Complete Specifications accepted	2665
Applications for Registration of Trade Marks	2670

Note.—Throughout this Gazette the names in Italics within parentheses are those of Communicators of Inventions.

Complete Specifications.

Patent Office, Perth,
5th July, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 3065.—CHARLES HARRISON WARD, of 60 Queen Street, Melbourne, Victoria, Metallurgist, "*An improved process of and Furnace for Chloridising or for Drying or Roasting Ores or other Metalliferous Materials, and for Volatilising and Separating their Constituents.*"—Dated 22nd August, 1900.

Claims:—

1. An improved process of chloridising or of drying or roasting ores or other metalliferous materials and volatilising and separating their constituents consisting in subjecting them in a furnace to the action of a pulsating or intermittent current of air or gas passing through the hearth then drawing off the vapourised constituents successively through one or more independent exits according to their respective volatilising points, substantially as and for the purposes herein described and explained.
2. Subjecting ores or other metalliferous material in a furnace to the action of a pulsating or intermittent current of air and, or, gas passed through the hearth, substantially as and for the purposes specified.
3. In a furnace for chloridising or for drying or roasting ores or other metalliferous materials and, or, volatilising and separating their constituents an adjustable shaking or vibrating hearth in combination with means for supplying air and, or, gas therethrough to the material under treatment, substantially as and for the purposes specified and as illustrated in the accompanying drawings.
4. In a furnace for chloridising or for drying or roasting ores and, or, other metalliferous materials and for volatilising and separating their constituents a hearth having numerous air or gas supply ports or passages (as b) arranged approximately horizontally or at only a slight incline through said hearth and with or without baffles (as b¹) substantially as and for the purposes specified and as illustrated in the accompanying drawings.
5. In a furnace for chloridising or for drying roasting and, or, volatilising and separating metals and, or, other materials in ores and ore concentrates, a hearth whose surface consists of a series of shallow steps with a number of approximately horizontal holes or passages allowing the passage of air and, or, gas from air chambers (d) through the "risers" of said steps and either with or without baffles or deflectors (as b¹) near the discharge ends of said holes or passages, substantially as and for the purposes specified and illustrated in Figure 4 of the accompanying drawings.
6. In a furnace for chloridising or for drying or roasting ores or other metalliferous materials and, or, volatilising and separating their constituents the combination with a hearth having numerous air or gas supply ports or passages (as b) arranged approximately horizontally or at a slight incline therethrough, of practically air-tight chambers (as d) arranged beneath the hearth and communicating with the perforations or passages in separate sections thereof substantially as and for the purposes specified and as illustrated in the accompanying drawings.
7. In a furnace for chloridising or for drying or roasting ores or other metalliferous materials and or volatilising and separating their constituents a hearth having numerous air or gas supply ports or passages (as b) arranged approximately horizontally or at only a slight incline therethrough said hearth being suspended or supported so that

its inclination can be adjusted and so that it can be vibrated or shaken said hearth being connected by a pipe or pipes having ball and socket and telescopic joints with an air or gas supply pipe whereby a current of air or gas, preferably pulsating or intermittent, may be supplied to the material under treatment substantially as and for the purposes specified and as illustrated in the accompanying drawings.

8. In a furnace for chloridising or for drying or roasting ores or other metalliferous materials and, or, volatilising and separating their constituents the combination with a hearth having an air or gas supply thereto, of partitions extending through the furnace roof or sides so as to practically divide the furnace into a number of chambers or compartments, each having a separate exit or exits substantially as and for the purposes specified and as illustrated in the accompanying drawings.

9. In a furnace for chloridising or for drying or roasting ores or other metalliferous materials and, or, volatilising and separating their constituents a rotating hearth having air or gas supply perforations or passages so arranged that they are approximately horizontal at that part upon which the material usually rests whilst under treatment substantially as and for the purposes specified and as illustrated in Figure 8 of the accompanying drawings.

10. In a furnace for chloridising or for drying or roasting ores or other metalliferous materials and, or, volatilising and separating their constituents a rotating hearth having air or gas supply perforations or passages so arranged that they are approximately horizontal at that part upon which the material under treatment usually rests in combination with a series of air or gas supply chambers or compartments (as d) arranged segmentally around the hearth substantially as and for the purposes specified and as illustrated in Figure 8 of the accompanying drawings.

