Effective Frontage.

6.4 For the purposes of Table No. 2 the "effective frontage" of a lot or defined site shall be calculated by:

- (a) fixing the points of the building or proposed building which are closest to and furthest from the street alignment of the lot. Where that part of the building which is closest to or furthest from the street alignment is a wall which is parallel to that street alignment the point so fixed shall be at the centre of that wall;
- (b) measuring the length of lines drawn through each of the points so fixed at right angles from each of the side boundaries to the other side boundary or a prolongation of such boundary;
- (c) averaging the length of such lines.

The average length of the lines drawn and calculated as provided in this clause shall be the effective frontage of the lot. Where there are two or more street alignments to a lot the Council shall determine from which street alignment the points referred to in subclause (a) of this clause are to be fixed.

Approved Lot and Population Density.

6.5 (a) Notwithstanding the provisions of clause 6.3 and Table No. 2:

- (i) a dwelling house may be erected on any lot created by a subdivision approved under the Act;
- (ii) a residential flat building shall not have a population density which would exceed the rate of 326 persons to the hectare.

(b) For the purpose of subclause (a) of this clause the population density of a residential flat building or a group house development shall be calculated by:

- (i) multiplying the number of habitable rooms in the building or the group by 0.8; and
- (ii) dividing the result by the proportion which the area of the land on which the build-

ing or the group is or is to be erected bears to one hectare.

Buildings on a Lot.

6.6 (a) Notwithstanding the provisions of any by-law to the contrary, the Council may approve of the erection of more than one residential building on a lot.

(b) Distances between buildings on the same lot. Where more than one building is erected on a lot, all standards shall be observed, as though the development were a single structure. In addition, the minimum distance between any two buildings shall be 9 metres or the minimum distance required under the formula set out below, whichever is the greater.

Single storey covered parking areas shall not be regarded as separate buildings for the purpose of this item.

The formula regarding the minimum distance between any two buildings (referred to as Building "a" and Building "b") is as follows:

$$D = \frac{L_a + L_b + 2(H_a + H_b)}{6}$$

6

where—

D is the required minimum horizontal distance between any wall of Building "a" and any wall of Building "b" or the vertical prolongation of either.

L_a is the total length of Building "a". The total length of Building "a" is the length of that portion or portions of a wall or walls of Building "a" from which, when viewed from directly above, lines drawn perpendicular to Building "a" will intersect any wall of Building "a".

L_b is the total length of Building "b". The total length of Building "b" is the length of that portion or portions of a wall or walls of Building "b" from which, when viewed from directly above, lines drawn perpendicular to Building "b" will intersect any wall of Building "a".

Ha is the height of Building "a".

The height of Building "a" is the height above natural ground level of any portion or portions of a wall or walls along the length of Building "a". Natural ground level is the mean level of the ground immediately adjoining the portion or portions of wall or walls along the total length of the building.

Hb is the height of Building "b".

The height of Building "b" is the height above natural ground level of any portion or portions of a wall or walls along the length of Building "b". Natural ground level is the mean level of the ground immediately adjoining the portion or portions of the wall or walls along the total length of the building.

The minimum required distance between two buildings as derived from the formula set out above may be reduced by 15 per cent if—

- (a) any one of the two buildings has a height of two storeys or less and the other has a height of six storeys or more; and
- (b) the difference in the height of the two buildings is 18 metres or more.

Plot Ratio.

6.7 Where the maximum plot ratio allowable on a particular lot is that shown in the first column of Table No. 3 the area of that lot that may be built upon shall not exceed the percentage shown in the second column to the Table.

Table No. 3.

Maximum plot ratio of	Percentage of Site Coverage
Up to and including 0.7	35
From 0.7 up to and including 0.8	20

Multiple Street Frontages.

6.8 Where a lot has boundaries to more than one street the Council shall determine which of those streets is for the purposes of this clause the primary street, or if there be more than two streets to which the lot has frontages, which are the primary streets and which the secondary street. The distance at which any building shall be set back from—

- (a) the primary street or streets shall be the distance prescribed in the appropriate part of Table No. 2 as the front boundary set back;
- (b) the secondary street shall be one-half of the distance prescribed in that part of the Table as the front boundary set back.

Landscaped Area.

6.9 At least 50% of every lot shall be designed, developed and maintained as landscaped area in accordance with the approved plan relating thereto. The area of all access driveways between the street alignment and the building line may be included in calculating the landscaped area required to be provided by this clause.

