

Supplement to Government Gazette

OF

WESTERN AUSTRALIA.

[Published by Authority.]

No. 54.
P.O. No. 32.

PERTH: FRIDAY, AUGUST 9.

[1901.]

CONTENTS:

| SUBJECT. | PAGE | SUBJECT. | PAGE |
|--|------|--|------|
| Complete Specifications accepted | 3179 | Alphabetical list of Inventions for which Patents have been granted | 3186 |
| Applications for Patents | 3184 | Subsequent Proprietors registered, Patents | 3187 |
| Provisional Specifications accepted | 3185 | Applications for Registration of Trade Marks | 3187 |
| Alphabetical list of Applicants for Patents | 3185 | Renewal Fees paid, Trade Marks | 3194 |
| Alphabetical list of Inventions for which Patents have been applied for | 3186 | Subsequent Proprietors registered, Trade Marks | 3194 |
| Alphabetical list of Patentees | 3186 | Alphabetical list of Registrants of Trade Marks | 3195 |
| | | Alphabetical list of Goods in respect of which Trade Marks have been registered | 3195 |

Note.—Throughout this Gazette the names in Italics within parentheses are those of Communicators of Inventions.

Complete Specifications.

Patent Office, Perth,
9th August, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 3142.—FREDERICK LAMBERT LORDEN, Draughtsman, and HENRY CRACROFT TROLLOPE, Engineer, both of Roseneath, Wellington, New Zealand, "*An improved Machine for Cutting Tobacco.*"—Dated 15th October, 1900.

Claims:—

1. The combination and arrangement of parts comprising my machine for cutting tobacco, substantially as and for the purposes set forth herein.

2. In a machine for cutting tobacco, in combination, a disc provided with knives and sloping faces for the knives, slots in the disc, a handle to turn the disc, and a box for receiving the cut tobacco attached to the disc, substantially as and for the purposes set forth herein.

3. A machine for cutting tobacco, comprising in combination, a disc provided with knives and sloping faces for the knives, slots in the disc, a handle to turn the disc, a box for receiving the cut tobacco attached to the disc, a bracket to which the disc is pivotted, and a mouth-piece placed centrally in relation to the disc, substantially as and for the purposes set forth herein.

4. A machine for cutting tobacco, comprising in combination, a disc provided with knives and pivotted, an adjustable mouth-piece placed centrally in relation to the disc, and means for securing the bracket to a table or the like, substantially as and for the purposes set forth herein.

5. A machine for cutting tobacco, comprising in combination, a disc provided with knives and sloping faces for the knives, slots in the disc, a handle to turn the disc, a box for receiving the cut tobacco attached to the disc, a bracket to which the disc is pivotted, a pin upon which the disc revolved screwed into the bracket and secured by a lock nut, a loop for holding the pin from turning while screwing up the lock nut, an adjustable mouth-piece placed centrally in relation to the disc, and a clamp formed on the lower part of the bracket with a sloping screw and a bevelled washer with a flat side bearing against the face of the bracket substantially as and for the purposes set forth herein.

6. In a machine for cutting tobacco in combination, a disc provided with knives having their back edges turned up and sloping faces for the knives, slots in the disc, a handle to turn the disc, and a box for receiving the cut tobacco hinged to the handle and secured by a spring catch, substantially as and for the purposes set forth herein.

Specification, 5s. 6d. Drawings on application.

Application No. 3428.—EDWARD WATERS, Junior, of 414-418 Collins Street, Melbourne, in the State of Victoria (*George Henry Oatway*), "*Improvements in Automatic Fire Alarms.*"—Dated 11th June, 1901.

Claims:—

1. In a fire alarm apparatus in which a contact maker supported by an approximately horizontal wire is arranged to make suitable contacts by the sagging of the wire by heating the combination therewith of means for sagging the wire without heating for the purpose of testing and restoring the wire to position substantially as described.

2. In a fire alarm apparatus in which a contact maker supported by an approximately horizontal wire is arranged to close suitable contacts by the sagging of the wire when heated the combination therewith for the purpose of testing the apparatus of means for raising the contacts relatively to the contact maker, or lowering the contact maker relatively to the wire and restoring the parts to position substantially as described.

3. In a fire alarm apparatus in which a wire which is approximately horizontal is arranged to maintain a normally closed circuit, and the sagging of the wire when heated opens the circuit, the combination therewith of means substantially such as are hereinbefore described for the purpose of testing the circuit without heating.

Specification, 9s. Drawings on application.

Application No. 3430.—METCHISLAW FIEDLER, of House Schelaputin, Mochowaja Street, in the City of Moscow, Russia, Director, "*Improvements in Explosive Compounds.*"—Dated 14th June, 1901.

