**LAND OPEN FOR SELECTION.**

IT is hereby notified, for general information, that the areas scheduled hereunder will be available for selection under "The Land Act, 1898," and its amendments, on and after the dates set out in the schedules.

The areas marked "A" shall be open for selection by the special classes of selectors hereinafter named in the following order of preference:—

- (1) Under "The Discharged Soldiers' Settlement Act, 1918," by "Discharged Soldiers" within the meaning of paragraphs (a), (b), and (c) of the interpretation of the term in Section 3 of that Act, and "Dependants" within the meaning of that term in the said section.
- (2) Under "The Land Act, 1898," by ex-British Soldiers who were on active service in the late war.
- (3) Under "The Land Act, 1898," by Munition Workers in the late war.
- (4) Under "The Land Act, 1898," by ordinary selectors.

(In the event of an applicant other than a Discharged Soldier under subparagraph (1) obtaining a block within a Repurchased Estate, the term of the lease and conditions of payment will be subject to re-adjustment in accordance with the provisions of "The Agricultural Land Purchase Act, 1909.")

The areas marked "B" are not subject to such order of preference.

The areas marked thus \* are open under Part VI.

Applications must be lodged at the Local Land Office for the district in which the land is situated, and should be lodged on or before the date specified.

All applications lodged on or before such date will be treated as having been received on the closing day, and if there are more applicants than one for any block the application to be granted will be determined by the Land Board, except in cases where it is already determined by the order of preference set out above under "A." Should any lands remain unselected such will continue available until applied for or otherwise dealt with.

If a Land Board sitting becomes necessary, the applicants for the blocks will be duly notified of the date, time, and place of the meeting of the Board, and there shall be an interval of at least three days between the closing date and the sitting of the Board.

If an applicant wishes to appear before the Land Board in person he may apply to the Head Office or to the Clerk in Charge of any of the District or Branch Land Offices for a certificate to the Railway Department which, on presentation at the nearest Railway Station, will entitle him to a Return Ticket, at Excursion Rates, to the place where the Board will sit, available for seven days from the date of issue.

The selector of a Homestead Farm from any location available under Part VIII. must take the balance thereof, if any, under Conditional Purchase.

*The prices quoted hereunder (exclusive of the value of improvements, if any, and survey fees, and land acquired by the Crown under "The Agricultural Lands Purchase Act, 1909," or otherwise for settlement) are reduced by one-half to Discharged Soldiers only.*

**SCHEDULES.**

Acting Under Secretary for Works and Trading  
Concerns.

#### THE ROAD DISTRICTS ACT, 1919.

##### *Bassendean Road Board.*

WHEREAS by Section 202 of "The Road Districts Act, 1919," the Governor may in his discretion extend the provisions set out in the Second Schedule of the said Act to any District or portion thereof; and whereas by an Order in Council made under the above-mentioned section and published in the *Government Gazette* of the 14th day of July, 1922, the Administrator did in his discretion extend the provisions set out in the Second Schedule of the said Act to the Bassendean Road Board: Now, therefore, the Bassendean Road Board, in pursuance of the powers conferred by the provisions of the said Schedule, doth hereby order as follows:—

##### *Interpretation.*

1. In the construction of these By-laws, unless the context otherwise requires:—

(a.) The word "Surveyor" means the Building Surveyor duly appointed under the provisions of the Second Schedule of "The Roads Act, 1919," Section 2.

##### *Level of ground.*

(b.) The expression "level of ground" shall mean the level of the ground as determined by the surveyor.

##### *Foundation.*

(c.) The expression "foundation" applied to a wall having footings shall mean the solid ground or artificially formed support on which the footings of the wall rest.

##### *Footings.*

(d.) The expression "footings" shall mean the extra spread of wall between the base of the wall and the foundations.

##### *Base.*

(e.) The expression "base" applied to a wall having footings shall mean the underside of the course immediately above the footings, or in the case of a wall carried by a bressummer above such bressummer.

##### *Bressummer.*

(f.) The expression "bressummer" shall mean a metallic or trussed or flitched wooden girder which carries a wall.

##### *Ground storey.*

(g.) The expression "ground storey" shall mean the storey of a building to which there is an entrance from the outside or near the level of the ground, and where there are two such storeys then the lower of the two.

Provided that no storey of which the upper surface of the floor is more than four (4) feet below the level of the adjoining pavement shall be deemed to be the ground storey.

##### *Basement storey.*

(h.) The expression "basement storey" shall mean any storey of a building which is under the ground storey.

(i.) The expression "first storey" shall mean the storey of a building which is next above the ground storey, the successive storey above the first storey being the second storey, the third storey, and so on to the topmost storey.

##### *Topmost storey.*

(j.) The expression "topmost storey" shall mean the uppermost storey in a building, whether constructed wholly or partly in the roof or not, and whether used or constructed or adapted for human habitation or not.

##### *External walls.*

(k.) The expression "external wall" shall mean the outer wall when under a main-roof, or the outside wall of a habitable room, or the outer wall of the main building.

##### *Party walls.*

(l.) The expression "party wall" shall apply to every wall used or built as a separation of any buildings from any other building, such buildings being occupied by different persons.

##### *Cross walls.*

(m.) The expression "cross wall" shall mean a wall used or constructed to be used in any part of its height as an inner wall of a building for separation of one part from another part of the building, that building being wholly in or being constructed or adapted to be wholly in one occupation.

##### *Party fence wall.*

(n.) The expression "party fence wall" shall mean a wall used or constructed to be used as a separation of adjoining lands of different owners and standing on lands of different owners, and not being part of a building, but does not include a wall constructed on the land of one owner, the footings of which project into the land of another owner.

##### *Party arch.*

(o.) The expression "party arch" shall mean an arch separating adjoining buildings, storeys, or rooms belonging to different owners, or occupied, or constructed, or adapted to be occupied by different persons, or separating a building from a public or a private way leading to premises in other occupation.

##### *Party structure.*

(p.) The expression "party structure" shall mean a party wall, or other structure separating two buildings when occupied as separate tenements, and approached by different staircases or separate entrances from without.

##### *Height of walls.*

(q.) The expression "height" in relation to any wall shall mean the measurement taken from the level of the base of such wall to the level of the top of the parapet or, where there is no parapet, to the level of the top of the external wall, or, in the case of gabled buildings, to a level half-way between the base and the apex of such gable.

Provided that where pediments are constructed above the top of the parapet or above the top of the wall, as the case may be, the height of the wall for the whole width of the pediment shall be measured from the base of the wall to a level half-way between the base and the top of such pediment.

##### *Floor area.*

(r.) The expression "floor area" applied to a building shall mean the aggregate superficial areas of so many horizontal sections thereof as there are floors in the said building. The horizontal section of each floor shall be made at the point of its greatest surface dimensions, inclusive of external walls, and of such portions of the party walls as belong to the building, and also of all verandah and balcony floors, covered ways, and light courts.

##### *Squares.*

(s.) The expression "square" applied to the measurement of the area of a building shall mean the space of one hundred (100) superficial feet.

##### *Cubical contents.*

(t.) The expression "cubical contents" applied to the measurement of a building shall mean the space contained within the external surfaces of the walls and the ceilings of the topmost storey, or, where there is no such ceiling, the roof and the upper surface of the floor of its lowest storey.

##### *Dwelling houses.*

(u.) The expression "dwelling house" shall mean a building used or constructed or adapted to be used wholly or principally for human habitation, not being a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

##### *Domestic buildings.*

(v.) The expression "domestic building" includes a dwelling house, suite of offices, and any other building not being a public building or building of the warehouse class, or a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

*Public buildings.*

(w.) The expression "public building" shall mean and include every building used as a church, chapel, or other place of public worship; also every building used for purposes of public instruction; also every building used as a college, public hall, hospital, theatre, public concert room, public exhibition room, or for any other public purposes, not being a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

*Buildings of the warehouse class.*

(x.) The expression "building of the warehouse class" shall mean a warehouse, factory, manufactory, brewery, or distillery, and any other building exceeding in cubical contents one hundred and fifty thousand (150,000) cubic feet, which is neither a public building nor a domestic building nor a building the property of or occupied by or under the control or management of His Majesty's Government or any department thereof.

