Upon receipt of such notice the Local Authority shall, as soon as practicable, arrange for the inspection of such drains and plumbing work. Until such inspection has been made all drains, connections, etc., shall remain exposed. If the work has been carried out in accordance with these By-laws and with the plans and specifications approved of, the Local Authority shall issue to the owner a "Certificate of Completion," to utilise such drainage and plumbing. No drainage, plumbing work, or fittings in connection therewith shall be used until such certificate has been issued.

By-law 23:—To be amended by deleting the whole of paragraph (a) in Clause (1) and by adding to Clauses (1) and (2) the following words:—"The work to be carried out in accordance with and as provided for in

paragraphs (c) and (d) of By-law 23." Subclause (1), Clause (c), to be deleted and the following to be substituted in lieu thereof:—

All waste pipes from lavatory basins, sinks, baths, and laundry troughs shall be of galvanised wrought iron; provided that, where the fitting is of porcelain or stoneware, lead pipes may be used from the fitting to a point on the outer wall, where it shall be connected to a galvanised wrought iron pipe by a screwed connection and continued by wrought iron pipes to discharge in the open air over a gully trap or P trap on the line of drain.

All waste pipes from sinks, baths, lavatory basins, and laundry troughs shall be properly trapped and vented; provided that, where the length of the waste pipes from lavatory basins, baths, and laundry troughs does not exceed ten feet in length, or the seal of the trap is not reduced by the discharge from the fitting, and where laundry troughs are in open sheds detached from a house, the vent may be omitted.

Waste pipes shall be of the best quality, and of weights and dimensions specified in Schedule A hereunder.

Where lead pipes are used they shall be of solid drawn lead, supported by lugs wiped on the pipes in pairs, such lugs shall not be more than three feet apart for 1½-inch pipes, and 2 feet 3 inches apart for 2-inch pipes. The dimensions of the lugs shall be 4 inches by one-eighth of an inch thick for 2-inch pipes, and 3 inches by one-eighth of an inch thick for 1½-inch pipes.

All joints of lead pipes shall be of the kind known as "Wiped" joints.

All junctions, tees, and bends on wrought iron waste pipes shall be of brass, or malleable iron; provided with inspection openings. The wrought iron pipe, where connecting with these fittings, shall form a smooth butt joint against the internal shoulder of the fitting.

Junctions, ties, and bends fitted on vent pipes may have the inspection opening omitted.

Sinks, baths, laundry troughs, and lavatory basins shall be so fitted to be graded with a fall to the outlet so that when the plug is out no water will remain in the fitting.

The traps in each case shall be placed as near the outlet from the fitting as possible.

The grade of all waste pipes shall be as steep as circumstances will permit, but in no case shall they be less than one in fifteen for 2-inch pipes and one in ten for 1½-inch pipes.

Wrought iron waste and vent pipes shall be rigidly secured to the walls with wrought iron pipe hooks or saddles, spaced not more than six feet apart.

Sinks, laundry troughs, and drainage boards shall be flashed with 5 lb. lead when required by an inspector.

Vent pipes installed inside a house shall be of lead or galvanised wrought iron. When on the outside of the wall, they shall be of galvanised wrought iron to a point 18 inches above the highest fitting; the balance may be of galvanised iron, not less than 24 gauge.

SCHEDULE A.

Drains shall, as far as practicable, be laid in straight lines. Where a change of direction is necessary, it shall be effected by the use of oblique junctions or bends; an inspection opening shall be provided giving access to each line.

An educt vent of the same diameter as the drain to be vented shall be provided at the head of the line of drain, and induct vent at the lower end; any portion of the vent pipes below the surface of the ground shall be of cast iron or glazed earthenware.

Galvanised iron vent pipes of less thickness than 24-gauge shall not be used; all joints shall be thoroughly airtight. The first 6 feet of the vent pipe above the ground surface shall be of cast iron, or 18-gauge galvanised iron; the pipes shall be painted on the inside with asphaltum or other approved composition paints.

Vent pipes shall be supported by wrought iron galvanised clips fastened to plugs in brick, stone, or concrete walls, and by approved screws to wood building. There shall be one clip to each 6 feet of the pipe, and the top clip shall in all cases be bolted through or into the wall.

The pipe shall be carried up vertically to a point not less than 2 feet above the eaves of the building, or to such higher level as may be required by the Inspector.

The inlet to any yard gully or P trap shall be raised to such a height above the surface of the ground, as may be determined by the inspector, as will prevent the ingress of surface water to the drainage system.

No person shall permit any rainwater pipe to be connected to or discharge into any drainage system provided for the disposal of liquid wastes or sewage.

Grease intercepting traps of approved design shall be provided at all premises from which liquid wastes discharge into the Council's drain, and at any other premises, when directed by an inspector.

The owner and occupier of every house shall cause all openings for ventilation or other purposes made in accordance with these By-laws to be kept at all times perfectly free from obstruction, and shall at all times keep all openings to the drains upon the premises, whether for ventilation or otherwise, and all traps and other fittings, in good order and free from obstruction.
