The Municipality of the Shire of Mingenew.

By-laws Relating to Erection of Verandahs.

L.G. 1140/68.

IN pursuance of the powers conferred upon it by the abovementioned Act, the Council of the abovementioned Municipality hereby records having resolved on the 9th day of October, 1968, to make and submit for confirmation by the Governor the following by-laws:—

1. In this by-law unless the context otherwise requires—

“Municipality” means the Municipality of the Shire of Mingenew.

“Building Surveyor” means the Building Surveyor of the Municipality and includes any acting Surveyor.

“Street” includes footway or roadway.

“Verandah” means a verandah or balcony protruding into or above a street, way, footpath or other public place.

2. No person shall erect any verandah over any public footpath within the limits of the district of the Municipality without having first obtained the consent of the Council of the Municipality, such consent to be signified by the issue of a Building License.

3. Any person desiring to obtain the consent of the Council to the erection of such verandah shall deposit with the Building Surveyor of the Council a plan, elevation, section and specification in duplicate showing in detail the proposed construction of such verandah and the manner in which it is proposed to secure to the building to which it is proposed to be attached.

4. Types permitted:

(a) All verandahs when practicable shall be of suspended awning or cantilever form and unless otherwise permitted by the Council the fascia shall finish within six inches of the face of the kerb or eight feet from the building line, whichever is the lesser.

(b) Provided that the Council may approve awnings of a different width if such width conforms with adjoining awnings or verandahs, or awnings or verandahs in close proximity, which were erected prior to the gazettal of this by-law.

(c) Every such verandah hereafter erected shall be of a standard design, to be seen at the office of the Surveyor, or of such material and design as shall be in the opinion of the Surveyor better for the particular circumstances of the case in accordance with a plan and specifications submitted to and approved by the Surveyor.

5. Construction.—In the construction of every such verandah, the following conditions shall be complied with:—

(a) All girders, rafters and framing other than purlins and battens shall be of steel of dimensions approved by the Surveyor and connections must be of standard type. Purlins and battens for fixing roof coverings and fascia may be of jarrah or other approved hardwood.

(b) The roof shall be covered with galvanised iron, galvanised steel or aluminium decking, with a fall of half an inch per foot towards the building.

(c) Box gutters shall be formed at or near the building line, lined with galvanised plain iron not lighter than 24 gauge and to a capacity sufficient to carry off all rain or storm water. Such a capacity shall in no case be less than 27 square inches.

(d) Downpipes shall be of sufficient capacity to efficiently discharge rain-water falling on roofs. The bottom six foot length of pipes shall be of wrought or cast iron. Pipes shall be chased into walls or piers to a height of nine feet or set back so as not to project beyond the face of the building and when required by the Surveyor shall discharge under

the footway into the street channel or be connected to underground stormwater drains. All work relating to the alterations of the footpath shall be carried out by the Council and the Council may charge for same.

- (e) The ceiling shall be of plain galvanised iron or other approved non-inflammable material securely fixed to the wood joists which shall be of 4 in. x 2 in. spaced not more than two feet centres, running parallel with the footpath and secured to the steel framing. All ceilings to be fiat and level.
- (f) The hanging bolts are to be not less than one inch diameter properly attached to the framing and securely anchored or bolted to the building, to the approval of the Surveyor, and provided with a union screw and shall be backstayed or anchored as may be necessary for stability. Hanging bolts shall be not more than 12 feet apart unless specially designed fascias are provided and computations submitted.
- (g) The fascia shall be lined with plain galvanised iron, stamped metal or other approved non-inflammable material on jarrah framing. The finished overall depth of fascias shall be 24 inches.

6. Verandah Ends:

- (a) Whenever a proposed verandah is being erected adjacent to an existing verandah it shall be built so as to abut onto the existing verandah and finished so as to prevent rain falling between such verandahs. Provided that where the end of an existing verandah is less than six inches from the side boundary line of the building to which it is attached, any person erecting a new verandah on a building adjacent thereto shall at his own expense extend the verandah so that both verandahs abut onto one another and are finished so as to prevent rain from falling between such verandahs. Where the end of an existing verandah is six inches or more from the side boundary line of the building to which it is attached the owner of such building shall on the written requisition of the Shire Council at the owner's expense extend the existing verandah up to the side boundary line of the building to which it is attached, so as to abut onto any new verandah adjacent thereto.
- (b) Whenever the end of a verandah abuts on to the end of a right of way, street, or public place, the fascia shall be returned along such end to the satisfaction of the Surveyor.

7. Height above Pavement:

- (a) The height of verandah ceilings shall except in special cases be 10 feet above pavement level. In special cases, the Council may approve of a minimum height of nine feet. Where there are existing verandahs the new verandah must conform thereto subject in all cases to the approval of the Council.
- (b) Where necessary, verandahs must be stepped to conform with the grade of the footpaths, such steps shall not exceed one foot in depth without special permission.

8. No writing, printing or trade notice of any description shall be exhibited on any portion of the verandah except on the outer face of the signboard and/or upon signboards under the ceiling of the verandah, constructed and erected in accordance with the requirements of Local Government Model By-laws Signs, Hoardings and Billposting, No. 13.

repair and it shall be lawful for the Council to give notice to the owner or occupier of the said building to clean, paint or repair such verandah whenever in its opinion such cleaning, painting or repairing is required.

- (a) Such blinds shall be hung from the outer edge of the verandah parallel to the kerb and when specially approved by the Council at discontinuous ends of verandahs.
- (b) Such blinds shall be so constructed that they cannot hang lower than seven feet above the level of the footway and when down shall be fixed rigidly in position.
- (c) Blinds shall be maintained in a proper state or repair to the satisfaction of the Surveyor.

11. Power to Approve Awnings of Special Design.—Notwithstanding anything contained in this section the Council may approve awnings or verandahs of a design not complying with the provisions of clauses 4 and 5.

12. Where anything by this by-law is directed to be done or forbidden to be done or where authority is given to the Council to direct anything to be done or to forbid anything to be done and such act so directed to be done remains undone or such act forbidden to be done is done in every such case the person making such default as to given direction and prohibition respectively shall be deemed guilty of a breach of this by-law.
