Nothing shall prevent the balance of purchase money being paid at an earlier date should the purchaser so desire, but a Crown Grant (freehold) will not issue until the conditions under which the land was released have been complied with.

A Crown Grant fee of \$55 plus an additional Assurance Fund fee of \$450 is payable with the final instalment.

Intending applicants shall submit with their applications—

- (i) Detailed plans of the proposed development including an indication of development stages where proposed.

The successful applicant will be required to submit detailed environmental protection and management plans acceptable to the Shire of Broome, the Department of Conservation and Environment and the Soil Conservation Service relevant to the site and adjoining land likely to be affected by the development. Such plans shall be submitted within four months of the date of authorisation or the application shall be deemed to have lapsed and all moneys so far paid shall be forfeited.

The successful applicant will also be required to make arrangements with the Water Authority of Western Australia to connect the development to the Town Sewerage System.

Water Supply and Sewerage Development Charges must be paid at the time of development and although not recurrent can be quite substantial. It is therefore recommended that intending applicants submit details of their proposed developments to the Water Authority so that an accurate indication of costs can be given prior to purchase.

A connection to a point 350 metres away from Lot 1795 near the intersection of Weld and Haas Streets will be possible next year. The cost of this has been estimated at approximately \$22 000.

Subject to the completion of these obligations to the satisfaction of the Minister for Lands (who shall take cognizance of the requirements of the Shire of Broome and affected State Departments and authorities) approval shall then issue for site development to proceed.

At the time of approval for site development to proceed the Minister shall advise the purchaser of the extent of development that will be necessary to enable the issue of a Crown Grant (freehold).

Subject to agreement between the purchaser and the Minister, the foregoing development obligations may be varied or added to from time to time.

The Minister for Lands reserves the right to refuse any application on the grounds that the proposed development and/or development programme is inadequate or unsuitable or that the applicant has failed to show adequate capacity to fund his development project.

Neither the State Government nor the Shire of Broome shall be responsible for the provision of additional services to the site and should the site not be developed as an extension to an adjoining site the developer shall be responsible for the extension of all required services to the site at his expense including the payment of all Statutory fees to the relevant Authorities.

A person in the employ of the State must apply through the Executive Director for the Governor's permission to hold this land. Written approval of the Permanent Head concerned should accompany such application.

## Applications

Applications for the award of a permit over any of the above areas are required to be made in the approved manner, submitted in duplicate and should be accompanied by—