*Inhabited rooms.*

(y.) The expression "inhabited" applied to a room shall mean a room in which some person passes the night, or which is used as a living room, including a room with respect to which there is a probable presumption (until the contrary is shown) that some person passes the night therein, or that it is used as a living room.

*Habitable room.*

(z.) The expression "habitable" applied to a room shall mean a room constructed or adapted to be inhabited.

*Building owner.*

(aa.) The expression "building owner" shall mean such one of the owners of adjoining land as is desirous of building, or such one of the owners of buildings, storeys, or rooms separated from one another by a party wall or party structure as does or is desirous of doing a work affecting that party wall or party structure.

*Adjoining owner.*

(bb.) The expression "adjoining owner" shall mean the owner or one of the owners, and "adjoining occupier" shall mean the occupier or one of the occupiers of land, buildings, storeys, or rooms adjoining those of the building owner.

## APPLICATION FOR BUILDING LICENSE.

*Form of application.*

2. Every person intending to erect any building or to alter or add to any building within the Road District of Bassendean shall, seven days before commencing to erect, alter, or add to the same, make application in the form provided in Schedule 1 hereof, and deposit with the Surveyor for a period of seven days drawings showing the plan, elevation, and sections of the proposed building, additions, or alterations, together with full and complete specifications of the work to be done. A duplicate of such drawings and a locality plan on tracing linen, showing the position to be occupied by such building, shall at the same time be deposited with the Surveyor to remain permanently in his custody.

3. No person shall commence to erect, alter, or add to any such building until the surveyor shall have signified his approval of such plans and specifications by the issue to such person of a certificate of such approval to be called a "Building License."

(a.) All drawings shall be in ink, on drawing or cartridge paper or tracing cloth of at least 15 inches by 22 inches in size. The drawings shall consist of complete plans of every storey, elevations of external fronts, and one or more sections transverse or longitudinal, showing heights of storeys, depths of foundations, level of ground, construction of walls, floors, roofs, etc., all clearly figured and dimensioned in feet and inches, also a locality plan showing location of proposed site with cardinal or North point position of proposed buildings and any existing buildings on the site or on the allotment, the position of any existing drains, size, depth, and gradient of the proposed drains, and the position of inlets, traps, and ventilators. The distance from the boundaries of the allotment of the proposed buildings shall be figured in feet and inches.

(b.) Distinctive colouring shall be used on the locality plan for new and old buildings.

(c.) The locality plan shall be drawn to a scale of 16 feet to 1 inch, and all other drawings to a scale of not less than 8 feet to 1 inch.

(d.) All plans, drawings, and specifications must be signed by the building owner, or his duly authorised agent.

*Departure from deposited plans.*

4. No person who shall have obtained a "building license" in respect of any building shall in the construction of such building depart from the plans or specifications which have been approved by the Surveyor, without his consent in writing first had and obtained, and such alterations or departures from approved plans and specifications shall be drawn, described, and endorsed on and in the plans and specifications.

## SITES AND FOUNDATIONS OF BUILDINGS.

*Sites.*

5. No person who shall hereafter erect any house or building shall construct the foundations of any such house or building upon any site or portion of any site which shall have been filled in or covered with any material impregnated or mixed with faecal, animal or vegetable matter, or which shall have been filled up or covered with dust or slop or other refuse or upon which any such matter or refuse shall have been deposited, unless and until such matter or refuse shall have been properly removed by excavation or otherwise from such site. Any holes caused by such excavation shall, if not used for a basement or a cellar, be filled in with hard brick or dry rubbish or concrete, sand, or other material to be approved by the Surveyor.

*Foundations.*

6. Every person who shall hereafter erect a building shall cause the foundations of the walls of such building to be formed of a bed of good concrete, not less than nine inches thick, and projecting at least four inches on each side of the lowest course of footings of such walls. If the site be upon a natural bed of gravel or sand, concrete may be omitted from the foundations of the walls.

The concrete shall be composed of clean gravel, broken hard brick, properly burnt ballast, or other hard material, well mixed with freshly burnt lime or cement, in the following proportions:—In the case of lime, not less than one part of lime to four parts of other material; in the case of cement, one part of cement to two parts of sand and four parts of stone.

## GENERAL.

*Brick and stone walls.*

7. Every person who shall hereafter erect any building shall cause the same to be enclosed with walls constructed of brick, stone, or other hard or incombustible substances, with the footings resting on the solid ground or upon concrete or upon other solid structure.

*Walls to be properly bonded.*

8. Every person who shall hereafter erect, alter, or add to any building shall cause every wall erected in the course of such work, which shall be constructed of brick, stone, or other similar substances, to be properly bonded, and solidly put together with mortar or cement, and shall not suffer the external face of any pier, bay between piers, or any other main walls of a building to be carried up otherwise than truly vertical, without any overhang whatsoever except as may be permitted under this By-law, Clause 30, "Projection."

*Return Walls.*

9. Every person who shall hereafter erect, alter, or add to any building shall cause every wall of such building erected in the course of such work, and which may be built at an angle with another wall, to be properly bonded therewith.

*Footings.*

10. Every person who shall hereafter erect, alter, or add to any building shall construct every wall of such building erected in the course of such work (other than a wall carried on a bressummer) so as to rest upon proper footings. He shall cause the projection of the bottom of every wall on each side of the wall to be at least equal to one-half of the thickness of the wall at its base, unless an adjoining wall interferes, in which case the projection may be omitted where that wall adjoins. He shall also cause the diminution of the footing of every wall to be formed in regular offsets, and he shall cause the height from the bottom of such footings to the base of the wall to be at least equal to two-thirds of the thickness of the wall at its base. Provided that in the case of domestic buildings of one storey, in the event of a wall being thickened four inches or more to carry a wall plate, the footings need not project in proportion to, or in respect of such thickening.

*Heights of storeys, etc.*

11. For the purposes of this By-law the measurement of height of storeys and of height and length of walls shall be determined by the following rules:—

*Topmost storey.*

(1.) The height of storeys shall be measured as follows:—

- (a.) The height of a topmost storey shall be measured from the level of the underside of its floor joists up to the level of the top of the parapet, or, if there is no parapet, up to the level of the under surface of the tie of the roof or other covering, or, if there is no tie, or in the case of gables, then up to the level of half the vertical height of the rafters or other support of the roof.

*Pediments.*

- (b.) Pediments constructed on top of walls or on top of parapets shall be included in the topmost storey, and the measurements of same shall be made in accordance with the rule laid down in subsection (r.) of the Interpretation clause.

*Lower storeys.*

- (c.) The height of every storey other than a topmost storey shall be measured from the level of the underside of the floor joists of the storey up to the level of the underside of the floor joists of the storey next above it.

*Lengths of walls.*

(2.) Walls shall be deemed to be divided into distinct lengths by return walls. The length of every wall shall be measured from the centre of one return wall to the centre of another, provided that such walls are external, party, or crosswalls of the thickness required under this By-law, and are bonded into the walls so deemed to be divided.

*Underpinning.*

12. Every person who shall cause the underpinning of walls and chimneys shall cause such underpinning to be built with bricks or stone bedded in cement to the full thickness of the old walls or work if underpinned in brick, and one-third thicker if underpinned in stone, and with proper footings, or to an additional thickness if the increased height of the wall so requires, and shall cause such underpinning to rest on the solid ground, or in concrete, or on other solid substructure as a foundation, and shall cause to be executed to the satisfaction of the surveyor.

