HIS Excellency the Administrator in Executive Council acting under the provisions of section 48 of the Noise Abatement Act, 1972, has been pleased—

- (a) to revoke, with effect from the date of publication of this Notice, the Noise Abatement (Annoyance of Residents) Regulations, 1974, published in the *Government Gazette* on 21st June, 1974; and
- (b) to make the regulations set out in the Schedule hereunder.

J. C. McNULTY,
 Commissioner of Public Health,
 and Medical Services.

Schedule.

NOISE ABATEMENT (NEIGHBOURHOOD ANNOYANCE) REGULATIONS, 1979.

CLD. 1919/73, V.2.

1. These regulations may be cited as the Noise Abatement (Neighbourhood Annoyance) Regulations, 1979.

2. In these regulations—

“approved” means approved by the Council;

“Council” means the Noise and Vibration Control Council established under the Act;

“dB(A)” means the reading in decibels on a sound level meter or other sound level measuring equipment using the A-weighting network specified for sound level meters in Part I or Part II, whichever is applicable to the measuring equipment in question, of Australian Standard AS 1259 of 1976;

“field calibration” means a check on the laboratory calibration of the sound level measuring equipment at a reference frequency;

“Form” means a form appearing in the Schedule to these regulations;

“laboratory calibration” means an evaluation of the sound level measuring equipment undertaken in a laboratory, and in a manner approved by the Council;

“noise” means an airborne vibration within the frequency range 20—20 000 Hz;

“premises” includes any land, building or place;

“Requirements” means the publication published by the Council entitled “Requirements for the measurement of noise for the purposes of the Noise Abatement Act”;

“section” means a section of the Act;

“standard sound source” means a device provided for field calibration of sound measuring equipment in compliance with clause 11.1(xi) of Australian Standard 1259 of 1976 Part II, or approved by the Council for such purpose;

“Table” means a table appearing in the Schedule to these regulations;

“the Act” means the Noise Abatement Act, 1972.

3. Proceedings under the Act may be brought—

(a) in respect of an offence, by an inspector or other person authorised by the Minister pursuant to section 46; or

(b) in respect of a nuisance on any premises, by the local authority pursuant to section 27 or by a person or persons pursuant to section 33.

Schedule—*continued.*

4. In any proceedings (whether proceedings under the Act or under any other Act or law) where the evidentiary provisions of the Act are relevant, the methods of noise measurement set out in these regulations do not constitute the only manner in which evidence of a noise level may be given, and a court may be satisfied as to the nature and effect of a noise on evidence other than proof of a measured or calculated noise level.

5. Where the Local Court—

- (a) serves on a local authority a nuisance order pursuant to subsection (4) of section 27; or
- (b) pursuant to subsection (1) of section 33 directs the local authority to abate a nuisance,

that local authority shall be deemed to have been satisfied as to the existence of the nuisance and shall as soon as is practicable thereafter (and whether or not any abatement notice is served) exercise such of the powers conferred by paragraph (b) of subsection (2) of section 26, subsection (4) of section 27, and subsection (2) of section 28 as may be appropriate.

6. (1) Where proceedings pursuant to section 33 are not taken by the complainants in person, a person who alleges that a noise which emanates on more than one occasion from any premises is injurious or dangerous to health, or occurs or continues to such a degree and extent that it has a disturbing effect on his physical, mental or social well-being when he is carrying on normal activities, may lodge with the local authority in the district of which the place at which he hears the noise is situate a complaint in Form A requesting that local authority to take action on his behalf.

(2) A complaint may be made to a local authority otherwise than in the manner provided for by subregulation (1) of this regulation, but in any such case the action to be taken thereon shall be at the discretion of the local authority and the provisions of regulation 7 of these regulations shall not apply to that complaint.

7. As soon as is practicable after receipt of a notice in Form A the local authority shall cause inquiries and investigations to be made and, unless the allegation appears to be of a frivolous, vexatious or unreasonable nature, the local authority shall as soon as practicable thereafter notify the person appearing to be responsible for the noise that a complaint has been lodged with the local authority in respect of the noise, and may require that the alleged nuisance be abated; and the local authority shall thereafter notify the person who lodged the complaint of the result of the inquiries and investigations, whether or not the local authority required the alleged nuisance to be abated, and of any response thereto.

