Note. - Throughout this Gazette the names in Italics within parentheses are those of Communicators of Inventions.

Complete Specifications.

Patent Office, Perth, 27th September, 1901.

OTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 3244.—HARRY REYNOLDS, of Christchurch, New Zealand, Watchmaker, "Improved Calculating and Indicating Apparatus, particularly applicable to Totalisator purposes."—Dated 27th December, 1900.

Claims :-

- 1. In apparatus for the purpose described the employment of wheels having hemispherical recesses in their circumferential peripheries and arranged opposite to each other whereby a ball passing into one of the recesses in one of the wheels, which is revolved by suitable means, engages in one of the recesses in the other wheel and causes it to revolve through part of a revolution, substantially as and for the purposes specified and illustrated.
- purposes specified and illustrated.

 2. In apparatus for the purpose described the combination of a hand lever to which is attached a knife designed when the lever is operated to force out one of a number of tickets pressed together by a spring, a connecting rod from said hand lever, arranged to oscillate a portion of a tube and deliver a ball to a race conducting said ball to indicating mechanism, two wheels in said mechanism arranged opposite to each other in the same plane and having corresponding recesses in their peripheries, means for revolving one of said wheels from any convenient source of power whereby the ball carried in a recess in the revolving wheel moves the other wheel through part of a revolution, motion being imparted thereby to drums or rollers having numbers upon their circumferential peripheries indicating the number of times the hand lever has been operated and consequently the number of backers of a competitor, substantially as and for the purpose specified.

 3. The combination in apparatus for the purpose described of an
- backers of a competitor, substantially as and for the purpose specified.

 3. The combination in apparatus for the purpose described of an inclined race to which an official issuing a ticket upon a competitor delivers a ball from a containing hopper said ball travelling in said race to a shute or tray from which it is delivered upon the periphery of a wheel having recesses each adapted to receive one ball, the wheel being constantly revolved from any convenient source of power, a second wheel having its periphery opposed to the first and having similar recesses in its periphery arranged at similar pitch, said second wheel being normally stationary but caused to move through part of a revolution when the revolving wheel carries a ball in one of its recesses so that it engages in one of the recesses in said second wheel, and indicating apparatus operated by the movement of the second wheel, substantially as specified.

4. The combination in apparatus for the purpose described of an inclined race to which an official issuing a ticket upon a competitor delivers a ball from a containing hopper said ball travelling in said race to a shute or tray from which it is delivered upon the periphery of a wheel having recesses each adapted to receive one ball, the wheel being constantly revolved from any convenient source of power, a second wheel having its periphery opposed to the first and having similar recesses in its periphery arranged at similar pitch, said second wheel being normally stationary but caused to move through part of a revolution when the revolving wheel carries a ball in one of its recesses to that it engages in one of the recesses in said second wheel, and indicating apparatus operated by the movement of the second wheel, an inclined shute conveying said ball passing from said wheels to similar wheels in similar mechanism provided to indicate the total number of backers of all competitors, substantially as specified herein.

Specifications, Ss. 6d. Drawings on application.

Specifications, 8s. 6d. Drawings on application.

Application No. 3373.—George Hall, of Lepperton, Taranaki, New Zealand, Builder, "Improvements in Ear-marks for Animals."—Dated 30th April, 1901.

- 1. In an ear-mark the combination of the hereinbefore described front and back buttons as and for the purposes set forth.

 2. In an ear-mark the combination of the parts constituting the hereinbefore described back button as and for the purposes set forth.

 3. In an ear-mark a shouldered pin as set forth projecting from one button, in combination with a perforated slitted steel plate secured in an opposite button, as and for the purposes set forth.

 Specification, 4s, 6d. Drawings on application.

Application No. 3490.—D. M. OSBORNE & COM-PANY, of 24 Genesee Street, Auburn, New York, U.S.A., Manufacturer (Assignee of Charles Stephen Sharp), "Improvements in the construction of Harrows."—Dated 5th August, 1901.

- Claims:

 1. In a harrow, a frame, a front shoe, a set of harrow-teeth, means for operating said set of harrow-teeth, a cross-bar pivotally connected to the harrow-frame, a set of trailing teeth secured to the cross-bar, one or more arms also secured to the cross-bar and having their free ends provided with wheels, and means for rocking the cross-bar on its axis and thereby simultaneously moving the trailing teeth and the wheels independently of the harrow-teeth, and for holding said cross-bar in a number of different positions independently of the harrow-teeth, substantially as and for the purpose described.
- teeth, substantially as and for the purpose described.