*Thickening of walls.*

13. Every person who shall thicken a wall shall cause such thickening to be executed with brick or stone work in cement, properly bonded to the old work, to the satisfaction of the surveyor, provided that in no case shall any person thicken any wall except after notice served on the surveyor of his intention so to do.

## DOMESTIC BUILDINGS.

*Thicknesses of walls.*

14. Every person who shall hereafter erect, alter, or add to any domestic buildings shall construct every external wall and every party wall erected in the course of such work in accordance with the following rules, and in every case the thickness prescribed shall be the minimum thickness of which any such wall may be constructed, provided that the several rules shall apply only to walls built of bricks or of suitable stone or other blocks of hard and incombustible substance, the beds of courses being horizontal:—

- (a.) Where the wall does not exceed twenty-five feet in height its thickness shall be as follows:—

If the wall does not exceed thirty feet in length and does not comprise more than two storeys, it shall be eight and a-half inches thick for its whole height.

If the wall exceeds thirty feet in length, or comprises more than two storeys, it shall be thirteen inches thick below the topmost storey, and eight and a-half inches thick for the rest of its height.

- (b.) Where the wall exceeds twenty-five feet but does not exceed forty feet in height, its thickness shall be as follows:—

If the wall does not exceed thirty-five feet in length it shall be thirteen inches thick below the topmost storey, and eight and a-half inches thick for the rest of its height.

If the wall exceeds thirty-five feet in length it shall be seventeen and a-half inches thick for the height of one storey, then thirteen inches thick for the rest of its height below the topmost storey, and eight and a-half inches thick for the rest of its height.

- (c.) Where the wall exceeds forty feet but does not exceed fifty feet in height, its thickness shall be as follows:—

If the wall does not exceed thirty-five feet in length it shall be seventeen and a-half inches thick for the height of one storey, then thirteen inches for the rest of its height below the topmost storey, and eight and a-half inches for the rest of its height.

If the wall exceeds thirty-five feet but does not exceed forty-five feet in length, it shall be seventeen and a-half inches thick for the height of two storeys, then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next storey, and then thirteen inches thick for the rest of its height.

- (d.) Where the wall exceeds fifty feet but does not exceed sixty feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length it shall be seventeen and a-half inches thick for the height of two storeys and thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next two storeys, and then thirteen inches thick for the rest of its height.

- (e.) Where the wall exceeds sixty feet but does not exceed seventy feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next two storeys, and then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).

- (f.) Where the wall exceeds seventy feet but does not exceed eighty feet in height its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length it shall be twenty-one and a-half inches thick for the height of one storey, then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).

- (g.) Where the wall exceeds eighty feet but does not exceed ninety feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length it shall be twenty-six inches thick for the height of one storey, then twenty-one and a-half inches thick for the height of the next storey, then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).

- (h.) Where the wall exceeds ninety feet but does not exceed one hundred feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length it shall be twenty-six inches thick for the height of one storey, then twenty-one and a-half inches thick for the height of the next two storeys, and then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).

- (i.) Where the wall exceeds one hundred feet but does not exceed one hundred and twenty feet in height, its thickness shall be as follows:—

If the wall does not exceed forty-five feet in length it shall be thirty inches thick for the height of one storey, then twenty-six inches thick for the height of the next two storeys, then twenty-one and a-half inches thick for the height of the next two storeys, then seventeen and a-half inches thick for the height of the next three storeys, and then thirteen inches thick for the rest of its height.

If the wall exceeds forty-five feet in length it shall be increased in thickness in each of the storeys below the uppermost two storeys by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).

*Increased thickness in walls.*

- (j.) If any storey exceeds in height sixteen times the thickness prescribed for its walls by the foregoing rules, the thickness of each external and party wall throughout such storey shall be increased to one-sixteenth part of the height of the storey, and the thickness of each external and party wall below that storey shall be increased to a like extent (subject to the provision hereinafter contained respecting distribution in piers).

*Piers.*

- (k.) Where by any of the foregoing rules relating to the thickness of external walls and party walls of domestic buildings an increase of thickness is required in the case of a wall exceeding sixty feet in height and forty-five feet in length, or in case of a storey exceeding in height sixteen times the thickness prescribed for its walls, or in the case of a wall below that storey the

increased thickness may be confined to piers properly distributed, of which the collective widths amount to one-fourth part of the length of the wall.

*Cross walls.*

- (l.) In buildings four storeys high, where the cross walls are supported from the ground, and where the cross wall in the highest storey is four and a-half inches thick, the cross walls in the two lower storeys shall be at least eight and a-half inches thick, and in the lowest storey thirteen inches thick. In three-storey buildings similar cross walls, which are four and a-half inches thick in the highest storey, shall be at least eight and a-half inches thick in the two lower storeys. In buildings two storeys high, having cross walls running through both storeys, such walls in the lower storey shall be not less than eight and a-half inches thick.

Cross walls in upper storeys not supported from the ground shall be carried on bresssummers.

- (m.) The external walls of all dwelling houses, with ground floor only, shall be not less than nine inches, or eleven inches (with two-inch cavity) in thickness, and all internal walls shall be not less than four and one-half inches in thickness.

*Cavity walls.*

15. The external walls of domestic buildings not exceeding two storeys and the external walls of the two topmost storeys of domestic buildings, exceeding two storeys, may be built with a cavity not exceeding two inches wide, provided—

- (a.) That the collective thickness of the walling on the two sides of the cavity shall not be less than if the wall were built without a cavity.
- (b.) That the walling on each side of such cavity shall have a minimum thickness of four and a-half inches.
- (c.) That the walls on each side of such cavity be tied with galvanised iron or other non-corrosive metal, or by earthenware tie blocks, in the proportion of at least four ties to every square yard of wall surface.
- (d.) That the walls of all storeys below the cavity walls shall be thickened beyond the thickness specified for similar walls in the preceding clause, if required, in order to seat such cavity walls so that the same shall not overhang.

**PUBLIC BUILDINGS.**

16. If a public building corresponds in form or structure or disposition with a domestic building, the rules which obtain for domestic buildings shall apply to such public buildings, provided that the thickness of all external and party walls, and the width of their footings be at least four inches more than is required for similar walls of domestic buildings; but should such public building correspond in form or structure or disposition with a building of the warehouse class, then the rules which obtain for buildings of the warehouse class shall apply to such public buildings, provided that the thickness of all external and party walls, and the width of their footings be at least four inches more than is required for similar walls of a building of the warehouse class.

Should, however, such public building not correspond in form and structure to either a domestic building or to a building of the warehouse class, then such building shall be subject as to its walls and other construction to the special approval of the building surveyor.

**BUILDINGS OF THE WAREHOUSE CLASS.**

*Thickness of walls.*

17. Every person who shall hereafter erect, alter, or add to any building of the warehouse class shall construct every external wall, party wall, and cross wall erected in the course of such work in accordance with the following rules, and in every case the thickness prescribed shall be the minimum thickness of which any such wall may be constructed; provided that the several rules shall apply only to walls built of bricks, or of suitable stone, or other hard and incombustible substance, the beds of courses being horizontal:—

- (a.) Where the wall does not exceed twenty-five feet in height (whatever its length), it shall be thirteen inches thick at its base.

- (b.) Where the wall exceeds twenty-five feet but does not exceed thirty feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed forty-five feet in length, it shall be thirteen inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be seventeen and a-half inches thick at its base.
- (c.) Where the wall exceeds thirty feet but does not exceed forty feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed thirty-five feet in length, it shall be thirteen inches thick at its base.  
If the wall exceeds thirty-five feet but does not exceed forty-five feet in length, it shall be seventeen and a-half inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.
- (d.) Where the wall exceeds forty feet but does not exceed fifty feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed thirty feet in length, it shall be seventeen and a-half inches thick at its base.  
If the wall exceeds thirty feet but does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be twenty-six inches thick at its base.
- (e.) Where the wall exceeds fifty feet but does not exceed sixty feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be twenty-six inches thick at its base.
- (f.) Where the wall exceeds sixty feet but does not exceed seventy feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (g.) Where the wall exceeds seventy feet but does not exceed eighty feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed forty-five feet in length, it shall be twenty-one and a-half inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provisions hereinafter contained respecting distribution in piers).
- (h.) Where the wall exceeds eighty feet but does not exceed ninety feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (i.) Where the wall exceeds ninety feet but does not exceed one hundred feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed forty-five feet in length, it shall be twenty-six inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).