11. In a furnace for chloridising or for drying or roasting ores or other metalliferous materials and, or, volatilising and separating their constituents, a series of adjustable hearths provided with chambers and perforations, each hearth capable of independent adjustment and motion including that of a vibratory or shaking character, and projecting alternately from opposite sides of the interior of a tower so that the ore or other material being fed from the top falls upon and passes over in succession each hearth, through which it is subjected to the action aforesaid of a current or currents of air and/or gas, substantially as and for the purposes specified, and as illustrated in Figure 9 of the accompanying drawings.

Specification, 12s. 6d. Drawings on application.

Application No. 3100.—JOHN ALBERT BLACKALL WESLEY, of Gawler, South Australia, Mining Engineer, "*Improvements in Concentrating Tables.*"—Dated 18th September, 1900.

Claims:—

1. A concentrating table having a movement in an elliptical or quasi-elliptical path in a horizontal plane, substantially as described.
2. A concentrating table having a movement in an elliptical or quasi-elliptical path in a horizontal plane, such movement being adjustable and capable of being applied at any angle relative to the flow of water over the table, substantially as described.
3. A concentrating table having a movement in an elliptical or quasi-elliptical path in a horizontal plane, such movement being adjustable and capable of being applied at any angle relative to the flow of water over the table and being further capable of variation in the speed of its travel over certain portions of its orbit, substantially as described.
4. In concentrating tables, the combination with a table pivotted to one corner of a triangular lever to which an eccentric motion is imparted, of a reciprocating lever capable of adjustment whereby the movement of the table is capable of being applied at any angle relative to the flow of water, substantially as described.
5. In concentrating tables, the combination with a table pivotted to one corner of a triangular lever to which an eccentric motion is imparted, of reciprocating levers connected by means of a rod, such levers being capable of adjustment whereby the movement of the table is capable of being applied at any angle relative to the table substantially as herein described and for the purposes set forth.
6. In concentrating tables, the combination with a table (such as B) pivotted to one corner of a triangular lever (such as J) to which an eccentric motion is imparted capable of adjustment by means of an eccentric sleeve (such as G²), of reciprocating levers (such as K and N) pivotted to blocks (such as L¹ and P¹) capable of adjustment within quadrants (such as L and P), substantially as herein described and for the purposes set forth.

Specification, 11s. Drawings on application.

Application No. 3105.—RAND DRILL COMPANY, of 100 Broadway, New York, United States of America (Assignee of ROBERT L. AMBROSE), "Improvements in Rock Drills."—Dated 22nd September, 1900.

Claims:—

1. A rock drill having a cylinder which is free of openings into the interior thereof except for those of the distributing ports, one at each end, and the two openings through which the stems of two primary valves protrude substantially as described.
2. In a rock drill means for independently controlling the ports through which primary valves, operated directly from the piston, control the movement of a fluid-pressure-operated main-distributing-valve substantially as described.
3. In a rock drill a pawl and ratchet for the rotating mechanism of a rock drill, in which the pawl has a squared end and a movement toward and away from the ratchet wheel in a line substantially as shown in Figures 4 and 5 of the drawings.
4. In a rock drill a spring for the pawl of the rotating mechanism and a follower interposed between the said spring and both the spring and follower being of larger diameter than the width of the pawl ways substantially as described and for the purpose specified.
5. In a rock drill a drill cylinder head, ratchet box, and cover comprising three pieces, the ratchet box portion being of substantially the same width as the width of the ratchet and pawls employed substantially as described.
6. In a rock drill an adjustable feed nut made in two parts both parts screw-threaded and fitted to the same screw-threaded orifice, one part secured fast therein, and the other part adjustably secured therein by means of a lock nut substantially as shown and described.
7. In a rock drill a cylinder head comprising two members, each having formed therein a semi-circular recess, a bushing composed of two members, each having a semi-circular flange adapted to engage with the said recess, means for securing the head members together, and a packing ring having a flange portion adapted to fit and be held in place between the sides of the recesses and the ends of the bushing members substantially as described.
8. A rock drill comprising a valve mechanism a rotating mechanism, an adjustable feed nut and a cylinder head all constructed and combined substantially as described with reference to the drawing and for the purpose specified.

