No. 2—Amendment No. 11

Ref: 853/6/14/2, Pt. 11.

IT is hereby notified for public information, in accordance with section 7 of the Town Planning and Development Act 1928 that the Hon Minister for Planning approved the Shire of Manjimup Town Planning Scheme Amendment on November 20, 1989 for the purpose of the following—

1. Adding a new Clause 3.6 to read—

3.6 The Scheme also contains Policy Precincts—

- (a) Policy Precincts (Special Design) within which statements of Objectives and Policies will indicate Council's intentions for the Precinct, and wherein development controls over buildings and works will be implemented in accordance with the provisions of the Scheme in order to achieve the Objectives.

2. Deleting Clause 5.2.9 and adding a new Clause 5.2.9 to read—

5.2.9 Special Rural Areas and Special Rural Zones.

- (i) Special Rural Areas—

Council's Objective is that, land identified in Council's Limited Rural Strategy as suitable for Special Rural may be progressively rezoned, subdivided and developed if shown to be in conformity with Council's overall planning objectives and requirements.

In order to achieve the Objective, Council Policy is that prior to re-zoning to Special Rural and subdivision, Council will require—

- (a) Preparation of an overall structure plan of the precinct for adoption by Council.
- (b) Satisfactory submissions conforming to the requirements of this clause.
- (c) A schedule of permitted uses, development requirements and management provisions for adoption by Council and inclusion in Appendix 1 of the Scheme Text.
- (d) Where considered necessary to ensure the undertaking of specific works (such as the upgrading of roads and drainage), drafting of a suitable agreement between Council and landowners.

- (ii) Submissions for re-zoning to Special Rural will be required to consist of:

- (a) A base plan at a scale adequate to enable all necessary information to be clearly shown, with contours at intervals which, in the opinion of Council, satisfactorily depict the topography of the land, and which shows physical features including rock outcrops, vegetation by type and approximate density, wetlands and watercourses, significant landscape features and areas of actual or possible erosion, and improvements such as buildings orchards or cultivation and dams.
- (b) Appropriately detailed land capability analysis to the satisfaction of the Department of Agriculture in order to justify lot sizes, shapes and boundary locations, and suitability for effluent disposal, thus minimising possible land degradation, pollution potential, or loss of landscape values.
- (c) Plan of proposed subdivision which is clearly based on (a) and (b) and which shows the proposed design of lots, open space, provision for pedestrian or other movement systems, other facilities where appropriate, proposed