- (j.) Where the wall exceeds one hundred feet and does not exceed one hundred and twenty feet in height, it shall be at its base of the thickness following:—  
If the wall does not exceed forty-five feet in length, it shall be thirty-one inches thick at its base.  
If the wall exceeds forty-five feet in length, it shall be increased in thickness from the base up to within sixteen feet from the top of the wall by four and a-half inches (subject to the provision hereinafter contained respecting distribution in piers).
- (k.) The thickness of the wall at the top, and for sixteen feet below the top, shall be thirteen and a-half inches, and the intermediate parts of the wall between the base and sixteen feet below the top shall be built solid throughout the space between straight lines drawn on each side of the wall, and joining the thickness at the base to the thickness at sixteen feet below the top. Nevertheless, in walls not exceeding thirty feet in height the walls of the topmost storey may be nine inches thick, provided the height of that storey does not exceed ten feet.

*Increased thickness of walls.*

- (l.) If any storey exceeds in height fourteen times the thickness prescribed for its walls by the foregoing rules, the thickness of each external and party wall throughout such storey shall be increased to one-fourteenth part of the height of the storey, and the thickness of each external and party wall below that storey shall be increased to a like extent.

*Piers.*

- (m.) Where by any of the foregoing rules relating to the thickness of external walls and party walls of buildings of the warehouse class, an increase of thickness is required, in the case of a wall exceeding sixty feet in height and forty-five in length, or in the case of a storey exceeding in height fourteen times the thickness prescribed for its walls, or in the case of a wall below that storey, the increased thickness may be confined to piers, properly distributed, of which the collective widths amount to one-fourth part of the length of the wall.

*Cross walls.*

- (n.) The thickness of every cross wall shall be at least two-thirds of the thickness hereinbefore prescribed for an external or party wall of the same height and length, but shall in no case be less than eight and a-half inches, and no wall subdividing any building shall be deemed to be a cross wall unless it is carried up to the floor of the topmost storey, and unless in each storey the aggregate extent of the vertical face or elevation of all the recesses, and that of all the openings therein taken together does not exceed one-half of the whole extent of the vertical face or elevation of the wall.

Wherever a cross wall becomes in any part an external wall such cross wall shall be of the thickness required for an external wall of the same height and length.

*Rubble stone walls.*

18. Every person who shall hereafter use stone in coursed or random coursed rubble for the construction of any walls in the erection of any building shall cause the thickness of such stone walls to be at least one-third greater than is prescribed for brick, and such walls shall not in any case exceed twenty-five (25) feet in height nor be less than twelve (12) inches in thickness.

**PARTY WALLS.**

*Height of party walls.*

19. Every person who shall hereafter construct a party wall shall cause such wall, if in a public building or a building of the warehouse class, to be carried up of a thickness equal to a thickness of such wall in the

topmost storey, and if any other building to be carried up of a thickness of at least eight and a-half inches.

- (a.) Above the roof, flat, or gutter of the highest building adjoining thereto, to such a height as will give a distance in a public building or a building of the warehouse class, exceeding thirty feet in height, of at least three feet, and in any other building of fifteen inches measured at right angles to the slope of the roof, or fifteen inches above the highest part of any flat or gutter as the case may be: provided that in dwellings built semi-detached in pairs, the party wall may be made to finish on the underside of the roof covering, which shall be bedded in mortar to the top of such party wall.

*Party walls at turrets, etc.*

- (b.) Above any turret, dormer, lantern light, or other erection of combustible material fixed upon the roof or flat of any building within four feet from such party wall, so as to extend at least twelve inches higher and wider on each side than such erection.
- (c.) Above any part of any roof opposite thereto, and within four feet therefrom.

*Chases in party walls.*

20. No person who shall hereafter erect a building shall make in any party wall any chase which shall be wider than fourteen inches, nor more than four and a-half inches deep from the face of such wall, nor shall leave less than eight and a-half inches in thickness at the back or opposite side thereof, or which shall be within a distance of seven feet from any other chase on the same side of the wall, or within thirteen inches from an external wall. No person shall make any chase in a wall of less thickness than thirteen inches.

OPEN AND CLOSED AREAS.

*Projection of gratings.*

21. In the construction of gratings and frames over areas no person shall cause or allow the maximum projection of any such gratings or frames, whether they be open frames or filled with slabs of glass or lenses, to exceed eighteen inches, measuring from the general line of the front of the walls at one foot above the ground level, or the maximum length thereof to exceed six feet; provided that—

*Division between gratings.*

- (a.) Where more than one area grating, or such other covering is permitted in the front of one house or building, the division between each shall be not less than nine inches, and shall be formed by a solid piece of hard stone, not less than nine inches wide and nine inches deep, such stone to be securely pinned into or to rest upon the brickwork not less than six inches at each end; such stone kerbs shall be fixed to the level of the footways, the gratings and frames shall be securely let into the kerbs, and be run with lead, and not be permitted to open.

*Description of gratings.*

- (b.) Where covered with open iron gratings, the gratings shall be made with frames or borders, the bars of the gratings shall be fixed at right angles with the house, and the space or width between each bar shall not exceed one inch and a-half; each bar shall be not more than three-quarters of an inch on the surface, and not less than one square inch in transverse sectional area.

*Description of light gratings.*

- (c.) The coverings over areas, where intended to be closed or filled with glass slabs, shall be formed by iron gratings or frames, the bars shall be not more than three inches apart, and fixed at right angles to each other; each bar shall have at least one square inch of sectional area, and the spaces between the bars shall be filled with glass at least one inch in thickness.

*Permissible covering over openings.*

- (d.) No covering of any material or description shall be permitted over any area openings, excepting those formed by open iron gratings, or by iron frames filled with slabs of glass or lenses as before described; or Yorkshire flagging four inches thick.

CELLAR FLAPS.

*Projection of openings.*

22. In the construction of openings to cellars or cellar flaps, no person shall cause or allow the maximum projection of such openings or cellar flaps to exceed eighteen inches, measuring from the front line of the wall of the house at twelve inches above the ground level or the maximum width of the openings to exceed four feet; such openings shall be surrounded at the footway level by kerbs made of hard stone, not less than nine inches wide on the face; such flaps shall be securely fastened from the underside, and be made so as to shut on to ledges or rabbeted in the stone kerbs, and to open outwards. All cellar flaps shall be made of jarrah wood, or iron or steel, or iron grating with wooden fillings, or of artificial stone.

*Stairs not permitted.*

No staircase or steps shall be fixed beneath the cellar flaps, and no openings in basements shall be allowed or used for the purpose of constant access, but only for the purpose of occasionally raising and lowering goods, or removing dust, etc., and such openings shall be closed immediately after such operations are completed.

COAL PLATES.

23. Every person who shall construct coal plates shall cause the same to be circular, and not more than twelve inches in diameter, and to be securely let into rabbets let flush into the footpath; such coal plates shall be made of iron not less than three-quarters of an inch thick, and deeply chequered on the surface; or, if necessary, for the purpose of giving light to the cellar, of iron frames, the space or width between the bars shall not be more than one and a-half inches at any point, and shall be filled with glass lenses.

DESCRIPTION AND QUALITY OF THE SUBSTANCES OF WALLS.

24. Every person who shall hereafter erect a building shall cause—

*Materials in walls.*

- (a.) The external and party walls of every such building, except in the case of concrete buildings, to be constructed of bricks or of stone.

