BUSH FIRES ACT 1954

Shire of Bridgetown-Greenbushes

Firebreak Order**Notice to Owners and Occupiers of Land**

WITH reference to section 33 of the Bush Fires Act 1954, you are required to carry out fire prevention work on land owned or occupied by you in accordance with the provisions of this order.

This work **MUST** be carried out by 30 November 1989 and kept maintained throughout the summer months until 14 March 1990.

An inspection of firebreaks and hazard removal will be carried out in all areas of the Shire by an authorised Officer.

Persons who fail to comply with the requirements of this Order may be issued with an Infringement Notice (Penalty \$40) or prosecuted with an increased penalty, and additionally, Council may carry out the required work at cost to the owner or occupier.

If it is considered for any reason to be impractical to clear firebreaks or remove inflammable materials as required by this notice, you may apply to the Council or its duly authorised officer not later than 1 November 1989 for permission to provide firebreaks in alternative positions or take alternative action to abate fire hazards on the land (guidelines and conditions for alternative breaks are listed below). If permission is not granted by the Council or its duly authorised officer, you shall comply with the requirements of the Notice. If the requirements of this Notice are carried out by burning, such burning must be in accordance with the relevant provisions of the Bush Fires Act.

Managed Farm Land

1. (a) **FARMLAND:** A 2.5 metre firebreak shall be constructed in such positions as agreed at a properly constituted meeting of a Bush Fire Brigade and incorporated in the Brigade Fire Protection plan, a copy of which is lodged at the Council Office and with the Brigade Fire Control Officer.
 If agreement between landowner or occupier and Brigade for the strategic firebreak plan is not achieved, Council may make a specific Order as to the firebreaks required in the circumstances.
- (b) **RURAL LAND IN TOWNSITES:** Managed rural land in townsites will not require firebreaks, except as required in clause 1 (c), provided that the property is comprehensively grazed or otherwise managed so as to reduce the accumulation of potential inflammable matter.
- (c) **CROPS:** A firebreak not less than 2.5 metres in width shall be provided around the perimeter of land on which a crop is planted.
- (d) **BUILDINGS AND HAY STACKS:** A break not less than 6 metres in width shall be provided immediately or as near as practicable surrounding all buildings and hay stacks.

4. A firebreak not less than ten metres in width—
 - (a) inside and around the perimeter of land in separate ownership on which pines are planted, but this firebreak is not required around unplanted areas; and
 - (b) inside and along the boundary of those portions of pine plantations adjoining a formed public road,
 - (c) additionally and in such position that no area of pine plantation shall exceed 200 hectares without being enclosed by a ten metre break.

A firebreak not less than six metres in width in such positions that no part or compartment of a pine plantation shall exceed 28 hectares in area.

All firebreaks referred to in this order shall be constructed and maintained in a condition trafficable by tractors and four wheel drive vehicles, and overhanging trees abutting all breaks shall be pruned to minimise accumulation of litter and allow vehicle access.

In addition to the breaks specified pine plantations traversed by S.E.C. power transmission lines have additional obligations under the Electricity Act.

Eucalypt Plantations

5. A firebreak not less than five metres in width—
 - (a) inside and around the perimeter of land in separate ownership on which trees are planted, but this firebreak is not required around unplanted areas; and
 - (b) inside and along the boundary of those portions of plantations adjoining a formed public road,

Definitions

For the purpose of this ORDER the following definitions apply—

"**MANAGED FARM LAND**" means any lot, location or holding consisting of adjoining lots or locations wholly or mainly maintained or used for grazing, dairying, pig farming, poultry farming, viticulture, horticulture, fruit growing or the growing of crops of any kind, or other similar businesses, where the activity substantially reduces the accumulation of inflammable matter.

"**UNMANAGED FARM LAND**" means land over 2 000 square metres on which inflammable matter has been permitted to accumulate, other than managed farm land, residential, commercial and industrial land, and pine or eucalypt plantations.

"**RESIDENTIAL, COMMERCIAL AND INDUSTRIAL LAND**" means all land used for those purposes and includes any ungrazed lot under 2 000 square metres.

"PINE PLANTATION" means land on which pine trees are planted covering an area greater than 400 square metres per lot or location, and intended for commercial purposes.

"FIREBREAK" means ground from which all inflammable material has been removed and on which no flammable material is permitted to accumulate during the period earlier referred to.

