### Complete Specifications.

Patent Office, Perth,  
8th August, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten Shillings (10s.) is payable with such notice.

Application 3931.—THOMAS DANIELLS MERTON, of the Spottiswoode Refinery and Metallurgical Works, Spottiswoode, near Melbourne, in the State of Victoria, and Commonwealth of Australia, Metallurgist, "*Improved Rotary Rabbling Apparatus for Ore Roasters.*"—Dated 8th July, 1902.

#### Claims:—

1. Improved rotary rabbling apparatus for ore roasters consisting of a rotatable spindle having a boss carrying on its shoulder a coating of refractory material around a portion of the spindle, the rabbles being fitted directly to said boss and the bottom having an annular recess into which projects an upwardly extending collar substantially as and for the purposes specified and as illustrated in the drawings.

2. In rotary rabbling apparatus for ore roasters, a spindle formed with a boss upon the shoulder of which is an iron cylinder surrounding a portion of said spindle, the space between being rammed tight with refractory material, such as a mixture of fireclay and silicate of soda substantially as and for the purpose specified and as illustrated in the drawings.

3. In rotary rabbling apparatus for ore roasters a spindle having a boss thereon formed with two passages one above the other, and adapted to receive a notched retaining-bar and rabble respectively, said bar and rabble being connected by a hooked bar, substantially as and for the purposes specified and as illustrated in the drawings.

Specification, 4s. Drawings on application.

Application No. 3932.—GEORGE GARIBALDI TURRI, of Salisbury Building, Queen Street, Melbourne, in the State of Victoria, Patent Agent (*Thomas Hammill Hicks*), "*Improvements in apparatus for Separating Mercury and Amalgam from Ore Pulp.*"—Dated 8th July, 1902.

#### Claims:—

1. A horizontal annular pan adapted to contain a flowable body of mercury over its entire bottom and mounted to oscillate about its vertical centre; an agitator arranged therein; and means to rotatively oscillate said pan.

2. An annular pan adapted to contain a flowable body of mercury over its entire bottom and afford passage for flowable bodies over the same and mounted to oscillate about its vertical centre; an amalgamable lining arranged on the bottom of said pan; an agitator arranged therein; and means to rotatively oscillate the same.

3. A horizontal annular pan adapted to contain a flowable body of mercury over its entire bottom and afford passage for flowable bodies over the same and mounted to oscillate about its vertical centre; an annular agitator mounted on said pan and having pins depending therein; and means to rotatively oscillate said pan.

4. An annular pan adapted to contain a flowable body of mercury over its entire bottom and afford passage for flowable bodies over the same; a trap arranged in connection with the pan to draw off automatically surplus mercury therefrom; and means to rotatively oscillate said pan.

5. A vertical series of annular pans, each having an amalgamable lining on its bottom and adapted to contain a flowable body of mercury over said entire lining and afford passage for flowable bodies over the same; and means to rotatively oscillate said series.

6. A vertical series of annular pans, each adapted to contain a flowable body of mercury over its entire bottom and afford passage for fluid bodies over the same and fitted to discharge such fluid bodies into the next below; an agitator arranged in each pan; and means to rotatively oscillate said series.

Specification, 6s. 6d. Drawings on application.

Application No. 3933.—GEORGE GARIBALDI TURRI, of Salisbury Building, Queen Street, Melbourne, in the State of Victoria, Patent Agent (*Thomas Hammill Hicks*), "*Improvements in processes for Recovering Gold from Refractory Ores in the form of Amalgam.*"—Dated 8th July, 1902.

#### Claims:—

1. The process of recovering gold as amalgam from pulverised sulphides (commonly called concentrates) which consists in subjecting such sulphides when dry to the action of heat and of hot mercury vapour as shown in the foregoing specification and then collecting the freed gold whether in particles of amalgam or not by any effective liquid mercury amalgamating or mercury massing apparatus.