*Bricks.*

- (b.) Bricks shall be at least eight and a-half inches by four and one-quarter inches by two and three-quarter inches of good, hard, sound, and well-burnt quality; stone shall be free from vents, cracks, or large sand holes, and laid on its natural bed.

*Stone.*

- (c.) Similar material to be used in the portions of party and cross walls below the surface or level of the ground, and above the road, including the chimney stack. Cut bricks may be used in arches over recesses and openings in, or for facings of external walls.

*Mortar.*

- (d.) All brick and stone work to be put together with lime mortar or with cement mortar. Lime mortar to be composed of freshly burnt lime and clean sharp sand, free from earthy matter, and mixed in the proportion of one part of lime to three parts of sand. Cement mortar to be composed of Portland cement, or other cement of equal quality, and clean sharp sand, free from earthy matter, mixed in the proportion of at least one part of cement to three parts of sand.

*Damp courses.*

- (e.) Every wall of such building to have a damp course composed of materials impervious to moisture, extending throughout its whole thickness at the level of the lowest floor above ground level. Every external wall or enclosing wall of all habitable rooms, and their appurtenances, and of all cellars and areas which abut against the earth, to be protected by materials impervious to moisture.

*Tops of party walls.*

- (f.) The top of every exposed party wall and parapet wall to be finished with one course of bricks set on edge in cement mortar, or by a coping of any other waterproof or fire-resisting material properly secured.

*Concrete walls.*

- (g.) All concrete used in the construction of walls to be composed of Portland cement, or other cement of equal quantity, clean sharp sand, and of clean gravel or broken bricks or stone or furnace clinkers, and clean water, mixed in the following proportions: one part of cement to two parts of sand, and four parts of the coarse material broken sufficiently small to pass through a two-inch diameter ring. The proportions of the materials to be ascertained by careful measurement, and the first mixing, either by machine or hand, to be done dry before the water is added. The walls to be carried up regularly, and in parallel frames of equal height, the surface of the concrete to be well rammed, and to be properly cleaned for the next layer of concrete. The thickness of concrete walls to be equal at least to the thickness prescribed for brick walls. Such portions of concrete party walls and chimney stacks as are carried above the roofs of buildings to be rendered externally with cement and mortar.

## RECESSES AND OPENINGS IN EXTERNAL WALLS.

25. No person who shall hereafter erect a building shall make any recess or opening in any external wall of such building unless—

- (a.) The back of such recess or opening be at the least eight and a-half inches thick, and  
 (b.) The aggregate area of recesses and openings above the ground storey do not exceed one-half of the whole area of the wall of the storey in which they are made.

## RECESSES AND OPENINGS IN PARTY WALLS.

26. No person who shall hereafter erect a building shall make any recess or opening in any party wall of such building unless—

- (a.) The back of such recess or opening be at the least eight and a-half inches thick, and  
 (b.) Over every recess so formed an arch of at least two rings of brickwork of the full depth of the recess be turned on every storey, except in the case of recesses formed for lifts; but where such recess does not exceed five inches in depth, corbelling in brick or stone may be substituted for the arching, and  
 (c.) The aggregate area of all such recesses and openings does not exceed one-half of the whole area of the wall of the storey in which they are made, and  
 (d.) Such recesses or openings do not come within thirteen inches of the inner face of the external walls.

*United buildings.*

27. No person shall cause any buildings to be united, except where such buildings are wholly in one occupation, or are constructed or adapted to be so.

- (a.) No person shall cause any buildings to be united if, when so united and considered as one building only, such buildings would not be in conformity with this by-law.

*Openings.*

- (b.) No person shall make an opening in any party wall or in two external walls dividing buildings, which buildings, if taken together, would contain more than two hundred and fifty thousand cubic feet, except under the following conditions:—  
 (1.) Such opening shall not exceed in width seven feet, or in height eight feet, and such opening or openings taken together shall not exceed one-half of the length of such party wall or such external walls on each floor of the building in which they occur.

- (2.) Such openings shall have the door jambs and head formed of brick, stone, or iron, and be closed by two wrought iron doors, each one-quarter of an inch thick in the panel, at a distance from each other of the full thickness of the wall, fitted to rabbeted frames without wood-work of any kind, or by wrought iron sliding doors, or shutters properly constructed, fitted into grooved or rabbeted iron frames.  
 (3.) If the thickness of the wall be not less than twenty-four inches, or the doors be placed at a distance from each other of not less than twenty-four inches, such opening may be nine feet six inches in height.

*Owners to give notice.*

- (c.) Whenever any buildings which have been united cease to be in one occupation, the owner or owners thereof shall give notice to the surveyor, and shall cause all openings in any party wall, or in any external walls uniting such buildings, to be stopped up with brick or stone work not less than thirteen inches in thickness (except in the case of a wall eight and a-half inches thick, in which case eight and a-half inches shall be sufficient), and properly bonded with such wall, and any timber not in conformity with this by-law placed in the wall shall be removed.

*Bressummers.*

28. Every person who shall hereafter erect a building shall cause every bressummer in any external, internal, or party wall to be of rolled steel or iron, or trussed or flitched wooden girder of approved strength, and to have a bearing in the direction of its length of at least six inches at each end upon a sufficient pier of brick or stone, or upon an iron storey post fixed on a solid foundation, in addition to its bearing upon any party or external wall, and he shall also cause such bressummer to have such other storey posts, iron columns, stanchions, or piers of brick or stone, or corbels, as may be sufficient to carry the superstructure. The ends of such bressummer shall not be placed nearer to each other or the opposite face of the party walls than four inches; provided that—

*Space for expansion.*

- (a.) At each end of every metallic bressummer a space shall be left equal to one-quarter of an inch for every ten feet, and also for any fractional part of ten feet of the length of such bressummer to allow for expansion.

*Templets.*

- (b.) Every bressummer bearing upon a party wall shall be borne by a templet or corbel of stone or iron tailed through at least half the thickness of the wall, and of the full breadth of the bressummer.  
 (c.) Bressummers consisting of more than one joist shall be solidly bolted together with packing pieces filling in the vacant spaces between the webs of the joists, and shall have such additional plates of sufficient strength, calculated in accordance with recognised formula, riveted on to the top or bottom boom. Bressummers shall in no case have a less factor of safety than three for dead loads, and five for live loads.

*Timber in walls.*

29. Every person who shall hereafter erect, alter, or add to any building shall comply with the following regulations:—

*Bond timber.*

- (a.) No bond timber or wood plate shall be built into any party wall, and the ends of any wooden beam or joists bearing on such wall shall be at least four and a-half inches from each other, or from the opposite face of the wall.

*Corbels or templets.*

- (b.) The end of any timber not permitted to be placed in or to have a bearing upon a party wall may be carried on a corbel or templet of stone or iron, or vitrified stoneware, tailed into the wall to a distance of at least eight and a-half inches, or otherwise supported to the satisfaction of the surveyor.

*Woodwork set back.*

- (c) All woodwork fixed in any external wall and frames of doors and windows of shops on the ground storey of any building (except loophole frames or bresssummer) shall be set back at the least four inches from the external face of such wall.

*Box gutters.*

- (d) If any gutter any part of which is formed of combustible materials adjoin an external wall, such wall shall be carried up so as to form a parapet one foot at the least above the highest part of the gutter, and the thickness of the parapet so carried up shall be at least eight and a-half inches throughout.
- (e) No fascia or projecting eave constructed of inflammable materials shall be carried at a less distance than two feet six inches from the boundary of an adjoining property.

## PROJECTIONS.

*Materials.*

30. Every person who shall hereafter erect, alter, or add to any building shall cause—

- (a.) All copings, cornices, string-courses whatsoever, and corbelled projections of party walls, to be of brick, tile, stone, artificial stone, slate, cement, or other fire-proof material.