Claims:—

1. A safety explosive consisting of two separate non-explosive parts:—*a.* A mechanical mixture of Berthollet salt $KClO_3$ and potassium permanganate $KMnO_4$, with or without the addition of bichromate of potassium $K_2Cr_2O_7$, pressed into paper, metal or other suitable cartridges, *b.* A fluid composed of a mixture of nitrobenzol $C_6H_5NO_2$ and turpentine $C_{10}H_{16}$, substantially in the proportions stated, which dry cartridges are saturated with the said fluid mixture shortly before the blasting is undertaken and exploded by the aid of a fulminate of silver or other suitable capsule or the like and approximate ignition means, substantially in the manner hereinbefore set forth.

2. In the application of the explosive as claimed in Claim 1, the employment of cartridges made of ordinary cotton, paper or similar substance, pasted over with fish or like glue to which potassium bichromate has been added, substantially as herein described.

Specification, 6s.

Application No. 3432.—GEORGE WESTINGHOUSE, of Westinghouse Building, Pittsburg, Pennsylvania, United States of America, Manufacturer, "*Improvements relating to the production and utilisation of Gas.*"—Dated 14th June, 1901.

Claims:—

1. Apparatus for the production and utilisation of gas, comprising a gas producer and a gas-engine or like device so connected that the products of combustion from the gas-engine are caused to pass through passages in the wall of the producer in close proximity to air passages in said wall for the purpose specified.

2. A producer in which the producing chamber is surrounded by a series of tubes enclosed in an annular space with or without deflecting plates or walls dividing said tubes into groups substantially as and for the purpose specified.

3. A producer having a steam-raising or superheating coil or coils combined therewith in such a manner, that after a portion of the sensible heat of the products of combustion has been employed in heating the air and steam supplied to the producing chamber, a further portion of such heat at a lower temperature is utilised in heating the steam-raising or superheating coil substantially as described.

4. A producer in which a supply of water regulated according to the amount of gas produced is provided in the wall of the producer which is heated by the produced gas, the water vapour thus formed being fed into the producing chamber with the air supply.

5. Gas producers constructed substantially as described with reference to Figure 2 or to Figure 9 or to Figure 11 of the accompanying drawings, and with or without an incinerator, for the purpose specified. Specification, 10s. Drawings on application.

Application No. 3433.—THOMAS JAMES McBRIDE
(General Manager for Australasia of Massey-Harris Co., Ltd.), of Nos. 570-576 Bourke Street, Melbourne, Victoria (Massey-Harris Company, Limited), "*Improvements in Mowers.*"—Dated 19th June, 1901.

Claims:—

1. In a mower, the combination with the cutter bar and the hand lever and the double arm located in proximity thereto and suitably journaled and raising means connecting the front end of the double arm to the heel of the cutter bar and means operated from the double arm for throwing the mechanism out of gear, of a stop designed to limit the upward movement of the raising means as and for the purpose specified.

2. In a mower, the combination with the cutter bar and the hand lever provided with a laterally extending stop, and the double arm located in proximity thereto and suitably journaled and raising means connecting the front end of the double arm to the heel of the mower bar and means operated from the double arm for throwing the mechanism into gear, of a stop on such double arm designed to come in contact with the aforesaid stop on the lower end of the hand lever as and for the purpose specified.

3. In a mower, the combination with the cutter bar and the hand lever, provided with a laterally extending stop and the double arm provided with a quadrantal front end and located in proximity to the hand lever and the raising chain extending from the quadrantal end of the double arm through a pulley on the bail to a standard on the end of the cutter bar, a spiral spring connected at one end to the tongue and at the other end to an arm pivotally connected to the rear of the double arm, a lateral projection attached to or forming part of the double arm, a bell crank suitably pivoted and having an inclined end with which such lateral projection is designed to come in contact, and a connection between the opposite end of the bell crank and the driving mechanism, of a stop on the double arm designed to come in contact with the aforesaid stop on the lower end of the hand lever as and for the purpose specified.

4. In a mower, the combination with the double arm suitably pivoted and provided with a lateral extension and means for operating the same, of a foot lever pivotally connected to the double arm above the lateral extension and extending over such extension rearwardly and means underneath the rearwardly projecting portion of the foot lever for varying the relation of such lever to the double arm as and for the purpose specified.

5. In a mower, the combination with the double arm suitably pivoted and provided with a lateral extension and means for operating the same, of a foot lever pivotally connected to the double arm above the lateral extension and extending over such extension rearwardly and a set screw extending into such lateral extension underneath the rearwardly projecting portion of the foot lever as and for the purpose specified.

6. In a mower, the combination with the double arm, suitably pivoted and provided with a lateral extension and means for operating the same, of a foot lever pivotally connected to the double arm above the lateral extension and extending over such extension rearwardly and means for varying the relation of such lever to the double arm as and for the purpose specified.

7. A pitman for mowers comprising a tubular intermediate portion with solid ends as and for the purpose specified.

8. In a mower, a pitman having a hollow laterally extending end journal for connecting it to the heel of the knife, and end disc for closing such hollow journal, so as to form an oil reservoir and oil ducts extending from the periphery of the journal into the oil chamber as and for the purpose specified.