2. The process of recovering gold as amalgam from pulverised sulphides (commonly called concentrates) which consists in subjecting such sulphides when dry to the action of heat and to the action of hot mercury vapour while their resultant temperature is between 350° Fahrenheit and the boiling point of mercury and then collecting the thereby freed gold and amalgam therein contained by means of apparatus suitable for massing finely divided mercury and amalgam or for liquid mercury amalgamation.

3. The process of recovering gold as amalgam from pulverised refractory ores which consists in first collecting the free gold therein contained by liquid mercury amalgamation, and then subjecting, when dry, that part of the residue of such ore containing gold after separating therefrom as much of the barren ore-gangue as practicable, to the action of heat and to the action of hot mercury vapour while the resultant temperature thereof is between 350° Fahrenheit and the boiling point of mercury and then collecting the thereby freed gold and amalgam therein contained by any apparatus suitable for liquid mercury amalgamation or for the massing of fine particles of mercury and amalgam.

Specification, 17s. Drawings on application.

Application No. 3934.—GEORGE GARIBALDI TURRI, of Salisbury Building, Queen Street, Melbourne, in the State of Victoria, Patent Agent (*Thomas Hammill Hicks*), "*Improvements in Apparatus for Separating Mercury from Amalgam.*"—Dated 8th July, 1901.

#### Claims:—

1. In a rotatable vessel, a cylindrical chamber and an annular chamber, each adapted to contain mercury and both arranged concentrically to the axis of said vessel's revolution and connected only by one or more joints so closely fitted as to prevent the passage of mercury there through except under pressure.

2. A rotatable vessel having two concentric chambers connected only by one or more joints so closely fitted as to prevent the passage of mercury except under pressure; and an annular dam at the top of each chamber extending from its outer wall inward.

3. In a rotatable vessel, two concentric chambers 10 and 11 connected only by one or more joints so closely fitted as to prevent the passage of mercury except under pressure, in combination with openings 12 for escape of water.

Specification, 7s. Drawings on application.

Application No. 3935.—GEORGE GARIBALDI TURRI, of Salisbury Building, Queen Street, Melbourne, in the State of Victoria, Patent Agent (*Thoms Hammill Hicks*), "*Improvements in ore concentrators.*"—Dated 8th July, 1902.

*Claims:*

1. In an ore concentrator, a spirally descending annular concentrating trough adapted to rotatively oscillate; a series of riffles arranged downward and inward on the bottom; and means to oscillate said trough rotatively.
2. In an ore concentrator, a spirally descending annular concentrating trough having a series of riffles arranged upon its bottom, which converge downward from the outer wall toward the inner wall thereof; a series of diverting septa arranged upon the tops of said riffles downward and outward from said inner wall; and means to rotatively oscillate said trough.
3. In an ore concentrator, a spirally descending concentrating trough; a free passage-way for concentrates along the inner wall of said trough; a series of riffles arranged upon the bottom of the trough converging from the outer wall toward said passage-way; and means to rotatively oscillate said trough.
4. In an ore concentrator, the spirally descending trough 1; the riffles 2 arranged downward and inward on the bottom of such trough; the septa 3 arranged downward and outward upon said riffles; the passage-ways 23 and 24 arranged respectively next the inner and outer walls of said trough; and means to rotatively oscillate said trough.
5. In an ore concentrator, the spirally descending trough 1; the riffles 2 arranged downward and inward on the bottom of such trough; the passage-way 23; the mercury collecting trap 4 arranged in the passage way 23; and means to rotatively oscillate the same.
6. In an ore concentrator, two spirally descending troughs rigidly mounted upon a hollow cylinder one above the other, and each provided with a series of riffles on the bottom converging downward and inward from the outer wall, and a series of septa on said riffles diverging downward and outward from the inner wall; and means to rotatively oscillate the same.
7. In an ore concentrator, riffles 2 arranged, as a series, annularly around a cylindrical form and, individually so as to be convergent inwardly and diagonal to the intercepted radii of such form, in combination with means to differentially oscillate such concentrator about such form.

Specifications, 10s. Drawings on application.