- means of protecting areas of significant landscape value or land degradation potential, staging of the subdivision where relevant, and if considered necessary by Council, building envelopes and areas proposed for tree preservation.
- (d) Where a zone adjoins or is in close proximity to State Forest, National Park or other Reserve, assessment of the fire hazard of the zone, the design criteria by which the subdivision will alleviate the risk of bushfire and allow for satisfactory control, and an appropriate fire management programme to the satisfaction of the Bush Fire Board, the Department of Conservation and Land Management, and the Council.
- (e) Where a zone is within a gazetted Water Reserve and subject to the need for a license to clear indigenous vegetation, a proposal for Special Rural Zoning must show clearly that development can conform to the relevant clearing regulations and that the need to do so will be made clear to purchasers of lots.
- (f) Information concerning the method whereby it is proposed that a potable water supply and a secondary water supply will be available to each lot.
- (g) Any other matter considered to be relevant to the proposed development or which may be specifically required by Council in a particular case.
- (iii) Provisions relating to Special Rural Zones.
- (a) If a plan of subdivision indicating building envelopes, tree preservation areas and other management requirements for a special rural area has not been produced when the land is rezoned, a suitable plan is to be prepared and submitted to Council and the State Planning Commission as part of any application for subdivision. Upon being satisfied that the plan fulfills planning objectives, Council will endorse the plan and use it to assist implementation of development and management provisions.
- (b) On land shown as Tree Preservation Area on a plan adopted by Council under the provisions of this clause, no indigenous tree or substantial vegetation may be felled or removed unless with the approval of Council, except—
- trees which are dead, diseased or dangerous,
- for the purpose of a firebreak required by a regulation or bylaw, or for bush fire fuel reduction procedures.
- (c) A building envelope for a lot shall be defined so as to attain the maximum flexibility for the location of buildings, but subject to—
- avoidance of significant landscape elements,
- avoidance of areas where ground or soil conditions may prejudice the structural integrity of buildings or result in potential for pollution, erosion, or flooding,
- the envelope containing an effluent disposal area in accordance with the provisions of the Scheme,
- conforming to the building setback requirements of the Scheme.
- (d) Building and development except for fences and firebreaks must be contained within the building envelope defined on a plan adopted by Council for the zone.
- (e) Council may at its discretion approve the relocation of a building envelope, or construction of a building outside the building envelope if it is satisfied that the amenity of the area, the privacy of adjoining properties and the landscape or environment of the area will not be detrimentally affected.
- (f) The area for the disposal of effluent shall be sited so as to be no closer to a stream line or water body than a distance of 30 metres, and where soil types are assessed as being of unsuitable absorption ability the minimum distance will be 100 metres. Generally, unsuitable soil types or landforms will be deep light sands, or subject to water logging or with a shallow water table.
- (g) Within a Special Rural Zone building setbacks from lot boundaries shall be a minimum of—
- (a) from a road boundary—20 metres
- (b) from other boundaries—15 metres.
- (h) Where land in a proposed Special Rural Zone is considered by Council to be deficient in tree cover and that such deficiency would upon development result in loss of landscape values, Council may require the planting and maintenance for a period of two years of additional trees. Additional planting may be required as a special provision at the time of rezoning or as condition of subdivision or Planning Approval.
- (i) In addition to a building permit Council Planning Approval is required for all development including a dwelling house and outbuildings.
- (j) Not more than one dwelling may be constructed or occupied on a lot within a Special Rural Zone.
- (k) In addition to any other general Scheme provision, land included in a Special Rural Zone will be subject to any provisions set out against in Appendix 1 of the Scheme.
- (l) Notwithstanding the provisions of the Scheme and what may be shown on a plan of subdivision adopted by Council, the State Planning Commission may, after consultation with the Council, approve a minor variation to a subdivision design but further breakdown of lots so created will be deemed to be contrary to the provisions of the Scheme.
- (m) Council may take any action which it considers necessary to reduce or eliminate any adverse effect on the environment caused solely or partly by the stocking of animals or by other development on a lot and any expense in this regard which may be incurred by Council, shall be recoverable from the registered owner of the land.

Applications

Applications for the award of a permit over the above area are required to be made in the approved manner, submitted in duplicate and should be accompanied by—

(a) Details of—

- (i) the applicant’s assessment of the petroleum potential of the area, including a geological and geophysical review and technical assessment of the area, and the concepts underlying the proposed exploration programme;

- (ii) the minimum work programme proposed for each of the five years, specifying the number of wells to be drilled, the line kilometres of seismic survey to be carried out and the estimated expenditure;

- (iii) wells referred to in the work programme should not include development wells (the AAPG well classification scheme will be the basis of identification).

(b) Particulars of—

- (i) the technical qualifications of the applicant and of its employees;
- (ii) the technical advice available to the applicant;
- (iii) the financial resources available to the applicant, including evidence of the applicant’s ability to fund the work programme proposed, and a copy of the latest annual report for each applicant company;
- (iv) where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice);
- (v) the percentage participating interest of each party to the application; and
- (vi) a single address for service of notices in respect of the application.

- (c) A fee of \$3 000, payable to the Department of Mines through an Australian bank or bank cheque, is required.

- (d) Such other information as the applicant wishes to be taken into account in consideration of the application.

Award of the permit will be based upon the adequacy of the work programme for the first two years of the permit term. The successful applicant will be required to fulfill the minimum commitment for each of those years without variation. This is known as the firm commitment phase, however the balance of the programme can be negotiated according to the result of prior exploration.

In addition, the permit will contain the condition that the permittee shall not assign or transfer the permit prior to the completion of the minimum work requirements for the first two years of the permit term.