 2. In a harrow, a frame, a front shoe, a set of harrow-teeth, means for operating said set of harrow-teeth, a cross-bar pivotally connected to the harrow-frame, a set of trailing teeth secured to the cross-bar and operating arts adjustably secured to the cross-bar and having wheels journalled at their forward extremities, and means for rocking the cross-bar on its axis and thereby simultaneously moving the trailing teeth and the wheels independently of the harrow-teeth, and for holding said cross-bar in a number of different positions independently of the harrow-teeth, substantially as and for the purpose specified.
- 3. In a harrow, a frame, a front shoe, a set of harrow-teeth, a cross-bar pivotally connected to the renr portion of the harrow-frame, a set of trailing teeth secured to the cross-bar and operating at the rear of the harrow-teeth, means for rocking the cross-bar and holding the same in a number of different positions, and for releasing the cross-bar and permitting the same to rock freely, one or more forwardly projecting arms secured to said cross-bar and wheels journalled at the forward extremities of said arms, substantially as and for the purpose set forth.

4. In a harrow, a frame, a set of barrow-teeth borne by the frame, means for adjusting said teeth and for holding the same in different elevated positions, a set of trailing teeth, means for adjusting said trailing, teeth and for holding the same in different elevated positions independently of the harrow-teeth, one or more forwardly projecting arms movable with the trailing teeth, and wheels carried by the arms and adjustable toward and away from the trailing teeth, substantially as and for the purpose described.

Specifications, 8s. Drawings on application.

Application No. 3491.—D. M. OSBORNE & COM-PANY, of 24 Genesee Street, Auburn, New York, U.S.A., Manufacturer (Assignee of Charles Stephen Sharp), "Improved transport attachments for Harrows."—Dated 5th August, 1901.

Claims:

- Claims:—

 1. The combination with a harrow-frame; of a support having one end journalled in the harrow-frame, and its opposite end provided with a traction-wheel and movable from in front of the axis of the support opoints beneath and above said axis at the rear thereof, said support being also provided with a normally fixed arm for supporting the contiguous portion of the harrow, and said arm being extended rearwardly beyond the contiguous portion of the support when in its operative position, substantially as and for the purpose described.

 2. The combination with a harrow-frame of a support having one
- 2. The combination with a harrow-frame; of a support having one end pivotally connected to the harrow-frame, its opposite end provided with a traction-wheel, and its portion interposed between the harrow-frame and the traction-wheel provided with a normally fixed arm for supporting the contiguous portion of the harrow, said arm when in its operative position having its free end arranged beneath and at the rear of the axis of the support and above the traction-wheel, substantially as and for the purpose specified.
- 3. The combination with a harrow-frame; of a support pivotally connected to the harrow-frame and provided with a traction-wheel and with a normally fixed arm for supporting the contiguous portion of the harrow, said arm being extended outwardly from the contiguous portion of the support between the axis of said support and the axis of the traction-wheel, and a clamping member for preventing said arm from novement independently of the contiguous portion of the harrow, substantially as and for the purpose set forth.
- 4. The combination with a harrow-frame; of a support pivotally connected to the harrow-frame and provided with a traction-wheel and with a normally fixed arm for supporting the contiguous portion of the harrow, said arm being extended outwardly from the contiguous portion of the support between the axis of said support and the axis of the traction-wheel, a clamping member for preventing said arm from novement independently of the contiguous portion of the harrow, and a catch for holding the clamping member in its adjusted position, substantially as and for the purpose described.
- 5. The combination with a harrow-frame; of a support having one end journalled in the harrow-frame, and its opposite end provided with a traction-wheel and movable from in front of the axis of the support to points beneath and above said axis at the rear thereof, said support being also provided with a normally fixed arm for supporting the contiguous portion of the harrow, and said arm being extended rearwardly beyond the contiguous portion of the support when in its operative position, a clamping member secured to the free end of the arm for engaging the contiguous portion of the harrow and a catch for holding the clamping member in its adjusted position, substantially as and for the purpose specified.

 Specification 5.6 (d. Drawings on application.

Specification, 5s. 6d. Drawings on application.

Application No. 3493.—Joseph William Gilbert Alford, of 173 Gilles Street, Adelaide, South Australia, Auctioneer, and BRIDGET CATHER-INE MARTIN, of 2 Blende Street, Broken Hill, New South Wales, Spinster, "Improvement in and connected with ventilation by window openings."—Dated 5th August, 1901.

