GOD SAVE THE KING !!!

AT a meeting of the Executive Council held in the Executive Council Chambers, Perth, this 23rd day of April, 1929, the following Order in Council was authorised to be issued:—

ORDER IN COUNCIL.

WHEREAS the enactment contained in Section 74 of "The Constitution Act, 1899," whereby the appointment of all public officers under the Government of the State is vested in the Governor in Council, does not apply to minor appointments which by Order in Council are vested in Heads of Departments or other officers or persons within the State; and whereas it is desirable that the appointment of foremen and all other persons employed at a daily rate of wage on works under the control of the Main Roads Board should be vested in F. W. Gilmour: Now, therefore, His Excellency the Lieut.-Governor and Administrator, by and with the advice of the Executive Council, hereby vests in the said F. W. Gilmour and any person or persons appointed to temporarily act in place of such officer, the appointment of foremen and all persons employed on such works at a daily rate of wages.

(Sgd.) R. GREEN,
for Clerk of the Council.

CHANNEL ACROSS SUCCESS BANK BETWEEN GAGE ROADS AND OWEN ANCHORAGE.

Channel Re-surveyed and Re-marked.

Notice to Mariners.

THE Fremantle Harbour Trust Commissioners notify, for the information of those navigating vessels through the channel (known as The Naval Base Channel) dredged through the Success Bank between Gage Roads and Owen Anchorage, in the Outer Harbour of Fremantle, that this channel has recently been completely re-surveyed, sounded and re-marked.

This channel is approximately one mile and eight cables in length by an approximate width of 300 feet, except at one spot which is marked by piles, where the banks of the channel approach to a width of approximately 200 feet.

The channel has in it a sufficient depth of water to enable it to be navigated by vessels of a maximum draft not exceeding 17 ft. 6 in., in a smooth sea.

The course through the channel is South 9 degrees 3 minutes East true.

The navigation marks are as follows, viz.:—

1. At the North-Western extremity a red painted conical buoy carrying a flashing white gas light showing one (1) second flash and four (4) seconds eclipse; position, latitude 32 degrees 4 minutes 12 seconds South, and longitude 115 degrees 41 minutes 10 seconds East.

2. At the North-Eastern extremity a black cask buoy placed 350 feet distant on a bearing of 81 degrees from the red conical light buoy at the North-Western extremity mentioned in No. 1 above.

3. The Western and Eastern edges of the channel are marked as follows, viz.:—

At distances five (5) cables, nine (9) cables, and one (1) mile two cables from the buoys mentioned in Nos. 1 and 2 above and bearing South 9 degrees 3 minutes East true, single pile beacons surmounted by red discs on the Western, and black discs on the Eastern side, have been driven 350 feet apart, the height of the discs being 14 feet above low water.

In addition, at a distance of ten (10) cables from the buoys mentioned in Nos. 1 and 2 above, two piles without discs have been driven 200 feet apart, indicating the approach of the edges of the Channel at that spot.

At the Southern end of the Channel are two (2) leading beacons marking the centre line of the Channel and placed 840 feet apart.

The Northernmost of these two beacons consists of a single pile surmounted by a triangle showing a four (4) feet side 14½ feet above low water.

The Southernmost of these two beacons stands on three (3) piles and is surmounted by an inverted triangle showing an eight (8) feet side 36½ feet above low water. The position of this Southernmost beacon is latitude 32 degrees 5 minutes 56 seconds South and longitude 115 degrees 41 minutes 33 seconds East.

These two beacons are to be used as transit leads for the centre line of the Channel and must both be passed close to on their Eastern side.

Issued by the Fremantle Harbour Trust Commissioners at Fremantle, Western Australia, this 18th day of April, 1929.

Chart affected: No. 1053, Rottnest Island to Warnbro' Sound.

LAND OPEN FOR SELECTION.

IT is hereby notified, for general information, that the areas scheduled hereunder are available for selection under and subject to "The Land Act, 1898," and its amendments, including such further amendments as may be made by Parliament during the current year.

All approvals shall be subject to the residence conditions as prescribed by Section 55 of the said Act.

