

# Supplement to Government Gazette

OF

WESTERN AUSTRALIA.

[Published by Authority.]

No. 40.  
P.O. No. 24.

PERTH: FRIDAY, JUNE 13.

[1902.]

## CONTENTS:

SUBJECT.	PAGE	SUBJECT.	PAGE
Complete Specifications accepted ... ..	2647	Alphabetical list of Applicants for Patents ... ..	2652
Notice of Application for Amendment ... ..	2651	Alphabetical list of Inventions for which Patents have been applied for ... ..	2652
Applications for Patents ... ..	2652	Applications for Registration of Trade Marks ... ..	2653

*Note.*—Throughout this *Gazette* the names in *Italics* within parentheses are those of Communicators of Inventions.

### Complete Specifications.

*Patent Office, Perth,  
13th June, 1902.*

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 3865.—WILLIAM HENRY SCHOFIELD, of Pueblo, in the County of Pueblo and State of Colorado, United States of America. Manufacturer, "*Improvements in Metal Wagons.*"—Dated 13th May, 1902.

#### Claims:—

1. A wagon having the sides and bottom portions of the body, together with the front end, formed of sheet metal plates secured together and to angle-bars, and having yokes embracing the sides and bottom, said yokes formed of angle or channel bars of iron bent into suitable shape.
  2. A wagon-body having sides formed of sheet-metal plates embossed in panels whereby they are stiffened, in the manner set forth.
  3. A wagon-body having sides formed of sheet-metal plates embossed in panels to stiffen same, and having a backing of wood or of other metal plates, or both wood and metal plates.
  4. In a wagon, a body having a bottom formed of two sheet-metal plates secured together with a space there between, and a suitable stiffening material placed between said plates.
  5. In a wagon, a body having a bottom formed of two sheet-metal plates secured together, one of said plates being corrugated for the purpose of stiffening same.
  6. A wagon having a body composed chiefly of sheet-metal plates, with metal yokes embracing its sides and bottom, and a bolster supporting said body, said bolster composed of two complementary iron channel-bars secured together, of iron standards secured to said bars, and metal stools supporting said bolster.
  7. In a metal wagon, tubular axles composed of two flanged metal semi-cylindrical bars secured together, said flanges being cut away at the end portions of the axles, and spindles or sleeves placed over such portions.
  8. In a wagon, a gear or supporting frame for the wagon-body, composed of a metal bolster formed of channel-bars, of metal standards secured to said bolster.
  9. In a wagon, a tongue formed of two flanged metal bars secured together, said flanges bent or curved for a portion of their length, and left square or straight for the rest of their length, whereby the rear portion of the tongue is square in cross-section and the middle and forward portions are rounded or round in cross-section.
  10. In a wagon, a body composed of sheet-metal sides ends and bottom secured to suitable iron flanged bars, and the sides and bottom embraced by iron yokes, in combination with bolsters composed of flanged metal bars secured together, metal standards secured to said bolsters at each end thereof, metal stools supporting said bolsters, tubular axles supporting said stools, said axles composed of two semi-cylindrical flanged metal bars secured together at their flanges, and a tubular tongue composed of two flanged metal bars secured together with a gradually diminishing space there between, the rear portion of said tongue being square in cross-section, and the front portion rounded or round, all substantially as set forth.
- Specification, 8s. Drawings on application.

Application No. 3870.—The Honourable CHARLES ALGERNON PARSONS, of Heaton Works, Newcastle-on-Tyne, in the County of Northumberland, England, Engineer, "*Improvements in and relating to Steam Turbine Blades.*"—Dated 15th May, 1902.

