NURSES REGISTRATION ACT, 1921-1959.

Department of Public Health,
Perth, 6th September, 1968.

HIS Excellency the Lieutenant Governor in Executive Council, acting pursuant to the provisions of the Nurses Registration Act, 1921-1959, has been pleased to make the regulations set forth in the schedule hereunder.

W. S. DAVIDSON,
Commissioner of Public Health.

Schedule.

Regulations.

1. In these regulations the Nurses Registration Regulations, 1960, as reprinted pursuant to the Reprinting of Regulations Act, 1954, published in the *Government Gazette* on the 10th June, 1966, and as amended by notices published in the *Government Gazette* on the 15th December, 1966 and 12th April, 1967 are referred to as the principal regulations. Principal Regulations.

2. Regulation 18 of the principal regulations is amended— Reg. 18 amended.
- (a) by adding immediately after the regulation number "18." the subregulation designation "(1)"; and
- (b) by adding a subregulation as follows:—

(2) For the purposes of giving effect to the Syllabuses set out in the Appendices to these regulations, the Board may from time to time issue supplementary written instructions for use in training schools, and any instructions so issued shall be deemed to be part of the course to which they relate.

3. Regulation 21 of the principal regulations is amended by adding after the passage, "Appendix 2" in the last line of paragraph (d), the passage, "or Appendix 3". Reg. 21 amended.

- Reg. 43 amended. 4. Regulation 43 of the principal regulations is amended by adding after subregulation (1) a subregulation as follows:—
- (1a) Notwithstanding the provisions of paragraph (d) of subregulation (1) of this regulation, any applicant for admission to a School of Nursing approved by the Board to teach in accordance with the Syllabus as set out in Appendix 8 to these regulations shall meet the general educational requirements of the Board as set forth in that Appendix.
- Reg. 48 substituted. 5. Regulation 48 of the principal regulations is revoked and the following regulation substituted:—
48. (1) The examination of students shall be written, practical and oral or any one or combination of those examinations as the Board from time to time determines.
- (2) The Board may require a student to attend before an examiner for an oral examination where the Board, having considered the marks obtained by the student in the General Nurses' written paper, determines that an oral examination is necessary for the purposes of deciding whether that student has failed, passed, or passed with credit in any examination conducted by the Board for the General Nursing Certificate.
- Reg. 51A amended. 6. Regulation 51A of the principal regulations is amended by substituting for the word, "twelfth" in line three of paragraph (a) of subregulation (1), the word, "ninth".
- Appendix 8 added. 7. The principal regulations are amended by adding after Appendix 7 thereto an appendix as follows:—

Appendix 8.

FOREWORD.

Since June 1963 the Working Committee of this Board have been working towards the modification of Nurse Education within this State. The Committee has worked with the Area Committee and Group Committees during these years and has prepared Syllabuses for two programmes for training for the General Certificate and reorganised the Syllabus for Aide training.

All three Syllabuses are set out in the same five broad fields but the level of teaching will be different as entry standards will be:

- at tertiary level,
- at fourth year,
- or at second year, depending on the Syllabus.

In presenting the Syllabus for the Hospital-Based Diploma Course '68 attention is drawn to the fact that the clinical content of this course will differ very little from the present course for the General Certificate. It is hoped that, with better prepared students and with a more objectively set out Syllabus, the psychological and sociological aspects of health will consistently be integrated with the physical aspects and that this approach will prove more effective in student development as well as more effective in providing a Nursing Service of high standard.

Introduction:

A Syllabus must be maintained over a sufficient period of time in order to establish its value but, because nursing education must be constantly making modifications to meet social and medical changes, detail has been avoided and the Syllabus is presented in broad outline only. Printed instructions may from time-to-time be issued by the Board for the guidance of Schools of Nursing.

It is felt desirable that, with the Nurses' Registration Board's approval, individual Schools of Nursing should have the freedom to develop the detail of their own programmes.

In approving the individual School of Nursing programmes, the Board will look for the teaching of essential general principles but will allow a degree of flexibility in the modification of detail in accordance with the facilities available in each school.

Entry Standards:

Applicants must have attained at least fourth year high school of the Education Department of Western Australia with passes in—

- (1) English,
- (2) One of History or Geography,
- (3) Biology,
- (4) Two other subjects from—

Physics,
Chemistry,
Biology,
Physiology and Hygiene,
Home Science,
Art,
A Foreign language,
Music (4th Grade Practical and Theory—A.M.E.B.),
General Maths,
Geography, History,
Scripture and Economics,

or such other qualifications as the Board deems to be an equivalent or high qualification.

It will be noticed that the Syllabus is divided into five main sections which should be built into the curriculum as five main streams of learning and wherever practicable they should be taught side by side and closely integrated. The sections relate to Community Organization, Institutional Organization, human growth and development, disease and Disease Processes and Nursing Skills.

Community Organization:

In studying Community Organization it is hoped to develop in the student a knowledge of society generally, in order that she may function as a useful member of the health team, and have the ability to identify social factors in a nursing situation. A nurse must recognise and teach that all individuals have responsibility for personal and community health in their own and other societies. A nurse must know and be able to teach others how to use the social services available for the prevention and treatment of all aspects of disease, for rehabilitation, for continuous support, and for terminal support.

