNTER COMPANY, LIMITED, of Hay and Murray Streets, Perth, Western Australia, Boot and Shoe Manufacturers, to register in Class 38, in respect of Boots and Shoes, Slippers, and such like Footwear, a Trade Mark, of which the following is a representation :—

THREE CROWNS

The essential particulars of the Mark are (1) the word "Crowns;" and (2) the device, and applicant Company disclaims any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian *Government Gazette* of the 11th January, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2042, dated 24th October, 1900.—ENOCH TAYLOR & Co., of 22 York Street, Sydney, New South Wales, Boot and Shoe Importers and Manufacturers, to register in Class 38, in respect of Boots and Shoes, a Trade Mark, of which the following is a representation :—

The essential particular of the above Mark consists of the device of the two crescents, and applicant Company disclaims any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian *Government Gazette* of the 11th January, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2052, dated 20th November, 1900.—FERNAND LEVIC, of York Street, Sydney, in the Colony of New South Wales, Cigar Manufacturer and Importer, trading under the style or firm of "Frossard, Levic, & Co.," to register in Class 45, in respect of Tobacco, Cigars, and Cigarettes, a Trade Mark, of which the following is a representation :—

The essential particulars of the Trade Mark consist of the combination of devices and the words "La Exportadora," and applicant disclaims any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian *Government Gazette* of the 11th January, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2054, dated 24th November, 1900.—HENRY CLAY and BOCK & Co., LIMITED, Dashwood House, 9 New Broad Street, London, England, Manufacturers of

Havana Cigars, to register in Class 45, in respect of Manufactured Tobacco, a Trade Mark, of which the following is a representation :—

This Mark was first advertised in the Western Australian *Government Gazette* of the 11th January, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2055, dated 24th November, 1900.—HENRY CLAY and BOCK & Co., LIMITED, Dashwood House, 9 New Broad Street, London, England, Manufacturers of Havana Cigars, to register in Class 45, in respect of Manufactured Tobacco, a Trade Mark, of which the following is a representation :—

The essential particulars of the Trade Mark are the combination of devices, and applicants disclaim any right to the exclusive use of the added matter, save and except the name "Henry Clay."

This Mark was first advertised in the Western Australian *Government Gazette* of the 11th January, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2056, dated 24th November, 1900.—HENRY CLAY and BOCK & Co., LIMITED, Dashwood House, 9 New Broad Street, London, England, Manufacturers of Havana Cigars, to register in Class 45, in respect of Manufactured Tobacco, a Trade Mark, of which the following is a representation :—

This Mark was first advertised in the Western Australian *Government Gazette* of the 11th January, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2074, dated 14th December, 1900.—THE MORGAN CRUCIBLE COMPANY, LIMITED, of Battersea Works, London, England, Crucible Manufacturers, to register in Class 16, in respect of Crucibles of all kinds, including Plumbago Crucibles and other fire-standing goods, Porous Cells, and Plates for Galvanic Batteries, not being of metal or carbon, a Trade Mark, of which the following is a representation :—

The Mark has been used by the applicants and their predecessors in business since prior to the 1st January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of the 11th January, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2075, dated 14th December, 1900.—THE MORGAN CRUCIBLE COMPANY, LIMITED, of Battersea Works, London, England, Crucible Manufacturers, to register in Class 16, in respect of Crucibles of all kinds, including Plumbago Crucibles and other fire-standing goods, Porous Cells, and Plates for Galvanic Batteries, not being of metal or carbon, a Trade Mark, of which the following is a representation :—

The Mark has been used by the applicants and their predecessors in business since prior to the 1st January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of the 11th January, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2076, dated 14th December, 1900.—THE MORGAN CRUCIBLE COMPANY, LIMITED, of Battersea Works, London, England, Crucible Manufacturers, to register in Class 16, in respect of Crucibles of all kinds, including Plumbago Crucibles and other fire-standing goods, Porous Cells, and Plates for Galvanic Batteries, not being of metal or carbon, a Trade Mark, of which the following is a representation :—

The Mark has been used by the applicants and their predecessors in business since prior to the 1st January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of the 11th January, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2077, dated 14th December, 1900.—THE MORGAN CRUCIBLE COMPANY, LIMITED, of Battersea Works, London, England, Crucible Manufacturers, to register in Class 16, in respect of Crucibles of all kinds, including Plumbago Crucibles and other fire-standing goods, Porous Cells, and Plates for Galvanic Batteries, not being of metal or carbon, a Trade Mark, of which the following is a representation :—

The Mark has been used by the applicants and their predecessors in business since prior to the 1st January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of the 11th January, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2082, dated 27th December, 1900.—HAVANA COMMERCIAL COMPANY, of 102 Galiano Street, Havana, in the Isle of Cuba, and of 135 Broadway, New York, in the United States of America, Cigar Manufacturers, successors in business to and owners of the factory of the persons lately trading under the firm name and style of "A. Murias y Ca.," in Havana aforesaid, to register in Class 45, in respect of Cigars and cognate substances and articles :—

This Mark was first advertised in the Western Australian Government Gazette of the 11th January, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2088, dated 3rd January, 1901.—GEORGE G. SANDEMAN, SONS & COMPANY, trading as "Sandeman," of Sydney, New South Wales, Wine and Spirit Merchants, to register in Class 43, in respect of Fermented Liquors and Spirits, a Trade Mark, of which the following is a representation :—