9. In a mower, a pitman having a hollow laterally extending end journal, for connecting it to the heel of the knife, an end disc for closing such hollow journal, so as to form an oil reservoir and oil ducts extending from the periphery of the journal into the oil chamber and provided with oil holes outside the journal proper and closing caps or plugs therefor as and for the purpose specified.

10. In a mower, the combination with the crank wheel and wrist pin thereof, of the pitman and socket having a laterally extending shell at the end provided with an annular groove and the sleeve fitting within the laterally extending shell and provided with the holes communicating with such groove and a suitable cap secured on the threaded end of the sleeve as and for the purpose specified.

11. In a mower, the combination with the crank wheel and wrist pin thereof, of the pitman and socket having a laterally extending shell at the end provided with an annular groove and the sleeve fitting within the laterally extending shell and provided with the holes communicating with such groove and a suitable cap secured on the threaded end of the sleeve as and for the purpose specified.

12. In a mower, the combination with the crank wheel and wrist pin thereof, of the pitman and socket having a laterally extending shell at the end provided with an annular groove and an orifice at the top, of the sleeve having holes communicating with the annular groove and a spring finger pivotally held at the top of the socket and having one end arranged to normally close the orifice as and for the purpose specified.

13. In a mower, the combination with the crank wheel and wrist pin and the pitman having a lateral extension at the end provided with annular grooves of the sleeve having holes extending from the wrist pin to the groove as and for the purpose specified.

14. In a mower, the combination with the crank wheel and wrist pin and the pitman having a lateral extension at the end provided with an annular groove, of the sleeve having an annular groove opposite the groove in the lateral extension and provided with holes extending from such groove through the sleeve to the wrist pin as and for the purpose specified.

15. In a mower, the combination with the crank wheel and wrist pin and the pitman having a lateral extension at the end provided with an annular groove and the projection b^4 and b^5 in such groove substantially diametrically opposite, of the sleeve having an annular groove opposite the groove in the lateral extension and provided with diametrical holes extending from such groove through the sleeve to the wrist pin substantially on a line with the projection b^4 and b^5 and the wool filling in the upper portion of the groove as and for the purpose specified.

Specification, 15s. Drawings on application.

Application No. 3434.—THOMAS JAMES McBRIDE
(General Manager for Australasia of Massey-Harris Co., Ltd.), of Nos. 570-576 Bourke Street, Melbourne, Victoria (Massey-Harris Company, Limited), "*Improvements in Spring Tooth Cultivators.*"—Dated 19th June, 1901.

Claims:—

1. In a spring tooth cultivator, the combination with a rectangular cross frame and axle and wheels, of the sections carrying the teeth pivotally connected to the front bar of the frame and extending rearwardly over the frame and axle as and for the purpose specified.

2. In a spring tooth cultivator, the combination with the rectangular frame and wheels carrying the same, of the sections formed of the U-shaped bars and provided with means for carrying the spring teeth and a lever pivoted to the front bar of the frame and provided with upwardly extending lugs and a cross rod extending through the lugs and side bars of the section as and for the purpose specified.

3. In a spring tooth cultivator, the combination with the rectangular frame and wheels carrying the same, of the sections formed of the U-shaped bars and provided with means for carrying the spring teeth and a lever pivoted to the front bar of the frame and provided with upwardly extending lugs, a cross rod extending through the lugs and side bars of the section and means for normally holding the lever rigid with the frame as and for the purpose specified.

4. In a spring tooth cultivator the combination with the rectangular frame and wheels carrying the same, of the sections formed of the U-shaped bars and provided with means for carrying the spring teeth and a lever pivoted to the front bar of the frame and provided with upwardly extending lugs, a cross rod extending through the lugs and side bars of the section and a bolt extending through one end of the lever into a hole in the frame as and for the purpose specified.

5. In a spring tooth cultivator, the combination with the rectangular frame and axle and wheels at the outer end carrying the same and the tongue secured to the centre of the frame and the wheel carrying the forward end of the tongue, of the sections pivotally secured to the front bar of the frame and extending over the axle and frame and carrying the teeth as and for the purpose specified.

6. In a spring tooth cultivator, the combination with the angle iron frame and bearings at the rear side of the frame, of the short wheel axle extending through the end bearings and an adjustable gripping means for the inner end of the axle as and for the purpose specified.

7. In a spring tooth cultivator, the combination with the angle iron frame and end bearings at the rear side of the frame, and the slot in the rear bar of the frame, of the short wheel axle extending through the end bearings, the clip and pin extending through the short end of the axle and slot in the bar and the clamping lever fitting on to the threaded end of the pin as and for the purpose specified.

8. In a spring tooth cultivator, the combination with the frame and end bar secured to the same, of the brake shoes and crank rods carrying the same suitably journaled in the end bars and provided with square inner ends lying one above and close to each other and clamping means for such square portion to permit of the ready longitudinal adjustment and yet normally prevent the same as and for the purpose specified.