Car Parking.

6.10 Where land is developed or buildings are used or adapted for use for any purpose other than a local shop or a purpose referred to in Table No. 2, car parking spaces of the number required by Part VII with respect to land used for that purpose shall be provided.

6.11 All car parking spaces shall be laid out, designed, constructed and maintained in accordance with the provisions of Part VII and the approved plan relating thereto.

New Concepts.

6.12 Notwithstanding any provision of the Scheme to the contrary, if application is made to the Council to approve of a residential development the type or nature of which is not otherwise provided for by the Scheme, whether by reason of the combination of different types of housing or otherwise, the Council may give its approval to the use of the land in question for the purpose proposed and may give approval to commence development thereof provided that:

- (i) an application for approval to use the land for such purpose is made in accordance with clause 3.6 and clause 3.7 and the requirements of clause 3.8 are complied with;
- (ii) the provisions of that part of Table No. 2 which apply to the Zone in which the land is located relating to the maximum plot ratio would not be exceeded by the proposed development;
- (iii) the population density of the proposed development (calculated in the manner specified in clause 6.5(b)) would not exceed the rate of 326 persons to the hectare;
- (iv) the Council is satisfied that having regard to the nature of the proposed development and development in the locality, open space sufficient to preserve the amenities of the development itself and the locality will be provided and the environment of the locality will be preserved or improved;
- (v) sufficient car parking spaces and areas for loading and unloading vehicles carrying goods or commodities to or from the proposed development, together with adequate access to and from the same, will be provided.

6.13 Where an application is made to the Council pursuant to Clause 6.12 the provisions of clauses 3.9 to 3.15 (both inclusive) shall apply to the consideration thereof by the Council and its decision thereon.

Local Shop.

6.14 The occupier of any local shop shall not erect, place or maintain any advertisement on the lot on which the shop is located provided that:

- (i) the fascia at the front of the shop may be used to display the name of the business and/or the name of the proprietor thereof; and
- (ii) advertisements relating to goods sold on the premises may be displayed on the front of the shop below such fascia.

6.15 A local shop in a Residential Zone may have self-contained living accommodation for a single family incorporated therein or attached thereto if the building as a whole is so designed that if the premises cease to be used for the purpose of a shop the whole of the premises could be used for residential purposes in accordance with the standards prescribed by the Scheme for residential purposes in the Zone in which the premises are located.

6.16 A local shop in a Residential Zone shall be provided with such number of car parking spaces as the Council considers necessary to prevent the obstruction of traffic on adjoining streets or roads and to provide adequate parking for customers but in no case shall there be less than three such car parking spaces.

Part VII—Car Parking.

7.1 (a) a person shall not develop or use any land or erect, use or adapt any building for use for the purpose indicated in the first column of Table No. 4 in any Zone in the Scheme Area unless car parking spaces of the numbers specified in the second column to the Table are provided and such spaces are constructed and maintained in accordance with the provisions of this Scheme.

Table No. 4.

Use	Number of Car Parking Spaces
Dwelling house, duplex triplex, quadruplex, residential flat building and group houses	As prescribed in Table No. 2.
Hotel, motel, tavern, club, private hotel, lodging house, eating house, night-club, place of public assembly	Where applicable to the particular use. 1 for every 2 sq. metres of drinking areas; 1 for every 4 seats which an eating area is designed to provide or 1 for every 4 sq. metres of eating area or part thereof whichever produces the greater number of car parking spaces; 1 for every bedroom; 1 for every 6 seats provided or capable of being provided in assembly area or 1 for every 5 sq. metres of assembly area, whichever produces the greater number of car parking spaces; 1 for every 3 sq. metres of public lounge drinking areas; 1 for every 5 sq. metres of beer garden or outdoor drinking areas.
Health centre, clinic, consulting rooms	4 for every consulting room up to 2 such rooms and 2 for every additional room.
Squash centre	3 for every court.

(b) Where an application is made for town planning approval and the purpose for which the land or building is to be used is not specified in Table No. 4 the Council shall determine the number of car parking spaces to be provided on the land having regard to the nature of the proposed development, the prevention of the obstruction of roads and streets, and the orderly and proper planning of the locality and the preservation of its amenities.

Conditions of Approval.