The areas marked "A" shall be open for selection by the special classes of selectors hereinafter named in the following order of preference:—

- (1) Under "The Discharged Soldiers' Settlement Act, 1918," by "Discharged Soldiers" within the meaning of paragraphs (a), (b), and (c) of the interpretation of the term in Section 3 of that Act, and "Dependants" within the meaning of that term in the said section.
- (2) Under "The Land Act, 1898," by ex-British Soldiers who were on active service in the late war.
- (3) Under "The Land Act, 1898," by Munition Workers in the late war.
- (4) Under "The Land Act, 1898," by ordinary selectors.

(In the event of an applicant other than a Discharged Soldier under subparagraph (1) obtaining a block within a Repurchased Estate, the term of the lease and conditions of payment will be subject to re-adjustment in accordance with the provisions of "The Agricultural Lands Purchase Act, 1909.")

The areas marked "B" are not subject to such order of preference.

Applications must be lodged at the Local Land Office for the district in which the land is situated, not later than the date specified, but may be lodged before such date if so desired.

All applications lodged on or before such date will be treated as having been received on the closing day, and if there are more applicants than one for any block, the application to be granted will be determined by the Land Board, except in cases where it is already determined by the order of preference set out above under "A." Should any lands remain unselected such will continue available until applied for or otherwise dealt with.

If a Land Board sitting becomes necessary, the applicants for the blocks will be duly notified of the date, time, and place of the meeting of the Board, and there shall be an interval of at least three days between the closing date and the sitting of the Board.

If an applicant wishes to appear before the Land Board in person he may apply to the Head Office or to the Clerk in Charge of any of the District or Branch Land Offices for a certificate to the Railway Department, which, on presentation at the nearest Railway Station, will entitle him to a Return Ticket, at Excursion Rates, to the place where the Board will sit, available for seven days from the date of issue.

The selector of a Homestead Farm from any location available under Part VIII. must take the balance thereof, if any, under Conditional Purchase.

The prices quoted hereunder (exclusive of the value of improvements, if any, and survey fees, and land acquired by the Crown under "The Agricultural Lands Purchase Act, 1909," or otherwise for settlement) are reduced by one-half to Discharged A.I.F. Soldiers only.

Wyalkatchem Road Board—By-laws relating to Buildings within the Townsite of Wyalkatchem.

P.W. 2464/23.

WHEREAS by "The Road Districts Act, 1919," the Road Board of any District is empowered to make By-laws for all or any purpose in the said Act mentioned, the Wyalkatchem Road Board, in pursuance of the powers vested in the said Board, under and by virtue of the said Act and of every other authority enabling it in that behalf, doth hereby make and publish the following By-laws:—

Interpretation.

"Act" means "The Road Districts Act, 1919."

"Basement" means a storey or portion of a storey partly below the level of the ground, the ceiling of which is not less than five feet above the adjoining ground (irrespective of any excavation made to comply with these By-laws).

"Board" means the Wyalkatchem Road Board.

"Cellar" means a storey or portion of a storey below the ground level, the ceiling of which is less than five feet above the adjoining ground.

"Cement mortar" means a mortar composed of one part cement to three or fewer than three parts of sand.

"Commercial buildings" means a building used or constructed or adapted to be used wholly or in part for commercial purposes.

"Dwelling house" means a building used, constructed, or adapted to be used wholly or in part for human habitation, but does not include other than the dwelling house portion (if any) of a commercial building.

"Townsite" means the Wyalkatchem Townsite.

"Habitable room" means any living room, and includes all rooms intended or adapted to be used for the purpose of sleeping or eating or the cooking of food.

"Surveyor" means the person appointed by the Board for the time being as Building Surveyor, or acting Building Surveyor, for the Wyalkatchem Road Board.

"Wall":—

"Divisional wall" means a wall (other than an external or party wall) which subdivides any floor of a building and which carries any load in addition to its dead weight.

"External wall" means an outer wall of a building, not being a party wall, even though adjoining a wall of another building.

"Partition wall" means a wall subdividing any floor and not carrying any load other than its own dead weight.

1.—Applications, Plans, and Notices.