#### Claims:—

1. In steam turbines, rings of blades formed by the staving up of the blade tops into heads which, in conjunction produce the effect of a continuous shrouding adapted to prevent steam leakage, substantially as described.
  2. In steam turbine rings of blades, the combination of blades similarly headed, joggled to overlap, and co-acting to produce a practically continuous shrouding on both sides of the blade ring, substantially as described.
  3. In steam turbine rings of blades, the combination of blades similarly headed to project on one side, joggled to overlap, and co-acting to produce a practically continuous shrouding on the inlet sides of the blade ring, substantially as described.
  4. In steam turbine rings of blades, the combination of blades similarly headed to project on one side, joggled to overlap, and co-acting to produce a practically continuous shrouding on the exit side of the blade ring, substantially as described.
  5. In steam turbines, in combination, a set of blades supported on a rotatable drum, and headed to form a shrouding ring, said ring co-acting with rubbing rings formed by the root stops of a fixed ring of blades, substantially as described.
  6. In steam turbines, a process of forming rings of blades, consisting in milling out grooves to receive the individual blades folding over the interleaving teeth, and then turning off the resulting irregular edge to produce a shrouding to prevent steam leakage, substantially as described.
  7. In steam turbines, a ring of blades having heads adapted to produce continuous shrouding, combined with a second ring of blades having their roots secured by means of a caulking strip adapted to give a continuous abutting surface to prevent steam leakage, substantially as described.
  8. In steam turbines, a ring of blades provided with a shrouding formed of a perforated strip secured to the blades, substantially as described.
  9. In steam turbines, a ring of blades provided with a shrouding formed by a set of overlapping segments of perforated strip secured to the blades, substantially as described.
  10. In steam turbines, a shroud ring adapted to prevent steam leakage, secured to the blades by notching and binding, substantially as described.
  11. A method of securing steam turbine blades in the drum and casing grooves, consisting in employing two complementary notched rings between which the blades are fastened by caulking, substantially as described.
  12. A method of securing steam turbine blades, in the drum and casing grooves, consisting in slitting the blade roots, and bending one or both of the parts at angles to correspond with those of grooves in the gripping faces of two notched rings which clamp the blades in position when caulked up, substantially as described.
  13. A method of securing steam turbine blades in the drum and casing grooves, consisting in employing a grooved strip within which the blades are packed and secured by means of dovetailing or locking, then securing this strip with its blades into the drum, and casing grooves by caulking, as set forth.
  14. A method of securing steam turbine blades, consisting in employing one or more perforated slips, into which the blades project, said blades and strips being both fastened in position by caulking, substantially as described.
  15. A method of securing steam turbine blades, consisting in employing one or more perforated strips into which the blades project, said blades and strips being both fastened by means of a caulking strip, substantially as described.
- Specification, 17s. 6d. Drawings on application.

Application No. 3871.—RICHARD MEAD ATWATER, junior, of Leonora, Western Australia, Mining Engineer, "A Stepped Furnace and means of feeding same, principally adapted for burning brushwood and such like fuel."—Dated 16th May, 1902.

Claims:—

1. A furnace having grate bars or ledges placed and arranged in an open stepped manner and provided with a hopper and door for controlling the feed of the fuel to the furnace, substantially as and for the purposes herein explained and as illustrated in the attached drawings.  
2. An open-stepped furnace as above described and claimed in combination with a fire box of a boiler so as to act as a heat producing auxiliary for same as herein explained and set forth and as shown in the attached drawings.

Specification 3s. 6d. Drawings on application.

R. G. FERGUSON,  
Registrar of Patents.

Patent Office, Perth,  
6th June, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten Shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 23, 6th June, 1902.

Application No. 3542.—FRANK ARTHUR BLAKESLEE, of Kalgoorlie, Western Australia, Engineer, "A combined Percolation and Agitation Vat."—Dated 16th September, 1901.

Specification, 5s. Drawings on application.

Application No. 3585.—RICHARD KEYTE, of Whangarei, Auckland, in the Colony of New Zealand, Builder, "An Improved Fire Escape."—Dated 8th October, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3651.—RICHARD KEYTE, of Whangarei, Auckland, in the Colony of New Zealand, Builder, "Improved means for automatically indicating a Change in Temperature."—Dated 23rd November, 1901.

Specification, 5s. 6d. Drawings on application.

R. G. FERGUSON,  
Registrar of Patents.

Patent Office, Perth,  
30th May, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten Shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 22, 30th May, 1902.

Application No. 3832.—SHERARD COWPER-COLES & Co., LIMITED, of 82 Victoria Street, Westminster, London, England, Manufacturers (Assignee of SHERARD COWPER-COLES), "Improvements in or relating to the Deposition of Metals or Compounds."—Dated 19th April, 1902.

Specification, 9s. Drawings on application.

Application No. 3835.—ALBERT KRANK, of Warkaus Jorois, Finland, Engineer, "Improvements in or connected with Steam Turbines, and Mechanism or Apparatus connected therewith, for directly converting the energy thereof into fluid pressure."—Dated 22nd April, 1902.

Specification, 12s. Drawings on application.

Application No. 3836.—FRANCIS JAMES ODLING, of No. 2 Prince's Walk, Prince's Bridge, Melbourne, in the State of Victoria, Commonwealth of Australia, Mining Engineer, and WILLIAM JAMIESON, of Broken Hill Chambers, No. 31 Queen Street, Melbourne, in Victoria, as aforesaid, Gentleman, "An improved Magnetic Separator for Pulverised Ores and other Materials."—Dated 22nd April, 1902.

