Site Coverage: Subject to the particular provisions of the Tables GR4 and GR5 the following provisions apply to all residential and flat buildings in every residential zone.

Buildings shall not occupy a greater percentage of a lot than is shown in the following table:—

On Lots subject to a maximum plot ratio of—		Maximum percentage of a lot which may be covered by buildings
Up to and including 0.7	...	35%
0.7 and less than 0.9	...	20%
0.9 and less than 1.1	...	16.66%
Over 1.1	...	15%

Distances Between Buildings on the Same Lot: Where more than one building is erected on a lot, all standards shall be observed, as though the development were a single structure. In addition, the minimum distance between any two buildings shall be 30 feet or the minimum distance required under the formula set out below, whichever is the greater. The formula regulating the minimum distance between any two buildings (referred to as "Building A" and "Building B") is as follows:—

$$D = La + Lb + 2(Ha + Hb).$$

6

where

D is the required minimum horizontal distance between any wall of Building A and any wall of Building B or the vertical prolongation of either.

La is the total length of Building A.

The total length of Building A is the Length of that portion or portions of a wall or walls of Building A from which, when viewed from directly above, lines drawn perpendicular to Building A will intersect any wall of Building B.

Lb is the total length of Building B.

The total length of Building B is the length of that portion or portions of a wall or walls of Building B from which, when viewed from directly above, lines drawn perpendicular to Building B will intersect any wall of Building A.

Ha is the height of Building A.

The height of Building A is the height above natural ground level of any portion or portions of a wall or walls along the length of Building A.

Natural ground level is the mean level of the ground immediately adjoining the portion or portions of the wall or walls along the total length of the building.

Hb is the height of Building B.

The height of Building B is the height above natural ground level of any portion or portions of a wall or walls along the length of Building B.

Natural ground level is the mean level of the ground immediately adjoining the portion or portions of the wall or walls, along the total length of the building.

The minimum required distance between two buildings as derived from the formula set out above may be reduced by 15 per cent. if—

- (a) any one of the two buildings has a height of two storeys or less and the other has a height of six storeys or more; and
- (b) the difference in the height of the two buildings is 80 feet or more.

3.3 Zoning Table Explanation: Table No. 1 indicates the several uses permitted by this Scheme in the various zones, such uses being determined by cross reference between the list of "Use Classes" on the left-hand side of the Table and the list of "Zones" on the top of that Table and as a whole, subject to the controls embodied in the Text. Notwithstanding anything to the contrary in this Scheme, and without prejudice of the generality of clause 1.4 of Section 1, the Council may, with the consent of the Minister or when required by the Metropolitan Region Planning Authority so to do, shall require that the development of any land within the District, however zoned, shall be subject to the provisions of clauses 10, 24 and 30 of the Metropolitan Region Scheme.

In respect of any use that is not expressly provided for in the Zoning Table the Council shall, on application, determine in which zone or zones the use may be permitted with or without conditions, as the Council deems necessary.

3.4 Zoning Table Symbols: The symbols used in Table I have the following meanings:—

"P" A use that is permitted under the provisions of this Scheme.

"AA" A use that is not permitted unless approval is granted by the Council.

"IP" A use that is not permitted unless such use is incidental to the predominant use as decided and approved by the Council.

"X" A use that is not permitted.

3.6 Bulk and Location Controls: Every new use being established on land zoned or reserved under this Scheme shall retain unobstructed by any building a front yard between building line and street alignment or proposed new street alignment, in accordance with the Schedule hereunder:—

Zone	Front Yard
(a) Service Industry	minimum depth 25 ft
(b) Light Industry	minimum depth 25 ft
(c) Shops : With the exception of lots facing Bay View Terrace 10 ft, except the West side between Guger St and St Quentin Ave 6 ft	minimum depth 20 ft
(d) Office, Showroom, Warehouse	minimum depth 20 ft
(e) Single and General Residential : As specified in the Residential Development Control Code.	
(f) Service Stations	minimum depth 30 ft
(g) Hotels	minimum depth 30 ft
(h) Other Lands	minimum depth 30 ft

PROVIDED THAT—

- (i) Nothing herein contained shall prevent the Council from requiring front yards of greater depth where it considers circumstances warrant such additional front yard depth.
- (ii) Where in the Service Industry, Light Industry, and Shop zones a parcel of land abuts on more than one street, the principal building may be erected to within 10 ft. of, but not nearer than 10 ft. to, such one of those streets as the Council may determine.