Before the erection of a building is commenced one copy of the plans and specifications, together with the cost of such building, and an application in writing for approval thereof, shall be submitted to the Board. Provided that the Board may, if it see fit, dispense with the necessity for the submission of plans and specifications, and reduce or dispense with the payment of a fee with any application for approval to make minor alterations in an existing building. Provided also, that any building (other than a verandah or aviary) used or intended to be used for the keeping of domestic animals, shall be wholly detached from any dwelling house. Provided also, that where it is desired to make some minor alterations to a building not materially affecting its stability, lighting, ventilation, or the size of rooms, the application may, in the first place, be made without submitting plans and specifications, which shall, however, be submitted if the Board so requires. The application shall describe the building and show the purpose for which the building is to be used. The plan shall consist of a general plan and elevation and a block plan. The block plan shall show the relation of the building to the boundaries of the site, and to other buildings or structures thereon. The specifications shall describe the construction and materials of which the building is to be built, and the method of drainage, sewerage, and water supply, and state whether the material will be new or second-hand, and, if second-hand materials are to be used, shall give particulars. When giving approval the Board may impose a condition that forty-eight hours' notice shall be given prior to the covering of any or all of the following works, in order that they may be inspected, that is to say:—trenches before foundations are laid: foundations before trenches are filled in, and drains before they are covered in.

2.—Fees and Permits.

No person shall commence any building, erection, or structure, or any addition or alteration to any building, erection, or structure, without having first obtained from the Surveyor a written permit for the commencement of same, and without having first paid to the Board the fees in respect thereof set forth in these by-laws. Each building, erection, or structure must be completed within the undermentioned specified time from the date of issue by the Board of the permit therefor:—

- (a) Brick, stone, or concrete—six months;
- (b) All other buildings—three months.

The fees payable in respect to buildings, erections, or structures shall be as follows:—

- (a) The expression "Floor area," applied to building, shall mean the aggregate superficial areas of so many horizontal sections thereof as there are floors in the said building. The horizontal section of each floor shall be made at the point of its greatest surface dimensions, inclusive of external walls and of such portion of the party walls as belongs to the building, and also of all verandah and balcony floors, covered ways, and light courts.

- (b) The expression "Square," applied to the measurement of the area of a building, means the area of a 100 superficial feet.

For the first five squares in every building—2s. 6d. per square.

All squares or part of a square over the first five squares—3s. per square.

Minimum charge for every building—3s.

3.—General Provisions.

Each building in a terrace of buildings, or in a pair of semi-detached buildings, shall be deemed to be a separate building for the purpose of this by-law. Every building shall be provided with one or more proper man-holes in the ceiling, so as to give access for electrical and other fittings. The Board may reject any plans or specifications which in their opinion are not in keeping with the size and character of the adjacent buildings. Every dwelling house shall be provided with a water storage capacity of at least 2,000 gallons, properly connected up with gutters of roof.

4.—Site, Healthiness of.

A person shall not, without the written permission of the Board, erect a building upon any site which shall have been filled with any material impregnated with faecal or with animal or vegetable matter, or upon which any such matter may have been deposited, unless and until such matter shall have been properly removed by excavation or otherwise from any such site and depressions filled in with clean soil. Every person who shall erect a building shall cause the subsoil of the site of such building to be effectually drained, wherever in the opinion of the Board the dampness of the site renders such a precaution necessary.

No person shall commence to build any structure without having first provided proper and sufficient sanitary accommodation to the satisfaction of the Board for all persons engaged or employed upon such structure. Motor garages not exceeding 300 square feet in floor area may be built in iron, brick, stone, or concrete or other non-inflammable material anywhere in the Townsite, provided that the Board may require—

- (a) that any such motor garage be 50 feet distant from the frontage of any other road or street (except in special cases, where the physical configuration of the ground precludes such distance being observed);
- (b) that any such motor garage be five feet distant from the frontage of any other road or street;
- (c) that any such motor garage be ten feet distant from any building used as a dwelling house on the same allotment or on any allotment adjoining;
- (d) that the motor garage complies otherwise with all the conditions and limitations of this by-law in regard to buildings.

Fowl-houses of not more than 200 square feet in area and not more than six feet in height may be erected at the rear of any dwelling; provided that the nearest portion of such fowl-house is at least 30 feet from any building used as or intended for a dwelling, and at least four feet from the boundary of land not in the same occupation. Fowl-houses of larger area may be erected if at a distance of at least 50 feet from any street and 40 feet from any dwelling house, and at least 4 feet

from the boundary of land not in the same occupation: Provided that the roof and walls are covered with galvanised iron or other fire-resisting material, approved by the surveyor, and that the building shall not be more than 7 feet high. The Board may refuse or postpone approval to build upon a site which is unhealthy by reason of its liability to dampness, unless and until the site has been rendered dry, sound, and well drained to the satisfaction of the Board. If the Board so direct in any particular case, the whole or part of the ground surface or site of the dwelling shall be covered with a layer of good cement concrete or tarred metal, rammed solid and at least four inches thick.