9. In a spring tooth cultivator, the combination with the frame and end bar secured to the same, of the brake shoes and crank rods carrying the same suitably journaled in the end bars and provided with square inner ends lying one above and close to each other, a foot lever provided at the lower end with a square opening and clamping jaws and bolt, whereby the square inner ends of the brake shoe rods are gripped and held together as and for the purpose specified.

10. In a spring tooth cultivator, the combination with the frame and end bar secured to the same, of the brake shoes and crank rods carrying the same suitably journaled in the end bars and provided with square inner ends lying one above and close to each other, a foot lever provided at the lower end with a square opening and clamping jaws and bolt whereby the square inner ends of the brake shoe rods are gripped and held together, a loop bracket through which the lever extends and a spiral spring extending between a teat on such loop bracket and a teat on the lower end of the lever as and for the purpose specified.

11. In a spring tooth cultivator, the combination with the sections pivotally connected at the forward end of the frame above the axle, of the cross bar suitably journaled in bearings supported on the frame and arms suitably connected to the ends of the cross bar, means for connecting them to the sections, the lever at one end of the cross bar and a co-acting quadrant with which it is designed to co-act secured to the frame, the supplemental arm on the cross bar, a rod pivotally connected at the rear end to the arm and extending through a bearing at the lower end of the tongue and a spring located between such latter bearing and the arm as and for the purpose specified.

12. In a spring tooth cultivator, the combination with the sections pivotally connected at the forward end of the frame above the axle, of the cross bar suitably journaled in bearings supported on the frame and arms suitably connected to the ends of the cross bar, the C-springs held in suitable clips secured to the cross bars of the sections, the chains connecting the arms to a point at the lower end of the C-springs, the chains connecting the arms to the upper ends of the C-springs and the lever for turning the cross shaft as and for the purpose specified.

13. In a spring tooth cultivator, the combination with the frame and the sections pivotally secured to the front end thereof, of a cross bar designed to carry the drills or sub-soil teeth and extending across the machine and binding means for securing the crossbar to the rear end of the sections so as to rigidly secure them together as and for the purpose specified.

14. In a spring tooth cultivator, the combination with the frame and the sections pivotally secured to the front end thereof and having a reverse U-shape underneath the ends of the section, of the double crossbar connected together by the blocks and bolts and the supplemental blocks fitting between the top of the double crossbar and the bottom of the double angle bar, the plates at the top of the double angle bar opposite the same and the bolts securing the plates bars and blocks together as and for the purpose specified.

15. The combination with the double crossbar and the drill or sub-soil teeth formed with a double shank of the grooved rear clip, the inner clip provided with the upper notches and forward projections, the front separating block and the pair of bolts extending through the separating block underneath the double crossbar through the notches in the clip and between the members of the double shank and through the rear clip as shown and for the purpose specified.

Specification, 16s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
2nd August, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 31, 2nd August, 1901.

Application No. 3115.—EDWIN PHILLIPS, of 533 Collins Street, Melbourne, Victoria, Certified Patent Agent and Engineer (*Luther Look*), "*An Ore Concentrator*."—Dated 28th September, 1900.

Specification, £2. Drawings on application.

Application No. 3416.—GEORGE WESTINGHOUSE, of Pittsburg, Pennsylvania, United States of America, Manufacturer, "*Improvements in Car Couplings*."—Dated 4th June, 1901.

Specification, 12s. 6d. Drawings on application.

Application No. 3418.—JAMES GRESHAM and FRANK JAMES GRESHAM, both of Craven Iron Works, Salford, Lancaster, England, Engineers, "*Improvements in or applicable to Injectors*."—Dated 5th June, 1901.

Specification, 7s. 6d. Drawings on application.

Application No. 3420.—FRANK AMBROSE MOSS, of Kalgoorlie, Western Australia, Engineer, "*The Swanson Filter Press and Cyanide Cock*."—Dated 10th June, 1901.

Specification, 3s. 6d. Drawings on application.

Application No. 3421.—JAMES HENRY SHAW, Photographer, of Moore Street, Bunbury, Western Australia, "*An invention for reducing Auriferous, Stanniferous, and other Wash-dirts, to be termed 'The Perfect Puddler'*."—Dated 10th June, 1901.

Specification, 4s. Drawings on application.

Application No. 3422.—GEORGE GARIBALDI TURRI, of Queen Street, Melbourne, Victoria, Patent Agent (*The Cosmopolitan Power Company*), "*Improvements in the art of Condensing Steam or Cooling Fluids*."—Dated 10th June, 1901.

Specification, 8s. Drawings on application.

Application No. 3426.—EDWARD WATERS, junior, of 414-418 Collins Street, Melbourne, Victoria (*The Linotype Company, Limited*), "*Improvements in Linotype Machines*."—Dated 11th June, 1901.

Specification, £1 17s. 6d. Drawings on application.

Application No. 3427.—PEDRO VICTOR SAN MARTIN, Chemist; GREGORIO SOLDANI, Merchant, and LORENZO BEVERLEY TRANT, Merchant, all of 253 Calle San Martin, Buenos Aires, Argentine Republic, "*Improved process for Tanning*."—Dated 11th June, 1901.

