THE MINING DEVELOPMENT ACT, 1902.

REGULATIONS UNDER WHICH STONE WILL BE
CRUSHED AND TAILINGS TREATED AT THE STATE
BATTERIES.

Department of Mines,
Perth, 7th April, 1904.

HIS Excellency the Governor in Executive Council, under the powers conferred upon him by Section 29 of "The Mining Development Act, 1902," has been pleased to cancel the Regulations gazetted on 14th August, 1903, and in lieu thereof to make the following Regulations under which Stone will be crushed and Tailings treated at the State Batteries.

H. GREGORY,
Minister for Mines.

1. All stone accepted for treatment at the State batteries shall be estimated at 21 cubic feet per ton, except where weighing machines are provided, when stone must pass over same to ascertain weight.

2. The manager of the battery may refuse any stone considered too poor to pay crushing charges, unless a deposit is paid in advance.

3. The charge for crushing, as determined from time to time by the Hon. the Minister for Mines, shall be posted up at each battery and strictly adhered to while in force.

4. A minimum charge will be made for all parcels of less tonnage than will return £5 on the rate charged per ton.

5. Payment for crushing shall be made to the manager on completion of treatment, or sufficient gold will be retained to pay for the amount due.

6. Where no cyanide plant has been erected at a battery, any person desirous of claiming tailings, the proceeds of his crushing, shall remove them from the battery site immediately the crushing is completed, otherwise they will be deemed absolutely abandoned.

7. Where a cyanide plant has been erected at a battery, tailings resulting from stone crushed at that battery will be treated, but the manager may, in his discretion, refuse to treat any tailings should he consider them unsuitable for treatment by cyanide.

8. The number of tons of tailings suitable for cyanide treatment by the ordinary leaching vat plant installed at the battery shall be determined by the manager, whose decision shall be final; provided that in no case shall such tonnage exceed eighty per cent. of the number of tons milled. Where a slimes plant is working in conjunction with the ordinary vat system, the combined tonnage of sand and slimes shall not exceed 90 per cent. of the tons milled.

9. The manager shall take samples of the tailings as they pass through the battery, or from the pit into which the tailings may be deposited. The tailings collected shall be thoroughly mixed and divided into three samples, one for assay by the manager, one for the owner, and one sealed and kept by the manager for reference. The assay of the manager's sample will be available on application within fourteen days from the completion of any crushing, and should the owner dispute such assay he shall, within six weeks of the completion of the crushing, notify the manager to that effect, in writing, and shall at the same time forward a certificate from a competent assayer. On receipt of such certificate the results of the two assays will be averaged, provided that the difference between them does not exceed six grains; but should the difference in the assay exceed six grains, and should the owner still refuse to accept the manager's assay, the manager shall forward the sealed sample previously referred to, to the Government assayer, Perth, and the result of the assay as furnished by him shall be indisputable and final. The cost of such assay (fifteen shillings) shall be borne by the party whose assay differs most widely from the referee assay.

10. A clean-up will be made about every two months when the Department will make a *pro rata* distribution, based upon the original assay value of the tailings, the estimated extraction therefrom, and the actual extraction. After the deduction of ten shillings per ton for cost of treatment, the owners of tailings treated will receive the amount due to them within 14 days after the value of the bullion has been ascertained.

11. All tailings assaying less than 3dwts. 3grs. per ton shall become the property of the Government.

12. A charge of ten shillings per ton for treatment shall be the first charge on all tailings treated, and the gold contents of tailings will be paid for at the rate of Four pounds per ounce.

13. All tailings collected for treatment by the owner will be treated at the rate of 27 cubic feet per ton.

14. All slimes, the produce of stone crushed at any State Battery, shall be absolutely the property of the Government, but when the Minister has decided to erect a plant for treatment of slimes in connection with such battery, thenceforward, as from such date as may be fixed by the Minister, payment will be made to the owners of the stone from which slimes are obtained of the value of the gold actually obtained therefrom by such treatment, less such charges for treatment, and deductions, and allowances for losses, and subject to such conditions and regulations as the Minister may from time to time prescribe.

15. All stone will be delivered and received for treatment absolutely at the owner's risk, and the Government shall not be responsible for any suspension of operations, delays in treatment, or for any loss or damage arising from any cause whatsoever

16. At every battery there will be kept a book in which shall be recorded the number of tons in each parcel left for treatment, the name, locality, and number of the lease or holding from which it is obtained, and the name of the person for whom the stone is to be crushed.

A copy of the foregoing rules shall be inserted in the said book, and every person sending stone for treatment shall sign opposite the entry relating to the stone lodged by him, and such signature shall be sufficient evidence that he is cognisant of the foregoing rules, and agrees to be bound by them.

GOVERNMENT ASSAYS.

ASSAYS, Analyses, and Determinations of any Western Australian Ore or Rock will be made by the Assayer to the Geological Survey, when not unduly interfering with official work, subject to the following conditions:—

1. Each sample must weigh at least 6oz., but not more than 2lbs.

2. Each sample must be enclosed in a separate canvas bag or strong paper wrapper, with a slip of paper bearing the name and address of the sender, together with a private mark by which it may be readily identified.

3. The parcel must be forwarded prepaid to:—

The Mineralogist and Assayer,
Geological Survey Office,
Perth.

4. A letter must be sent at the same time to the same address, stating for what metals the samples are to be assayed, or containing other instructions, as the case may be.

(N.B.—It is always advisable to keep duplicate samples of those submitted.)

5. Before any assay is made the prescribed fee must be paid to the Mineralogist and Assayer or sufficient reasons, in accordance with Section 7 below, be furnished for having the samples treated free of cost.

6. The following fees will be charged:—

	£	s.	d.

(b.) Assay for Lead, Iron, or Manganese, each ...	0	10	6

7. With the object of encouraging *bonâ fide* prospecting, free assays will be made under the following circumstances:—

- (a.) The sample must have been obtained from land within the State not held under lease for mining purposes.
- (b.) The exact locality where the sample was found must be disclosed.
- (c.) The sample must be of sufficient promise to warrant an assay being made at the expense of the State.
- (d.) Free assays will not be made of samples showing free gold, or of tailings or other metallurgical products, or of umpire samples.

8. The Department reserves to itself the right of refusing to make any particular assay, and also the right of publishing at any time the results of an assay made at the public expense.

* Averages for three years only.

This was an unusually warm month in Western coastal districts, but on the Eastern side of the Darling Ranges it was, on the contrary, remarkably cool. We find that whereas at the Perth Observatory the mean daily maximum was 4·1 above that for previous years, at Coolgardie it was 4·7 below, so that we have the very unusual condition that the Eastern Goldfields in March were considerably cooler than the districts near the West coast. In fact the hottest place in the whole State South of latitude 30 was Guildford; Geraldton was very much hotter than usual, the mean daily maximum being 89·1 or 5·7 above the average for previous years. There were two very unpleasant periods of hot sultry weather, viz., from 28th February to the 8th March, and from the 21st to 27th. Altogether there were 12 days when the temperature exceeded 90, or more than double the average. Following the former heat spell were showers in South-West and South districts, and following the latter were general rains throughout the extra tropical portion of the State; in some cases very heavy. On the whole the rainfall in South-West and South districts was far in excess of the mean for previous years. Elsewhere it was patchy, but mostly above the average.

Pressure was generally below the average, especially on the South-West coast.
