2. Any subdivision application over the land shall be required to identify building envelopes on each lot, designed to ensure minimal disturbance to existing natural vegetation and consistency with the Residential Planning Codes requirement for the R5 coding. 5. No indigenous trees or substantial vegetation shall be felled or removed except where:

- trees are dead, diseased or dangerous
- the establishment of a firebreak is required under a regulation or by-law;
- access to the building site is required and approved;

In some instances alternative treatment units with a nutrient retention capacity may be required. Evidence of soil suitability for effluent disposal is to be undertaken to the satisfaction and specification of the Health Department of Western Australia as part of any subdivision application.

The minimum vertical clearance between the bottom of any leach drain and the highest known water table shall be 2.0 metres.

The minimum vertical clearance between the bottom of any alternative effluent treatment system and amended soils and the highest known water table shall be 0.5 metres.

8. Boundary fencing is to consist of a minimum of post and 5 strand, ringlock, hinge joint, wire or similar product, 1 metre to 3 metres high. Asbestos, metal sheeting or wooden pickets or similar solid fencing will not be permitted.

12. Council may request, at the subdivision stage, that the subdivider provide prospective purchasers with the relevant provisions of the Scheme.

13. Council will request, at the subdivision stage, that the subdivider undertake to prepare a declared rare flora survey at the subdivider's cost.