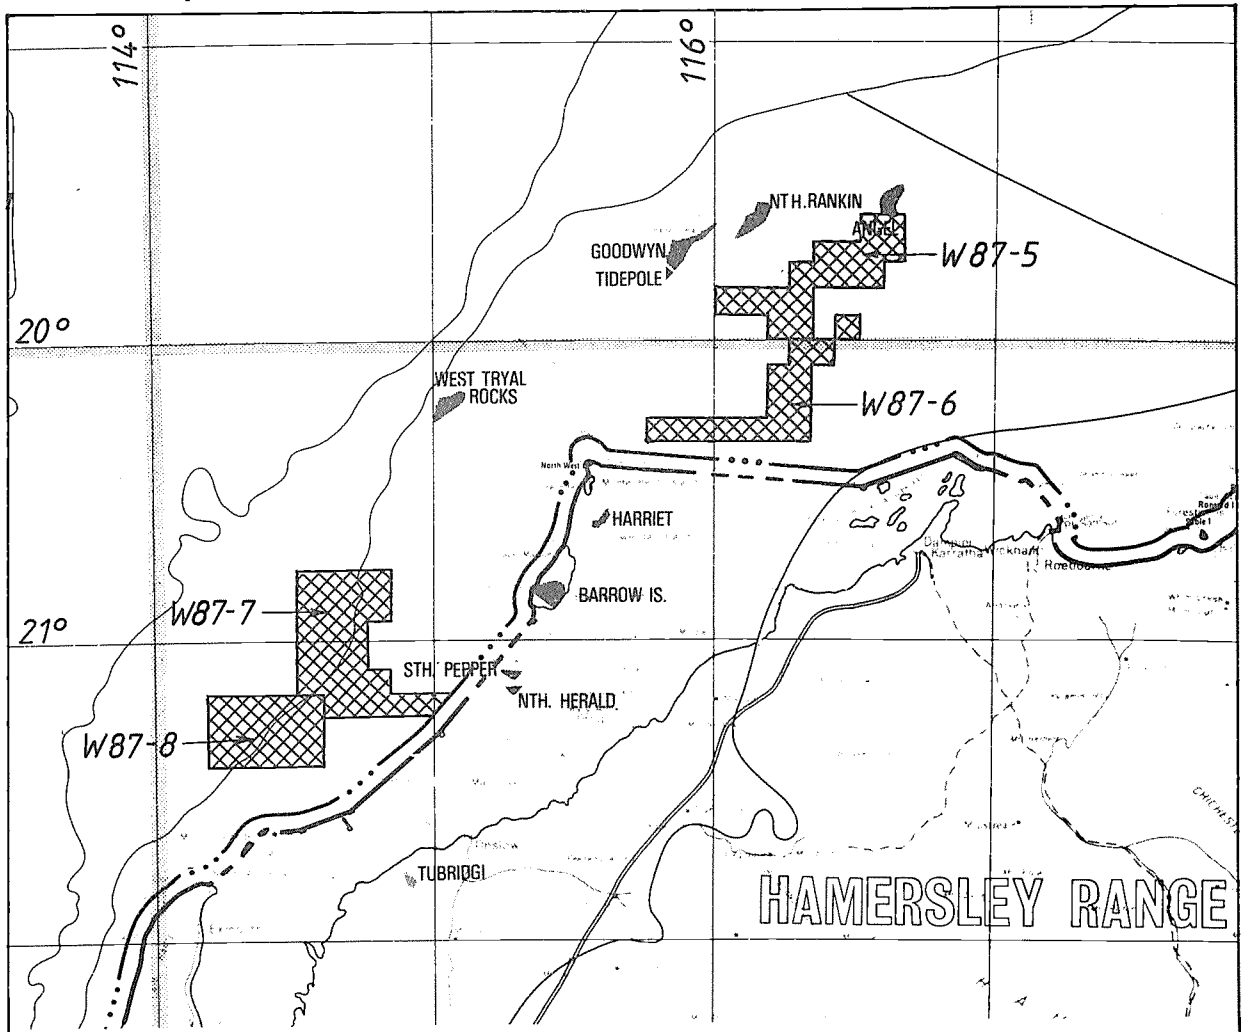

## (a) Details of—

- (ii) the applicant's minimum guaranteed proposal (in terms of operational activity and indicative minimum expenditure) for data evaluation, seismic surveying activities and exploration wells to be drilled, on the basis that none of the wells drilled encounters significant hydrocarbons, for each year of the first three years of the permit term. This proposal, to be known as the minimum guaranteed "dry hole" work programme, should only include work expected to involve a substantial exploration component—appraisal work should not be included;
- (iii) the applicant's proposal (in terms of operational activity and indicative minimum expenditure) for data evaluation, seismic surveying activities and exploration wells to be drilled, for each of the remaining three years of the permit term. This proposal, to be known as the "secondary" work programme, should only include work expected to involve a substantial exploration component—appraisal work should not be included.

- (b) Particulars of—
- (i) the technical qualifications of the applicant and of its employees;
  - (ii) the technical advice available to the applicant;
  - (iii) the financial resources available to the applicant, including evidence of the applicant's ability to fund the work programme proposed, a statement of other exploration plans and commitments over the next six years, and a copy of the latest annual report for each applicant company;
  - (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice);
  - (v) the percentage participating interest of each party to the application; and
  - (vi) the business address for service of notices in respect of each applicant.

- (c) A fee of \$3 000, payable to the Commonwealth of Australia through an Australian bank or bank cheque, is required for each area (see section 21 (1) (f) of the Petroleum (Submerged Lands) Act 1967).
- (d) Such other information as the applicant wishes to be taken into account in consideration of the application including, for example, past performance in offshore exploration either in Australia or overseas; past performance and future intentions as to the sourcing of goods and services to be used in operations; evidence of recent willingness to apply for "frontier" exploration areas, such as previously unavailable areas, deeper water prospects, hostile environments; proposals to improve technical capabilities through research to be undertaken in Australia or overseas, and, in the case of foreign companies, proposals to transfer technology and skills to Australians.