5.—Position of Building Site.

No building which is intended to be used, or which shall be used as a dwelling house, and no addition to any such building, shall be built, constructed, or erected within a distance of 30 feet, measured horizontally, from the building line of the street or road the building is intended to or shall front, unless with the approval of the Board.

Except as hereinafter provided, no building with an external wall of wood which is intended to be used, or which shall be used as a dwelling house, and no addition with an external wall of wood to any building which is intended to be used, or which shall be used as a dwelling house, shall be built, constructed, or erected within a distance of four feet six inches, measured horizontally, off any street, road, land, or right-of-way at the side of any such building.

6.—Access to Rear.

Where there is no public or convenient access to the rear of the site of any building for the removal of nightsoil, the building shall be so designed as to leave outside the building a way of access at least 4 feet wide from a public road to the privy closet, and for the removal of garbage and refuse.

7.—Outbuildings.

In case of an application to erect (as appurtenant to any building) any outbuilding from the use of which unpleasant noises, unpleasant odours, or unusual risk of fire may reasonably be expected to arise, the Board may determine in what position upon the allotment such outbuilding may be erected.

8.—Brick Area.

Within the area set out hereunder no building plan shall be approved, and no building erected, the materials of the walls and party walls of which are deemed by the Board to be inferior to brick, stone, concrete, or reinforced concrete, namely—Wyalkatchem Township Lots 1 to 7, 15 to 22, 8 to 30, 37 to 38, 45, and 60.

9.—Tents—Canvas Buildings.

The Board may grant, subject to conditions, or refuse permission to erect a structure of calico-canvas or other textile material, and if any such structure is erected without the Board's permission may order its demolition.

10.—Materials and Workmanship.

Materials which have been used in the construction of any cess-pit, drain, or sewer, or which for any other reason are dangerous to health, shall not be used in the erection of any buildings. Faulty or unsuitable material shall not be used in any building.

Every part of a building shall be erected and finished off in a good and workmanlike manner.

Bricks used in any building shall be good, hard, and well burnt, and, if old or second-hand, shall be thoroughly cleaned and approved by the Board in writing before being used.

All brick or stone chimneys shall be constructed of ample flue, to be well plastered or pargetted inside for the full height, and no timber of any description shall be allowed to be built into the brickwork.

The Board may give authority to build iron chimneys, but in the erection they shall be laid on either stone or concrete base, and lined three feet high with brickwork, and free from all woodwork.

Hearths of stone, brick, or cement, of approved dimensions, shall be placed in front of all fireplaces.

11.—Testing Materials.

The Board may test any building materials and prohibit the use of such materials as are proved unfitted for the purpose for which they were intended to be used.

12.—Timber Construction.

All timbers used in any buildings are to be perfectly sound, free from rot, shakes, large or loose knots, or any other imperfection whereby the strength of the material may be impaired.

The following conditions shall apply as to the spacings and scantlings of timber:—

(i) Stumps shall not be less than 4 inches x 4 inches jarrah or other approved timber, spaced 5 feet centre to centre, and fixed on 6in. by 1½in. sole plates. Stumps shall be tarred and sunk at least half their exposed length in the ground, provided that no stumps shall be less than 2 feet in the ground. Tarring is to extend for 6 inches above the ground surface.

(ii) Studs and ceiling joists shall not be less than 4in. by 2in., spaced not more than 2 feet apart, centre to centre, properly secured and braced.

Studs and ceiling joists of 3in. by 2in. may be used; provided they are spaced 18in. apart, centre to centre, properly braced and secured.

Where studs of 3in. x 2in. are used, the angle or corner studs shall be of 3in. x 3in.; where 4in. x 2in. studs are used, the angle studs shall be of 4in. x 4in.