7.2 When considering any town planning application the Council shall have regard to and may impose conditions on the required car parking spaces. In particular the Council shall take into account and may impose conditions concerning:

- the proportion of car parking spaces to be roofed or covered;
- the proportion of car parking spaces to be below natural ground level;
- the means of access to each car parking space and the adequacy of any vehicular manoeuvring area;
- the location of the car parking spaces on the site and their effect on the amenity of adjoining development, including the potential effect if those spaces should later be roofed or covered;
- the extent to which car parking spaces are located within required building set back areas;
- the location of proposed public footpaths, vehicular crossings, of private footpaths within the lot, and the effect of both pedestrian and vehicular traffic movement and safety.

Use of Public Car Parks.

7.3 Where public off street parking facilities are or are to be located in the near vicinity of land or a building the subject of an application for town planning approval the Council may:

- if satisfied that those facilities are sufficient to cater for the parking requirements of the land or building;
- if the applicant for town planning approval enters into an agreement with the Council to pay to the Council the costs of providing in such facilities the number of car parking spaces which would otherwise have to be provided,

approve the application notwithstanding that the required number of car parking spaces will not be provided within the land or building.

Shared or Combined Parking.

7.4 Where the number of car parking spaces proposed to be provided on land or in a building the subject of an application for town planning approval is less than the number required to be provided pursuant to the Scheme, the Council may approve the application if the applicant demonstrates that off street parking facilities in the near vicinity are available to cater for the parking requirement of the land and that arrangements to the satisfaction of the Council have been made to enable those facilities to be used for that purpose.

1.4 In this Scheme the terms used will have the respective interpretations set out in Appendix "D" of the Town Planning Regulations 1967 unless otherwise specified by the Scheme and with the addition of the following:

Rural Uses means uses normally carried out in connection with agriculture, grazing or farming generally including residential use but not including piggeries, noxious uses or other uses considered by Council to be detrimental to the health or amenity of the area, but may with consent of Council include establishments for the breeding and sale of animals.

Building Envelope is an area of land within a lot defined on a plan of subdivision lodged with the Council or by other means related by measurement to the boundaries of the lot, and within which all buildings on the lot are to be contained.

Tree Preservation Area is an area of land within a lot defined on a plan of subdivision lodged with the Council and related by measurement to the boundaries of the lot or elsewhere by the Scheme within which no indigenous trees or vegetation may be removed except under the conditions laid down in the Scheme.

Part II—Objectives and Policies.

2.1 Council's primary objective will be to ensure that development which takes place within the Scheme Area as a result of increased residential and recreation uses should occur with the least detrimental effect possible to the Shire's rural landscape, its social structure and its historic heritage.

2.2 Council's Policy in order to achieve its objectives will be to require that applications for development in the Scheme Area must show an adequate concern for the environment and show minimal detrimental intrusion into the landscape, the area's ecology, and the Shire's social structure.

Part III—Reserved Land.

3.1 (a) Land set aside under this Scheme for the purposes of a reservation is deemed to be reserved for the purposes indicated on the Scheme Map or for such other purposes as may from time to time be decided by the Authority in whom the Reserve is vested or is controlled.

(b) Except as otherwise provided in this Part a person shall not carry out any development on land reserved under this Scheme, other than the erection of a boundary fence, without first applying for and obtaining the written approval of the Council.

(c) In giving its approval the Council shall have regard to the ultimate purpose intended for the reserve and shall in the case of land reserved for the purposes of a public authority confer with that authority before giving its approval.

(d) No provision of this Part shall prevent the continued use of land for the use for which it was being lawfully used immediately prior to the Scheme having the force of law, or the repair and maintenance, for which the prior consent in writing of the Council has been obtained, of buildings or works lawfully existing on the land.

3.2 (a) Where a Council refuses approval for the development of land reserved under the Scheme on the ground that the land is reserved for public purposes, or grants approval subject to conditions that are unacceptable to the applicant the owner of the land may, if the land is injuriously affected thereby, claim compensation for such injurious affection.

(b) Claims for such compensation shall be lodged at the office of the Council not later than six months after the date of the decision of the Council refusing approval or granting it subject to conditions that are unacceptable to the applicant.

(c) In lieu of paying compensation the Council may purchase the land affected by such decision of the Council at a price not exceeding the value of the land at the time of refusal of approval or of the grant of approval subject to conditions that are unacceptable to the applicant.