Application No. 3936.—GEORGE GARIBALDI TURRI, of Salisbury Building, Queen Street, Melbourne, in the State of Victoria, Patent Agent (*Thomas Hammill Hicks*), "*Improvements in rotatable Single Ball Ore-pulverising Apparatus.*"—Dated 8th July, 1902.

*Claims:—*

1. In ore pulverising apparatus, a single pulverising sphere or ball 4; a ring 1 whose inner surface is concave for most of its length to conform to the surface of said sphere and whose inner diameter is barely sufficient to admit the passage of 4 therethrough; two heads 2 and 3 fitted to engage opposite ends of 1 and support it so that its tread 26 shall be constantly equidistant at all similar points from the axis of revolution; and bolts 17 outside of 1 fitted to clamp and hold said flanges tightly against the ends of 1.
2. In ore pulverising apparatus, a ring having a tread on its inner surface conforming to the pulverising sphere to roll thereon; and two heads arranged to hold and support said ring equidistant at all similar points from the axis of revolution each having a centrally projecting trunnion containing a central opening, of which the one serves as an inlet and the other as an outlet for ore and water, the inlet opening tapering outwardly and receiving a feed-pipe which enters through a stuffing-box.
3. In ore pulverising apparatus, a ring having a concave tread upon its inner surface, arranged between heads having shouldered flanges and centrally projecting trunnions mounted in supporting bearings; and a solitary sphere adapted to roll upon said tread, the concavity of the tread conforming with the said sphere.
4. In ore pulverising apparatus, a ring having a concave tread upon its inner surface, arranged between heads having centrally projecting trunnions mounted in supporting bearings; and a solitary sphere of a size to conform to the opening of said ring.

Specification, 4s. Drawings on application.

Application No. 3937.—LOUIS CARNEGIE AULDJO, of Equitable Building, George Street, Sydney, in the State of New South Wales, Consulting Engineer, "*Improvements in Steam Boilers.*"—Dated 8th July, 1902.

*Claims:—*

1. In a steam boiler, an insulated jacket in the water space, as and for the purpose herein set forth.
2. In a steam boiler, an insulated jacket for isolating a confined water space, as and for the purpose set forth.
3. In a steam boiler, an insulated jacket for isolating an enclosed space which has an inlet at or near the bottom and an outlet at or near the water level, substantially as described and shown on the drawings and for the purpose herein set forth.
4. In a steam boiler, an insulated jacket enclosing and isolating a space in which the water surrounding the furnace is confined.
5. In a steam boiler fitted with Galloway tubes, an inner insulated tube in combination with an insulated jacket, which encloses a space in which the water surrounding the furnace is confined, such space having an inlet near the bottom of the boiler, and an outlet at or near the water level as and for the purpose set forth.
6. In a steam boiler, having field tubes, the insulation of the inner circulating tubes, in combination with an insulated jacket to which they are secured as and for the purpose set forth.
7. In a water tube boiler, constructed with concentric tubes, the insulating of the inner tubes and the central dividing plate to which they are secured, as and for the purpose set forth.
8. In an internally fired boiler, an insulated jacket confining the water which surrounds the furnace, in combination with insulated tubes which extend to or near the water level, substantially as and for the purpose herein set forth.
9. In a steam boiler, an insulated jacket, enclosing a space, having an inlet near the bottom of the boiler, and an outlet at or near the water level, in combination with a baffle plate, as and for the purpose set forth.
10. In a steam boiler, in combination with the furnace b, the insulated jacket c, enclosing space m about said furnace, the inlet j and outlet e, substantially as described and shown in the drawings and for the purpose herein set forth.

11. In a steam boiler, in combination with the furnace b, the insulated jacket c, enclosing space m about said furnace, the inlet j, outlet e and baffle plate d, substantially as described and shown on the drawings and for the purpose herein set forth.

Specification, 11s. 6d. Drawings on application.