"HAYSTACK" means any collection of hay including fodder rolls placed or stacked together.

"EUCALYPT PLANTATION" means land not being native forests, on which eucalypts have been planted covering an area greater than 400 square metres per lot or location, and intended for commercial purposes.

Guidelines for Alternative Breaks

- (a) An alternative break shall be cleared as near as practicable to the position required by this notice, and such position shall be approved by either the Bush Fire Control Officer or Captain of the Bush Fire Brigade in the area concerned and forwarded in writing by the 1st November 1989, by the owner or occupier to the Shire Council for confirmation, enclosing a map of the alternative positions endorsed.
- (b) The Strategic Firebreak scheme submitted by a Bush Fire Brigade must be agreed to at a properly constituted Brigade meeting.
Alterations to the Brigade plan will need to be submitted to Council by 1st November each year and applications for alteration shall be endorsed by the brigade Captain or Fire Control Officer.
- (c) Any alternative submitted has no effect until approved by the Council after which notification in writing will be given.
- (d) All alternative breaks approved may be reviewed by the Council at any time after the expiry of one year.
- (e) Cultivation of roadsides will be allowed on road reserves only with the written permission of the Council, and for the purpose of protection of fencing only, and not as an alternative to a firebreak.
- (f) Pine Plantations: Alternative firebreaks may be provided by special permission of the Council after application by 1st November 1989, supported by a plan showing full detail, and where two or more owners are concerned an agreement in writing that they will be jointly and severally liable for compliance. Upon application and with special approval of the Council a totally cleared road survey on which a road has not been formed may be utilised as a firebreak.

Special Notice to Land Owners and Occupiers

The Council forwards a copy of this firebreak order with rate assessments each year. The notice is also published in the *Warren Blackwood Times* and additional copies are obtainable at the Shire Office counter.

The aim of the Council is to eliminate destructive bush fires and to this aim, some areas of the Shire are subject to hazard removal and roadside burning which is carried out by the Shire's Bush Fire Brigades and Council workforce.

The requirements of this order are considered to be the minimum standard of fire prevention work required to protect not only individual properties but the district generally. In addition to the requirements of this order, Council may issue separate special orders on owners or occupiers if hazard removal is considered necessary in some specific areas.

K. L. HILL,
Shire Clerk.

Applications

Applications for the award of a permit over any of the above areas are required to be made in the approved manner, submitted in duplicate and should be accompanied by—

- (ii) the applicant's minimum guaranteed proposal (in terms of operational activity and indicative minimum expenditure) for data evaluation, seismic surveying activities and exploration wells to be drilled, on the basis that none of the wells drilled encounters significant hydrocarbons, for each year of the first three years of the permit term. This proposal, to be known as the minimum guaranteed 'dry hole' work program, should only include work expected to involve a substantial exploration component—appraisal work should not be included;
- (iii) the applicant's proposal (in terms of operational activity and indicative minimum expenditure) for data evaluation, seismic surveying activities and exploration wells to be drilled, for each of the remaining three years of the permit term. This proposal, to be known as the 'secondary' work program, should only include work expected to involve a substantial exploration component—appraisal work should not be included.

(b) Particulars of—

- (i) the technical qualifications of the applicant and of its employee;
- (ii) the technical advice available to the applicant;
- (iii) the financial resources available to the applicant, including evidence of the applicant's ability to fund the work program proposed, a

statement of other exploration plans and commitments over the next six years, and a copy of the latest annual report for each applicant company;

- (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice;
 - (v) the percentage participating interest of each party to the application; and
 - (vi) the business address for service of notices in respect of each applicant.
- (c) such other information as the applicant wishes to be taken into account in consideration of the application including, for example, past performance in offshore exploration either in Australia or overseas; past performance and future intentions as to the sourcing of goods and services to be used in operations; evidence of recent willingness to apply for "frontier" exploration areas, such as previously unavailable areas, deeper water prospects, hostile environments; proposals to improve technical capabilities through research to be undertaken in Australia or overseas, and, in the case of foreign companies, proposals to transfer technology and skills to Australians.
- (d) A fee of \$3000, payable to the Commonwealth of Australia through an Australian bank or bank cheque, is required for each area (see section 21 (1) (f) of the Petroleum (Submerged Lands) Act 1967).