Specification, 7s. 6d. Drawings on application.

Application No. 3839.—FREDERICK ALBERT BARDWELL, of 50 Kenilworth Street, Boston, U.S.A. (assignee of ARTHUR FRANCIS BARDWELL), "Improvements in Voting Machines."—Dated 22nd April, 1902.

Specification, £1 14s. Drawings on application.

Application No. 3845.—AMERICAN MINERAL WATER MACHINE COMPANY, of 305-309 East 43rd Street, New York, U.S.A. (assignee of PETER ENGELBRECHT MALMSTROM), "Improvements in apparatus for making Aerated Beverages, and automatically and electrically controlling the gas pressure therein."—Dated 29th April, 1902.

Specification, £1 18s. Drawings on application.

Application No. 3849.—PIERRE CLAUDE LOUAT, of Merrylands, near Sydney, New South Wales, Engineer, "Improvements in the generation of Steam and in its utilisation for motive power purposes."—Dated 29th April, 1902.

Specification, 12s. Drawings on application.

Application No. 3853.—JAMES SYMONS, of Foxton, New Zealand, Settler, "Improved Filtering Apparatus."—Dated 2nd May, 1902.

Specification, 6s. Drawings on application.

Application No. 3854.—RICHARD SPARROW, of Perth, Western Australia, Licensed Patents Agent (William Chapman), "Improvements in track construction for Electric Railways operated on the Conduit System."—Dated 2nd May, 1902.

Specification, 14s. Drawings on application.

Application No. 3855.—FREDERICK JOHN KING, of Croydon, Surrey, England, Mining Engineer, "Improvements in and relating to Magnetic Ore Separators."—Dated 3rd May, 1902.

Specification, 12s. Drawings on application.

Application No. 3857.—SAMUEL MILNES, Engineer, and HERBERT WILLIAM DE BAUGH, Commercial Traveller, both of Auckland, New Zealand, "An improved Portable Combination Furnace for domestic and other purposes."—Dated 6th May, 1902.

Specification, 4s. 6d. Drawings on application.

Application No. 3858.—THE SMETHURST FURNACE AND ORE TREATMENT SYNDICATE, LIMITED, of 3 Great Winchester Street, London E.C., England, Manufacturers (Assignee of W. SMETHURST), "Improvements in the Treatment of Substances with Nascent Carbon Dioxide to produce a Chemical Reaction."—Dated 7th May, 1902.

Specification, 6s. 6d. Drawings on application.

Application No. 3860.—RICHARD SPARROW, of Perth, Western Australia, Patents Agent (Edwin Musser Herr), "Improvements relating to Brake Shoes."—Dated 7th May, 1902.

Specifications, 5s. Drawings on application.

Application No. 3861.—ANDREW CHARLES JOSEPH CHARLIER, of 108A West Regent Street, Glasgow, Scotland, Chemist, "Improvements in the Manufacture of Lead Pigments and Lead or other Metallic Compounds and in apparatus therefor, also suitable for aerating or saturating liquids with Gases."—Dated 8th May, 1902.

Specification, 6s. 6d. Drawings on application.

R. G. FERGUSON,  
Registrar of Patents.

Patent Office, Perth,  
23rd May, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten Shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 21, 23rd May, 1902.

Application No. 3842.—HENRI GALOPIN, of Chancery Lane, Melbourne, State of Victoria, Instrument Maker, "Mechanism for Measuring the flow of Fluids."—Dated 23rd April, 1902.

Specifications, 12s. 6d. Drawings on application.

Application No. 3843.—JOSEPH LYBRAND FERRELL, of 2218 Race Street, in the City of Philadelphia, and State of Pennsylvania, United States of America, Mechanical Engineer, "*Improvements in Wood Preserving.*"—Dated 25th April, 1902.

Specifications, 8s. 6d. Drawings on application.

Application No. 3850.—FRIEDRICH ALBRECHT, of No. 379 Swanston Street, Melbourne, in the State of Victoria, Metal Worker, "*Means for coupling pipes or cocks to fluid mains, branches, receptacles, or tanks.*"—Dated 29th April, 1902.

Specification, 4s. 6d. Drawings on application.

R. G. FERGUSON,

Registrar of Patents.

Patent Office, Perth,  
16th May, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 20, 16th May, 1902.*

Application No. 3826.—EUGENE O'CONNOR, of Westport, New Zealand, Farmer, "*Improvements in or relating to Trusses, Belts, Braces, and the like.*"—Dated 15th April, 1902.

Specification, 6s. Drawings on application.