- 1. The combination and arrangement in a window opening of two sashes, the upper sash having on each side a socket with means of engagement to receive and engage the end of a rod attachment and the lower sash having a locking catch and means for locking one of said rods in such catch as herein described and illustrated by the drawings for the numbers set forth the purposes set forth.
- 2. The combination and arrangement in a window opening of (a) a pair of sliding sushes (b) a socket in each upper corner of the upper sash with means of engagement to receive and engage the end of a rod attachment (c) two rods each having at one end a cross-pin or key adapted to fit into and engage the socket in the upper sash and at the lower end a knob or handle, (d) on the lower sash a locking catch such as illustrated more particularly in Figure 9 whereby one of the rods is locked to the lower sash, (c) means such as illustrated more particularly in Figures 10, 11 and 12, whereby the two sashes when locked together are locked to the window casing, all substantially as herein described and illustrated by the drawings.
- 3. As an attachment to window sushes a pair of rods, each rod having at one end a suitable device such as a cross-pin or key adapted to fit into and engage a socket in the upper sash and at the lower end a knob or handle enabling the rod to be operated to raise or lower the sash, such rod being also slidable in a locking eatch attached to the bottom sash, as and for the purposes set forth.
- 4 The combination and arrangement of parts constituting the improved device for opening, closing, and adjusting top sashes of windows, as hereinbefore described and illustrated by the drawings. Specification, 5s. Drawings on application.
 - Application No. 3497.—Thomas Hood, of Gisborne, Chemist, and Frederick Treweek, of Whenuakura, Railway Ganger, both in New Zealand, "An improved preservative Composition for certain Metals and Substances."—Dated 7th August, 1901.

The preservative composition consisting of coal tar, benzine, and ferro-cyandide of potassium substantially as and in the proportions specified.

Specification, 1s. 6d.

No. 3498.—WILLIAM Application Clifton, of Perth, Western Australia (Raimund Janesch), "Improvements in temporary Framing for Concrete Construction."—Dated 8th August,

In constructions of concrete or reinforced concrete or similar plastic materials, the use of temporary framing or moulds, in which that part of the moulds which is in contact with the finished surface of the structure consists of corrugated sheets of metal adjustable by lapping to the widths or lengths required, without cutting or waste, and adaptable to plane or curved surfaces, and capable of repetitive use without waste or loss substantially as above described, shown and illustrated.

Specification, 5s. 6d. Drawings on application.

Application No. 3503.—CHARLES CONGALTON BETHUNE, of King Street, Sydney, New South Wales. Professor of Music, "An improved Burglar Alarm."—Dated 12th August, 1901.

- A contr vance to be used in connection with an electric battery and an alarum consisting of a metal ground plate, a movable metal plate linged thereto, and an insulating sheet separating the above plates, substantially as described.
- 2. A burglar alarum comprising an ordinary battery and alarum in combination with a contrivance for placing in contact with a door or window, consisting of a metal ground plate; a hinged metal plate and an insulating sheet, substantially as described.

Specification, 2s. 6d. Drawings on application.

Application No. 3504.-Robert Perkins, of Ucolta, South Australia, Farmer, and ROBERT CARROLL, of Bunbury, Western Australia, Woolbuyer, "Perkins's Patent Bay Lifter."— Dated 13th August, 1901.

An apparatus for attachment to a dray, waggon, or other vehicle, by which bags or other loading may be lifted into the vehicle, substantially as described and shown herein and in the drawings attached hereto. Specification, 2s. Drawings on application.

Application No. 3529. John Whitworth Shaw, of 285 Bulwer Street, Perth, Western Australia, Signal Inspector, "Improvements in Railway Interlocking Signals."—Dated 6th September, 1901.

- 1. In railway signalling appliances a locking bolt or plunger which is in operative circuit with the levers of a "home" and "starting" signal in combination with a sliding arm secured to the lever of the other or opposite companion "home" signal, said plunger and arm operating and engaging with each other in an interlocking manner, substantially as and for the purposes herein set forth and described and as illustrated in the attached drawings.
- 2. In railway signalling appliances a sliding pulley provided with a counter-balance weight for taking up and paying out the slack of the circuit connections of the "home" and "starting" signals, substantially as and for the purposes herein set forth and described and as illustrated in the attached drawings.
- 3. In railway signalling appliances the peculiar construction and combination of parts consisting of a circuit having its terminals at the levers of a "home" and "starting" signals and which circuit carries a locking bolt for to engage and interlock with a sliding arm pivotted to the lever of a "home" signal, said circuit carried over fixed pulleys and over a counter-balance pulley, the whole working in fellowship substantially as and for the purposes herein set forth and described and as illustrated in the attached drawings.

 Specification 5s. Drawings on application

Specification, 5s. Drawings on application.

MALCOLM A. C. FRASER, Registrar of Patents.

> Patent Office, Perth, 20th September, 1901.

TOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 38, 20th September, 1901.

Application No. 3483.—Andrew John Fredrikson, of Smalands, Taberg, Sweden, Engineer, "Improvements in or connected with Wax Matches."—Dated 31st July, 1901.

Specification, 3s. 6d.

Application No. 3484.—HANS FRANZ REISERT, of 34 Huhnsgasse, Cologne, Germany, Engineer, "Improvements in and connected with the process and apparatus for purifying Water."—Dated 31st July, 1901.

Specification, £5. Drawings on application.