*Projections secured.*

- (b.) Every cornice or other projection to be tailed into the wall of the building, and where the projection thereof exceeds the thickness of the wall, to be weighed or tied down. No cornice to project more than two feet six inches over the public way or beyond the face of the external wall.

*Plinths.*

31. No person shall cause the plinth of any building to project beyond the surveyed building line except as follows, that is to say: plinths not exceeding two feet in height may project two and a-half inches into the streets beyond the surveyed building line. Where streets are constructed on a gradient the height of the plinth may be varied if approved by the surveyor.

*Cornices of shop fronts.*

32. No person shall cause the cornice of any shop front, the piers of which have been built upon the surveyed building line, to project beyond such piers and beyond such surveyed building line, except as follows: in a street or way of a width not greater than thirty-three feet such projection shall not exceed thirteen inches; in a street or way of a width greater than thirty-three feet such projection shall not exceed eighteen inches.

*Extent of woodwork in shop fronts.*

33. No person who shall hereafter erect, alter, or add to any building shall cause any part of the woodwork of any shop front to be fixed higher than twenty-five feet above the pavement of the public footpath in front of the shop, or nearer than four and a-half inches to the centre of the party wall, where the adjoining premises are separated by a party wall, or nearer than four and a-half inches to the face of the wall of the adjoining premises, where the adjoining premises have a separate wall, unless a pier or corbel of stone, brick, or other incombustible material, at least four and a-half inches wide, be placed as high as, and alongside such woodwork, and projecting throughout at the least one inch in front thereof, between such woodwork and the centre of the party wall, as the case may be.

*Bay windows.*

34. Bay windows to any dwelling-house may be erected on the land of the owner of such house, provided that no such bay windows shall be erected except subject to the following conditions, viz.:—

- (1) Such windows shall not exceed three storeys in height above the level of the footway.
- (2) Shall be in no part nearer to the centre of the nearest party wall than the extreme amount of their projection from the main wall of the building to which they are attached.
- (3) Shall not, taken together, exceed in width three-fifths of the frontage of the building towards the street to which such bays face.

*Oriel windows, turrets, balconettes.*

35. Oriel windows, turrets, and balconettes to a building may be erected in a street of a width of not less than forty feet, or where the front wall of such building is at a distance of not less than forty feet from the opposite boundary of the street, provided that no such oriel window, turret, or balconette shall be erected except subject to the following conditions, viz.:—

- (1) No part of such window, turret, or balconette shall extend more than three feet from the face of the front wall of such building, or more than twelve inches over the public way.
- (2) No part of such window, turret, or balconette shall be less than ten feet above the level of the footway of the street.
- (3) No part of such window, turret, or balconette (where same overhangs the public way) shall be within a distance of four feet of the centre of the nearest party wall.
- (4) On no floor shall the total width of any oriel windows, turrets, or balconettes, taken together, exceed three-fifths of the length of the wall of the building of that floor.

*Drainage of projections.*

36. Every person who shall hereafter erect, alter, or add to a building shall cause the roof, flat, or gutter of such building, and every shop front, bay window, oriel window, turret, balconette, or other similar projection erected in the course of such work to be so arranged and constructed and so supplied with gutters and pipes as to prevent the water therefrom from dropping upon or running over any public way.

*No other projections allowed.*

37. Except in so far as is permitted by this by-law in the case of shop fronts and projecting windows, and with the exception of water pipes and their appurtenances, copings, string-courses, cornices, fascias, window dressings, and other like architectural decorations, no person shall cause or allow any projection from any building to extend beyond the surveyed building line in any street.

*Projections not to overlap.*

38. No person shall cause or allow any cornice, string-course, or other projection on any building to be constructed in such manner as to overlap or project in front of any adjoining property, unless with the consent of the owner of the adjoining property expressed in writing and deposited in the hands of the Building Surveyor.

## CHIMNEYS.

*Foundations and supports.*

39. Every person who shall hereafter erect, alter, or add to any building shall cause every chimney of such building erected in the course of such work to be built on solid foundations and with footings similar to the footing of the wall against which such chimney is built, unless it is carried upon iron girders, with direct bearing upon any party wall, external or cross walls, to the satisfaction of the surveyor; provided, nevertheless, that in cases in which it is impracticable to comply with the above provisions, such person may cause any chimney of such building to be built on corbels of brick, stone, or other incombustible materials, if the work so corbelled out does not project from the wall more than the thickness of the wall measured immediately below such corbel.

*Soot doors.*

40. All chimneys and flues shall have proper soot doors of not less than forty square inches, which shall be at least fifteen inches distant from any woodwork, and no person shall hereafter construct any chimney flue so as to incline at a less angle than forty-five degrees to horizon, or without providing proper soot doors.

41. Every person who shall hereafter erect, alter, or add to any building shall cause—

*Chimney arches and bars.*

- (a.) An arch of brick or stone to be built over the opening of every chimney constructed in the course of such work to support the breast thereof, and shall support all such arches, except semi-circular ones, upon wrought-iron bars of sufficient strength, to be built eight and a-half inches into the chimney jambs.

*Flue.*

- (b.) All flues in such building, constructed in the course of such work, which may be intended for use in connection with any oven, furnace, cockle, steam boiler, or close fire constructed for any purpose of trade or business, or which may be intended for use in connection with any range or cooking apparatus of such building, when occupied as a hotel or eating house, to be surrounded with brickwork at least eight and a-half inches thick from the floor on which such oven, furnace, cockle, steam boiler, or close fire may be constructed or placed to a point eighteen inches clear of the outside of the roof.

*Flues to be pargeted.*

- (c.) The inside of every flue, constructed in the course of such work, to be pargeted, or lined with fire-resisting glazed piping or stoneware.

*Outside flues to be marked.*

- (d.) The position and course of every flue which is being constructed in a party wall, if the construction of the building or of the flues and fireplaces on both sides of such party wall be not carried on contemporaneously, to be distinguished in some durable manner by outline marks on the outside of the work as it is carried up.

*Chimney jambs.*

- (e.) The jambs of every fireplace opening constructed in the course of such work to be at least eight and a-half inches thick.

*Chimney breast.*

- (f.) The breast of every chimney and the brickwork surrounding every smoke flue constructed in the course of such work, except where otherwise provided in this By-law, to be at least four and a-half inches thick.

*Back of fireplaces.*

- (g.) The back of every fireplace opening constructed in the course of such work in a party wall to be at least eight and a-half inches thick from the hearth to the height of twelve inches above the mantel.

*Flues in cross walls.*

- (h.) The upper side of every flue constructed in a cross wall, and carried from the fireplace to an external wall, to be at least eight and a-half inches thick.

*Thickness of walls of flues.*

- (i.) Every chimney shaft or smoke flue constructed in the course of such work, not otherwise provided for in this By-law, to be carried up in brickwork at least four inches thick throughout, to a height of not less than three feet above the roof, flat, or gutter adjoining thereto, measured at the highest point in the line of junction with such roof, flat, or gutter.

*Top of stack.*

- (j.) The highest six courses of every chimney stack or shaft constructed in the course of such work to be built in cement mortar.

*Outer hearths.*

- (k.) An outer hearth to be constructed before every fireplace opening, which hearth shall consist of a slab of stone or other incombustible material at least fourteen inches wide, and six inches longer on each side than the width of such opening. Except on the lowest floor, such slab shall be laid on iron bearers or brick trimmer arches, supported by the floor joists, but on the lowest floor may be bedded on a solid built-up foundation.

*Inner hearths.*

- (l.) The inner hearth of every chimney erected in the course of such work to be constructed wholly of brick, stone, or other incombustible material, and such hearth, except on the lowest floor, or unless inset in the brickwork of a chimney breast, to be supported by corbelling of brick or stone, or by slate or stone slabs, or by iron girders or other incombustible material; provided that on the lowest floor such hearth shall be bedded on a solid built foundation. In no case shall the least thickness of such inner hearth be less than six inches.

