PETROLEUM (SUBMERGED LANDS) ACT 1967

NOTICE OF INVITATION FOR APPLICATIONS FOR EXPLORATION PERMITS

(2003 Offshore Acreage Release—West Australian Adjacent Area)

I, William Lee Tinapple, the delegate of the Designated Authority in respect of the adjacent area of Western Australia, for and on behalf of the Commonwealth-Western Australia Offshore Petroleum Joint Authority, acting pursuant to Section 20(1) of the Petroleum (Submerged Lands) Act 1967, hereby invite applications for the grant of exploration permits in respect of the following Blocks within the areas as described in the following schedule.

The Commonwealth/State/Territory jurisdictional boundary in coastal waters is determined by the Australian Maritime Boundaries Information System Dataset of 2000, released in January 2001 by the Australian Surveying and Land Information Group (now Geoscience Australia National Mapping Division).

Section 5AAA of the Petroleum (Submerged Lands) Act 1967 provides that, where a change to the baseline of Australia's territorial sea would impact on the boundary of an existing petroleum title (in Commonwealth or State or Territory waters), there is in fact no such impact. The Commonwealth, State or Territory Act (as the case may be) under which the title has been granted, continues to apply to the title and the whole title area for as long as the title remains in force. Therefore, this Instrument does not apply to any such area that is already under title.

Applications for areas **W03-7 to W03-15** will be received up until 4:00 pm on Thursday, **25 September 2003**.

Applications for areas **W03-1 to W03-6** will be received up until 4:00 pm on Thursday **25 March 2004**.

SPECIAL CONDITIONS**Area W03-15**

No exploration or development activities will be permitted within the Lancelin Defence Training Area, which overlaps part of area W03-15 without prior approval from the Department of Defence. Successful applicants will be required to consult closely with the Royal Australian Navy if proposing to enter into the Lancelin Defence Training Area.

APPLICATIONS FOR AREAS –W03-1 TO W03-15

Applications for the award of a permit over areas W03-1 to W03-15 are required to be made in the approved manner, submitted in duplicate and should be accompanied by—

1.1 Details of—**1.1.1 Technical Assessment**

The applicant's technical assessment of the petroleum potential of the area, including the concepts underlying its proposed exploration work program, with sufficient detail to support that program

1.1.2 Minimum Guaranteed Work Program

The applicant's minimum guaranteed proposal (including indicative minimum expenditure) for exploration wells to be drilled, 3D and 2D seismic and other surveying activities, data evaluation and other work, for each year of the first three years of the permit term. This proposal, to be known as the minimum guaranteed work program, should comprise work expected to involve a substantial exploration component—normally, appraisal work should not be included

1.1.3 Secondary Work program

The applicant's proposal (including indicative minimum expenditure) for exploration wells to be drilled, 3D and 2D seismic and other surveying activities, data evaluation and other work, for each of the three remaining years of the permit term. This proposal, to be known as the secondary work program, should comprise work expected to involve a substantial exploration component—normally, appraisal work should not be included.

NOTE: Applicants should note it is mandatory that the minimum work program proposed in each year of the exploration permit is stated precisely to avoid any ambiguity. Proposals for work programs that cannot be guaranteed to be undertaken within the first 3 years of the permit must not be included.

1.2 Particulars of the applicant—

1.2.1 the technical qualifications of the applicant and of its key employees

1.2.2 the technical advice available to the applicant

1.2.3 the financial resources available to the applicant, including evidence of the applicant's ability to fund the work program proposed, a statement of other exploration commitments over the next 6 years, and a copy of the latest annual and quarterly reports for each applicant company

1.2.4 where relevant, the viability of the consortium lodging the application, including evidence that a satisfactory settlement has been, or can be, reached on the Joint Operating Agreement (a copy of a signed Heads of Agreement dealing will generally suffice), and

1.2.5 the percentage participating interest of each party to the application.

1.3 Other Information

Such other information as the applicant wishes to be taken into account in consideration of the application. Where an applicant has previously had an exploration permit cancelled such information might include why the applicant believes the prior failure is irrelevant to the current application.

1.4 Fee

Each application must be accompanied by a fee of \$A3,900, payable to the Commonwealth of Australia through an Australian bank or bank cheque.

An information package on the release areas detailing the work program bidding system outlined above and including the criteria for assessment of applications and the conditions to apply following the award of a permit, is available on the Department of Industry, Tourism and Resources Website at www.industry.gov.au/petexp, or on CD-ROM. Copies of the CD-ROM can be obtained through the Department of Industry, Tourism and Resources by e-mailing petroleum.exploration@industry.gov.au.

Obtaining and observing the release package is essential to making an informed application for any of the areas.

The Government will also publish on-line data about Australia's petroleum exploration opportunities. This spatial data gives key hydrocarbon well information (about hydrocarbon shows, biostratigraphic age, porosity and depositional environment) and will be released on the Geoscience Australia internet site at www.ga.gov.au free of charge.

It should be noted that any income derived in the future from the recovery of petroleum from these areas will be subject to the Commonwealth Government's Resources Rent Tax.

Release Date: Tuesday 25 March 2003

Closing Date: Thursday 4:00pm 18 September 2003

AREAS AVAILABLE

Applications are invited for the grant of exploration permits over the following discrete areas **within Western Australia's coastal waters and onshore Perth Basin** as identified on the attached plans.