Application No. 3833.—JEREMIAH CAMPBELL, of 30 Congress Street, Boston, Massachusetts, U.S.A., Gentleman, "*Improvements in Apparatus for use in handling and transferring Coal and other substances.*"—Dated 19th April, 1902.

Specification, £2 18s. Drawings on application.

R. G. FERGUSON,

Registrar of Patents.

Patent Office, Perth,  
9th May, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 19, 9th May, 1902.*

Application No. 3840.—RICHARD SPARROW, of Barrack Street, Perth, Western Australia, Patents Agent (*Joseph Robert Hayward*), "*Improved Receptacle Cover, usable as a Cooking Utensil.*"—Dated 22nd April, 1902.

Specification, 1s. 6d. Drawings on application.

Application No. 3841.—JULES EDMOND DE STOUTZ, of King Solomon's Gold Mines, Ltd., of Coolgardie, in the State of Western Australia, Mining Engineer, "*Rotary Suction Filter.*"—Dated 23rd April, 1902.

Specification, 4s. Drawings on application.

Application No. 3844.—JOHN THOMAS ALLINSON, of Victoria Street, Warragul, Saddler, and WILLIAM THOMAS SCOTT ROBERTSON, of Cunningham Street, Sale, Sergeant-Major in the Victorian Mounted Rifles, both of Gippsland, in the State of Victoria, Commonwealth of Australia, "*An improved Puttie Legging.*"—Dated 25th April, 1902.

Specification, 3s. 6d. Drawings on application.

Application No. 3848.—CYRIL ERNEST NICHOLAS, of "Invermay," corner of Queen and Lonsdale Streets, Launceston, in the State of Tasmania, Commonwealth of Australia, but temporarily residing at 91 Edgevale Road, Kew, in the State of Victoria, Inventor, "*An improved Table Game of Cricket.*"—Dated 29th April, 1902.

Specification, 5s. 6d. Drawings on application.

R. G. FERGUSON,

Registrar of Patents.

Patent Office, Perth,  
2nd May, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide *Gazette No. 18, 2nd May, 1902.*

Application No. 3523.—JOSEPH SCHOFIELD, of 26 Austin Street, Footscray, Victoria, Manufacturer, "*Hydraulic apparatus for the Separation and Recovery of Metals and Minerals from their Ores.*"—Dated 3rd September, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3588.—HARRY VAUGHAN RUDSTON READ, of Broad Street Avenue, London, England, Civil Engineer, "*Improvements in connection with Syphons or the like, in which the aeration of liquids is affected by releasing compressed or liquefied gas from containers thereof.*"—Dated 9th October, 1901.

Specification, 13s. 6d. Drawings on application.

Application No. 3799.—HENRY JAMES JONES, of Stratford, New Zealand, Engineer, "*Improved appliances for the generation of Acetylene Gas.*"—Dated 2nd April, 1902.

Specification, 6s. Drawings on application.

Application No. 3802.—GUSTAV AMBERG, of 4 Spener Strasse, Berlin, Germany, Professor of Physics, "*A new and improved Telephone System.*"—Dated 2nd April, 1902.

Specification, 9s. Drawings on application.

Application No. 3819.—CHARLES EMERY BILLIN, of 205 Goethe Street, Chicago, United States of America, Manufacturer (Assignee of WALTER SABINE MCKINNEY), "*Improvements in Stamp Mills.*"—Dated 10th April, 1902.

Specification, 17s. 6d. Drawings on application.

Application No. 3820.—RICHARD SPARROW, of Perth, Western Australia, Patents Agent (*Thomas Steel Perkins*), "*Improvements in Controllers for Electric Motors.*"—Dated 10th April, 1902.

Specification, 8s. 6d. Drawings on application.

Application No. 3823.—METCHISLAW FIEDLER, of House Schelaputin, Mochowaja Street, Moscow, Russia, Director, "*Improvements in Explosives.*"—Dated 14th April, 1902.

Specification, 4s. 6d. Drawings on application.

Application No. 3825.—DOUGLAS STUART SPENS STEUART, of 31 South Street, Thurloe Square, London, England, Mining Engineer, "*Improvements in Machines for Pulverising, Crushing and Grinding.*"—Dated 15th April, 1902.

Specification, 7s. 6d. Drawings on application.

Application No. 3829.—ARTHUR AUBREY FRANCIS, of Ponte di Nossa, Bergamo, Italy, Manager of Ore Concentrating Works, "*Improvements in Ore Concentrating Apparatus.*"—Dated 17th April, 1902.

Specification, 7s. Drawings on application.