Specification, 3s.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office,
19th July, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or person intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 29, 19th July, 1901.

Application No. 3419.—WILLIAM DAVIDSON PEACOCK, of Hobart, Tasmania, Manufacturer, "*An improvement in Closing the ends of Tins for Perishable Comestibles*."—Dated 5th June, 1901.

Specification, 2s. 6d.

Application No. 3423.—GUSTAV ADOLPH HEINRICH PIETSCH, of Kiata East, Victoria, Farmer, "*Improvements in or connected with the Propulsion of Bicycles or Tricycles*."—Dated 10th June, 1901.

Specifications, 6s. 6d. Drawings on application.

Application No. 3429.—MARIE HOLAUBEK, of 21 Wienstrasse, Vienna, Austria, "*A Wheel with resilient tyre*."—Dated 13th June, 1901.

Specifications, 6s. Drawings on application.

Application No. 3431.—JAMES BAKER, of Melbourne, Victoria, Engineer, "*Improvements in Bicycles driven partly by the rider's weight*."—Dated 14th June, 1901.

Specification, 5s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
12th July, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 28, 12th July, 1901.

Application No. 3403.—EDWARD WATERS, jun., of 131 William Street, Melbourne, Victoria, Patent Agent (*The Linotype Company, Limited*), "*Improvements in Linotype Machines for making improved displayed advertisement linotypes and repeat linotypes, and in the said displayed advertisement linotypes*."—Dated 24th May, 1901.

Specification, £1 7s. Drawings on application.

Application No. 3404.—HENRY CLAY BULL, of 15 West Square, Lambeth, London, England, Engineer, and ARTHUR WATLING, of 59 and 60 Chancery Lane, London, England, Land Agent, "*Improvements in the Extraction of Gold from Sea Water*."—Dated 24th May, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3405.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*William Chapman*), "*Improvements in or relating to track construction for Electric Railways operated on the Conduit System.*"—Dated 24th May, 1901.

Specification, 10s. 6d. Drawings on application.

Application No. 3406.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*William Chapman*), "*Improvements in Insulators.*"—Dated 24th May, 1901.

Specification, 3s. 6d. Drawings on application.

Application No. 3407.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (*George Westinghouse*), "*Improvements in Draught Appliances for Railway Vehicles.*"—Dated 24th May, 1901.

Specification, 6s. Drawings on application.

Application No. 3409.—EDWARD JOHN MCFIE, of 317 Argyle Street, Hobart, Tasmania, Master Mariner, "*A new or improved anti-corrosive Boiler Composition, to be called 'McFie's Boiler Composition.'*"—Dated 25th May, 1901.

Specification, 2s.

Application No. 3412.—HYRUM SMITH WOOLLEY, Mining Engineer, Paris, State of Idaho, United States of America, "*Improvements in and relating to Furnaces.*"—Dated 28th May, 1901.

Specification, 9s. Drawings on application.

Application No. 3413.—WILLIAM ALLEN PENDRY, of 65 Farnsworth Avenue, Detroit, Michigan, United States of America, Mechanical Engineer, "*Improvements in Button-making Machines.*"—Dated 30th May, 1901.

Specification, £3 3s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
6th July, 1901.

NOTICE is hereby given that the undermentioned Application for the Grant of Letters Patent, and the complete specification annexed thereto, has been *accepted*, and is now open to public inspection at this Office.

Any person or persons intending to oppose this application must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 2922.—BERNARD HENRY TUCK, of Terowie, South Australia, Carpenter, "*A device for automatically throwing Windmills in and out of gear as reservoir fills or as water recedes in reservoir.*"—Dated 7th April, 1900.

Specification, 2s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
5th July, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing,

in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, *vide Gazette No. 27, 5th July, 1901.*

Application No. 3065.—CHARLES HARRISON WARD, of 60 Queen Street, Melbourne, Victoria, Metallurgist, "*An improved process of and Furnace for Chloridising or for Drying or Roasting Ores or other Metalliferous Materials, and for Volatilising and Separating their Constituents.*"—Dated 22nd August, 1900.

Specification, 12s. 6d. Drawings on application.

Application No. 3100.—JOHN ALBERT BLACKALL WESLEY, of Gawler, South Australia, Mining Engineer, "*Improvements in Concentrating Tables.*"—Dated 18th September, 1900.

Specification, 11s. Drawings on application.

Application No. 3105.—RAND DRILL COMPANY, of 100 Broadway, New York, United States of America (Assignee of ROBERT L. AMBROSE), "*Improvements in Rock Drills.*"—Dated 22nd September, 1900.

Specification, 19s. Drawings on application.

Application No. 3108.—GEORGE STURTZEL, of Mount Gambier, South Australia, Agent, "*An improved Totalisating Machine.*"—Dated 25th September, 1900.