Application No. 3487.—Auguste Lumiere and Louis Lumiere, both of 21 Rue Saint Victor, Lyons, Monplaisir, Manufacturers of Photographic Plates, "Panoramic Photographic Apparatus."—Dated 1st August, 1901.

Specification, 9s. Drawings on application.

Application No. 3494.—George Archibald Lowry, Mechanical Engineer, of 1124 Monadnock Block, 260 Dearborn Street, Chicago, Illinois, United States of America, "Process of and Apparatus for ginning Cotton and similar material."—Dated 5th August, 1901.

Specification, £1 5s. Drawings on application.

Application No. 3496.—VALENTINE JOHN SADDLER, of 14 Market Buildings, Flinders Lane, Melbourne, Victoria, Railway Contractor (Assignee of Alfred Dean), "Improvements in and connected with Aerial Wireways or Tramways."—Dated 5th August, 1901.

Specification, 8s. Drawings on application.

Application No. 3505.—The Honourable Charles Algernon Parsons, Engineer, of Heaton Works, Newcastle-on-Tyne, England, "Improvements in Turbo-compressors and Pumps."—Dated 15th August, 1901.

Specification, 7s. 6d. Drawings on application.

Application No. 3506.—Donald Macdonald, of Orroroo, South Australia, Cyclist, "Improvements in Gearing of Bicycles."—Dated 19th August, 1901.

Specification, 9s. Drawings on application.

Application No. 3508.—John Francis O'Rourke, of 53 West 85th Street, Borough of Manhattan, New York, United States of America, Engineer, "Improvements in Subterranean or Subaqueous Dam or Foundation Construction."—Dated 20th August, 1901.

Specification, 16s. Drawings on application.

Application No. 3509.—Edward Waters, Junior, of 414-418 Collins Street, Melbourne, Victoria (George Henry Ellis), "Manufacture of Twine from unretted Flax Straw, and slivers for making the same."—Dated 20th August, 1901.

Specification, 4s. 6d. Drawings on application.

Application No. 3510.—Dunlop Pneumatic Tyre Company of Australasia, Limited, of 108 Flinders Street, Melbourne, Victoria (Henry James Doughty), "Improvements in apparatus for use in the manufacture of Covers for Wheel Tyres."—Dated 20th August, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3513.—FREDERICK HENRY Sprang, of 86 Grange Road, Bermondsey, London, England, India-rubber Manufacturer, "Improvements in the manufacture of Diving Dresses."—Dated 22nd August, 1901.

Specification, 8s. Drawings on application.

Application No. 3516.—THOMAS PATRICK TIERNEY and ERNEST JOHN DOUGLAS, of Boulder City, Contractor and Surface Foreman, "An improved process for precipitating Saline Matters and other Solids from Water, specially in Condenser and other Steam Boilers."—Dated 26th August, 1901.

Specification, 2s. 6d.

Application No. 3517.—CHARLES E. PATRIC, of Springfield, Ohio, U.S.A., Manufacturer, "Distributors for Grain Drills."—Dated 30th August, 1901.

Specification, 9s. 6d. Drawings on application.

Application No. 3518. - ROBERT HENRY CARTER, of Kimbolton, New Zealand, Farmer, "An improved Axe-head and Handle therefor, and for other Analogous Implements." — Dated 30th August, 1901.

Specification, 4s. Drawings on application.

Application No. 3524.—Jesse Hopson and Henry Hayward Priest, both of Brisbane, Queensland, "Improvements in Hand signal Lamps."—Dated 3rd September, 1901.

Specification, 4s 6d. Drawings on application.

Application No. 3526.—The Cereal Sugar Company, of 828 Gratiot Street, St. Louis, United States of America (Assignee of William Rilea Long), "Improvements in and relating to Process and Apparatus for refining Grape Sugar."—Dated 5th September, 1901.

Specification, 11s. Drawings on application.

Application No. 3528.—AGGLAMENT LIMITED, of Cambrian Chambers, Swansea, South Wales (Assignee of Herbert Charles Bath Forester and John Arthur Ash Yeo), "Improvements in or relating to the Manufacture of Artificial Furl, and Apparatus therefor." - Dated 5th September, 1901.

Specification, £1 6s. Drawings on application.

MALCOLM A. C. FRASER, Registrar of Patents.

> Patent Office, Perth, 13th September, 1901.

A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 36, 6th September, 1901.

Application No. 3109.—John Henry Bailey Brown, of Fremantle, Salesman, "An improved Butter Press."—Dated 25th September, 1901.

Specifications, 1s. 6d. Drawings on application.

Application No. 3116.—George James Kingsbury, of Coolgardie, Western Australia, Plumber, "Apparatus for the combined generation, distribution, and supply of Acetylene Gas."—Dated 2nd October, 1900.

Specifications, 7s. Drawings on application.

