1. Rural Land

- (a) On cleared land—clear firebreaks not less than three (3) metres wide along the whole of the inside of the property within 100 metres of the external boundaries.
- (b) Around any buildings, group of buildings, hayshed or haystack—clear firebreaks not less than three (3) metres in width within twenty (20) metres of the perimeter of any buildings, group of buildings, hayshed or haystack.
- (c) Where the total area of property exceeds 2 000 hectares, additional firebreaks not less than three (3) metres in width must be provided in such positions as to divide the property into areas not exceeding 2 000 hectares, each area being completely surrounded by a firebreak.
- (d) Where the bush on land owned or occupied by you has been bulldozed, chained or prepared and any similar manner for clearing by burning (whether you intend to burn the bush or not), you shall forthwith clear a firebreak not less than twenty (20) metres wide immediately inside the external boundaries of land on which bulldozed, chained or otherwise prepared bush is situated.

2. Townsite Land

- (a) Where the land is 2 000 m² or less—
 - (i) A firebreak is NOT required but
 - (ii) Such land is required to be made safe from fire by the reduction of existing fire hazards. Compliance with such requirements need not require the removal of all flammable material.
- (b) Where the land is 2 000 m² or greater—

Clear firebreaks not less than three (3) metres wide along the whole of the external boundaries of the property and also immediately surrounding all buildings and haystacks situated on the land.

3. Bulk Fuel/Gas/Chemical Storage

4. Application to vary the above requirements

Council will consider approval on an annual basis for other than perimeter firebreaks where a more suitable fire protection can be provided or variation is desirable for conservation purposes.

Approval for such alternatives will only be considered if submitted in writing by September 30th with the endorsement of the Bush Fire Brigade for the area concerned and will be on an annual basis. Application for exemption from the standard firebreaks requirement will only be considered if Council is satisfied adequate measures have been taken to prevent the spread of fire into or out of the particular property.

When making such applications landowners will have to—

- install firebreaks around all buildings, fuel installations and haystacks at least 20 metres wide, if provided by burning cultivating or spraying or 60 metres wide, if provided by being closely grazed or mowed;
- submit in conjunction with their application plan detailing a fire protection strategy they are prepared to implement on their land and on any unmanaged Vacant Crown land that may adjoin the relevant property;
- provide a mobile engine powered pumping unit with not less than 450 litres of water to be available at all times and in the paddock during harvesting operations;
- comply with any other conditions imposed by the appropriate Bush Fire Brigade.

It should be noted that this provision accommodates the construction of strategic firebreaks encompassing a number of adjoining small semi-rural holdings.

5. Definitions for the purpose of Section 1-4 of this notice

Bush—includes trees, bushes, plants, stubble, scrub and undergrowth of all kinds whatsoever alive or dead and whether standing or not standing and also a part of a tree, bush plant or undergrowth, and whether severed there from or not so severed excluding plantations.

Haystack—means any collection of hay including five (5) round fodder bales or more stacked or placed together.

Flammable Material—includes bush, timber, boxes, cartons, paper and like flammable materials, rubbish and also any combustible matter, but does not include green standing trees or growing bushes and plants in gardens or lawns.

Safe from fire—means that the vegetation shall be controlled in such a way that it cannot carry or sustain the passage of fire. On uncleared land this means the use of either a firebreak, a fuel reduction cool burn or both. The establishment of permanent green grass and tree areas is allowable provided that the grass has a summer growth phase, e.g. couch or kikuyu. The use of cereal grasses can cause high risk fire areas. Trees should be evergreens of the fire resistant variety with no foliage within 1.2 metres of the ground in summer. Paperbark, tamariskes, wattles and pines are fire prone and should not be used in fuel reduced zones.

6. Private Hardwood/Softwood Plantations

Minimum Firebreak Standards—

The following firebreak standards apply for plantations—

- Firebreaks constructed fifteen (15) metres wide (as per definition below) on the boundaries of plantation or on such other location as may be agreed between Council and the plantation owner.
- Firebreaks six (6) metres wide should surround compartments of approximately thirty (30) hectares.
- All firebreaks must be maintained in trafficable condition and trees on both sides of breaks progressively pruned to a minimum height of four (4) metres to allow unrestricted access of maintenance and fire fighting equipment and so as to maintain an effective width or fire break.
- Where power lines pass through plantation areas firebreaks as per S.E.C. specifications must be provided.

Equipment standards—

The Bush Fires Board recommends the following equipment for protection of plantation areas—

Plantation Area (HA)	Light Duty Unit Min. 900 Litres Capacity	Heavy Duty Unit Min. 2700 Litres Capacity	Medium Duty Unit Min. 1900 Litres Capacity
Up to 100	2		
101 to 500	1	1	
501 to 1000		1	1
1001 to 2000		2	1
2001 plus		2	1 for every 1500ha or part thereof minimum of 2

NB: One heavy unit is the equivalent of two medium tanker units.

7. Definitions for the purpose of section 6 above

Plantation—Any area of planted Pines or Eucalyptus species exceeding three (3) hectares except areas planted as salt reclamation projects and areas planted as windbreaks not exceeding fifteen (15) metres in depth.

Firebreaks—15 metres Boundary Break—The first row of trees must be at least fifteen (15) metres from the outside edge of the break. The firebreak must be maintained clear of all flammable material over the outer three (3) metres and then in a low fuel condition for the next twelve (12) metres and have a ten (10) metre vertical clearance, i.e. with no overhanging branches.

8. Penalty

Persons who fail to comply with the requirements of this order may be issued with an infringement (penalty \$80) or prosecuted with an increased penalty of up to \$1 000 and additionally, Council may carry out the required work at the cost to the owner or occupier.

By Order of the Council.

R. T. SCOBLE, Shire Clerk.