Specification, 9s. 6d. Drawings on application.

Application No. 3356.—ALFRED GRA ROSSER, of Fremantle, Western Australia, Gentleman, "*An improved Lock Nut.*"—Dated 4th April, 1901.

Specification, 6s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
28th June, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, *vide Gazette No. 26, 28th June, 1901.*

Application No. 3410.—SAMUEL THOMAS LUGG, of 141 Green Street, Richmond, Victoria, Blacksmith, "*Improved appliances for the manufacture of Horse Shoes.*"—Dated 28th May, 1901.

Specification, 4s. Drawings on application.

Application No. 3411.—HUGH MAIDEN, of 10 Union Street, Pyrmont, and JAMES COURTS, of MacRae Street, Petersham, both in New South Wales, Divers, "*Improvements in Shear Legs.*"—Dated 28th May, 1901.

Specification, 3s. 6d. Drawings on application.

Application No. 3415.—JOHN DOBSON, of Kalgoorlie, Western Australia, Engineer, "*An improved Signalling Gong.*"—Dated 4th June, 1901.

Specification, 3s. 6d. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
21st June, 1901.

NOTICE is hereby given that the undermentioned applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 25, 21st June, 1901.*

Application No. 3094.—FRANK GOLD, of Palmer Street, Richmond, in the State of Victoria, Nail Manufacturer, "*A combination Mushroom-shaped fixed Water-tight Head and Washer Head and Screw Nail for securing Corrugated Iron Roofing and Fencing.*"—Dated 11th September, 1900.

Specification, 3s. Drawings on application.

Application No. 3392.—FREDERICK JOHN CORBETT, of 11 Portland Place, South Yarra, Victoria, Gentleman, "*An improved apparatus for manufacturing White Lead.*"—Dated 14th May, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3394.—HENRY FREDERICK BAND, of Sherman Avenue, Omaha, Nebraska, United States of America, Manufacturer, "*Improvements in Tool for Clamping Crossed Wires together.*"—Dated 16th May, 1901.

Specification, 6s. Drawings on application.

Application No. 3395.—ROSE MARY BADDELEY, wife of Arthur Baddeley, of Mount Eden Road, Auckland, New Zealand, Agent, "*A sliding Ventilator for doorways, windows, and all open spaces of buildings.*"—Dated 21st May, 1901.

Specification, 6s. Drawings on application.

Application No. 3401.—CHARLES LEWIS PULLMAN, of Washington, Columbia, United States of America, President of the Pullman Automatic Ventilating Company, "*Ventilation.*"—Dated 21st May, 1901.

Specification, 7s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Patent Office, Perth,
14th June, 1901.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the Complete Specifications annexed thereto, have been *accepted*, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 24, 14th June, 1901.*

Application No. 3344.—WILLIAM PAYNE, of Orange, New South Wales, Assayer, "*Improved process or method of extracting Copper from the Ore.*"—Dated 23rd March, 1901.

Specification, 4s. 6d. Drawings on application.

Application No. 3355.—ALEXANDER MARTIN, of Sydney, New South Wales (Assignee of *Joseph Lindsay Schmidt*), "*Improvements in apparatus for generating Gas from Carbides, and for cooling and purifying same.*"—Dated 4th April, 1901.

Specification, 12s. Drawings on application.

Application No. 3396.—PATRICK H. REARDON, of 13 First Street, San Francisco, California, United States of America, Mechanic, "*Improvements in Engines for Rock Drills.*"—Dated 21st May, 1901.

Specification, 7s. Drawings on application.

Application No. 3397.—PATRICK H. REARDON, of 13 First Street, San Francisco, California, United States of America, Mechanic, "*Improvements in Attachments for Rock Drills.*"—Dated 21st May, 1901.

Specification, 4s. 6d. Drawings on application.

Application No. 3399.—ARTHUR IORWERTH JOSEPH, of Sydney, New South Wales, Gentleman, "*Improvements in and relating to Up-draught Cowsls.*"—Dated 21st May, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3400.—HANS PETER RASMUSSEN and WILLIAM HAGERTY WINTON, of Southland, New Zealand, Clerk and Mechanic, "*Improvements in Pneumatic Hubs for Cycle and other Wheels.*"—Dated 21st May, 1901.

Specification, 6s. Drawings on application.

MALCOLM A. C. FRASER,
Registrar of Patents.

Applications for Patents.

JULY 13TH—AUGUST 3RD.