Application No. 3424.—Frank Lemont Dodgson, of Rochester, New York, United States of America, Engineer, "Improvements in Pneumatic Railway Signalling."—Dated 10th June, 1901.

Specifications, 13s. Drawings on application.

Application No. 3439.—ALEXANDER MUIRHEAD, of Shortlands, Kent, England, Doctor of Science, Telegraph Engineer, "Improvements relating to Electric Telegraphy."—Dated 24th June, 1901.

Specification, £1 1s. Drawings on application.

Application No. 3447.—Frank Lemont Dodgson, of Rochester, New York, United States of America, Engineer, "Improvements in Pneumatic Railway Signalling."—Dated 2nd July, 1901.

Specification, 19s. Drawings on application.

Application No. 3451.—WILLIAM TIMBRELL CLARK, of Perth, Consulting Engineer, "An Improved Spark-arrester for Locomotive and other Steam Boilers."—Dated 4th July, 1901. Specification, 7s. Drawings on application.

Application No. 3452.—EUGEN SCHILZ, of Johannesburg, South Africa, "An improved Extraction of Gold Ores."—Dated 4th July, 1901.

Specifications, 15s.

Application No. 3453.—John Breedon, of John Street, Granville, near Sydney, New South Wales, Brickmaker, "An improved method, with apparatus therefor, for treating Kaolin, Slimes, Saponaceous Earthy Matter, and the like, preparatory to the extraction, by either amalgamation, chlorination, leaching, or such like process, of the precious metals contained therein."—Dated 5th July, 1901.

Specification, 23s. Drawings on application.

Application No. 3455.—George John Hoskins and Charles Henry Hoskins, Engineers, of Darling Street, Ultimo, Sydney, New South Wales, "An improved Ring and Joint to be used specially with the locking bar type of Sheet Metal Pipes."—Dated 8th July, 1901.

Specification, 5s. 6d. Drawings on application.

Application No. 3456.—Francis James Odling, of 2 Prince's Walk, Prince's Bridge, Mining Engineer, and William Jamieson, of 31 Queen Street, Gentleman, both in Victoria, "Improved Process for Magnetically Separating Pulverized Ores, Sulphide or otherwise, from their gangue or from each other."—Dated 9th July, 1901.

Specification, 5s. 6d. Drawings on application.

Application No. 3458.—James Peter Roe, of 721 King Street, Pottstown, Pennsylvania, United States of America, Mechanical Engineer, "Improvements in and relating to Puddling Machines."—Dated 9th July, 1901.

Specification, £1. Drawings on application.

Application No. 3461.—John Sinclair, of 15 Ballast Point Road, Balmain, near Sydney, New South Wales, Marine Engineer, "Improvements in Screw-propellers and appurtenances for the propulsion and steering of ships, parts of which are applicable to universal joints or shaft couplings."—Dated 16th July, 1901.

Specification, 15s. Drawings on application.

Application No. 3462.—WILLIAM KINGSLAND, of 8 Bream's Buildings, Chancery Lane, London, England, Electrical Engineer, "Improvements in or connected with Electric Switches having intermittent or step-by-step motions."—Dated 16th July, 1901.

Specification, 12s. 6d. Drawings on application.

Application No. 3464.—Hugh Fitzalis Kirk-Patrick Picard, Metallurgist, of 44 London Wall, London, E.C., England, "Improvements in or relating to the Treatment of Slags and Byeproducts containing Zinc."—Dated 17th July, 1901.

Specification, 3s.

Application No. 3465.—Francis Ambrose Moss, of Kalgoorlie, Western Australia, Metallurgist, "A new process for the Extraction and Separation of Gold from finely crushed Ore, Sand, Slimes, and other material."—Dated 19th July, 1901.

Specification, 5s. 6d. Drawings on application.

Application No. 3467.—Edward Waters, Jun., of 414-418 Collins street, Melbourne, Victoria, Patent Agent (The Linotype Company, Limited), "Improvements in Wipers for use in Linotype Machines." -- Dated 25th July, 1901.

Specification, 6s. 6d. Drawings on application

Application No. 3468.—Josef Führer, of 5 Marokkaner Strasse, Vienna, Austria, "Improvements in Explosives."—Dated 25th July, 1901. Specification, 3s.

> MALCOLM A. C. FRASER, Registrar of Patents.

Specification, £1 17s. 6d. Drawings on application.

Application No. 3427.—Pedro Victor San Martin, Chemist; Gregorio Soldani, Merchant, and Lorenzo Beverley Trant, Merchant, all of 253 Calle San Martin, Buenos Aires, Argentine Republic, "Improved process for Tanning."—Dated 11th June, 1901.

Specification, 3s.

MALCOLM A. C. FRASER,

Registrar of Patents.

Notice of Application for Amendment.