Application No. 3945.—JOHN COWAN, of 2 St. Andrew's Square, Edinburgh, Scotland, Managing Director of the Stirling Boiler Company, Limited, "*Improvements in Water Tube Boilers.*"—Dated 15th July, 1902.

*Claims:—*

1. In water tube boilers with two or more steam and water drums increasing the effective distance between the water level in these drums and the steam outlet by means of directive baffle plates so that the outlet draws steam only by way of a drum other than that on which it is secured.
2. In water tube boilers provided with three or more steam-and-water drums, increasing the effective distance between the water level in these drums and the steam outlet by means of an internal pocket or box secured opposite the steam outlet, groups of steam tubes connecting the steam spaces of the drums together, and a group of steam tubes connecting the steam box with the steam space of the back drum, and in equal baffle plates opposite the steam tubes whereby the steam can only pass to the outlet by way of the baffle plates, connecting tubes, and steam pocket, substantially as described.
3. In water tube boilers as claimed in Claim 1, connecting the steam spaces of the steam-and-water drums by two or more sets of tubes separated into groups for steam circulation by means of baffle plates forming pockets in the upper part of the middle and front drums, the upper group of tubes being connected with the outlet by a pocket in one of the drums, preferably the front one.
4. In water tube boilers having upper steam-and-water drums connected by banks of tubes with a single lower water drum, partitions dividing the water space of the upper drum most remote from the furnace and the lower water drum into two longitudinal spaces, so that the feed water admitted to one of these spaces in the upper drum is kept practically separate from the main water circulation of the boiler until it has passed down the coolest bank of tubes into the back lower water space, and means for equalising the water circulation, substantially as described.
5. The combination of a water tube boiler as claimed in Claim 4, with tubes connecting the front water space of the back steam-and-water drum with the water space of the adjacent steam-and-water drum so as to prevent piling of the water in the front steam-and-water drum of the boiler, substantially as described.
6. The combination of a water tube boiler as claimed in Claims 4 and 5 with steam baffling or drying devices as claimed in Claim 1.
7. Water tube boilers provided with the improved water circulation devices hereinbefore described with reference to Figures 1 to 6 of the accompanying drawings.
8. Water tube boilers provided with the improved steam baffling or drying devices hereinbefore described with reference to Figures 1 to 8 of the accompanying drawings.

Specification, 4l. Drawings on application.

Application No. 3968.—THOMAS HERBERT, of Brighton Road, Remuera, in the Provincial District of Auckland and Colony of New Zealand, Manufacturer, and FRANK JAGGER, of Arney Road, Remuera aforesaid, Merchant, "*An improvement in Ping Pong bats.*"—Dated 29th July, 1902.

*Claims:—*

1. In a ping pong bat the blade thereof having its surfaces or faces formed into regular evenly spaced and parallel corrugations made to run either lengthwise, crosswise, diagonally, or at any other angle for the purpose set forth, substantially as described.
2. In combination in a ping pong bat the blade thereof having its surface or faces formed into regular evenly spaced and parallel corrugations made to run either lengthwise, crosswise, diagonally, or at any other angle and the handle suitably secured thereto for the purpose set forth, substantially as described.

Specification, 3s. Drawings on application.

R. G. FERGUSON,

Registrar of Patents.

Patent Office, Perth,  
2nd August, 1902.

NOTICE is hereby given that the undermentioned Application for the Grant of Letters Patent, and the complete Specification annexed thereto, has been accepted, and is now open to public inspection at this Office.

Any person or persons intending to oppose this application must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the *Western Australian Government Gazette*. A fee of Ten Shillings (10s.) is payable with such notice.

Application No. 3954.—WILHELM BÖTTCHER, Engineer, and RUDOLF ALFRED FRIEDRICH, Merchant, both of Perth, Western Australia, "*A new and improved method to extract all fine gold, which is contained in the material or stuff commonly known as 'Kanowna pug,' and in materials of a like nature or character, such as clay, scapolite, and others.*"—Dated 17th July, 1902.