(iii) Rafters shall not be less than 3in. x 2in., spaced not more than 3 feet, centre to centre, in the case of iron roofs; and 18in., centre to centre, in the case of slate, tile, or other similar roofs 4in. x 2in. rafters may be used, but must be spaced at 2 feet centres for slates or tiles, and not more than 3 feet apart for any type of roof.

All rafters must be securely braced with purlins and collar ties.

(iv) Floor joists shall not be less than 4in. x 2in., spaced 18in. apart, centre to centre.

(v) Floor bearers shall not be less than 4in. x 3in., spaced not more than 5 feet apart.

In addition to the bearers required for the spacing, an additional bearer of 4in. x 3in. must be placed under each wall or partition.

No framing timber in any building shall be notched or checked out to receive bracing or otherwise so as to reduce its cross sectional area more than one sixth.

13.—Awnings and Verandahs.

The Board may require that any or all awnings or verandahs proposed to be erected over a public place shall be of the cantilever type. No verandah shall be enclosed for living or sleeping purposes, without the Board's written consent.

14.—Footings.

Every person who shall erect a building of brick, stone, or the like shall construct every wall of such building, unless built upon a hard rock foundation, to rest upon proper footings, or upon a sufficient beam.

He shall cause the projection of the bottom of the footings on each side of such wall to be at least equal to one-half the thickness of the wall at its base, unless an adjoining wall interferes, or unless the wall is upon the boundary of the land, in which case the projection may be omitted on the side of the boundary or where the wall adjoins.

He shall also cause the diminution of the footings to be in regular offsets, unless the footings be of concrete.

The height from the bottom of such footings to the base of the wall shall at least be equal to two-thirds of the thickness of the wall at its base. Provided that, when the footings are of reinforced concrete, the Board may permit the height to be less; and, provided further that it shall not in any case be less than 12in.

Footings to walls of brick in cement mortar (3 to 1) shall be the same width and height as those to walls of the same thickness not built in cement mortar.

Vermin plates shall be provided to all walls other than brick, stone, or concrete.

15.—Damp Course.

Every person who shall erect a building shall provide and insert damp-proof courses of lead, slate bedded in cement, or natural asphalt; provided that the Board may permit the omission of damp-proof courses from closets, outbuildings, and the like structures.

Where material which is not slate, natural asphalt, or lead, of a minimum weight of two pounds per square foot under walls not exceeding 40 feet in height, or three pounds per square foot for walls exceeding 40 feet in height, is desired to be used, the applicant shall submit to the Board evidence that the material to be used has been approved by the Board of Health, or failing such evidence, that the material is a good and effective damp proof course.

Damp-proof courses shall be inserted in walls to their full width and in such manner that there shall be no open spaces, cracks, or gaps in the damp-proof courses along the full length of the walls.

Damp-proof courses shall be inserted in walls in each position and in such manner that—

- (a) moisture from the earth shall be prevented from reaching the lowest floor timbers or the walls above the underside of the lowest floor joists, or, where solid floors are laid shall be prevented from reaching higher than 3½ in. above such floors;
- (b) where floors are below ground level, moisture shall be prevented from reaching inner face of outer walls;
- (c) where cavity walls are used, moisture penetrating outer portion of walls shall be prevented from reaching the floor timbers, or the inner portion or face of all walls above the underside of lowest floor timbers, or where solid floors are laid, shall be prevented from reaching higher than 3½ in. above such floors;
- (d) moisture penetrating the chimney, parapet, or other walls above the roof shall be prevented from reaching any part of the inner walls or the inner portion of inner face of outside walls below the upper side of the ceiling joists in either case.
- (e) moisture penetrating the outer portions of cavity walls shall be prevented from reaching the inner portion or inner face of such walls above or about window, door, and other frames or openings. In cavity walls the cavity shall extend not less than 4½ inches below damp-proof course. This clause shall apply to all walls constructed of brick, stone, or concrete, and to walls of any material readily permeable by water.

16.—External Walls, Structure.

Every person who shall erect a building shall cause the external walls thereof to be constructed of brick, stone, concrete, timber, or other material approved by the Board. If built of brick, stone, concrete, or the like, the external walls shall, except where herein provided to the contrary, be not less than 9 inches in thickness: Provided that the walls of sheds, laundries, out-houses, and the like, not exceeding 10 feet in height, may, if the Board so permit, be of 4½ inches in thickness. Cavity walls may be built provided that two sections are securely tied together by a sufficient number of wire ties or other effective method, and when used the combined thickness of the inner and outer part shall be deemed to be the thickness of the wall. Bottoms of all cavities shall be carefully raked out before the completion of the building, and all ties kept free from mortar droppings.

