- (1) To plough, cultivate, scarify or otherwise clear, of all inflammable materials, fire breaks not less than eight feet wide—
 - (a) inside and along the boundaries of all your land;
 - (b) around the perimeter of any land which is under crop so that such firebreak will completely encircle the crop;
- (2) to bulldoze or otherwise clear of all inflammable materials, firebreaks not less than fifteen feet wide, around the perimeter of all bush land which has been bulldozed or otherwise prepared for clearing by means of burning, and to ensure that all debris resultant therefrom is placed on the side of such firebreaks which adjoin the areas intended to be burned;
- (3) to clear of any accumulation of inflammable materials—
 - (a) the immediate surrounds of all farm buildings and haystacks;
 - (b) all townsite lots within the Shire;

If it is considered impracticable to provide firebreaks in the position required by this notice, you should apply for the approval of the Council to construct such firebreaks in an alternative position. Approval to any such variation will only be granted where the Bush Fire Control Officer for the area has first signified his approval.

Where your land abuts a road you may apply for Council's approval to burn the area between the road pavement and your fence and this could

then be accepted as a suitable firebreak. Approval will only be given under this section where it is established that damage will not result to trees and other desirable flora.

Dated at Trayning this 24th day of July, 1967.