Application No. 3830.—LOUIS BERNHARD BARON, of 4 to 6 Saint James' Place, London, England, Engineer, "*Improvements in Apparatus for Manufacturing Cigarettes.*"—Dated 17th April, 1902.

Specification, 6s. Drawings on application.

R. G. FERGUSON,

Registrar of Patents.

Patent Office, Perth,  
25th April, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 17, 25th April, 1902.

Application No. 3466.—JAMES STEEDMAN HOLMES, of 207 Palmerston Street, Carlton, Victoria, Machinist, "Improved Manifold Counter-check or Sales-book for drapers, traders, and others."—Dated 25th July, 1901.

Specification, 5s. 6d. Drawings on application.

Application No. 3783.—PATRICK H. REARDON, of 24 First Street, San Francisco, U.S.A., Mechanic, "Improvement in Pressure Regulators."—Dated 18th March, 1902.

Specifications, 8s. Drawings on application.

Application No. 3784.—CLIFTON HAROLD WHEELER, of Forest Drive, Short Hills, United States of America, Mechanical Engineer, "Improvements in Cooling Towers for reducing the temperature of condensing water and other fluids."—Dated 18th March, 1902.

Specification, 10s. Drawings on application.

Application No. 3801.—GEORGE HENRY DUNN, of Bendleby, South Australia, Farmer, "Improvements in Winnowing or Grain-cleaning Machines."—Dated 2nd April, 1902.

Specification, 5s. Drawings on application.

Application No. 3808.—FREDERICK WALTER PAGE, of Chertsey, New Zealand, Settler, "Improved means for securing Fencing Wires and Wire Netting to standards and droppers, and Wire Netting to Fencing Wires."—Dated 7th April, 1902.

Specification, 3s. Drawings on application.

Application No. 3809.—JOHN CHARLES BOWRING, of 90 Pitt Street, Sydney, New South Wales, Engineer, "An improved Grate-bar for Steam Boiler and other Furnaces."—Dated 7th April, 1902.

Specification, 4s. 6d. Drawings on application.

Application No. 3812.—FEDERAL REFINING COMPANY, of Jersey City, U.S.A. (Assignee of CLAUS A. SPRECKELS and CHARLES A. KERN), "Improvements in treatment of Sugar, Sugar-liquor, and Sugar-bearing Material, and in cleansing compositions employed in such treatment."—Dated 8th April, 1902.

Specification, £1 1s. Drawings on application.

Application No. 3814.—ERNEST JAMES HUME and WALTER REGINALD HUME, both of Mollison Street, Malmsbury, Victoria, Machinists, "Improvements in Wire Fences, and apparatus for the construction thereof."—Dated 9th April, 1902.

Specification, 6s. 6d. Drawings on application.

Application No. 3815.—ERNEST JAMES HUME and WALTER REGINALD HUME, both of Mollison Street, Malmsbury, Victoria, Machinists, "Improvements in Stump-Jumping Harrows."—Dated 9th April, 1902.

Specification, 6s. Drawings on application.

Application No. 3821.—HULDRICH WILHELM BUFF, of Herisau, Switzerland, Merchant, "Improvements in and connected with Coverings for the Feet."—Dated 11th April, 1902.

Specification, 3s. 6d. Drawings on application.

Application No. 3822.—WALTER HARFORD, of 101 Melbourne Road, Bootmaker, and JAMES MALCOLM, of 132 Lake Street, Carpenter, both in Perth, Western Australia, "Improved means for Operating Venetian and other Blinds."—Dated 11th April, 1902.

Specification, 6s. 6d. Drawings on application.

R. G. FERGUSON,

Registrar of Patents.

Patent Office, Perth,  
18th April, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten Shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 16, 18th April, 1902.

Application No. 3446.—JOHN JOSEPH LEAHY, Contractor, and ARTHUR PARMITER, Carpenter, both of Adelaide, South Australia, "Improved method of and means for transferring travelling belts from one pulley to another."—Dated 2nd July, 1901.

Specification, 6s. 6d. Drawings on application.

Application No. 3775.—MURRAY CORRINGTON, of 40 Wall Street, New York, in the State of New York, one of the United States of America, Attorney at Law, and FRANK LEMONT DODGSON, of Rochester, in the State of New York, one of the United States of America, Engineer, "Improvements in Pneumatic Railway Signalling."—Dated 11th March, 1902.

Specification, £1 5s. Drawings on application.

Application No. 3780.—DR. HERMAN JACOB KEYSER, of Westeinde, Amsterdam, in the Kingdom of Holland, Solicitor, "Improvements in the Manufacture of Carbide Electrodes for Arc Lamps."—Dated 18th March, 1902.