[Where Provisional Specification accompanies Application an asterisk is affixed.]

| No. | Date. | Name. | Address. | Title. |
|-------|-----------------|---|---------------------------|--|
| 3461 | 16th July, 1901 | Sinclair, J. | Balmain, N.S.W. ... | Improvements in screw-propellers and appurtenances for the propulsion and steering of ships, parts of which are applicable to universal joints or shaft couplings. |
| 3462 | 16th July, 1901 | Kingsland, W. | London, England ... | Improvements in or connected with electric switches having intermittent or step-by-step motions. |
| *3463 | 16th July, 1901 | Hayes, R. | Sydney, N.S.W. ... | An improved boiler-tube cleaner. |
| 3464 | 17th July, 1901 | Picard, H. F. K. | London, England ... | Improvements in or relating to the treatment of slags and bye-products containing zinc. |
| 3465 | 19th July, 1901 | Moss, F. A. | Kalgoorlie, W.A. ... | A new process for the extraction and separation of gold from finely crushed ore, sands, slimes, and other material. |
| *3466 | 25th July, 1901 | Holmes, J. S. | Carlton, Victoria ... | Improved manifold counter-check or sales book for drapers, traders, and others. |
| 3467 | 25th July, 1901 | Waters, E. jun. (<i>Linotype Co., Ltd.</i>) | Melbourne, Victoria | Improvements in wipers for use in linotype machines |
| 3468 | 25th July, 1901 | Führer, J. | Vienna, Austria ... | Improvements in explosives. |
| 3469 | 25th July, 1901 | Hewton, T. | Dunedin, N.Z. ... | An improved apparatus for straining wire. |
| 3470 | 25th July, 1901 | Ostergren, O. P. | New York, U.S.A. ... | Method of utilizing the latent heat of the steam in steam power apparatus. |
| *3471 | 27th July, 1901 | Hancox, E. | Stockton-on-Tees, England | Improvements in machinery or apparatus for closing the locking-bar or bars used in the construction of certain kinds of rivetless pipes. |
| *3372 | 27th July, 1901 | Hancox, E. | Stockton-on-Tees, England | Improvements in machinery or apparatus for forming dovetail edges on metal plates to be used in the manufacture of rivetless pipes. |
| *3473 | 27th July, 1901 | Hancox, E. | Stockton-on-Tees, England | Improvements in machinery or apparatus for forming dovetail edges on metal plates to be used in the manufacture of rivetless pipes. |
| 3474 | 27th July, 1901 | American Mining and Metal Extraction Co. (assignee of C. E. Dolbear) | Boston, U.S.A. ... | Improvements in electrostatic separators. |
| 3475 | 27th July, 1901 | Miller, J. C. | Canton, U.S.A. ... | Sterilizing and cooling liquids. |
| *3476 | 29th July, 1901 | Rayfield, J. W., and Manton, C. E. | Menzies, W.A. ... | Improved process for the recovery of gold from pug or clay. |
| 3477 | 31st July, 1901 | Macindoe, A. E. | Auckland, N.Z. ... | A packing holder for piston rods, shafts, and such like of engines that require packing. |
| 3478 | 31st July, 1901 | Grundy, T., and Potter, R. ... | Auckland, N.Z. ... | A combined safety clothes line and peg-holder or clamp. |
| 3479 | 31st July, 1901 | Tropenas, A. | Paris, France ... | Improvements in the manufacture of steel, steel castings, or ingot iron, and in apparatus and appliances employed therein. |
| 3480 | 31st July, 1901 | Oesterreichische Gasglühlicht und Electricitäts-Gesellschaft (assignee of Dr. C. A. von Welsbach) | Vienna, Austria ... | Improvements in supports for osmium filaments. |
| *3481 | 31st July, 1901 | Brown, W. | Melbourne, Victoria | Improvements in engines worked by oil, vapour, or gas |
| 3482 | 31st July, 1901 | Waters, E., jun. (<i>Linotype Co., Ltd.</i>) | Melbourne, Victoria | Improvements in linotype machines. |
| 3483 | 31st July, 1901 | Fredrikson, A. J. | Taberg, Sweden ... | Improvements in or connected with wax matches. |
| 3484 | 31st July, 1901 | Reisert, H. F. | Cologne, Germany | Improvements in and connected with the process and apparatus for purifying water. |
| 3485 | 31st July, 1901 | Ploeg, J. P. van der | The Hague, Holland | Improvements for treatment of ores and materials containing antimony. |
| *3486 | 1st Aug., 1901 | Gouget, R. A. E. | Cottesloe, W.A. ... | The "Gouget" self-acting endless path for use with automobiles and all other vehicles, and improvements connected with same. |
| 3487 | 1st Aug., 1901 | Lumière, A. and L. | Lyons, France ... | Panoramic photographic apparatus. |

Provisional Specifications.

Patent Office, Perth, 9th August, 1901.

A PPLICATIONS for Letters Patent, accompanied by Provisional Specifications, which have been accepted from the 13th July to the 3rd August, 1901:—

Application No. 3408.—JOHN FELIX MARTIN, of Gawler, South Australia, Engineer, "*Improvements in Cocks and Taps.*"—Dated 24th May, 1901.

Application No. 3417.—FREDERICK GEORGE WILSON, of 108 Queen Street, Melbourne, Victoria, Accountant (assignee of LEWIS JOHN PRANGLEY), "*A combined Sash Lift and Window Guard.*"—Dated 5th June, 1901.