Specification, 19s. Drawings on application.

Application No. 3108.—GEORGE STURTZEL, of Mount Gambier, South Australia, Agent, "An improved Totalising Machine."—Dated 25th September, 1900.

Claims:—

1. In improvements in totalisators the combination with a revolubly mounted cylinder or drum such as C¹ with an externally arranged ratchet wheel D¹ with an internally arranged ratchet face D² constructed substantially as described and as illustrated.
2. In improvements in totalisators the application and use of two free rods connected with intermediate mechanism one of said rods being so arranged that its free end rotates or progresses an enumerated band of canvas or tape whilst the other retards or prevents the further progress of such canvas or tape after it has traversed the desired distance during the cycle of events incidental to stamping a ticket as hereinbefore described.
3. In improvements in totalisators, and in combination with the parts set forth in Claim 1 a rod such as L arranged to engage in the external ratchet wheel D¹ for operating the same and a rod such as M to engage in the internal ratchet face D² of same for the purpose of stopping the same substantially as described and illustrated.
4. In improvements in totalisators, and in combination with the parts set forth in Claim 1 the rods L and M, and the pawl E substantially as described and illustrated for progressing, stopping, and locking the tape gear.
5. In improvements in totalisators, the combination of a ticket press and lever, two free rods, two rollers such as C C and the parts set forth in Claim 1 connected together by intermediate mechanism as and for the purposes set forth as a combination of parts.
6. In improvements in totalisators, and in combination with the parts above claimed a band of tape or canvas such as F having numerals printed thereon and a winding wheel such as G the said tape being fastened at one extremity to the reel G, whilst the other extremity is attached to the double ratchet faced cylinder or drum C¹ so that when in use it is wound from the reel G round both of the upper rollers C C or vice versa by means of the mechanism above claimed substantially as described and illustrated.
7. The hereinbefore specified improvements in totalisators constructed and arranged substantially as described and illustrated and operated in the manner set forth in the specifications as and for the purposes indicated as a combination of parts.

Specification, 9s. 6d. Drawings on application.

Application No. 3356.—ALFRED GRA ROSSER, of Fremantle, Western Australia, Gentleman, "An improved Lock Nut."—Dated 4th April, 1901.

Claims:—

1. IN LOCK NUTS: A lock nut formed in two parts, one part being made with a recess or faucet having a different pitch to that of the inner or bolt thread of its own part, substantially as and for the purposes herein set forth and explained and as illustrated in the accompanying drawings.
2. IN LOCK NUTS: A lock nut formed in two parts, one part being made with an exterior threaded projection or spigot having a screw or thread of a different pitch to that of the inner or bolt thread of its own part, substantially as and for the purposes herein set forth and explained and as illustrated in the accompanying drawings.
3. IN LOCK NUTS: The combination of two differential threaded parts, as above claimed, which when interscrewed with each other form or act as one united nut and which when being unscrewed cause a lock action, substantially as and for the purposes herein set forth and explained and as illustrated in the accompanying drawings.

4. IN LOCK NUTS: Two differential threaded portions, as A and F, in combination with a retention or pinch screw pin as E for to maintain such differential threaded portions in a locked condition, substantially as and for the purposes herein set forth and explained and as illustrated in the accompanying drawings.

Specification, 6s. Drawings on application.

MALCOLM A. C. FRASER,

Registrar of Patents.

Patent Office, Perth,
28th June, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 26, 28th June, 1901.

Application No. 3410.—SAMUEL THOMAS LUGG, of 141 Green Street, Richmond, Victoria, Blacksmith, "Improved appliances for the manufacture of Horse Shoes."—Dated 28th May, 1901.

Specification, 4s. Drawings on application.

Application No. 3411.—HUGH MAIDEN, of 10 Union Street, Pyrmont, and JAMES COURTS, of MacRae Street, Petersham, both in New South Wales, Divers, "Improvements in Shear Legs."—Dated 28th May, 1901.

Specification, 3s. 6d. Drawings on application.

Application No. 3415.—JOHN DOBSON, of Kalgoorlie, Western Australia, Engineer, "An improved Signalling Gong."—Dated 4th June, 1901.

Specification, 3s. 6d. Drawings on application.