Specifications, 16s.

Application No. 3781.—EDWARD WATERS, junior, a member of the firm of EDWARD WATERS & SON, Patent Agents, of Nos. 414-418 Collins Street, Melbourne, in the State of Victoria (Frederic Hamlet Long), "Improvements in Metallurgic Filters."—Dated 18th March, 1902.

Specification, 4s. Drawings on application.

Application No. 3782.—EDWARD WATERS, junior, a member of the firm of EDWARD WATERS & SON, Patent Agents, of Nos. 414-418 Collins Street, Melbourne, in the State of Victoria (Frederic Hamlet Long), "Improvements in Electrolytic Converters."—Dated 18th March, 1902.

Specification, 7s. 6d. Drawings on application.

Application No. 3785.—RAND DRILL COMPANY, of 128 Broadway, City of New York, United States of America (Assignee of FREDERICK WILLIAM PARSONS), "Improvements in and relating to apparatus for Compressing Air and other Fluids."—Dated 18th March, 1902.

Specification, 15s. Drawings on application.

Application No. 3789.—JOSEPH GEORGE NASH, of Hindmarsh Square, Adelaide, in the State of South Australia, Commonwealth of Australia, Engineer, "Improvements in Gas Generators."—Dated 18th March, 1902.

Specifications, 7s. Drawings on application.

Application No. 3790.—JOHN MARWIN RAUHOFF, of Chicago, County of Cook, State of Illinois, 1250 West 60th Street, Machinist, "Mechanism for converting motion."—Dated 18th March, 1902.

Specification, 7s. 6d. Drawings on application.

Application No. 3791.—THE GOLD RECOVERY FROM SLIMES SYNDICATE, LIMITED, of 128 Hope Street, Glasgow, Scotland (assignee of HUGH DUNCAN and ROBERT RANKIN SHERRIFF), "Improvements in apparatus for Separating Liquids from Solids."—Dated 18th March, 1902.

Specifications, 8s. 6d. Drawings on application.

Application No. 3796.—GILBERT SCOTT RAM and EUSTACE GRAHAM SHEPPARD, both of 82 Victoria Street, Westminster, London, S.W., England, Electricians, and NERNST ELECTRIC LIGHT, LIMITED, also of 82 Victoria Street, aforesaid, "Improvements in and relating to Nernst Lamps."—Dated 26th March, 1902.

Specifications, 9s. Drawings on application.

Application No. 3797.—THE CONVERSION COMPANY (BILLINGS MACHINERY AND PROCESS), LIMITED, of 21 Regent Street, London, S.W., England, Manufacturers (assignee of LAWRENCE BRIANT and HENRY CHEVALIER RIGAUD), "Improvements in the Manufacture of Beer."—Dated 26th March, 1902.

Specifications, 3s. 6d. Drawings on application.

Application No. 3798.—THOMAS DOUGLAS KYLE, of Pile Street, Dulwich Hill, Sydney, in the State of New South Wales, Engineer, "Improvements in the Combustion of Fuel in Boiler and other Furnaces, and in Apparatus therefor."—Dated 27th March, 1902.

Specification, 6s. Drawings on application.

Application No. 3804.—HENRY LIVINGSTONE SULMAN and HUGH FITZALIS KIRKPATRICK-PICARD, of 44 London Wall, in the City of London, England, Metallurgists, "Improvements in or relating to the Treatment of Ore Slimes."—Dated 4th April, 1902.

Specification, 7s. 6d.

Application No. 3805.—RHYS DAVID HARRIS, of 99 Cameron Street, London, E.C., England, Miner, "Hat Grips."—Dated 4th April, 1902.

Specification, 2s. Drawings on application.

Application No. 3806.—THOMAS CUSDIN, of Orrong Road, Armadale, in the State of Victoria, Farrier, and JOHN WILLIAM RICE, of "Trecarne" Grand View Grove, Armadale, in the State of Victoria aforesaid, Commercial Representative, "Improvements in soft tread Horseshoes."—Dated 4th April, 1902.

Specification, 6s. 6d. Drawings on application.

Application No. 3807.—JOSEPH LYBRAND FERRELL, of 2218 Race Street, Philadelphia, County of Philadelphia, State of Pennsylvania, United States of America, Mechanical Engineer, "Improvements in Wood Preserving."—Dated 4th April, 1902.

Specification, 5s. 6d.

Application No. 3818.—JAMES EDWIN GEE, of 2 Devonshire Square, in the City and County of London, England, Engineer, "An improved apparatus for Washing, Scrubbing, and Cleaning Floors."—Dated 10th April, 1902.