8. (1) Where—

- (a) a local authority determines that—
 - (i) a notice under section 26; or
 - (ii) proceedings for an offence pursuant to these regulations, shall, or shall not, be issued; or
- (b) a finding or calculation is made as to an alleged noise by an inspector pursuant to these regulations,

the nature of that determination, finding or calculation shall be made known as soon as is practicable by the local authority to the person who lodged the complaint to which it relates and to the person who is, in the opinion of the local authority, responsible for the alleged noise.

(2) Where an inspector is of the opinion that the alleged noise does not constitute a nuisance he may, without measuring that noise or undertaking any calculation for the purpose of these regulations, so inform the local authority which shall thereupon notify the person who lodged the complaint as to that finding.

(3) Subject to the provisions of regulation 5 and of regulation 11 of these regulations a local authority may, but is not required to, serve an abatement notice under section 26 and thereafter institute and conduct proceedings relating thereto, but may make it a condition of the consent to take such action that any person making a complaint attend and give evidence at the proceedings.

9. Where an inspector is of the opinion that, although by measurement or calculation a noise does not exceed the level prescribed by these regulations, in the circumstances of the case the noise nevertheless constitutes a nuisance the local authority may accept that opinion as sufficient grounds for the issue of an abatement notice.

10. Where an inspector ascertains that, although the level of noise emanating from any premises exceeds (at the place of measurement and after adjustment in accordance with regulation (15) the level shown in Table 1 as being the assigned outdoor neighbourhood noise level applicable to the relevant circumstances, the ascertained level does not exceed that assigned level by more than 5 dB(A) then the provisions of paragraph (a) of subsection (3) of section 8 shall apply and it shall be for the local authority to decide whether or not to issue an abatement notice, although the local authority may be satisfied that sufficient grounds exist for the issue of an abatement notice.

Schedule—*continued.*

11. Where an inspector ascertains that the level of noise emanating from any premises exceeds (at the place of measurement and after adjustment in accordance with regulation 15) the level shown in Table 1 as being the assigned outdoor neighbourhood noise level applicable to the relevant circumstances and that the ascertained level exceeds the assigned level by more than 5 dB(A), then the provisions of paragraph (b) of subsection (3) of section 8 apply and the local authority shall issue and enforce an abatement notice.

12. (1) In order to bring a locality within the description of a neighbourhood under these regulations it may be shown that the nature of the locality approximates more nearly to one of the kinds described in Table 1 than to any other kind there described, and for the purposes of any proceedings under the Act what is comprised in a locality is a question of fact but may be taken to be the general environs within a radius of 200 metres of the place where the measurement is made.

(2) The kind of neighbourhood and the assigned outdoor neighbourhood noise level applicable to the relevant circumstances may be determined from Table 1 in the following manner—

- (a) the use of the premises at the place of reception of the noise, current while the noise is alleged to give rise to complaint, shall be decided in accordance with the first column;
- (b) a description of the neighbourhood for the purposes of these regulations shall be decided in accordance with the second column;
- (c) depending on the time at which the noise is alleged to give rise to complaint, the assigned outdoor neighbourhood noise level in dB(A) applicable to the relevant circumstances shall be that given in the corresponding third, fourth, or fifth column for that use and neighbourhood.

13. (1) Where the description of a locality cannot be brought within that of a neighbourhood of a kind described in Table 1, the background noise shall be measured in the absence of the noise alleged to be offending, where possible, and used as the assigned outdoor neighbourhood noise level; and where this measurement is less than the lowest values indicated in Table 1, the lowest value for the appropriate time period in Table 1 is to be used as the assigned level.

(2) The result of the measurement of background noise shall be ascertained by taking the average of the minimum pointer deflections on a sound level meter.

(3) Where the noise complained of occurs during the measuring period the noise level then recorded at the time of occurrence shall be excluded from the calculation of the background noise for the measured period.

(4) The measurement of the sample of background noise shall be made in dB(A) over a continuous period as close as is practicable to the time at which the noise alleged to give rise to complaint occurs, but subject to subregulation (3) of this regulation may extend either side of that time.

14. (1) For the purpose of these regulations a noise shall be measured as nearly as is reasonably practicable to where the complainant is alleged to have heard it, indoors and out, or both, as is relevant and practicable in the circumstances in relation to which the cause of complaint occurs, and with any windows, doors or other openings in a configuration appropriate to those circumstances.

