(1) For the purposes of clause 17A, where a determination of the weight of a quantity of abalone taken under the authority of a licence has been made in accordance with clause 19 and recorded in accordance with clause 20, that determination shall be used for the purpose of calculating the total amount of abalone that has been taken under the authority of the relevant licence, provided that where any abalone has been delivered to an approved fish processor and a determination of the weight of abalone has been made by that person and recorded in the relevant consignment note and in accordance with the fish processor's licence and the Act, then the weight determined and recorded by that person may be used in the calculation.
- (2) At any time when a determination of the weight of a quantity of abalone taken under the authority of a licence has been made in accordance with clause 19 and the abalone has been consigned to an approved fish processor but not weighed by the holder of the fish processor's licence then, subject to subsection (3), a conservative estimate based on reasonable grounds of the weight that the abalone will have when it is weighed by the holder of the fish processor's licence may be used in the calculation.
- (3) Nothing in this clause authorises a nominated diver to take a quantity of abalone, the weight of which is to be determined in accordance with subclause (1), that is in excess of the sum of the unit values of the units under the relevant licence that relate to the species of abalone and the Area from which they were taken.”.
