Administrative Directions Relating to Assays and Analyses.

Department of Mines,
Perth, 24th November, 1958.

IT is hereby notified, for public information, that the Hon. Minister for Mines has approved of the undermentioned rules and scale of fees to come into operation as from the 1st January, 1959.

(Sgd.) A. H. TELFER,
Under Secretary for Mines.

(1) Assays, analyses and tests may be made of any Western Australian raw material or manufactured product by the Government Chemical Laboratories when not unduly interfering with official work, subject to the pre-payment of the fees set out below and the conditions laid down in paragraphs (4) and (6) hereunder.

(2) Reductions of the usual fees will be allowed under certain conditions, viz.:—

(a) for a number of samples submitted by the one person at the one time for identical treatment:—

Five to ten (inclusive) 20% reduction.
Eleven or more 25% reduction.

A special reduced fee may be charged where the extra work involved in a number of samples is so small as to warrant a special fee.

(b) Agricultural materials, including waters, will be charged at one-third rates to persons who provide evidence that they are bona fide prospectors, farmers, market gardeners, orchardists, graziers or other primary producers (name of owner or occupier, location number of site of sample, etc.) and that the examination is needed for the proper conduct of their business as such.

(c) At the discretion of the Director free mineral identifications and assays will be made for prospectors of Western Australian ores and minerals taken from ground not held under gold mining lease, mineral lease, dredging claim or mineral claim provided the exact locality where the specimen was found is disclosed.

Free assays will not be made of samples showing free gold, or of tailings or other metallurgical products or of umpire samples.

(3) A special fee will be charged for any abnormal, lengthy or intricate investigation, in accordance with the actual cost to the Laboratories. This includes assays for the less commonly occurring elements.

(4) All samples for examination must be addressed to the Director, Government Chemical Laboratories, Adelaide Terrace, Perth, and must be marked on the outside with the name and address of the sender. This information should also be enclosed with the sample(s) and each sample should be distinctly and separately marked. A letter must be sent at the same time stating the reasons why the sample is submitted and enclosing the prescribed fee, or, if applicable, stating the exact locality from which each mineral specimen was taken (paragraph 2c).

(5) Samples will normally be dealt with in order of their receipt, at such times as do not interfere with Departmental work.

(6) The Director reserves the right to refuse to make any particular examination on the ground of (i) the laboratories being already too fully occupied to accept more samples; (ii) the sample being unsuitable for the purpose; or (iii) any other good and sufficient reason.