MALCOLM A. C. FRASER,

Registrar of Patents.

Patent Office, Perth,
21st June, 1901.

NOTICE is hereby given that the undermentioned applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 25, 21st June, 1901.

Application No. 3094.—FRANK GOLD, of Palmer Street, Richmond, in the State of Victoria, Nail Manufacturer, "A combination Mushroom-shaped fixed Water-tight Head and Washer Head and Screw Nail for securing Corrugated Iron Roofing and Fencing."—Dated 11th September, 1900.

Specification, 3s. Drawings on application.

Application No. 3392.—FREDERICK JOHN CORBETT, of 11 Portland Place, South Yarra, Victoria, Gentleman, "*An improved apparatus for manufacturing White Lead.*"—Dated 14th May, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3394.—HENRY FREDERICK BAND, of Sherman Avenue, Omaha, Nebraska, United States of America, Manufacturer, "*Improvements in Tool for Clamping Crossed Wires together.*"—Dated 16th May, 1901.

Specification, 6s. Drawings on application.

Application No. 3395.—ROSE MARY BADDELEY, wife of Arthur Baddeley, of Mount Eden Road, Auckland, New Zealand, Agent, "*A sliding Ventilator for doorways, windows, and all open spaces of buildings.*"—Dated 21st May, 1901.

Specification, 6s. Drawings on application.

Application No. 3401.—CHARLES LEWIS PULLMAN, of Washington, Columbia, United States of America, President of the Pullman Automatic Ventilating Company, "*Ventilation.*"—Dated 21st May, 1901.

Specification, 7s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
14th June, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 24, 14th June, 1901.

Application No. 3344.—WILLIAM PAYNE, of Orange, New South Wales, Assayer, "*Improved process or method of extracting Copper from the Ore.*"—Dated 23rd March, 1901.

Specification, 4s. 6d. Drawings on application.

Application No. 3355.—ALEXANDER MARTIN, of Sydney, New South Wales (Assignee of Joseph Lindsay Schmidt), "*Improvements in apparatus for generating Gas from Carbides, and for cooling and purifying same.*"—Dated 4th April, 1901.

Specification, 12s. Drawings on application.

Application No. 3396.—PATRICK H. REARDON, of 13 First Street, San Francisco, California, United States of America, Mechanic, "*Improvements in Engines for Rock Drills.*"—Dated 21st May, 1901.

Specification, 7s. Drawings on application.

Application No. 3397.—PATRICK H. REARDON, of 13 First Street, San Francisco, California, United States of America, Mechanic, "*Improvements in Attachments for Rock Drills.*"—Dated 21st May, 1901.

Specification, 4s. 6d. Drawings on application.

Application No. 3399.—ARTHUR IORWERTH JOSEPH, of Sydney, New South Wales, Gentleman, "*Improvements in and relating to Up-draught Cows.*"—Dated 21st May, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3400.—HANS PETER RASMUSSEN and WILLIAM HAGERTY WINTON, of Southland, New Zealand, Clerk and Mechanic, "*Improvements in Pneumatic Hubs for Cycle and other Wheels.*"—Dated 21st May, 1901.

Specification, 6s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
7th June, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 23, 7th June, 1901.

Application No. 3385.—GEORGE JONES ATKINS, of Ruskin Road, Tottenham, Middlesex, England, Metallurgical Chemist, "*Improvements in the manufacture of Chlorine, and in the employment thereof for bleaching, for disinfecting, for the treatment of Metals and Metallic Ores, and so forth.*"—Dated 8th May, 1901.

Specifications, 6s.

Application No. 3386.—GEORGE JONES ATKINS, of Ruskin Road, Tottenham, Middlesex, England, Metallurgical Chemist, "*Improvements in the Electrolysis of Chlorides of Metals of the Alkalies and Alkaline Earths for the purpose of obtaining Chlorine, and Apparatus therefor.*"—Dated 8th May, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3387.—RAND DRILL COMPANY, of 128 Broadway, New York, United States of America (Assignee of HENRY KOCH), "*Improvements in Rock Drills.*"—Dated 8th May, 1901.

Specifications, 9s. 6d. Drawings on application.

