PUBLIC NOTICE.
DEVELOPMENT OF MINING.

Advances on Alunite.

Department of Mines,
Perth, 18th July, 1919.

1322/19.
IT is hereby notified, for public information, that in order to assist in the development of the Potash deposits of the State, the Government, until further notice, is prepared to make cash advances on alunite of suitable quality, on the following terms and conditions, viz. :—

1. The alunite shall be the produce of mines in the State of Western Australia.

2. The alunite shall be delivered at such places and to such persons as the Minister from time to time shall appoint.

3. The weight of each parcel delivered shall be determined by actual weighing or by measurement, as the person appointed to receive it shall determine. He shall draw a fair sample for moisture determination, and another for analysis for the extractable potash content, and shall send them to the person or persons appointed by the Minister to assay same. All methods of weighing, measuring, sampling, and assay shall be in accordance with the instructions of the State Mining Engineer. The owner of the alunite, or his representative appointed in writing, may be present at the weighing and sampling, but shall not interfere with the work, or approach nearer than is allowed by the person in charge of the sampling. The weight and moisture deduction as determined at the time of receipt of the parcel shall be final.

4. The sampler shall divide his final sample into three approximately equal portions, one of which he shall give to the owner of the parcel, another which he shall send to the Analyst appointed by the Minister to assay such samples, and the third shall be sealed and preserved by him to be sent to an umpire if necessary.

5. The Analyst shall determine the percentage of potash in each sample which can be extracted by calcining followed by leaching with hot water, and such extractable potash shall be deemed to be the whole of the potash in the sample for the purpose of these conditions, notwithstanding that complete analysis may show that a further portion of potash remains in the insoluble residue.

6. The owner of the parcel, within one week of the date of sampling, may submit to the officer in charge an assay by a qualified analyst of the portion of the final sample taken by him for comparison with that made by the analyst for the Government. The agreed percentage of potash shall be calculated to the first place of decimals of a unit only. If the results do not differ by more than one-half per cent. of potash (K_2O), the mean of both results shall be taken as correct; but if the difference be greater than one-half per cent. potash (K_2O), the parties may agree to a mean result, or either may require an umpire assay. If an umpire assay be required, the umpire sample shall then be sent to the Government Assayer in Perth as umpire, and the mean of his assay and the nearer to it of the two previous ones shall be deemed to be correct. The umpire's fee shall be paid by the party whose result is furthest from that of the umpire. The Government Assayer shall be such officer of the Geological Survey of W.A. or of the Government Analyst's Department as shall be appointed from time to time by the Minister to carry out such duty.

If the owner of the parcel do not submit his assay within one week, the assay by the Analyst appointed by the Minister shall be accepted as final.

7. Cash advances will be made on agreement of assays upon the estimated selling value of each parcel of the mineral according to its net dry weight and the quantity of extractable potash contained therein, in the manner hereunder following, viz. :—

(a.) The estimated selling value of each unit (*i.e.*, one per cent.) of potash (K_2O) shall be deemed, for the purpose of the advances, to be fifteen shillings (15s.) unless and until, in the opinion of the Minister from time to time, the selling price actually obtainable for the potash shall require such estimated value to be reduced or admit of it being increased, when he may alter it to such other amount as he shall think reasonable by giving notice as in Clause 12 hereunder.

(b.) The advances will be reckoned on the total number of units of extractable potash (K_2O) in each parcel, found by multiplying the agreed assay by the net dry weight, at the estimated selling price as fixed by the foregoing subclause (a), less five shillings

per unit of potash, and also less a penalty of two pence (2d.) per unit for every one tenth of a unit by which the agreed assay falls below four per cent. (4%) extractable potash (K_2O).*

(c.) Before making the advances any expenses paid by the Government for transport of the mineral from the mine to the place of reception may be deducted, and also such charges towards costs of receiving, sampling, and assaying the parcels as the Minister may approve from time to time.

8. The Receiving Officer may require any parcel which he may consider to be of doubtful quality to be deposited separately until it has been assayed, and should the assay show that it is unsuitable to be accepted for any reason, the owner shall remove it at his own cost. (Owners are therefore recommended to have their mineral assayed before carting from their mines, so as to be assured that it will not be refused by the receiver.)

9. After being weighed, sampled, and assayed, parcels of alunite will not be kept separate, but will be heaped together and dealt with in larger combined parcels at the Minister's discretion. They shall be deemed to be the property of the Minister for all purposes of sale, treatment, or other method of realisation, and no person shall have any claim upon the Government on the ground that his mineral has not been realised upon to the best advantage.

10. Any moneys resulting from disposal of the alunite by the Minister will be subject to a first charge upon them of all his expenditure upon the same material, inclusive of interest at $6\frac{1}{2}$ per cent. per annum, or such other rate as may be from time to time fixed by the Minister, on all moneys laid out by him for advances, transport, treatment, and all other realisation charges. Any balance will then be divided among the owners of the mineral in such manner as may seem to the Minister to be most equitable.

11. Any parcel of less than five (5) tons net dry weight shall be charged with an extra charge of ten shillings, to be deducted from the advance.

12. Appointments by the Minister under the foregoing conditions and his decisions from time to time on matters therein left to his discretion will be notified by public notices posted in places approved by the Minister as convenient for the producers of the mineral, and such notices shall be deemed to be sufficient notification thereof.

13. All persons sending in alunite under the foregoing conditions shall be deemed to have agreed thereto and to be bound thereby.

*Examples:—(i.) Value under (a) being 15s. per unit and agreed assay 3.5% K_2O , the advance per ton of net dry weight of the parcel of mineral would be—

4 — 3.5 = 0.5 units
= 5 tenths
x 2d. = 10d. penalty per unit.
15s. — 5s. = 10s.
less 0s. 10d. penalty
= 9s. 2d. value per unit.
3.5 units x 9s. 2d. = 32s. 1d. value per ton for advances.

(ii.) Value under (a) having fallen to 12s. and agreed net assay being 3.1% K_2O —

4 — 3.1 = 0.9 units
= 9 tenths
x 2d. = 1s. 6d. penalty.
12s. — 5s. = 7s.
less 1s. 6d. penalty
= 5s. 6d. value per unit.
3.1 units x 5s. 6d. = 17s. value per ton for advances.

Minister for Mines.