Specification, 8s. 6d. Drawings on application.

Registrar of Patents.

### Notice of Application for Amendment.

THE PATENTS ACTS, 1888-1894.

IN the matter of Letters Patent No. 3232, dated 21st December, 1900, in the name of HORACE BELMORE JOSEPH, of Barrack Street, Perth, Western Australia, Solicitor (communicated by *Albrecht Honneus*).

Notice is hereby given that the above Horace Belmore Joseph has applied for leave to amend the complete Specification of his invention, alleging as his reason for so doing:—"Owing to the occurrence of errors in the communication of the invention by the inventor."

The amendments proposed are as follow, viz. [Reference being had to amended copy of Specification lodged in Patent Office, Perth]:—

Page 1, line 2.

Strike out the word "bodies" and insert the word "matrices."

Page 1, line 11.

After the word "distributed" insert the words "intermixed with."

Page 1, line 11.

Strike out the word "bodies" and insert the word "matrices."

Page 1, line 12.

For the words "chemical consists" read "chemicals consist."

Page 1, line 12.

After the word "sulphur" insert the words "or sulphur."

Page 1, line 12.

For the words "compound or substance," read the words "compounds or substances."

Page 1, line 13.

Strike out the words "in combination with," and insert the word "and."

Page 1, line 14.

For the word "compound," read the words "compounds, and used either in combination or separately, as the character of the ore demands."

Page 1, line 16.

Strike out the words "that is," and insert the words "when sulphur and nitre are used in combination the best proportions are."

Page 1, line 18.

After the word "treated," insert the words "or when used separately, six pounds of sulphur to the ton of ore, or when nitre is used individually, four pounds of nitre to each ton of ore."

Page 2, line 1.

After the word "sprinkle" insert the word "intermix."

Page 2, line 2.

For the word "chemical" read the word "chemicals."

Page 2, line 2.

Strike out the words "combination and."

Page 2, line 3.

After the word "proportions" insert the words "ascertained by actual experiment."

Page 2, line 13.

After the words "and the" insert the words "action of the."

Page 2, line 13.

Strike out the word "be" and insert the words "have been."

Page 2, line 16.

After the word "body" insert the words, "Ore may be also treated in the following manner:—The ore first finely pulverised and then passed into a closed, stationary, or reverberatory or revolving furnace, and sulphur or its compounds, and nitre or its various equivalents, either alone or in conjunction, are added to the finely pulverised ore in the furnace. Whereas certain ores do require different treatment to secure a complete roast, it is intended that these Letters Patent shall comprehend either the separate or combined application of sulphur and its equivalents and nitre and its equivalents to the ore in process of treatment, whether in open kilns or in the various forms of furnace referred to in this paragraph."

Page 3, lines 6 and 7.

For the word "substance" read the word "substances."

Page 3, line 6.

Strike out the words "in combination," and insert the word "and."

Page 3, line 8.

After the word "combined," insert the words "or used separately."

Any person or persons intending to oppose the said application for amendment must leave particulars, in writing (on Form G.), of his or their objections thereto, within one calendar month from the date hereof. A fee of ten shillings (10s.) is payable with such notice.

Dated this 6th day of June, 1902.

R. G. FERGUSON,

Registrar of Patents.

This Mark was first advertised in the Western Australian Government Gazette of 25th April, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2447, dated 15th April, 1902.—RIGBY, BATTOCK, AND COMPANY, Brush Manufacturers, of 50 Bethnal Green Road, London, England, to register in Class 50, s.s. 5, in respect of Brushes of all kinds, a Trade Mark, of which the following is a representation :—

The essential particulars of the Trade Mark are the device of the head of a Bull Dog and the words "Bull Dog," and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 25th April, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2448, dated 15th April, 1902.—THE AMERICAN TOBACCO COMPANY, of No. 111 Fifth Avenue, in the City of New York, State of New York, one of the United States of America, to register in Class 45, in respect of Tobacco, Cigars, and Cigarettes, a Trade Mark, of which the following is a representation :—

## TROPHIES

This Mark was first advertised in the Western Australian Government Gazette of 25th April, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2450, dated 16th April, 1902.—CRUCIBLE STEEL COMPANY OF AMERICA, of State of New Jersey, in the United States of America, to register in Class 5, in respect of Steel, a Trade Mark, of which the following is a representation :—

## VICTOR.

This Mark was first advertised in the Western Australian Government Gazette of 25th April, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2451, dated 17th April, 1902.—A. HOADLEY & Co., Manufacturers, St. Kilda Road, South Melbourne, Victoria, to register in Class 42, in respect of substances used as food, or as ingredients, in food, a Trade Mark, of which the following is a representation :—