*Claim:—*

The improved method of extracting fine gold from what is commonly known as "Kanowna Pug," substantially as described in the accompanying specification.

Specification, 1s. 6d.

R. G. FERGUSON,

Registrar of Patents.

Patent Office, Perth,  
1st August, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten Shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 31, 1st August 1902.

Application No. 3543.—ARTHUR CONSTANT AUCHER, of Bank Street, South Brisbane, in the State of Queensland, Commonwealth of Australia, Bachelor of Arts, "An improved Burner and Mantle for Incandescent Gas Lighting."—Dated 17th September, 1901.

Specification, 3s. 6d. Drawings on application.

Application No. 3953.—THE VACUUM CLEANER COMPANY, LIMITED, of 25 Victoria Street, in the County of London, England (assignee of Herbert Cecil Booth), "Improvements relating to the Extraction of Dust from Carpets and other materials."—Dated 16th July, 1902.

Specifications, 15s. Drawings on application.

Application No. 3958.—PERCY HERBERT DANDO, of Whangarei, in the Colony of New Zealand, Cabinet-maker, "Improvements in Chamber Utensils and attachments therefor."—Dated 21st July, 1902.

Specification, 3s. 6d. Drawings on application.

Application No. 3961.—PHILIP RAYSON, of Orrong Road South, Elsternwick, in the State of Victoria, Engineer, "Improvements in Spanner Attachments."—Dated 22nd July, 1902.

Specification, 4s. 6d. Drawings on application.

Application No. 3962.—MATTHEW BERNARD SILK, of S2 King Street, Sydney, in the State of New South Wales, Tailor, "An apparatus for Shrinking Cloth and other fabrics."—Dated 22nd July, 1902.

Specification, 3s. Drawings on application.

Application No. 3965.—WALTER LEITCH, of Wattletree Road, Malvern, in the State of Victoria, Merchant, "Improvements in the manufacture of Sweetmeats and the like."—Dated 26th July, 1902.

Specification, 5s. 6d. Drawings on application.

R. G. FERGUSON,  
Registrar of Patents.

Patent Office, Perth,  
25th July, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 30, 25th July, 1902.

Application No. 3583.—JULIUS PAUL KERBAUM, of 19 Nicholson Street, South Yarra, in the State of Victoria, Bootmaker, "Improvements in Locks for mail bags and cognate purposes."—Dated 8th October, 1901.

Specifications, 11s. 6d. Drawings on application.

Application No. 3586.—GEORGE ANDREW, of No. 88 Barkly Street, Carlton, in the State of Victoria, Commonwealth of Australia, Joiner, "Improved Cash Register and Indicator."—Dated 8th October, 1901.

Specification, 8s. 6d. Drawings on application.

Application No. 3599.—WALTER SKELTON, of the Broadway, Dunolly, in the State of Victoria, Commonwealth of Australia, Importer, "Improvements in a Combination Water-bag and Extension Cool Chamber or Chambers."—Dated 17th October, 1901.

Specifications, 6s. Drawings on application.

Application No. 3761.—CHARLES EDWARD NICHOLAS, of "Atheistane," Denham Street, Hawthorn, in the State of Victoria, Commonwealth of Australia, Engineer, "Improved Steam Condenser."—Dated 4th March, 1902.

Specification, 3s. Drawings on application.

Application No. 3913.—JAMES HENRY SOUTHCOFF, of 196 Gilles Street, Adelaide, in the State of South Australia, in the Commonwealth of Australia, Engineer, "Improvements in the Manufacture of Trough Linings for Saddle-trees."—Dated 27th June, 1902.

Specification, 3s. 6d. Drawings on application.

Application 3914.—WILLIAM WATTIE, citizen of the United States, residing at Worcester, County of Worcester, State of Massachusetts, United States of America, Mechanical Engineer, "Improvements in Straw Matting, and Looms for making the same."—Dated 27th June, 1902.

Specification, 16s. Drawings on application.