Where cavity walls are used weep-holes shall be left at foot of cavity not more than 6 feet apart, and over all damp-proof courses inserted to protect walls weep-holes shall be left not more than three feet apart. Notwithstanding anything to the contrary in this clause, the Board may permit the erection of dwellings not more than two storeys in height of concrete with walls of less than the prescribed thickness, if satisfied that such proposed dwellings will be hygienic and structurally sound.

17.—Party Walls.

Two, but not more, residences may be erected together in one block, provided that they shall be separated from each other by a wall of concrete or of brick or stone at least six inches in thickness, properly reinforced to the satisfaction of the surveyor, projecting, in the case of wooden houses, at least one inch through the wood-work front and back, and in all cases projecting 1 foot 6 inches at least through the roof covering or gutter adjoining the same, whether belonging to the same owner or not. Each building or dwelling house in a block shall be subject to the provisions of the by-laws applicable to its class, save that the site or curtilage of each of such buildings shall have a superficial area of at least 4,000 square feet and a frontage of at least 33 lineal feet to a street or road.

18.—Rooms: Size; Cubic Space.

Every person who shall erect a building shall provide that—

- (a) the areas of the floors of all the habitable rooms in such building shall, taken together, average not less than 120 square feet per habitable room;
- (b) a habitable room shall not in any case have a floor area of less than 80 square feet, and

(c) a habitable room shall not, in any case, have a cubic space of less than 880 cubic feet; Provided that, in each dwelling house and in each flat of a residential flat building, there shall be at least one habitable room, the cubic space of which shall not be less than 1,296 cubic feet; no main room in any building shall be less than 11 feet in height from floor to ceiling;

(d) all shops shall have a clear space of 12 feet six inches from floor to ceiling.

19.—Lighting and Ventilation—Under Floors.

For the purpose of ventilation, every building shall be so erected that there shall be between the under-side of every joist upon which the lowest floor of such building is laid and the ground surface or upper surface of the asphalt or concrete with which the ground or site of the building may be covered, a clear space of 12 in. at least in every part, and such space shall be thoroughly ventilated and cross-ventilated by means of suitable and sufficient air bricks or other effectual method. Provided that, where the lowest floor is so constructed (by filling with concrete, asphalt, or other approved material) as not to permit the harbouring of rats, this provision shall not apply.

20.—Rooms: Air Bricks, Louvres, etc.

Every room of a building shall be so constructed that for every 1,000 cubic feet or part thereof of air space in the room there shall be 24 square inches at the least of unobstructed ventilation to the outer air by means of air bricks situated at or near the level of the ceiling or any other efficient means.

21.—Rooms, Windows.

Every habitable room or room or alcove in which food is intended or likely to be stored or prepared, and every bathroom, enclosed laundry, and privy closet shall have at least one vertical window opening directly to the outside air. One-half at least of such window shall be constructed to open to its full extent, and so that the opening shall extend to the top of the window: Provided that in a pantry any other system of ventilation may be substituted for windows if the Board be satisfied that such system is equally efficient.

22.—Size of Windows.

The window or windows of any room shall have a superficial area clear of the sash frame of not less than one-tenth of the floor area of the room.

23.—Laundries and Kitchens.

A dwelling of any kind shall not be erected with the kitchen and laundry combined in one room.

24.—Windows.

Any window the top of which is more than 12 feet above either the ground of an external flat surface or slightly sloping roof sufficient for safety, shall be so constructed that it can be cleaned from the interior of the building.

25.—Drainage, Levels.

Every person who shall erect a building shall construct the lowest storey of such building at such a level that, in the opinion of the Board, it may be practicable to construct a drain sufficient for the effectual drainage of such building. No person shall build or erect, or cause or permit to be built or erected, any building, erection, tent, or addition to any building, erection, or tent on any land unless curtilage thereof can be properly drained, and the Board may refuse permission to build and erect any building, erection, or tent, or addition unless and until it is satisfied that the proposed building, erection, tent, or additions, and the site and curtilage can be properly drained. No water is to be discharged on to the surface of any footpath.