(2) The measurement of the noise alleged to give rise to complaint shall be made in dB(A) over a sufficiently long period to be representative of the annoying effect at a time during which that noise is occurring in the manner alleged to give rise to the complaint.

15. (1) Where—

(a) a noise is measured for the purposes of these regulations; and

(b) the noise—

(i) is measured in circumstances in which Table 2 applies; or

(ii) has any of the characteristics set out in Table 3 or Table 4 or has characteristics appropriate to both such Tables,

the measurement shall be adjusted as indicated in those Tables according to the circumstances and characteristics applicable to the noise, and the level of noise as so measured and adjusted is the calculation or finding for the purposes of these regulations.

(2) For the purpose of making a comparison with indoor measurement of any noise alleged to give rise to complaint the level assigned shall be adjusted in accordance with Table 2.

16. (1) The following provisions apply to the measurement of noise for the purposes of these regulations—

(a) measurement shall be carried out using a sound level meter conforming to the requirements of Part I or Part II, whichever is applicable to the particular case, of Australian Standard AS 1259 of 1976, or such other sound level measuring equipment as is approved;

(b) except in special circumstances as specified by the Council, sound level measuring equipment shall be set on A-weighting and slow response;

(c) the measurement shall be carried out and recorded substantially in accordance with the appropriate procedure set out in the Requirements.

Schedule—*continued*.

(2) Measurements of a level of noise by sound level measuring equipment shall not be used for the purposes of these regulations unless—

- (a) the sound measuring equipment and the standard sound source used in connection with it have been laboratory calibrated within twelve months immediately preceding the measurement or within such other period as is approved;
- (b) the sound measuring equipment has been field calibrated, as nearly as is practicable immediately prior to and as soon as practicable after the measurement has been made, at a reference frequency within the range of 200 to 1 000 Hz by a standard sound source; and
- (c) the accuracy of the equipment at the reference frequency, including errors due to free field approximation and electro-acoustical measurements, is within 1dB.

17. (1) In any proceedings where for the purposes of section 7 it falls to be determined whether or not a level of sound was unavoidable in connection with a trade or business, a level of sound shall be taken to be reasonable if it does not exceed the level prescribed pursuant to paragraph (i) of subsection (2) of section 48 or if it is shown that all practicable means have been taken to prevent that level of sound occurring and to prevent it from causing annoyance in any premises other than the premises at which it occurs.

(2) For the purposes of this regulation—

- (a) the test of "practicable means" is to apply only so far as compatible with—
 - (i) any duty imposed by law;
 - (ii) safety and safe working conditions; and
 - (iii) the exigencies of any emergency or unforeseeable circumstances;
- (b) "practicable means" include the design, installation, maintenance and manner and periods of operation of plant and machinery, and the design, construction and maintenance of buildings and noise attenuating devices or structures; and
- (c) "practicable" means reasonably practicable having regard among other things to local conditions and circumstances, to the current state of technical knowledge and to the financial implications.

(3) Where it is found that a level of sound is reasonable having regard to the provisions of subregulation (1) of this regulation, that level of sound shall be deemed to be unavoidable in the absence of proof to the contrary.

Notice Under Section 415.

To the Chairman and Committee, Boulder Youth Organisation, P.O. Box 144, Boulder, W.A.

TAKE notice that, as a result of reports submitted by the Building Surveyor of the Shire of Boulder, I am of the opinion that the building known as the Old Palace Picture Theatre situated at the corner of Burt and Brookman Streets, Boulder, is not fit to be used as a public building for the following reasons—

(1) exit doors would not permit rapid egress in the event of fire;

(2) there is no fire service to the building;

(3) the main floor is unstable;

(4) the ceiling is not fixed in a safe manner, and take note that it is the absolute duty of the owner and the occupier to ensure that the building is not used by the public or for public purposes until it has been made fit to be so used nor until the Minister has granted a certificate to that effect.

TOLTOYS FUN FOUNTAIN.

WE are concerned that, in certain circumstances and in areas of extreme water pressure, the stream of water could result in an injury to a child.

Toltoys have decided therefore to incorporate a water pressure limiting device in all FUN FOUNTAINS and we recommend that owners contact the Toltoys' Service Division in their State who will arrange for the modification to be effected, free of charge.

Toltoys suggest that any person contemplating the purchase of a FUN FOUNTAIN ensures that the notice—