Application No. 3916.—JAMES PURVIS, of 21 Great St. Helen's, in the City of London, England, Brickmaker, and THOMAS ROUSE, of 7 Old Hill Street, Stamford Hill, in the County of Middlesex, England, Gentleman, "Improvements in the manufacture of Artificial Stone."—Dated 1st July, 1902.

Specification, 3s. 6d. Drawings on application.

Application No. 3919.—ERNEST BÖHM, of 99 Cannon Street, London, E.C., England, "Improvements in Electric Lamp Globes."—Dated 1st July, 1902.

Specification, 3s. 6d. Drawings on application.

Application No. 3921.—ROLAND HENRY EASDOWN, of Mount McDonald, in the State of New South Wales, Postmaster, "Improvements in Fastenings for Mailbags, and the like."—Dated 1st July, 1902.

Specification, 3s. Drawings on application.

Application No. 3924.—FREDERICK MONDELET GAUDET, of Quebec, in the Province of Quebec, Canada, a major in His Majesty's Regiment of Royal Canadian Artillery and Superintendent of the Dominion Arsenal, at present residing at 5 Gloucester Walk, West Kensington, in the County of London, England, "Improvements in Targets for Miniature Ranges."—Dated 2nd July, 1902.

Specification, 13s. 6d. Drawings on application.

R. G. FERGUSON,  
Registrar of Patents.

Patent Office, Perth,  
18th July, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 29, 18th July, 1902.

Application No. 3891.—WILLIAM JOSEPH DIBDIN and HERMAN CHARLES WOLTERECK, of Edinburgh Mansions, Howie Place, Victoria Street, London, S.W., Consulting Chemists, "Process of Manufacturing Illuminating or Heating Gas."—Dated 5th June, 1902.

Specification, 4s. 6d. Drawings on application.

Application No. 3896.—EDWARD WATERS, a member of the firm of EDWARD WATERS & SON, Patent Agents, of Nos. 414-418 Collins Street, Melbourne, in the State of Victoria and Commonwealth of Australia (Rose Gold Reclamation Company), "Gold Separators."—Dated 10th June, 1902.

Specifications, 7s. Drawings on application.

Application No. 3898.—WILLIAM KINGSLAND, of 8 Breams' Buildings, Chancery Lane, in the City of London, England, Electrical Engineer, "Improvements in Mechanism or Devices for communicating Step-by-step Motions, for controlling and for encasing and mounting Electric Switches."—Dated 10th June, 1902.

Specification, £1 1s. Drawings on application.

Application No. 3899.—WILLIAM PAYNE, PERCY DEAN BRAY, and JAMES HYNDR GILLIES, all of Orange, in the State of New South Wales, Assayer, Medical Practitioner, and Mining Engineer respectively, "Improvements in the Treatment of Copper Ores."—Dated 10th June, 1902.

Specification, 2s.

Application No. 3902.—OLIVER IMRAY, of Birkbeck Bank Chambers, Southampton Buildings, in the County of London, England, Chartered Patent Agent (assignee of J. W. L. ONKEN), "*Improvements in Electro-magnetic Couplings.*"—Dated 10th June, 1902.

Specification, 9s. 6d. Drawings on application.

Application No. 3906.—DOUGALD DRUMMOND, of South Bank Lodge, Surbiton, in the County of Surrey, England, Engineer, "*Spark-Arrester for Locomotive and other Engines.*"—Dated 11th June, 1902.

Specification, 5s. Drawings on application.

Application No. 3915.—EMILE MASLIN, of Tricon Buildings, Bonneveine, No. 6 Marseilles, in the Republic of France, Engineer, "*Improvements in and relating to Steam Boiler and other Furnaces and Heat-generating Apparatus.*"—Dated 28th June, 1902.

Specification, 10s. Drawings on application.

Application No. 3920.—WILLIAM BUCKINGHAM, of Nos. 171 and 173 Riley Street, Sydney, in the State of New South Wales and Commonwealth of Australia, Draper, "*Improvements in annular chamber types of Rotary Engines and Pumps.*"—Dated 1st July, 1902.