26.—Miscellaneous.

The Board may permit the enclosure and use of any public place in connection with the building or taking down of a building, or the alteration or repair of a building.

27.—Skylights.

The Board may order the alteration or repair, or both, of any skylight in any building if such skylight be, in the opinion of the Board, in such a condition as to be detrimental to health or dangerous.

28.—Existing Buildings.

If, in the opinion of the Board, any building has been allowed to fall into an unsafe or insanitary condition, either by faulty construction or any other cause, the Board may give notice in writing to the owner or occupier to repair said building, and, in the event of no action being taken within seven days by the said owner or occupier to remedy any defect complained of in the said notice, the said owner or occupier shall be liable to a fine, as hereinafter provided, until such time as the building shall be placed in a safe and sanitary condition, and the owner or occupier shall be liable for all charges incurred in doing the necessary works, and, moreover, if, in the opinion of the Board, any building does not warrant the expense of repairing, the owner, after receiving notice, shall remove the building within seven days; failing this he will be liable to a fine, as hereinafter mentioned, for not removing building after receiving the notice. The Board may remove same and charge the owners with the cost of so doing, and recover the same in any court of competent jurisdiction and/or sell the material to cover the cost of taking down.

29.—Removal of Buildings.

No building or erection shall be removed into and erected or re-erected in the Road District, or removed from one part of the District to and erected or re-erected in another part thereof, unless the owner or person carrying out the removal first obtain written permission from the Board to do so. Before such permission shall be granted not less than seven clear days' notice in writing shall be given to the Board or surveyor of the desire to remove and erect or re-erect such building or erection; such notice shall contain or be accompanied by the following:—

- (a) particulars of the situation of building which it is proposed to remove;
- (b) particulars of the situation of and plan of the land upon which it is proposed to erect or re-erect or place such building thereon, and a tracing copy of such plan, to be retained by the Board;
- (c) a plan giving the dimensions of the building, and any proposed alterations or additions thereto, and a tracing copy of such plan, to be retained by the Board;
- (d) a specification giving particulars of the construction of the existing building, and of the alterations and additions (if any) which it is intended to make when the building is erected or re-erected;
- (e) evidence satisfactory to the Board that such house has not been condemned as dilapidated, insanitary, or unfit for human habitation, and a certificate from the Health Officer of the Road District from which the building is proposed to be removed that, within a reasonable time prior to the date of removal, no case of disease of an infectious or contagious nature has occurred therein;
- (f) such further particulars in writing regarding the same as shall be sufficient to enable the Board or its surveyor to determine if all the provisions of any Act of Parliament, by-law or regulation applicable thereto are or will be complied with.

No written permission shall be given unless such removed building when erected or re-erected shall comply with the provisions of the by-law as applicable to new buildings. No building or erection that has been condemned as dilapidated, insanitary, or unfit for human habitation shall be removed into or re-erected within the Townsite. No building or erection in which any case of infectious or contagious disease has occurred during the preceding six months shall be removed into or re-erected within the Townsite. No removed building shall be occupied until the surveyor shall have certified in writing that all the provisions of the by-law have been observed and complied with in respect to such building. Nothing herein contained shall prevent the alteration of the position of any building within the boundaries of the land on which the same stands: Provided that, in its altered position, it shall comply in all respects with this by-law, and that in the progress of such removal the building be not taken on to any street, road, or public place.

30.—Proportion of Site which may be covered.

A dwelling house, together with its appurtenances, to be erected on an allotment, shall not occupy more than two-thirds of such allotment, and the minimum of unoccupied area shall not be less than 500 superficial feet: Provided, that this shall not prevent the Board from

granting approval to the erection of a dwelling house occupying more than two-thirds of an allotment, or with a minimum of unoccupied area of less than 500 superficial feet, in replacement of an existing dwelling house which occupies more than two-thirds of that allotment, or has a minimum of unoccupied area of less than 500 superficial feet, as the case may be. Provided also, that where situated on a site considered by the Board to be an established shopping locality, the Board may permit a building which is to be a shop and dwelling combined to occupy not more than four-fifths of the allotment, subject to the unbuilt upon area being not less than 500 square feet. After the adoption of this by-law all subdivisions or resubdivisions of allotments must be such as to have a frontage to a street or road of not less than 66 lineal feet and a depth of not less than 165 lineal feet, or, with such measurements, to equal one-quarter of an acre in area. Such subdivisions or resubdivisions must be lodged with the Board for approval before commencing to build, and shall apply throughout the whole of the Wyalkatchem Townsite without special approval of the Board. A shop shall not be built on land having a frontage of less than 18 feet to a street or road and an average depth of 130 feet. There shall be back access from right-of-way 10 feet wide at least.