The essential particular of the above Trade Mark consists of the distinctive label.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2452, dated 19th April, 1902.—JOHN TULLIS & SON, LTD., St. Amis Leather Works, Glasgow, Scotland, to register in Class 40, in respect of Belting for Driving Machinery, a Trade Mark, of which the following is a representation :—

## CHONATA.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2453, dated 19th April, 1902.—JOHN TULLIS & SON, LTD., St. Amis Leather Works, Glasgow, Scotland, to register in Class 37, in respect of Leather Belting for Driving Machinery, a Trade Mark, of which the following is a representation :—

## ORANGE TAN.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2455, dated 22nd April, 1902.—NEW SUNLIGHT INCANDESCENT COMPANY (1900), LIMITED, of Nos. 33 and 34 Shoe Lane, London, in England, to register in Class 18, in respect of Incandescent Mantles, a Trade Mark, of which the following is a representation :—

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2456, dated 22nd April, 1902.—JOSEPH GEORGE NASH, of Hindmarsh Square, Adelaide, in the State of South Australia, in the Commonwealth of Australia, Engineer, to register in Class 5, in respect of Zinc, a Trade Mark, of which the following is a representation:—

The essential particulars of the Trade Mark are the device and the word "Top," and applicant disclaims any right to the exclusive use of the added matter, except in so far as it consists of the applicant's name and address.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2459, dated 23rd April, 1902.—DEANE BENNETT, trading as the "Trilene Company," 66 Finsbury Pavement, London, England, Manufacturer, to register in Class 3, in respect of Chemical Substances prepared for use in Medicine and Pharmacy, a Trade Mark, of which the following is a representation:—

**TRILENE.**

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2460, dated 24th April, 1902.—I. and R. MORLEY, of 18 Wood Street, London, England, Warehousemen, to register in Class 38, in respect of Gloves, a Trade Mark, of which the following is a representation:—

MEDAILLE D'OR

*Jossefors*

COUSU A LA MAIN

The essential particular of the Trade Mark is the word "Jossefors," and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2461, dated 24th April, 1902.—I. and R. MORLEY, of 18 Wood Street, London, England, Warehousemen, to register in Class 38, in respect of Hosiery, a Trade Mark, of which the following is a representation:—

MEDAILLE D'OR  
**BONNEFOI**

The essential particular of the Trade Mark is the word "Bonnefoi," and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2462, dated 24th April, 1902.—I. and R. MORLEY, of 18 Wood Street, London, England, Warehousemen, to register in Class 38, in respect of Hosiery, a Trade Mark, of which the following is a representation:—

MEDAILLE D'OR  
**MERLIER**

The essential particular of the Trade Mark is the word "Merlier," and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2463, dated 24th April, 1902.—I. and R. MORLEY, of 18 Wood Street, London, England, Warehousemen, to register in Class 38, in respect of Gloves, a Trade Mark, of which the following is a representation:—

The essential particular of the Trade Mark is the device, and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2464, dated 24th April, 1902.—I. and R. MORLEY, of 18 Wood Street, London, England, Warehousemen, to register in Class 38, in respect of Gloves, a Trade Mark, of which the following is a representation:—

The essential particulars of the Trade Mark are the device and the word "Theta," and applicants disclaim any right to the exclusive use of the added matter.

This Mark was first advertised in the Western Australian Government Gazette of 2nd May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2483, dated 23rd January, 1902.—The firm trading as HENRI NESTLE, of 48 Cannon Street, London, England; Christiania, Norway, and Vevey, Switzerland, Merchants, to register in Class 42, in respect of Condensed Milk, a Trade Mark, of which the following is a representation:—

The essential particular of the Trade Mark is the distinctive label.

This Mark was first advertised in the Western Australian Government Gazette of 9th May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2385, dated 28th January, 1902.—H. ALBRECHT & Co., Brush Manufacturers, George Street, East Fremantle, in the State of Western Australia, to register in Class 50, s.s. 5, in respect of Brushware, a Trade Mark, of which the following is a representation:—

The essential particular of the above Mark consists of the distinctive device.

This Mark was first advertised in the Western Australian Government Gazette of 9th May, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2466, dated 29th April, 1902.—FARQUHAR & GILL, of North of Scotland Colour Works, St. Paul Street and Drums Lane, Aberdeen, Scotland, Colour, etc., Manufacturers, to register in Class 1, in respect of Paints, Colours, Varnishes, and Enamels, a Trade Mark, of which the following is a representation:—
