NOTICE is hereby given in accordance with Section 93 of the Water Authority Act 1984, of the intention of the Water Authority to undertake the provision or construction of the following works.

Sewerage—Kalamunda Collection Sewer, Traylen Road and Reticulation areas Kalamunda 1A and 1B and Forrestfield IUU—Shire of Kalamunda

The localities of the above works are shown on plan BP02 which may be viewed at, Major Projects Branch, John Tonkin Water Centre, 629 Newcastle Street, Leederville.

Provisions for Charging: When the works are completed, owners of land within the areas to be sewered will be required to pay Water Authority sewerage rates whether or not they connect to the sewer. For eligible pensioners, concessional rates are available or payment may be deferred until eligibility ceases.

## Applications

Applications for the award of a permit over any of the above areas are required to be made in the approved manner, submitted in duplicate and should be accompanied by—

## (a) Details of—

- (i) the applicant's assessment of the petroleum potential of the area, including a geological and geophysical review and technical assessment of the area, and the concepts underlying the proposed exploration programme;

(ii) the minimum work programme proposed for each of the five years, specifying the number of wells to be drilled, the line kilometres of seismic survey to be carried out and the estimated expenditure;

(iii) wells referred to in the work programme should not include development wells (the AAPG well classification scheme will be the basis of identification).

## (b) Particulars of—

- (i) the technical qualifications of the applicant and of its employees;
- (ii) the technical advice available to the applicant;
- (iii) the financial resources available to the applicant, including evidence of the applicant's ability to fund the work programme proposed, and a copy of the latest annual report for each applicant company;
- (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice);
- (v) the percentage participating interest of each party to the application; and
- (vi) a single address for service of notices in respect of the application.

(c) A fee of \$3 000, payable to the Department of Mines through an Australian bank or bank cheque, is required.

(d) Such other information as the applicant wishes to be taken into account in consideration of the application.

If applications are submitted for more than one area an order of preference should be stated.

Applicants for L89-10, L89-11 and L89-12 should note that these areas encroach upon a proposed national park in the Kennedy Ranges and any intended operations in the encroachment zone will need to be referred to the Governor in Executive Council for clearance.

Award of permits will be based upon the adequacy of the work programme for the first two years of the permit term. The successful applicant will be required to fulfill the minimum commitment for each of those years without variation. This is known as the firm commitment phase, however the balance of the programme can be negotiated according to the results of prior exploration.

Applications made on the approved form are to be addressed to—