Institutional Organization:

Regarding Institutional Organization, with its need for sound communication, it is important that even the most junior nurse sees the relationship of people as of prime importance in the maintenance of services. A nurse must therefore know something of the role of all other workers, and of how she is expected to interact with them for the optimum functioning of the service.

Human Growth and Development:

In the past, the tendency has been to fragment teaching into a study of human organs, and systems affected. It is now hoped that the care and treatment of people will be presented as a whole. The developmental function and approach should replace the segmental approach of the past. It is felt that this will be achieved by the initial approach to nursing being conducted in the community, and later by the integration of all new knowledge in patient-centred conferences and discussion. All visits should be prepared for and followed by discussions and reports. These discussions will give opportunity for clarification by expert teachers and will allow other students to share the experience.

It is hoped that the presentation of case studies will become a general part of the School of Nursing evaluation systems.

Disease and Disease Processes and Treatment:

The student nurse must bring a sound elementary knowledge of the basic sciences to this study. We must develop her ability to reason around the care of her patient and his reaction to treatment. Teachers must integrate broad underlying scientific principles, of physics, chemistry, biology, psychology and sociology, disease and disease processes, and nursing in all clinical teaching.

The nursing programme will include patients of all ages, including children. Special developmental and degenerative features will be covered.

Nursing Skills:

The teaching and practice of nursing skills must be integrated according to the specific needs of patients and to the availability of facilities. The nurse must learn to practice her skills so that she can adapt them to the most primitive of home situations as well as in the best equipped of institutions. Adaptions and modifications must be based on the knowledge of, and respect for, essential principles. Ethical standards must always guide the practice of nursing.

“Reserve” shall mean any reserve vested in or under the control of the Council.

“License” means a license issued by the Council to take or catch fish with a net.

“Fixed Engine” means and includes any hedge, fence, weir, stake-net, trap or any fixed implement for catching or facilitating the catching of fish.

“Fish” means and includes all or any of the varieties of marine or fresh water fishes and crustacea or marine animal life.

2. Any person who takes or attempts to take fish by means of a fishing net on any reserve shall hold a license.

3. Any person who is the holder of a license shall not use a fishing net of a length greater than seventy yards or having meshes smaller than two and one-half inches.

4. Every license shall be subject to such conditions as may be reduced to writing and endorsed on the said license.

5. No person shall be granted at any time more than one license.

6. The fee payable to the Council for a license shall be one dollar (\$1.00). Licenses are not transferable.

7. The License shall be issued in the form prescribed in the Schedule herein. Every license shall expire on the thirtieth day of September next following the date of issue.

8. The Council may in its absolute discretion refuse to grant a license to any person, provided that, any person who has been refused a license may appeal to a Magistrate sitting at Gnowangerup who may if he thinks fit direct a license to be issued and whose decision shall be final.

9. For the purpose of testing the length of any fishing net such net shall be measured along the cork line upon which the net is hung. The size of the mesh shall be determined by measuring from knot to knot on the inside of the mesh when wetted ready for use and stretched so that the opposite knots on the alternative corners are in contact. In the event of the net being dry the part to be measured shall be soaked either in fresh or salt water for not less than ten minutes, and the dimensions of the mesh or meshes of the portion so soaked shall thereupon be determined.

10. No person shall capture, kill or destroy or attempt to capture, kill or destroy any fish in the waters of any reserve by the discharge or use of any speargun, gun, rifle or other firearm whatsoever or by the use of any explosive howsoever ignited or exploded.

11. Any person or persons using, having used or being about to use a fishing net to take fish in the waters of any reserve or being in possession of a fishing net on any reserve, shall forthwith on demand by any officer produce his license and if required by an officer permit such net to be measured not only as to length but also as to size of mesh and give his name and address.

12. On any reserve an officer may seize any fishing net which is not licensed, or which he suspects on reasonable grounds not to be so licensed, or any net of a length greater or having meshes smaller than such as are lawful for the reserve, or any net which is used in contravention of the conditions which may be endorsed on the license.

13. Any such net if found and seized by an officer without any person in actual possession thereof then the officer shall give or cause to be given the prescribed notice of finding thereof and the provisions of Section 9 of the Fisheries Act, 1905-1965 shall apply.

14. Any person who on a reserve has in his possession a fishing net of which he has not the appropriate license commits an offence and any such fishing net and if the net be in a boat which is being used to fish on the reserve such boat together with any oars, rowlocks or engine being used to propel such boat or which might be used to propel such boat shall on conviction of any such person for an offence against this section of these by-laws be forfeited to Her Majesty unless the Court in its absolute discretion orders otherwise.

15. No person shall at any time use a fixed engine to take fish in a reserve.

16. Any person to whom a license has been issued shall keep attached to any fishing net which is used or intended to be used, a float of not less than four inches in diameter which shall be legibly marked and kept marked either by branding or otherwise stamping on the float the number of the license held by such person. The said float shall be supplied by the Council at cost not exceeding One Dollar. Any person who fails to comply with this law shall be deemed to have committed an offence.

17. Any person who shall assault, restrict, obstruct or delay, interfere with or give false information to or use abusive language to any officer when in the execution of his duties or authority under these by-laws and any person who shall direct or encourage any other person to do so commits an offence and in addition to any penalty imposed may be liable to a term of imprisonment not exceeding six months.

18. Every person who commits an offence against these by-laws is liable for a first offence to a penalty of not more than fifty dollars (\$50.00) and for a subsequent offence a penalty of not more than One Hundred Dollars (\$100.00).