Applications will be received up until 4.00 PM on Thursday, 18 September 2003.

AREAS L03-1 with T03-2

These areas comprise blocks described below which straddle the baseline dividing the Petroleum Act 1967 from the Petroleum (Submerged Lands) Act 1982.

Despite that two statutes are involved, only a single combined application (proposing a unified work program) is necessary. However the application fee in this instance is \$7800.00.

While two permits will be issued to the successful applicant, those permits will, as far as the legislation allows be dealt with as one.

NOTE

The Commonwealth/State/Territory jurisdictional boundary in coastal waters is determined by the Australian Maritime Boundaries Information System Dataset of 2000, released in January 2001 by the Australian Surveying and Land Information Group (now Geoscience Australia National Mapping Division).

However this is modified by section 5AAA of the Petroleum (Submerged Lands) Act 1967, which provides that, where a change to the baseline of Australia's territorial sea would impact on the boundary of an existing petroleum title (in Commonwealth or State or Territory waters), there is in fact no such impact. The Commonwealth, State or Territory Act (as the case may be) under which the title has been granted, continues to apply to the title and the whole title area for as long as the title remains in force. Therefore, this Instrument does not apply to any such area that is already under title.

APPLICATION INFORMATIONWork Program

Central to any application made is the program of work proposed for each of the years of the six year term. Applications are to be made in accordance with Section 31 of the Petroleum Act 1967 and Section 21 of the Petroleum (Submerged Lands) Act 1982 as appropriate. Consideration of an application for the grant of a Permit shall take into account work programs relative to the whole of the area applied for, the adequacy of the work program and the applicant's technical and financial ability to undertake the work. Permits are awarded on the understanding that the first two years work commitment will be fulfilled without variation.

Where there is more than one applicant to the application, the percentage participating interests of each party to the application is to be supplied including evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (a copy of a Heads of Agreement dealing will generally suffice).

Land Access

Applicants should make themselves aware of the existence of any areas, which have the potential to restrict exploration activities eg. National Parks, Nature Reserves, Marine Parks, World Heritage Areas and Ramsar wetlands.

Insofar as Reserved Land is concerned, entry for exploration purposes is subject to approval by the Minister. In this regard, it should be noted that Government policy, at least, is such that petroleum extraction from within National Parks and Nature Reserves should not be presumed.

Fishing Activities

In respect to offshore areas, impacts on fishing activities should also be considered.

Native Title

Any applications over the above onshore areas may be subject to the provisions of the Commonwealth Native Title Act 1993 and applicants should be prepared to negotiate with Native Title parties pursuant to the right to negotiate provisions of the NTA. It should, however, be noted that the right to negotiate does not apply offshore.

Applicants should also be aware that all the areas available for application are subject (at least in part) to Native Title claims. Plans showing these claim boundaries are available from the Department of Industry and Resources.

Release Package

An information package on the release areas detailing the criteria for assessment of applications and the conditions to apply following the award of a permit, and including a plan of the release areas and an application proforma, is available on CD-ROM. Copies of the CD-ROM can be obtained from the Petroleum Division, Department of Industry and Resources by contacting the Senior Titles Officer (Titles) on (08) 9222 3186.

DRAFT LOCAL AREA MANAGEMENT PLAN FOR THE LOWER GASCOYNE RIVER

Notification that a Draft Plan has been prepared and call for Public Comment

The Water and Rivers Commission and the Carnarvon Water Allocation Advisory Committee invites you to comment on a Draft Local Area Management Plan for the Lower Gascoyne River under section 26GZA of the *Rights in Water and Irrigation Act 1914*.

You are also invited to attend the public release of the Plan on 27th March 2003 at Santa Rosa Packing Shed at 2pm. Copies of the plan will be available on the day. (Please RSVP to Leah Jones on 9941 4921 if you wish to attend the public release.)

The Water and Rivers Commission has prepared a Draft Local Area Management Plan in conjunction with the Carnarvon Water Allocation Advisory Committee. This Plan was developed in response to the direction of the Lower Gascoyne Management Strategy. The Management Strategy identified a need to develop appropriate water allocation and management policies for the Lower Gascoyne Region through the production of a management plan that would include tradeable water entitlements.

This document is the first comprehensive Management Plan developed for the alluvial groundwater resources associated with the Lower Gascoyne River. It is intended to be both an informative and a technical publication. The aim of the Plan is to ensure that the groundwater resources of the Lower Gascoyne River are allocated equitably and used sustainably in the long term for the benefit of the Carnarvon community, taking into consideration the inherent social, economic and environmental impacts of such usage.

Copies of the Draft Plan can be obtained from the Commission's Website at <http://www.wrc.wa.gov.au/using/policy.htm>, from the Commission's Information Centre on telephone 9278 0464 fax 9278 0301 or e-mail to library@wrc.wa.gov.au, and from the Commission's Carnarvon office.

For more detailed information contact Ms Claire Thorstensen or Mr Darryl Abbott on telephone (08) 9941 4921 or facsimile (08) 9941 4931.

Submissions on the draft plan must be written, can be made by any body or person, and must be received at either of the addresses specified below by the closing date for submissions.

Please send your submission to Ms Claire Thorstensen, Water and Rivers Commission Carnarvon District Office,