 $[{\rm N.B.-The}\ {\rm paging}\ {\rm referred}\ {\rm to}\ {\rm is}\ {\rm that}\ {\rm of}\ {\rm the}\ {\rm proposed}\ {\rm Amended}\ {\rm Specification.}]$

In the matter of Application for Letters Patent No. 3222, dated 8th December, 1900, by John James Christmas, of Perth, Western Australia, Mining Agent, for an invention for "An improved Concentrating and Goldsaving Table."

Notice is hereby given that the above John James Christmas has applied for leave to amend the complete Specification and drawings of his invention, alleging as his reason for so doing, "in order to more fully and accurately explain the exact nature of my invention and its essential features."

The amendments proposed are as follows, viz. [Reference being had to amended copy of Specification and drawings lodged in Patent Office, Perth]:—

Strike out the whole of page 1.

Page 2.

Strike out lines 1 to 5, and insert the words:—"This invention relates to the construction and arrangement of an improved table which has for its object the exhaustive concentration of all classes of ore, slimes, tailings, and other finely-divided material, so as to win the gold particles contained therein or other valuable metallic concentrates."

Strike out the balance of page 2.

Pages 3 and 4.

Insert the following:—" In order that my invention may be clearly and accurately understood, I will refer to the accompanying drawings which illustrate the construction of same."

In these drawings:-

Figure 1 shows a portion of the table in longitudinal section, and with the travelling brush.

Figure 2 being a similar view showing the detachable ripple constructed of wood in lieu of composition.

Figure 3 is a transverse view of the table mounted on its frame; while

Figure 4 is a top plan of same.

In these drawings the arrows in full denote the incline of the table, and the consequent flow of the wash water, and the stuff under treatment, while the broken arrows show the direction of the travelling brush, and of the consequent removal of the concentrates. A represents the corrugated table which is formed with the crests or ripples as A1 and the troughs or depressions as A2 and such table is placed at the approved incline and provided with the head or feed apron as A3 and on to which the stuff to be concentrated is delivered. On and along this table I place or bed down a blanket, canvas or analogous material as B in such a manner as to closely follow the contour of the table A and as clearly shown in Figures 1 and 2 by dotted lines. In the troughs A2 of the table I employ a certain composition formed approximately of seven parts resin and one part of fat or oil. This composition is poured on when hot and thereby forms the additional ripples of the shape as shown in Figure 1 by the letter C or approximating the etc. This composition adheres to the blanket as B and at its conjunction on either side forms the traps C1 in which the gold and concentrates are collected, and which concentrates are denoted in Figures 1 and 2 by small dots.

In lieu of this composition for forming the additional ripple and traps I may employ a wood ripple as D if the section shown in Figure 2, and which ripple is secured in a detachable manner to the main table A by means of the screw D2.

The table is provided with a longitudinal carry-away gutter as E into which the concentrates are swept as they accumulate in the traps C1, while on the opposite side of the table is formed the piece E1 for to give an easy lead to the brush. To effect such removal I employ the brush F which travels in a direction transversely to that of the lie of the table. This brush is connected to the belts F1, which latter travel over the wheels F2 on the running shafts F3 as mounted on the brackets shown in Figure 3. These wheels being driven by the pulleys F4 in usual manner.

It is obvious that I may attach two or more brushes to these travelling belts so as to effect a more constant

Page 5.

Insert the following:—removal of the concentrates as the amount of accumulation of the concentrates in the traps is controlled and determined either by the speed of the travel of the brush or the number of the brushes employed.

The mode of operation of the invention is apparent and easily followed by a perusal of this specification in conjunction with the attached drawings.

Strike out lines 8-22.

Insert the following:-

Having now particularly described and ascertained the nature of my said invention and in what manner the same is to be performed I declare that what I claim is:—

Page 6.

Insert the following:-

- 1. In combination with a concentrating table, additional ripple pieces formed of a peculiar composition substantially as herein set forth and described and as illustrated in Figure 1 of the accompanying drawings.
- 2. In combination with a concentrating table, a brush or brushes which travels or travel transversely across such table for the removal of the concentrates substantially as herein set forth and described and as illustrated in Figures 1, 3, and 4 of the attached drawings.
- 3. In combination with a concentrating table: Additional ripple pieces made of wood and which ripples are secured to the main table, but in a detachable and replacable mann r, substantially as herein set forth and described and as illustrated in Figure 2 of the attached drawings.
- 4. The construction of an improved gold saving table covered with blanketting and provided with additional ripple pieces made of a peculiar composition or of wood and with a carry away gutter in combination with a travelling brush or travelling brushes for the removal of the concentrates substantially as herein set forth and described and as illustrated in the accompanying drawings.

Any person or persons intending to oppose the said application for amendment must leave particulars, in writing (on Form G.) of his or their objections thereto, within one calendar month from the date hereof. A fee of ten shillings (10s.) is payable with such notice.