42. No person who shall hereafter erect, alter, or add to any building shall cause or allow—

*Height of chimneys.*

- (a) The brickwork or stonework of any chimney shaft erected in the course of such work, other than a chimney shaft of the furnace of any steam engine, brewery, distillery, or manufactory, to be built higher above the roof, flat, or gutter adjoining thereto than a height equal to six times the least width of such chimney shaft taken at the level of the highest point in the line of junction, unless such chimney shaft shall be built with or bonded to another chimney shaft not in the same line with the first-mentioned chimney shaft, or shall be otherwise rendered secure.

*Flues against party walls.*

- (b) Any flue to be built in or against any party wall, unless it be surrounded with new brickwork at least four inches thick, properly bonded into the old work.

*Cutting into chimneys.*

43. No person shall cause or allow—

- (a) Any chimney shaft, jamb, breast of flue to be cut into, except for the purpose of repair, or for some one or more of the following purposes—

- (1) For letting in or removing or altering flues, pipes, or funnels, for the conveyance of hot air, smoke, or steam, or for letting in, removing, or altering smoke stacks.
- (2) For forming openings for soot doors, in which case such openings shall be fitted with a close iron door and frame.
- (3) For making openings for the insertion of ventilating valves, provided that such openings shall not be made nearer than twelve inches to any timber or combustible substance.

*Timber bear chimneys.*

- (b) Any timber or woodwork to be placed—

- (1) In any wall or chimney breast nearer than four and a-half inches to the inside of any flue or chimney opening.
- (2) Under any chimney opening within six inches from the upper surface of the hearth thereof.

*Wooden plugs.*

44. No person shall drive any wooden plug into any wall nearer than four and a-half inches to the inside of any flue or chimney opening, nor shall any iron hold-fasts or other iron fastenings be placed nearer than two inches thereto.

## FACTORY CHIMNEYS.

45. Every person who shall hereafter construct a chimney shaft which may be intended for use in connection with the furnace of a steam engine, brewery, distillery, or manufactory, shall construct such shaft in conformity with following rules:—

*Foundations.*

- (a) The foundation of such shaft shall be made of concrete or other sufficient foundation.
- (b) The footings of such shaft shall spread all round the base thereof by regular offsets to a projection equal to the thickness of the enclosing brickwork at the base of such shaft, and the space enclosed by such footings be filled in solid as the work progresses.

*Width at base.*

- (c) The width of the base of such shaft, if square, shall be at least one-tenth of the proposed height thereof, or if such shaft is round, octagonal, or other many and equal sided and angled, then at least one-twelfth of the height thereof.

*Chimney shaft.*

- (d) Every such shaft shall be carried up throughout in brickwork and mortar of the best quality, and, if detached, shall be tapered gradually from the base to the top, and on all faces or sides of such shaft, at the rate of at least two and a-half inches for every ten feet of height.

*Thickness of brickwork.*

- (e) The brickwork at the top of such shaft, and for twenty feet below the top, shall be at least eight and a-half inches thick, and such thickness shall be increased at least four inches for every additional twenty feet, measured downwards.

*Projections.*

- (f) Every cap, cornice, pedestal, string course, or other variation from plain brickwork in connection with such shaft shall be as additional to the thickness of brickwork required under this by-law, and every such cap shall be constructed and secured to the satisfaction of the Surveyor.

*Fire-brick lining.*

- (g) All fire-brick lining built inside the lower portion of such shaft shall be additional to, and independent of the thickness of the brickwork thereof prescribed by this by-law, and shall not be bonded therewith.

## GENERAL RESTRICTIONS RELATING TO STEAM BOILERS, ETC.

46. No person shall cause or allow—

- (a.) The floor under any oven, copper, steam boiler, or stove, which is not heated by gas, or the floor around the same for a space of eighteen inches to be constructed of materials of a combustible or heat-producing nature, of less than six inches thick.

*Smoke pipes.*

- (b) Any pipe for conveying smoke or other products of combustion, heated air, steam, or hot water, to be fixed against any building on the face adjoining to any street or public way.  
(c.) Any pipe for conveying smoke or other products of combustion to be fixed nearer than six inches to any combustible materials.

*Steam pipes.*

- (d.) Any pipe for conveying heated air or steam to be fixed nearer than six inches to any combustible materials.

*Hot water pipes.*

- (e.) Any pipe for conveying hot water to be fixed nearer than three inches to any combustible materials, provided that the restrictions imposed by this clause, and by subclause (d) with respect to the distance at which pipes for conveying steam and hot water shall be fixed from any combustible materials, shall not apply in the case of pipes with a free blow-off.

*Floors over furnaces.*

- (f) The floor over any room or enclosed space in which a furnace is fixed, of any floor within eighteen inches from the crown of an oven, to be constructed of combustible materials.

*Staircases.*

47. Every person who shall hereafter construct or adapt any building for occupation in separate tenements by more than two families shall cause the principal staircase of such building, which may be used by several families in common, to be ventilated upon every storey above the ground storey by means of windows or skylights opening directly into the external air, or to be otherwise adequately ventilated.

48. Every person concerned in the erection of any dwelling house not subject to the provisions of the last preceding clause shall cause the principal staircase in such dwelling house to be ventilated by means of a window or skylight opening directly into the external air.

49. Every person concerned in the erection of a building of more than 150,000 cubic feet, which is constructed or adapted to be used as a dwelling house for separate families, shall cause the floors of the lobbies,

corridors, passages, landing, and also the stairs to be of fire-resisting materials, and, when over three storeys exclusive of basement, to be carried by supports of fire-resisting materials.

*Habitable rooms.*

50. Every person concerned in the erection of any building containing a habitable room or rooms shall cause:—

*Cubical capacity.*

- (a) Every such room to have a capacity of not less than nine hundred cubic feet.

*Height of rooms in roof.*

- (b) Every such room wholly or partly in the roof of such building to be at least eight feet six inches in height from the floor to the ceiling throughout not less than one-half the floor area of such room.

*Height of other rooms.*

- (c.) Where skillions are erected at the back of premises the height from floor to ceiling must average not less than nine feet six inches.  
(d) Every such room, not being wholly or partly in the roof, to be in every part at least eleven feet in height from the floor to the ceiling.  
(c) Every such room to have one or more windows opening directly into the external air or into a conservatory with a total superficies clear of the sash frames and free from any obstruction to the light, equal to at least one-twelfth the floor area of such room, and so constructed that a portion equal to at least one twenty-fourth of such floor area can be opened, and that the opening in each case shall extend to at least seven feet above the floor level, provided that such room may be lighted by a lantern light, which shall be hung to open with rods or lines and levers of which a portion equal to at least one twenty-fourth of the floor area can be opened.

*Rooms over stables.*

- (f) Every such room constructed over a stable to be separated from the stable by a floor, which shall have in every part not occupied by a joist or girder, a layer of concrete or clay pugging of good quality, or of other solid construction three inches in thickness, finished smooth upon the upper surface and properly supported, and the underside of such floor to be ceiled with lath and plaster of good quality, or of other solid construction; and every staircase, gallery, or structure by which rooms shall be approached, to be separated from the stable, which it adjoins, by a brick wall not less than eight and a-half inches in thickness.

*Ventilation.*

- (g.) Every such room, whether used for the purpose of habitation or for the assemblage of people for any purpose whatever, to be well and properly ventilated by the insertion of air bricks below the floor, and by openings in the sleeper walls, also by inlet ventilators in the walls, and by outlet ventilators in the ceilings, or at the top of the walls of such room, with sufficient flues and pipes thereto, according to the position and size of such room.

*Ventilation under basement.*

- (h) Every basement room having a wooden floor other than a floor constructed of solid wood bedded on concrete, to have a sufficient space between the ground and the underside of the floor to admit of ventilation by means of air flues formed in the wall connected with air bricks or otherwise above ground level.

