(a) Plans and specifications:—Properly prepared plans and specifications of such building, addition or alteration, together with a tracing or copy of the plans of such building, addition, or alteration, and also details of dimensions, sizes, and qualities of all materials, and enumerating any old materials proposed to be used in the construction of same.

## 5.

The tracing or copy of the plans and details of materials shall be retained by the surveyor, and the original plans and specifications, when approved, shall be returned to the owner or his agent. Such approval shall be evidenced by writing indorsed on the plans and specifications and signed by the surveyor.

## 6.

Where it is desired to make some minor alterations to a building not materially affecting its stability, lighting, ventilation, or the size of rooms, the application may in the first place be made without submitting plans or specifications, which shall however be submitted if the Board so requires. The Board may if it sees fit, dispense with the necessity for the submission of plans and specifications, and reduce or dispense with the payment of a fee in case of an application for approval to make minor alterations in an existing building.

## 7.—Plans, etc., to be kept at Building.

Such plans and specifications shall be kept at the building therein referred to and shall be available for inspection by the surveyor or the accredited officer of the Board at all reasonable times on demand during the construction or erection or alteration or addition, as the case may be, and for fourteen days after the completion thereof.

## 8.—Permits and Fees.

No persons shall commence any building, or any addition or alteration to any building, or demolish any building without having first obtained from the surveyor a written permit for the commencement of same, and without having first paid to the Board fees in accordance with the scale set out in the Second Schedule hereto, having regard to the class of building.

## 9.—Area of new Building.

The decision of the surveyor as to the area of a new building or value of an addition shall be final and conclusive.

## 10.—Permits shall lapse after Six Months.

A permit obtained pursuant to this By-law shall lapse and be of no effect unless the building for which such permit was granted shall be commenced within six months and completed within twelve months from the date of such permit.

## 11.—Surveyor may enter and inspect.

The surveyor at all reasonable times during the progress and after the completion of any building, or addition or alteration to any building affected by this By-law, may enter and inspect such building or addition or alteration.

## 12.—Surveyor may stop work if contrary to By-law.

The surveyor may at any time stop the progress of any building and withdraw or suspend any permission given by the Board under this By-law, in the event of his not being satisfied that all the provisions of this By-law are being complied with, and any person who continues or builds or erects or works on the site after notice from the surveyor to desist shall be guilty of an offence against this By-law.

*Part 3.—General Provisions.*

## 13.

Each building in a terrace of buildings, or in a pair of semi-detached buildings, shall be deemed to be a separate building for the purpose of this By-law.

## 14.

Every building shall be provided with one or more proper manholes in the ceiling so as to give access for electrical or other fittings.

## 15.

The Board may reject any plans or specifications which in its opinion are not in keeping with the size and character of the adjacent buildings.

## 16.

Every dwelling-house shall be provided with a water storage capacity of at least 1,000 gallons properly connected up with gutters of roof, or other suitable water supply approved by the Board.

## 17.

Every person who shall erect a building shall cause the subsoil of the site of such building to be effectually drained, wherever in the opinion of the surveyor the dampness of the site renders such a precaution necessary.

## 19.

If the Board so direct in any particular case, the whole or part of the ground surface or site of the building shall be covered with a layer of good cement concrete or tarred metal, rammed solid, and at least four inches thick.

## 20.

The Board may refuse or postpone approval to build upon a site which is unhealthy, by reason of its liability to dampness, unless and until the site has been rendered dry, sound, and well drained to the satisfaction of the Board.

*Part 5.—Position of Building on Site.*

## 21.

No building which is intended to be used as a dwelling-house, and no addition to any such building, shall be built within a distance of 25 feet, measured horizontally, from the road the building fronts or is intended to front.

## 22.

## 23.—Minimum Area of Land.

No person shall build or cause to be built any building which is intended to be used as a dwelling-house, unless the site or curtilage of such building has a superficial area of at least 10,890 square feet, and after the adoption of this By-law, all subdivisions or resubdivisions of allotments must be such as to have a frontage to a street or road of not less than 66 lineal feet and a depth of not less than 165 lineal feet, or with such measurements, to equal one quarter of an acre in area.

Provided that, when any allotment of land smaller in area than that hereinbefore prescribed was owned by any person prior to the coming into operation of this By-law, and not part of an allotment of which a portion has been alienated or excised since the coming into operation of this By-law, or such allotment is shown on any plan or subdivision heretofore approved by the Board or by the Town Planning Board, the Board may permit a dwelling-house, which shall in all other respects comply with this By-law, to be erected upon such land. Before permission be so granted for the erection of any building, the land must be subdivided so that each building is located on a separate and distinct allotment. A plan of such subdivision shall be lodged with the application, and there shall be shown on such plan all buildings located or to be located thereon, and no building shall be proceeded with unless and until the subdivisional scheme of such land be approved by the Board.

## 24.

A dwelling-house together with its appurtenances, to be erected on any allotment, shall not occupy more than two-thirds the area of such allotment:

Provided that, where situated on a site considered by the Board to be an established shopping locality or business area, the Board may permit a building, which is to be a shop and dwelling combined, to occupy not more than four-fifths of the allotment, subject to the unbuilt-upon area of the allotment being not less than 500 square feet.

(b) No shop shall be of less width in any part thereof than 18 feet.

No building shall be erected in such a position that it shall lie between another building or any part thereof and street, unless such other building has a direct and unobstructed access to some other street at least 16 feet wide.

## 27.—Permit for Erection of Shop where Dwelling not Attached.

Permission may be given for the erection of a shop where a dwelling is not attached, and where no person resides at such shop, on land having a frontage of 18 feet to a road and a depth of not less than 50 feet and a superficial area of not less than 900 square feet: Provided that no portion of such shop or building shall be erected within 15 feet of the rear boundary of such land, and only if the Board shall approve of the site of the proposed building.

## 28.

No two buildings which are intended to be used or which shall be used as dwelling-houses or residential flats shall be built or erected or constructed on the one allotment, if of wood, within a distance of twelve feet; if of brick, stone, or concrete, within a distance of six feet of each other: Provided that this does not prohibit the erection of semi-detached buildings.

## 29.

The Board may at any time by resolution waive any of the provisions or restrictions of this part, where the levels of the allotment or other exceptional conditions of the site make it necessary or expedient to do so in respect of any building or part of a building.

## 30.—Access to Rear.

Where there is no public or convenient access to the rear of the site of any building for the removal of night-soil, the building shall be so designed as to leave outside the building a way of access, at least four feet wide, from a public road to a privy closet, and for the removal of garbage and refuse.

## 30A.—Outbuildings.

In case of an application to erect (as appurtenant to any building) any outbuilding from the use of which unpleasant noises, unpleasant odours, or unusual risk of fire may reasonably be expected to arise, the Board may determine in what position upon the allotment such outbuilding may be erected.

## Part 6.—Materials.

## 31.

All materials used in any building must be of good quality and shall be subject to the approval of the surveyor, and the surveyor shall have power to condemn and to order the removal of or to remove at the expense of the owner any material which in his opinion is not suitable for use for the purpose for which he considers it is intended to use same, and no person shall use any material so condemned for any building, alteration, or addition. No old or second-hand material may be used unless approved in writing by the surveyor.

## 36.—Timber.

All timbers and wooden beams used in any building shall be good sound material, free from rot, large or loose knots, shakes or any other imperfections whereby the strength may be impaired, and shall be of such sizes, dimensions, and spaces as set forth in Clause 37 of this By-law.

## 43.—Hollow Walls.

External walls may be constructed as hollow walls, if constructed in accordance with the following rules:—