Specification, 11s. 6d. Drawings on application.

Application No. 3922.—RICHARD SPARROW, of Perth, Western Australia, Patents Agent (B. G. Lamme), "*Improvements in Single-phase Alternating Current Electric Motors.*"—Dated 1st July, 1902.

Specification, £1 5s. 6d. Drawings on application.

R. G. FERGUSON,  
Registrar of Patents.

Patent Office, Perth,  
11th July, 1902.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose any of such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the first appearance of this advertisement in the Western Australian Government Gazette. A fee of Ten shillings (10s.) is payable with such notice.

For particulars of claims, vide Gazette No. 28, 11th July, 1902.

Application No. 3514.—THE LONDON AND HAMBURG GOLD RECOVERY COMPANY, LIMITED, of 22 Austin Friars, London E.C., England (Assignee of Ludwig Diehl and George Henry Walkeden), "*Combined Condensing and Evaporating Appliances for the distillation of Impure Water.*"—Dated 23rd August, 1901.

Specification, 7s. Drawings on application.

Application No. 3520.—REUBEN SPARROW, of Richardson Street, South Melbourne, in the State of Victoria, Commonwealth of Australia, Engineer, and NICOLAY FAHRENHOLTZ JENSEN, of No. 21 High Street, Malvern, near Melbourne, in the said State of Victoria, Nurseryman, "*An Improved Hub Brake for Cycles, Automobiles, and other road vehicles.*"—Dated 3rd September, 1901.

Specification, 4s. Drawings on application.

Application No. 3525.—WILLIAM GEORGE GIBBINS, of Argyll House, Kirkdale Road, Leytonstone, in the County of Essex, England, Furrier, "*Improvements in Washing Machines.*"—Dated 4th April, 1901.

Specification, 8s. Drawings on application.

Application No. 3532.—RICHARD BUCK ARTHUR, of 39 Armstrong Street, Ballarat, in the County of Grenville, State of Victoria, Commonwealth of Australia, Shopman, "*An improved process for preserving Leather and similar substances from Mineralised Waters.*"—Dated 11th September, 1901.

Specification, 3s. 6d. Drawings on application.

Application No. 3589.—MANUEL ANTONIO GOMES HIMALAYA, of 76A Estrada de Monsanto, Bemfica, Lisbon, Portugal, late of Rue de Buzenval, Boulogne-sur-Seine, Department of Seine, in the Republic of France, Engineer, "*Improved Apparatus for making industrial use of the heat of the sun and obtaining High Temperatures.*"—Dated 9th October, 1901.

Specification, £1. Drawings on application.

Application No. 3874.—WILLIAM JULIUS BALTZER, of 82 Pitt Street, Sydney, in the State of New South Wales, Civil Engineer, "*Improvements in the re-inforcement of Plastic Materials.*"—Dated 19th May, 1902.

Specification, 3s. 6d. Drawings on application.

Application No. 3897.—GEORGE THOMAS ALLNUTT, of Centre Dandenong Road, Cheltenham, near Melbourne, in the State of Victoria, Commonwealth of Australia, Market Gardener, and WILLIAM EDWARD LAKE, of the same address, Creamery Employee, "*An improved Machine for Cutting Bulk Butter into pieces of pre-determined size.*"—Dated 10th June, 1902.

Specifications, 6s. Drawings on application.

Application No. 3900.—EMILY LANGER, of Petersham, near Sydney, in the State of New South Wales, Dress Cutter, "*Improvements in the Drifting of Patterns for Garments, and in Charts therefor.*"—Dated 10th June, 1902.

Specification, £3 5s. Drawings on application.

Application No. 3903.—GODFREY BAMBERG, of Boswell House, Bolt Court, Fleet Street, London, England, Consulting Chemist, "*Improvements in Detergents and their manufacture.*"—Dated 12th June, 1902.

Specification, 6s. 6d.