*Distance from boundary.*

51. No person shall cause or allow to be constructed in any dwelling any habitable room, unless every window thereof opening directly into the external air at the side of such dwelling is provided with a clear air space, in the case of a single storied dwelling of at least two feet and six inches, and in any other case of at least three feet wide, measured square on to the exterior face of the wall in which such window is situate, such air space being in the same ownership as the dwelling.

## LIGHT COURTS.

*Light courts inside buildings.*

52. No person shall cause or allow—

- (a.) A habitable room, not having a window directly opening into the external air, otherwise than into a court enclosed on every side, to be constructed in any building, unless the width of such court, measured from such window to the opposite wall, shall be equal to half the height measured from the sill of such window to the eaves of top of the parapet of the opposite wall; provided that a court of which the greater dimension does not exceed twice the lesser dimension shall be held to comply with this clause if a court of the same area, but square in shape, would comply therewith.
- (b.) No person shall cause or allow to be constructed in any building, other than a dwelling house, any habitable room, unless every window of such room opening directly into an external light court at the side of such building is provided with a clear air space of at least four feet, measured square on to the external face of the wall in which such window is situate, such air space being in the same ownership as the said building.

*Ventilation of light courts.*

- (c.) Any light court, wholly or in part open on the top, but enclosed on every side, and constructed and used for admitting light and air to a domestic building, to be constructed unless adequate provision shall have been made for the ventilation of such court by means of a communication capable of admitting fresh air to the lower end of such court.

*Access to light courts.*

- (d.) Any light court, enclosed on every side to be constructed in any building, unless means of access is given to such court by a doorway leading out from the ground storey of such building.

*Drainage of light courts.*

- (e.) Any light court enclosed on every side to be constructed unless adequate provision for the proper drainage of such court shall first have been made.

## BACK BUILDINGS.

53. No person shall cause or allow any habitable room to be constructed in any back building when the only window or windows of such room opening into the external air is or are situate in the wall which faces the front building, unless every window of such room be placed not nearer to the opposite wall of the front building than a distance of twelve feet.

## CONVERSION OF BUILDINGS.

54. No person shall convert into, or use a dwelling house, any building or any part thereof, not originally built as and for a dwelling house within the limits of the Road District, whether built before or after the making of this By-law, without the previous consent of the Board.

## SIGNBOARDS, SIGNS, ETC.

55. No person shall erect, put up, or place any signboard, sign, awning, blind, overhanging lamp, or other thing over or near any footway or roadway within the Road District without first having obtained the written consent of the Board therefor. Permission to erect a signboard shall only be given where there is a verandah to which to affix such signboard, and every person who shall have obtained permission to erect a signboard shall cause the same to be securely fastened to such verandah at a height in the clear of not less than eight feet from the footpath. No signboard shall be affixed to any covering of the verandah roof, or to any roof guttering, nor shall it project beyond the footway into the roadway.

## VERANDAH AND BALCONIES.

56. (a.) No person shall erect any verandah over any public footpath within the limits of the Road District without having first obtained the consent of the Board, to be signified by the issue of a license in the form of Schedule "A" thereto.

- (b.) Any person desiring to obtain the consent of the Board to the erection of such a verandah shall deposit with the building surveyor a plan, elevation, section, and specification, showing in detail the proposed construction of such verandah and the manner in which it is proposed to be attached.
- (c.) No such verandah shall hereafter be erected except in accordance with the standard plan settled and approved by the Board and deposited in the office of the Surveyor. Provided that the strength of the materials to be used in the construction thereof may, subject to the approval of the surveyor, be varied according to circumstances.
- (d.) The minimum height of any verandah hereafter erected shall be eleven feet from the top of the kerb to the underside of the signboard. In the case of sloping ground the height shall be measured, at the centre of the frontage. Provided that if the frontage shall exceed 20 feet, a breach shall be made if so directed by the surveyor.
- (e.) All verandahs in a street shall be erected of a uniform height and width. Subject to the last preceding section, the standard height and width of verandahs in each street shall be fixed by the Board.
- (f.) The roof of every such verandah shall be covered with a 24-gauge galvanised corrugated iron. Gutters shall not be lighter than 24-gauge galvanised iron of sufficient capacity and with proper fall to outlets. Down pipes shall be of 24-gauge galvanised iron with elbows, bends, connections and fittings to the satisfaction of the surveyor. Provided that the lower length of the down pipe (6 feet) and the pipe under footpath shall be of cast or wrought iron.
- (g.) The signboard shall be constructed of such materials, sections, and workmanship as in the opinion of the surveyor are of sufficient strength in the particular case, and shall be covered with 24 galvanised flat iron riveted and soldered at all joints, and properly secured to the framework and surrounded with a suitable margin.
- (h.) Wherever a proposed verandah will abut on to an existing verandah, it shall be so finished as to prevent rain from falling between such verandahs. Provided that when the existing verandah is shorter than the frontage of the building to which it is attached, the persons erecting the new verandah shall make the necessary extension to the existing one.
- (i.) Whenever the end of a verandah abuts on to a right-of-way, street, or public place the signboard shall be returned along such end, and the space between the signboard and the roof of the verandah shall be filled to the satisfaction of the surveyor.
- (j.) No writing, printing, or trade notice of any description shall be exhibited on any portion of the verandah except on the outer face of the signboard.
- (k.) The footway under every verandah shall be kerbed and paved, and the owner shall pay to the Board one-third of the cost of such kerbing and paving, and the whole of the cost of the paving of any door approaches.

## MISCELLANEOUS.

*Filling in of cellars.*

57. The owner of any building or premises shall fill up, secure, or remove any cellar-ways or openings which may be in or under any footway, and are used in connection with, or are appurtenant to such building or premises, whenever ordered by the Board so to do.

*Removal of verandahs, etc.*

58. The owner of any building or premises shall, when ordered by the Board so to do, at his own expense remove any verandah, balcony, or other obstruction used in connection with or appurtenant to such building or premises which shall obstruct the footway or street, or are dangerous, whether such verandah, balcony, or other obstruction shall have been erected before or after the commencement of "The Roads Act, 1911."

*Posts and poles in streets.*

59. The owner of any lamp post, telegraph, telephone, electric lighting, or tramway poles shall, when ordered by the Board so to do, at his own expense, paint the same during such hours, and in such manner as the surveyor shall direct, and shall, at such like expense and when so ordered, remove any of such posts or poles as shall be bent, dangerous, unsightly, or not in use.

*Dangerous fences.*

60. No person shall erect any dangerous fence, or shall use barbed wire in the construction of any fence abutting on any public place.

*Refrigerating paint.*

## FREMANTLE HARBOUR.

*Australia—West Coast.**Removal of Mark Buoys from Southern Flats and Reinstatement of Collie Ledge Buoy.**Notice to Mariners.*

NOTICE to Mariners and others using the Port of Fremantle, Western Australia, is hereby given by the Fremantle Harbour Trust Commissioners that the two buoys previously marking the Northern and Eastern, respectively, limits of the shoal water on the Southern Flats South-East of Garden Island have been removed and their places taken by a concrete pile beacon, which has been driven on the Eastern edge of the shoal.

This beacon, which is surmounted by a circular iron disc, is placed in

Lat.: 32deg. 14min. 55sec. South.

Lon.: 115deg. 43min. 20sec. East.

Vessels bound Southward towards Rockingham jetties will, by keeping the said jetties open East of the pile beacon, clear the Eastern edge of the shoal water of the Southern Flats.

*Collie Ledge Buoy.*—The black iron buoy which was some time ago swept away from its position at the Collie Ledge, South of Garden Island, has been replaced in its charted position.

*Charts affected:*

No. 1033—Champion Bay to Cape Naturaliste.

No. 1058—Rottneest Island to Wambro' Sound.

Issued by direction of The Fremantle Harbour Trust Commissioners.

(Sgd.) F. STEVENS,  
Secretary.

Fremantle, Western Australia,  
9th February, 1923.