For the purposes of this clause the Board may agree to a subdivision with frontages less than 66 feet, but notwithstanding any such approval, no dwelling shall be erected upon the subdivided land except in accordance with these by-laws. No land upon which any dwelling house has been erected shall thereafter be reduced in area below the minimum area prescribed by this by-law. Provided always, that notwithstanding anything hereinbefore provided to the contrary, the Board may, on application in writing setting forth the grounds of the application, under special circumstances, and for special causes, and at a meeting of which due notice has been given to each member, declare that the provisions of the by-law either in whole or in part shall not apply to any particular area of land.

No building shall be erected in such a position that it shall lie between another building or any part thereof and street, unless such other building has a direct and unobstructed access to some other street at least 16 feet wide.

31.—Space outside Windows on side Land.

If there be any side wall of a dwelling house in which it is proposed to provide a window or door opening, that wall shall be set back (throughout its whole length) from the side line of the allotment to a distance of 3 feet, in the case of a dwelling house of one or two storeys, or to a distance of 5 feet in the case of a dwelling of more than two storeys.

32.—Kitchen, Laundry, and Bathroom Fittings.

Every dwelling house shall be provided with a completely enclosed bathroom or combined bathroom and laundry, and with wash-tubs and copper or other means of washing clothes, and the water laid thereto. The floor surfaces of bathrooms on any floor, and of laundries when above the ground floor, shall be of impervious material, properly graded and drained. The wash-tubs, copper, and bath shall not be placed in the kitchen. One bathroom in each dwelling house shall have at least 30 square feet of floor area, and a combined bathroom and laundry shall have at least 56 square feet of floor area. Provided that the Board may in any case where it considers that a bathroom or laundry could be dispensed with, exempt any building from the above provision, but such exemption shall be given by resolution of the Board.

33.—Enforcement, Inspection, Cutting into Building.

The Board may order the opening or cutting into or pulling down of any work where the Board has reason to believe or suspect that anything has been done in contravention of the Act or of any by-law, and in the event of the work being found to have been done in contravention of the Act or the by-laws, the person doing the work shall be required to comply with the Act or the by-law, and shall bear the full cost of such pulling down, opening, or cutting into and of compliance with the Act or the by-laws. In the event of the work being found to have been done in accordance with the requirements of the Act and the by-laws, the cost of such pulling down, opening, or cutting into, as well as the cost of reinstatement, shall be borne by the Board. The surveyor or his representative shall have power to enter, at any time, upon any building in course of erection for the purpose of inspecting the said building, and may require the production of the approved plans thereof,

which are to be available on the building during ordinary working hours whilst the building is in the course of construction.

34.—Inspection before Occupation.

Before permitting any person to use or occupy any uncompleted building, and forthwith upon completion of any unoccupied building, the person by or in consequence of whose order the building is being erected, shall give notice to the Board. Forthwith upon receipt of notice as aforesaid, the Board shall instruct the building surveyor to make an inspection, and such surveyor shall inspect and report to the Board whether or not the building has been erected in accordance with this by-law, and without material deviation from the approved plan and specifications, but this shall not be read to permit any alteration whatever in the position of the building on the site. Such report shall not be deemed to be evidence (in the event of any prosecution hereunder) that this by-law is being complied with.

35.—Penalties.

Any person who erects a building in contravention of this by-law, or any person who neglects to comply with any provision set forth therein, shall be liable to a penalty not exceeding Ten pounds (£10) and also a daily penalty of one pound per day for any continuance of the offence.

36.—Repeal of previous Building By-laws.

All building by-laws previously passed by the Wyalkatchem Road Board are repealed from date of gazettal of above Building By-laws.

Made and passed by the Wyalkatchem Road Board on the 9th day of February, 1929.