Application No. 3388.—ALBERT HAYES, of Salt Lake City, Utah, United States of America, Inventor, "*Improvements in Vapourising and Burning Hydrocarbon Oils.*"—Dated 8th May, 1901.

Specification, 12s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
31st May, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian *Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 22, 31st May, 1901.

Application No. 3288.—JOHN COLLINS CLANCY, Analytical Chemist and Metallurgist, and LUKE WAGSTAFF MARSLAND, Solicitor, both of Martin Place, Sydney, New South Wales, "*Improvements in the Extraction of Gold, Silver, Lead, Zinc, and other Metals from Sulphide Ores.*"—Dated 29th January, 1901.

Specification, 6s.

Application No. 3346.—BRADFORD HOMER LOCKE, of Denver, Colorado, United States of America, Mining Engineer, "*Devices for converting rotary into reciprocatory motion, especially applicable to percussion drills and other machines wherein a rapid reciprocatory movement is required.*"—Dated 23rd March, 1901.

Specification, 14s. Drawings on application.

Application No. 3351.—JAMES GILBERT DAW, of 2 Goring Road, Llanelly, in the county of Carmarthen, Great Britain, Engineer, "*An improved form of Stamping Heads and Dies or Anvils, on which the heads beat for the purpose of crushing Metalliferous Ores.*"—Dated 27th March, 1901.

Specifications, 2s. Drawings on application.

Application No. 3353.—HARRY EDWARD GRESHAM, of Craven Iron Works, Salford, Manchester, Lancaster, England, Engineer, "*Improvements in or applicable to Mechanism for actuating Brakes for Railway Wagons or Vehicles.*"—Dated 28th March, 1901.

Specification, 12s. 6d. Drawings on application.

Application No. 3354.—FERDINAND FANTA, of 6 Fullwoods Rents, High Holborn, London, England, Consulting Engineer, "*Improvements in and relating to the Manufacture and Repair of Incandescent Electric Lamps.*"—Dated 28th March, 1901.

Specification, 14s. Drawings on application.

Application No. 3359.—THOMAS JAMES CLARKE DREWETT, of 36 Trederwen Road, London, England, Stereotyper, "*Improved Flong for Stereo. Moulds.*"—Dated 10th April, 1901.

Specification, 6s. Drawings on application.

Application No. 3362.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*Thomas Steel Perkins*), "*Improvements in Rheostat Elements or Resistance Boxes.*"—Dated 12th April, 1901.

Specification, 3s. Drawings on application.

Application No. 3363.—THE GOLD ORE TREATMENT COMPANY, LIMITED, of 29 Gracechurch Street, E.C., London, England (assignee of HUGH FITZALIS KIRKPATRICK-PICARD), "*Improvements in the manufacture of the Haloid Compounds of Cyanogen.*"—Dated 12th April, 1901.

Specification, 4s. 6d.

Application No. 3367.—JAMES DUNLOP, of 206 Gorton Lane, Manchester, Lancaster, England, Engineer, "*Improvements in Pneumatic and like Percussive Hammers.*"—Dated 19th April, 1901.

Specification, 5s. 6d. Drawings on application.

Application No. 3371.—WALTER McDERMOTT, of 43 Threadneedle Street, London, England, Mining Engineer, "*Improvements in Screening Crushed Ore and other Materials.*"—Dated 25th April, 1901.

Specification, 10s. Drawings on application.

Application No. 3372.—JOHANNES CHRISTIAAN WEGERIF, of Leigh-on-Sea, Essex, England, Civil Engineer, "*Improvements in Roller Mills for Crushing and Grinding.*"—Dated 25th April, 1901.

Specification, 8s. Drawings on application.

Application No. 3375.—CHARLES HERBERT CURTIS, CLEMENT LEIGH WATSON SMITH, DAVID JAMES METCALFE, and ALFRED COPLEY PEARCY, all of 3 Gracechurch Street, London, England, and ANDREW FULLER HARGREAVES, of Roslin, Midlothian, Scotland, Gunpowder Manufacturers, "*Improvements in Explosives.*"—Dated 30th April, 1901.

Specification, 6s.

Application No. 3379.—GEORGE FRASER, the younger, and SAMUEL EDGAR FRASER, of Wai-kino, Auckland, New Zealand, Engineers, "*A Revolving Vacuum Filter for recovering the liquid from slimes, sands, pulp, and such like in connection with cyanide or other chemical applications.*"—Dated 7th May, 1901.