Dated this 6th day of September, 1901.

MALCOLM A. C. FRASER,

Registrar of Patents.

Renewal Fees Paid on Patents from the 14th to the 21st September, 1901.

Fees payable before the end of the fourth year in respect of the three following years:—

No. 1530.-T. Willmot and M. T. Morgan.

1795.-S. P. Wood.

1797.-H. B. Moody,

1862.--J. Kirkaldy.

Subsequent Proprietors of Patents Registered from the 14th to the 21st September, 1901.

[Note.—The names in brackets are those of former proprietors,]

No. 1358.—F. A. Moss and R. S. Black. [D. White and T. M. Simpson.]

Nos. 3405 and 3406.—The British Westinghouse Electric and Manufacturing Co., Ltd. [R. Sparrow.]

Trade Marks.

Patent Office, Trade Marks Branch, Perth, 27th September, 1901.

TT is hereby notified that I have received the undermentioned Applications for the Registration of Trade Marks.

Any person or persons intending to oppose any of such applications must leave particulars in writing, in duplicate (on Form F), of his or their objections thereto, within two months of the first advertisement of the applications in the Western Australian Government Gazette.

A fee of £1 is payable with such notice.

In the case of an Application in which have been inserted a statement and disclaimer (or a disclaimer only), a copy of the same is printed in *italics* in connection with the advertisement.

MALCOLM A. C. FRASER, Registrar of Designs and Trade Marks.

Application No. 1931, dated 7th June, 1900.—WILLIAM BERRY, of Diamond Oil Blacking Works, Rochdale Road, Manchester, England, Blacking Manufacturer, to register in Class 50, s.s. 6, in respect of Blacking and Boot Polish, a Trade Mark, of which the following is a representation:—

W.BERRY'S DIAMOND

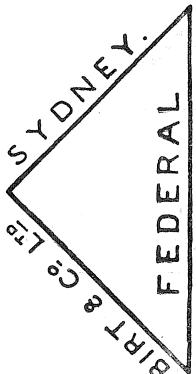

The essential particular of this Trade Mark consists of the word "Diamond," and I disclaim any right to the exclusive use of the added matter, except in so far as it consists of my name.

This Mark was first advertised in the Western Australian Go erament Gazette of 9th August, 1901—vide notice at head of Trade Mark advertisements.

Applications Nos. 2230-1-2, dated 2nd July, 1901.—BIRT & COMPANY, LIMITED, of 7 Macquarie Place, Sydney, in the State of New South Wales, Merchants. Application No. 2230 to register in Class 4, in respect of Wool and Tallow; Application No. 2231, to register in Class 37, in respect of Hides and Skins; and Application No. 2232, to register in

Class 42, to register in respect of Fresh, Frozen, and Chilled Meats and Butter, a Trade Mark, of which the following is a represention:—

The essential particular of this Trade Mark consists of the word "Federal," and applicant Company disclaims any right to the exclusive use of the added matter, except in so far as it consists of its own name and address.

This Mark was first advertised in the Western Australian Government Gazette of the 9th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2241, dated 27th July, 1901.—STAPLEY AND SMITH, of 128 London Wall, London E.C., Manufacturers of Ladies' and Children's Clothing and Undergarments, to register in Class 38, in respect of Articles of Clothing, a Trade Mark, of which the following is a representation:—

This Mark was first advertised in the Western Australian Government Gazette of 9th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2242, dated 27th July, 1901.—The CLIPPER PNEUMATIC TYRE COMPANY, LIMITED, of Lichfield Street, Aston Cross, Birmingham, England, Manufacturers, to register in Class 40, in respect of India-rubber Tyres for Cycles and for other Vehicles, a Trade Mark, of which the following is a representation:—

The essential particulars of the Trade Mark are the representation of a clipper ship at sea, combined with the representation of a pneumatic tyre and the name of the Applicants.

[3This Mark was first advertised in the Western Australian Government Gazette of 9th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2243 and 2244, dated 27th July, 1901.—WILLIAM GOSSAGE & SONS, LIMITED, of Widnes, Lancashire, England, Soap Manufacturers. Application No. 2243, to register in Class 47, in respect of Candles, Common Soap, Detergents, Illuminating, Heating, or Lubricating Oils, Matches, and Starch, Blue, and other preparations for Laundry purposes; Application No. 2244, to register in Class 48, in respect of Perfumery (including toilet articles, preparations for the teeth and hair and perfumed soap), a Trade Mark, of which the following is a representation:—

PAYMASTER

This Mark was first advertised in the Western Australian Government Gazette of 9th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2248, dated 2nd August, 1901.—ARTHUR WILLIAM BERRYMAN, of 189 Murray Street, Perth, Western Australia, Boot Manufacturer, to register in Class 38, in respect of Boots and Shoes, a Trade Mark, of which the following is a representation:—

KANGOWALLA.