Application No. 3425.—ENOCH RICHARDSON, of 22 Chaucer Street, Moonee Ponds, Victoria, Engineer, "*An improved Spark-arrester and Extinguisher for Locomotive, Traction, Portable, and other High-pressure Steam Engines.*"—Dated 11th June, 1901.

MALCOLM A. C. FRASER,
Registrar of Patents.

Subsequent Proprietors of Patents Registered from the 27th July to the 3rd August, 1901.

[NOTE.—The names in brackets are those of former proprietors.]

No. 526.—The New Calyx Drill and Boring Co., Ltd. [F. H. Davis.]

Trade Marks.

*Patent Office, Trade Marks Branch,
Perth, 9th August, 1901.*

IT is hereby notified that I have received the under-mentioned Applications for the Registration of Trade Marks.

Any person or persons intending to oppose any of such applications must leave particulars in writing, in duplicate (on Form F), of his or their objections thereto, within two months of the first advertisement of the applications in the *Western Australian Government Gazette*.

A fee of £1 is payable with such notice.

In the case of an Application in which have been inserted a statement and disclaimer (or a disclaimer only), a copy of the same is printed in *italics* in connection with the advertisement.

MALCOLM A. C. FRASER,

Registrar of Designs and Trade Marks.

Application No. 2158, dated 16th April, 1901.—JOHN DEWAR & SONS, LIMITED, of Perth, North Britain, and London, England, Distillers, to register in Class 43, in respect of Whisky, a Trade Mark, of which the following is a representation:—

The essential particular of the Trade Mark consists of the combination of devices, and the applicant Company disclaims any right to the exclusive use of the added matter, save and except its trading name and address.

This Mark was first advertised in the *Western Australian Government Gazette* of 14th June, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2175, dated 9th May, 1901.—GUTHRIE AND Co., of Fremantle, in the Colony of Western Australia, Merchants, to register in Class 42, in respect of Pineapples, a Trade Mark, of which the following is a representation:—

The essential particulars of this Mark consist of the combination of devices, and applicant Company disclaims any right to the exclusive use of the added matter, save and except its trading name.

This Mark was first advertised in the *Western Australian Government Gazette* of the 14th June, 1901—*vide* notice at head of Trade Mark advertisements.

Application No. 2179, dated 17th May, 1901.—ALLCOCK MANUFACTURING COMPANY, of 22 Hamilton Square, Birkenhead, in the county of Chester, England, and of the village of Sing Sing, New York, United States of America, Patent

Medicine Manufacturers, to register in Class 3, in respect of Plasters, included in Class 3, a Trade Mark, of which the following is a representation :—

If not sufficiently adhesive, heat the Plaster before applying.

Should there be difficulty in removing the Muslin on the FACE of the Plaster, wet the Muslin with water; then it comes off easily.

The essential particulars of the above Mark consist of the combination of devices, the signature of "B. Brandreth," and the name "Allcock's," and applicant Company disclaims any right to the exclusive use of the added matter, save and except their trading name and address.

This Mark was first advertised in the Western Australian Government Gazette of the 14th June, 1901—vide notice at head of Trade Mark advertisements.

Applications Nos. 2194 and 2195, dated 25th May, 1901.—SARAH JANE LEAKE, of Ellen Street, Fremantle, Western Australia, Manufacturer. Application No. 2194, to register in Class 44, in respect of Mineral and Aerated Waters, natural and artificial, including Ginger Beer; Application No. 2195 to register in Class 15, in respect of Glass Bottles for containing Mineral and Aerated Waters, natural and artificial, including Ginger Beer, a Trade Mark, of which the following is a representation :—

The essential particulars of the Mark consist of the device and the word "Anchor," and applicant disclaims any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 14th June, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2205, dated 5th June, 1901.—THE BUNYIP SOAP COMPANY, LIMITED, of Freeman Street, Adelaide, in the State of South Australia, Soap Manufacturers, to register in Class 47, in respect of Soap, a Trade Mark, of which the following is a representation :—

SOUTHERN SEAS.

This Mark was first advertised in the Western Australian Government Gazette of 14th June, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2206, dated 5th June, 1901.—CURTIS'S & HARVEY, LIMITED, 3 Gracechurch Street, London, England, Explosives Manufacturers, to register in Class 20, in respect of Explosive Substances, a Trade Mark, of which the following is a representation :—

BULL-DOG.

This Mark was first advertised in the Western Australian Government Gazette of the 14th June, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2207, dated 5th June, 1901.—CURTIS'S & HARVEY, LIMITED, 3 Gracechurch Street, London, England, Explosives Manufacturers, to register in Class 20, in respect of Explosive Substances, a Trade Mark, of which the following is a representation :—

This Mark was first advertised in the Western Australian Government Gazette of the 14th June, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2208, dated 5th June, 1901.—W. T. MURRAY & Co., LTD., of Auckland, New Zealand, Condensed Milk Manufacturers, to register in Class 42, in respect of substances used as food, or as ingredients in food, a Trade Mark, of which the following is a representation :—