Specification, 6s. Drawings on application.

Application No. 3380.—HENRY MOORE SUTTON and WALTER LIVINGSTON STEELE, both of 194 North Jefferson Street, Dallas, Texas, United States of America, Electricians, "*Improved process of and apparatus for Separating a Conductive Substance from a Non-conductive Substance.*"—Dated 7th May, 1901.

Specification, 11s. Drawings on application.

Application No. 3382.—THOMAS HAMMILL HICKS, Physician, of No. 48 Brackenridge Street, Fort Wayne, Indiana, United States of America, and SAMUEL ROCKWELL ALDEN, Lawyer, of No. 190 West Berry Street, Fort Wayne, aforesaid, "*Apparatus for recovering Amalgamable Metals.*"—Dated 7th May, 1901.

Specification, £1 6s. 6d. Drawings on application.

Application No. 3383.—THE GARDNER ELECTRIC DRILL AND HAMMER COMPANY, LIMITED, of 7-11 Moorgate Street, London, England (assignee of LOUIS THEODORE SICKA), "*Improvements in Rock Drills.*"—Dated 8th May, 1901.

Specification, 4s. 6d. Drawings on application.

Application No. 3384.—THE GARDNER ELECTRIC DRILL AND HAMMER COMPANY, LIMITED, of 7-11 Moorgate Street, London, England (assignee of LOUIS THEODORE SICKA), "*Improvements in Rock Drills.*"—Dated 8th May, 1901.

Specifications, 4s. Drawings on application.

MALCOLM A. C. FRASER,

Registrar of Patents.

Patent Office, Perth,
24th May, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 21, 24th May, 1901.

Application No. 3051.—MICHAEL HEENAN, of Esperance, Western Australia, Miner, "*An improved Bottle-holder.*"—Dated 10th August, 1900.

Specification, 1s. 6d.

Application No. 3083.—JOHN SHEARER and DAVID SHEARER, both of Mannum, South Australia, Machinists, "*Improved Share and Foot-piece for Ploughs and other Cultivating Implements.*"—Dated 4th September, 1900.

Specifications, 4s. Drawings on application.

Application No. 3377.—ALBERT KINGMAN LOVELL, of St. Cloud Hotel, New York, United States of America, Gentleman, "*Lacing Hook Guards.*"—Dated 3rd May, 1901.

Specifications, 7s. 6d. Drawings on application.

Application No. 3378.—GUSTAVE LOUIS MOUCHEL, of 38 Victoria Street, London, England, Engineer, "*Improvements in and relating to Metal and Concrete Structures.*"—Dated 3rd May, 1901.

Specifications, £3 10s. Drawings on application.

Application No. 3381.—JOHN HARVEY KELLOGG, of Battle Creek, United States of America, Physician, "*Improvement in Vegetable Food Compounds.*"—Dated 7th May, 1901.

Specifications, 5s.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
17th May, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 20, 17th May, 1901.*

Application No. 3022.—JAMES FOX MELLOR, of Franklin Street, Adelaide, South Australia, Machinist, "*An improved Tooth for the comb of Grain-stripping Machines.*"—Dated 10th July, 1900.

Specification, 3s. 6d. Drawings on application.

Application No. 3368.—HENRY ISMAY MORALEE ROSS, of 49 Moray Place, Dunedin, New Zealand, Engraver, "*Improved Ventilation for Cars or Buildings.*"—Dated 19th April, 1901.

Specification, 10s. 6d. Drawings on application.

Application No. 3374.—FRANKLIN GEORGE BENSON, of Cheltenham Street, Malvern, in the State of South Australia, Engineer, "*Improvements in Sprayers for Perfume, Antiseptics, and the like.*"—Dated 30th April, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3376.—THE RIGHT HONOURABLE DOUGLAS MACKINNON BAILLIE HAMILTON COCHRANE, EARL OF DUNDONALD, of 34 Portman Square, in the county of London, England, "*An improvement in Tea and Coffee Pots.*"—Dated 30th April, 1901.

Specification, 2s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
10th May, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 19, 10th May, 1901.*