Application No. 3904.—WILLIAM GEORGE WAUCHOPE, of 18 George Street, Perth, in the State of Western Australia, in the Commonwealth of Australia, Malster, "*An improved Torrifler for Malting purposes.*"—Dated 14th June, 1902.

Specification, 3s. 6d.

R. G. FERGUSON,  
Registrar of Patents.

Patent Office, Perth,  
27th June, 1902.

Renewal Fees paid on Patents registered from the 26th July to the 2nd August, 1902.

Fees payable before the end of the seventh year in respect of the seven following years:—

- No. 648.—H. R. Dixon.
- No. 727.—J. Hillman.
- No. 746.—H. R. Dixon.
- No. 750.—E. Maertens.

Fees payable before the end of the fourth year in respect of the three following years:—

- No. 2204.—H. R. Dixon.
- No. 2207.—F. Lobnitz.

Trade Marks.

Patent Office, Trade Marks Branch,  
Perth, 8th August, 1902.

IT is hereby notified that I have received the under-mentioned Applications for the Registration of Trade Marks.

Any person or persons intending to oppose any of such applications must leave particulars in writing, in duplicate (on Form F), of his or their objections thereto, within two months of the first advertisement of the applications in the Western Australian Government Gazette.

A fee of £1 is payable with such notice.

In the case of an Application in which have been inserted a statement and disclaimer (or a disclaimer only), a copy of the same is printed in *italics* in connection with the advertisement.

R. G. FERGUSON,  
Registrar of Designs and Trade Marks.

Application No. 2473, dated 15th May, 1902.—HUNTLEY AND PALMERS, LIMITED, of Reading, England, Biscuit Manufacturers, to register in Class 42, in respect of Biscuits, a Trade Mark, of which the following is a representation :—

The said Trade Mark having been used by us and our predecessors in business, in respect of the articles mentioned, for nineteen years before the 1st January, 1885.

The essential particulars of the Trade Mark are: A representation of a Garter and Buckle, the Garter bearing the words "Huntley & Palmers Reading Biscuits."

This Mark was first advertised in the Western Australian Government Gazette of 13th June, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2474, dated 15th May, 1902.—HUNTLEY & PALMERS, LIMITED, of Reading, England, Biscuit Manufacturers, to register in Class 42, in respect of Biscuits, a Trade Mark, of which the following is a representation :—

The said Trade Mark having been used by us and our predecessors in business, in respect of the articles mentioned, for eighteen years before the 1st January, 1885.

The essential particulars of the Trade Mark are the following: A label wrapper or covering adapted for application to the cover and four sides of one of the boxes in which the proprietors' biscuits are commonly sold, the portion of the wrapper which occupies the top of the box bearing a view of the proprietors' works, the portion at the front and rear, the proprietors' name coupled with "Superior Reading Biscuits," and the end portions the words "Huntley & Palmers Reading Biscuits" arranged in a circle.

This Mark was first advertised in the Western Australian Government Gazette of 13th June, 1902—vide notice at head of Trade Mark advertisements.

Applications Nos. 2483, 2484, dated 27th May, 1902.—ALLEN & HANBURYS, LIMITED, of Plough Court, 37 Lombard Street, and Bethnal Green, London, England, Manufacturing Chemists. Application No. 2483, to register in Class 42, in respect of substances used as food or as ingredients in food, and Application No. 2484, to register in Class 3, in respect of chemical substances prepared for use in medicine and pharmacy, a Trade Mark, of which the following is a representation :—

This Mark was first advertised in the Western Australian Government Gazette of 13th June, 1902—vide notice at head of Trade Mark advertisements.

Application No. 2485, dated 27th May, 1902.—GOLLIN AND COMPANY PROPRIETARY, LIMITED, of Melbourne, Victoria; Sydney, New South Wales; Adelaide, South Australia, and Wellington, New Zealand, Merchants, to register in Class 42, in respect of Tinned, or Canned and Dried or Preserved Fish, Tinned or Canned Meats, Fruits, and other Tinned or Canned Food Products, a Trade Mark, of which the following is a representation :—