This Mark was first advertised in the Western Australian Government Gazette of 16th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2250, dated 5th August, 1901.—The persons trading together under the name and style of "Marshall & Co.," of Degraves Building, Degraves Street, Melbourne, in the State of Victoria, Commonwealth of Australia, Boot and Shoe Manufacturers and Importers, to register in Class 38, in respect of Boots and Shoes, a Trade Mark, of which the following is a representation:—

This Mark was first advertised in the Western Australian Government Gazette of 16th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2253, dated 5th August, 1901.— California Fig Syrup Co., 398 Church Street, San Francisco, California, U.S.A., Manufacturing Chemists, to register in Class 3, in respect of Chemical Substances prepared for use in Medicine and Pharmacy, a Trade Mark, of which the following is a representation:—

CALIFIG

This Mark was first advertised in the Western Australian Government Gazette of 16th August, 1901—vide notice at head of Trade Mark advertisements.

Application Nos. 2148 and 2149, dated 28th March, 1901.—The West Australian Apothecaries Company, Limited, of Perth, Western Australia. Application No. 2148, to register in Class 48 in respect of Washes and Preparations for the hair; and Application No. 2149, to register in Class 3 in respect of Chemical substances prepared for use in medicine and pharmacy, a Trade Mark, of which the following is a representation:—

The above Mark has been used by the applicant Company and its predecessors in business in respect of the goods mentioned since before 1885.

This Mark was first advertised in the Western Australian Government Gazette of 23rd August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2247, dated 2nd August, 1901.—Engelbert & Co., of Murray Street, Perth, Western Australia, to register in Class 45, in respect of Tobacco; Cigars and Cigarettes, a Trade Mark, of which the following is a representation:—

CROWN.

This Mark was first advertised in the Western Australian Government Gazette of 23rd August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2254, dated 9th August, 1901.—Salmon & Gluckstein, Limited, Merchants, Clarence Works, St. Luke's, London, E.C., to register in Class 45, in respect of Tobacco, manufactured or unmanufactured, a Trade Mark, of which the following is a representation:—

WINGED WHEEL.

This Mark was first advertised in the Western Australian Government Gazette of 23rd August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2255, dated 13th August, 1901,—ESTHER ABRAHAMS, of Elizabeth Street, Melbourne, Victoria, Cycle Agent, to register in Class 50, s.s. 10, in respect of goods not included in other classes, a Trade Mark, of which the following is a representation:—

The essential particular of the above Mark consists of the combination of devices, and the applicant disclaims any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 23rd August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2110, dated 30th January, 1901.— Havana Commercial Company, of 102 Galiano Street, Havana, in the Isle of Cuba, and of 135 Broadway, New York, in the United States of America, Cigar Manufacturers, to register in Class 45, in respect of Cigars and Cognate Substances and Articles, a Trade Mark, of which the following is a representation:—

The above Trade Mark has been used by the applicant Comrany and its predecessors in business in respect of the articles mentioned prior to the 1st day of January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of 30th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2111, dated 30th January, 1901.—HAVANA COMMERCIAL COMPANY, of 102 Galiano Street, Havana, in the Isle of Cuba, and of 135 Broadway, New York, in the United States of America, Cigar Manufacturers, to register in Class 45, in respect of Cigars and Cognate Substances and Articles, a Trade Mark, of which the following is a representation:—

The above Trade Mark has been used by the applicant Company and its predecessors in business in respect of the articles mentioned prior to the 1st day of January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of the 30th August, 1901—vide notice at head of Trade Mark advertisements.

Application No. 2112, dated 30th January, 1901.— Havana Commercial Company, of 102 Galiano Street, Hevana, in the Isle of Cuba, and of 135 Broadway, New York, in the United States of America, Cigar Manufacturers, to register in Class 45, in respect of Cigars and Cognate Substances and Articles, a Trade Mark, of which the following is a representation:—

The above Trade Mark has been used by the applicant Company and its predecessors in business in respect of the articles mentioned prior to the 1st day of January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of 30th August, 1901, vide notice at head of Trade Mark advertisements.

Application No. 2113, dated 30th January, 1901.—HAVANA COMMERCIAL COMPANY, of 102 Galiano Street, Havana, in the Isle of Cuba, and of 135 Broadway, New York, in the United States of America, Cigar Manufacturers, to register in Class 45, in respect of Cigars and Cognate Substances and Articles, a Trade Mark, of which the following is a representation:—

The above Trade Mark has been used by the applicant Company and its predecessors in business in respect of the articles mentioned prior to the 1st day of January, 1885.

This Mark was first advertised in the Western Australian Government Gazette of 30th August, 1900—vide notice at head of Trade Mark advertisements.
