If the Scheme is implemented in stages:

(a) the costs or estimated costs to be deducted shall be those which in the opinion of the Council are applicable to that stage including such proportion of the costs or estimated costs of works which serve or will serve or which will be of advantage to that and any other stage as the Council considers equitable;

Schedule.

Shire of Belmont Town Planning Scheme No. 6—
Amendment No. 66.

RESOLVED that the Council in pursuance of section 7 of the Town Planning and Development Act, 1928 (as amended), amend the above Town Planning Scheme Text by deleting from Clause 3.4 all reference to Group Housing and substituting the following regulations:

Group Housing: For the purpose of this part the following interpretations shall apply

"Group House" means a dwelling unit, constructed as one of a group of four or more on one lot such that no dwelling is placed wholly or partly vertically above any other, and which may be attached to another dwelling.

"Habitable Room" means any room in which any person sleeps, eats or carries on his usual domestic business or social vocations, or avocations, but does not include laundries, bathrooms, water closet compartments, serving and storage pantries and closets, boiler rooms, cellars, corridors, and similar spaces used neither frequently nor during extended periods.

"Living Room" means a habitable room, excluding a kitchen or a room used principally for sleeping purposes, and includes rooms used principally for dining (other than where part of a kitchen) or for relaxation or recreation, provided that all dwelling units shall have at least one room classified as a living room.

"Major Opening" means a window, door or other opening to a room or space which provides the principal or substantial external means of light and/or view to that room or space and excludes secondary openings where these are of an aggregate area to any one wall not exceeding 1.5 m² provided that any room may have more than one major opening, and no habitable room shall have less than one.

"Plot Ratio" means the ratio of the gross total of floor area to the area of land within the site boundaries, where the floor areas

are measured from the outer faces or external walls, or from the outer face of any portion of the building other than the roof structure that projects beyond these walls, but excluding open patios, terrace and verandahs not deeper than 1.5 m, external storage areas and areas used exclusively for the parking of wheeled (motor) vehicles.

Council may, at its discretion, approve the development of single storey group houses in the Residential "A" Zone where comprehensive plans are submitted for a minimum group of four dwelling units. The number of dwelling units that may be permitted on any single lot in accordance with the following bulk and location controls is ten except that Council may permit a larger number of dwelling units providing a density of 20 units per hectare is not exceeded and the maximum number of dwelling units serviced by a single service road is ten. Council may also require the provision of adequate visitor parking.

Bulk and Location Controls

(A) Use	Minimum Housing Lot Area	Minimum Setbacks from Boundaries	Maximum Plot Ratio	Maximum Site Cover	Minimum Number of Car Spaces
Group Housing	300 m ²	Streets: 6m Others: refer to (b)	.35	.35	2 per unit sited behind the 6 m building line

(B) Building Setbacks: The depth of setback of a wall at any point shall be measured as the horizontal distance between that point and a point on the lot boundary (or assumed boundary between buildings) for which a line drawn perpendicular to the boundary would intersect with the given point on the wall. The setback as measured shall be increased by the extent to which an eaves or roof overhang projects by more than 0.5 metres.

The setbacks to boundaries other than street boundaries shall be as follows:—

- (i) Walls containing a major opening to a living room or giving access directly from a living room to the exterior shall not be permitted closer to a side or rear boundary than 4 metres.
- (ii) Walls containing a major opening to a habitable room or giving access from a habitable room to the exterior shall not be permitted closer to a side or rear boundary than 3 metres.
- (iii) Walls without major openings to habitable rooms shall not be permitted closer to a side or rear boundary than 1.5 metres.
- (iv) Walls with or without major openings to nonhabitable rooms shall not be permitted closer to a side or rear boundary than 1.5 m.
- (v) The distance between buildings on the same lot but in different occupancies may be nil but in cases where groups of attached and/or single units are to be dispersed on the same lot then the distance between buildings will be calculated on the assumption of a boundary between buildings less 10%.
- (vi) The distance between facing walls in different occupancies of a single building shall be calculated as far as possible as though they were walls of separate buildings on the same lot, but in any case the Council shall ensure the provision of adequate rear yard amenity and shall retain the right to require any adjustment to setbacks it thinks fit to ensure adequate provision of such amenity.

(vii) Council shall at all times retain the discretion to determine which is the front, which is the rear and which are the side boundaries to a lot. The minimum setbacks shall be as laid down in (a) but Council may permit a dispensation from one street whereby buildings may be setback from that street a minimum distance of 4 metres, or in accordance with acceptable site lines for traffic. Where special locational circumstances prevail Council shall have discretion to vary the setback requirements of this part except that it shall not vary the setback requirements laid down in (v) and (vi).

(viii) Where development fronts an internal access road Council, having due regard to the amenity of the area, shall retain the discretion to impose any setback deemed necessary but in any case the Council shall not require a building or buildings to be setback a greater distance than 4 metres.

(C) Notwithstanding the above provisions Council shall require:—

- (i) Each group house to be sited, with due regard to the natural constraint of the site, on 300 m² of land exclusive of internal areas set aside for vehicular access purposes.
- (ii) All group housing developments shall be connected to sewer.

8. No dwelling unit shall be constructed or approved for construction unless a domestic water supply is incorporated into the approved plans and no dwelling shall be considered fit for human habitation unless such a supply has been installed and is operating.

9. No lots shall display a sign hoarding or billboard other than one advertising activities conducted on site and such signs shall not exceed 0.2 m² in area.

10. In areas which Council considers deficient in tree cover, it may require, as a condition of any building permit issued in these areas, the owner to plant up to 20 native trees of species specified by the Council.
