BUSH FIRES ACT 1954

Shire of Harvey

Important information relating to your responsibility as a
landholder in the Shire of Harvey

WITH reference to section 33 of the Bush Fires Act 1954 you are required to carry out fire prevention work on land owned or occupied by you, in accordance with the provisions of this order.

This work must be carried out by 15 November 1987, and kept maintained throughout the summer months until the close of the restricted burning period, 1988.

Persons who fail to comply with the requirements of the order may be issued with an infringement notice (penalty \$40) or prosecuted with an increased penalty, and additionally, Council may carry out the required work at cost to the owner or occupier.

If it is considered for any reason to be impractical to clear firebreaks or remove flammable materials as required by this notice, or where—

- (a) compliance with this order may aggravate soil erosion problems; or
- (b) the owner or occupier of land considers a more effective system of fire protection can be obtained; or
- (c) natural features render firebreaks unnecessary,

you may apply to the Council or its duly authorised officer, not later than 1 November 1987, for permission to provide firebreaks in alternative positions (strategic breaks) or to take alternative action to abate fire hazards on the land.

Approval of variations to this order must be endorsed by a fire control officer.

If permission is not granted by the Council or its duly authorised officer, you shall comply with the requirements of this notice. If the requirements of this notice are carried out by burning, such burning must be in accordance with the relevant provisions of the Bush Fires Act.

A. Rural Land: Firebreaks not less than two metres wide must be provided in the following positions—

- (a) within 60 metres inside and along the boundaries of all land including that which is uncleared, so as to form a continuous break around the holding.

(Note: firebreaks constructed on road verges do not constitute a legal firebreak.)

- (b) Where the area of land exceeds 120 ha (300 acres), additional firebreaks are required so as to divide the land into areas of not more than 120 ha (300 acres) which are completely surrounded by firebreaks.
- (c) Not more than 100 metres and not less than 20 metres from the perimeter of all groups of buildings, haystacks (includes two or more round bales placed in a paddock for storage purpose) and fuel installations provided on that land.

Note: Irrigation Areas—Owners or occupiers may be exempted from all or part of the requirements of the above if, in the opinion of the fire control officer responsible for the area in which the land is located, there is no need to construct breaks on the irrigated land or non-irrigated land, not exceeding 20 hectares in area if surrounded by irrigated land.

B. Special Rural Land: The owners of all existing small rural holdings zoned as "Special Rural" under Town Planning Schemes, must maintain clear of all flammable materials, a firebreak not less than two metres wide immediately inside all external boundaries of the land.

C. Urban Land (residential, commercial and industrial land within a townsite or any other area subdivided for residential purposes): In respect of land owned or occupied by you within any townsite or any area subdivided for other purposes, you shall—
