#### 1. POLICY STATEMENT

This document stipulates the requirements set by the Commissioner of Main Roads for towed agricultural implements crossings under the *Road Traffic (Towed Agricultural Implements) Regulations 1995*.

It should be remembered that the onus remains with the operator of an agricultural combination to take all reasonable precautions when crossing roads. Also, nothing in this document prevents the application of, or absolves the operator from compliance with, any applicable road traffic law.

The *Road Traffic (Towed Agricultural Implements) Regulations 1995* limit the crossing of roads under these requirements to “gate to gate” operation only—i.e. where the centerlines of the two opposing gates are not more than 20 metres apart.

#### 2. APPLICATION AND APPROVAL REQUIREMENTS

##### 2.1 Definitions

Unless otherwise indicated in the text of this document—

**Agricultural Combination** has the same meaning as defined in *Road Traffic (Vehicle Standards) Regulations 2002*.

**Agricultural Implement** has the same meaning as defined in *Road Traffic (Vehicle Standards) Regulations 2002*.

<b>AS</b>	means Australian Standards.
<b>Local road</b>	means a road under the control of a Local Government.
<b>Main Roads</b>	means Main Roads Western Australia.
<b>RTC 2000</b>	means The Road Traffic Code 2000.
<b>State road</b>	means a road under the control of Main Roads Western Australia
<b>Traffic signs</b>	mean a sign as recognised in the Australian Standards or Main Roads Signs Index.

## 2.2 Background

The purpose of this document is to specify the traffic management requirements necessary for towed agricultural implements crossings.

Under the provisions of the *Road Traffic (Towed Agricultural Implements) Regulations 1995* before a towed agricultural implements crossing can be used on a highway or main road approval is required from Main Roads. However, no such approval is required for roads under the control of a Local Government.

Applications must be made to Main Roads in writing by the owner or leasee of the property from which the crossing is to be made, and shall be taken to apply to all agricultural combinations using that towed agricultural implements crossing.

Approval shall only be granted by Main Roads if it is demonstrated that the crossing location meets the requirements of this document, including the minimum approach sight distance in Section 3.

There are no fees associated with an application or approval for a towed agricultural implements crossing.

Approval will not be granted by Main Roads for a towed agricultural implements crossing at locations that are—

- on declared Control of Access Highways under the *Main Roads Act 1930*;
- on dual carriageways;
- located within built-up areas;
- on roads that have an average annual daily traffic volume of 500 vehicles per day or greater;
- at locations where the crossing cannot be seen from more than 300 metres away by an approaching motorist; or,
- closer than 1 km to another crossing point servicing the same landowner.

The *Road Traffic (Towed Agricultural Implements) Regulations 1995* require the person responsible for an agricultural combination to install temporary road warning signs and to display orange flashing warning lights in accordance with the requirements of this document.

## 2.3 Application

### 2.3.1 General

The Road Traffic (Towed Agricultural Implements) Regulations 1995 requires the person responsible for an agricultural combination to—

- take all reasonable precautions to warn approaching traffic of the presence of the agricultural combination; and
- arrange the moving of the agricultural combination at such times, and in such a manner, as is likely to prevent unreasonable delay to the passage of other traffic.

### 2.3.2 Reasonable Warning

Reasonable precautions to warn approaching traffic with warning signs and devices is provided in **Section 3—Technical Guidelines**.

### 2.3.3 Unreasonable Delay

The following circumstances are considered to be unreasonable delay—

- the duration of road closure is greater than 5 minutes; and,
- for multiple crossing movements, all queued vehicles are not cleared before the commencement of the next crossing movement.

### 2.3.4 Costs

The person responsible for an agricultural combination is responsible for the supply, installation and removal of the road traffic signs and devices associated with the road crossing.

## 3. TECHNICAL GUIDELINES

### 3.1 General

The removal or covering of signs when not in use is mandatory. Signs that are displayed while not in use may bring all signing into disrepute and may result in motorists disregarding important warnings. Signs should be covered so that they are not visible in all light conditions.

**3.2 Towed Agricultural Implements Crossings**

A crossing must be located such that approaching motorists can see the crossing point from a minimum of 300 metres away. The required signing shall be as per **Figure 1**.

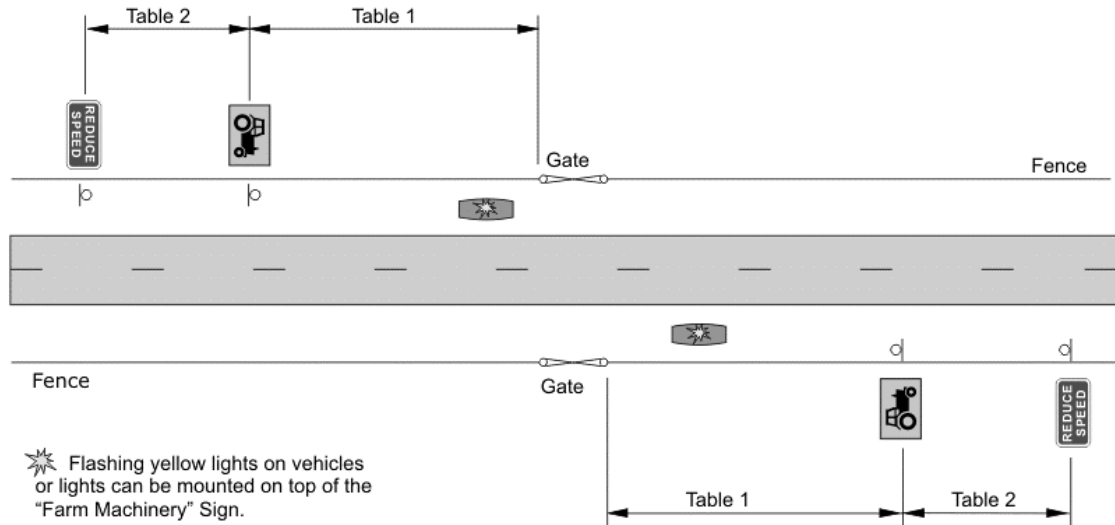

FIGURE 1—Typical Crossing Site

The crossing should not be used when sun glare will interfere with an approaching motorist’s view of the traffic signs or the agricultural combination crossing the road. The REDUCE SPEED and the FARM MACHINERY signs should be visible at the same time to approaching motorists.

Where a crossing point is adjacent to an intersection, FARM MACHINERY and ON SIDE ROAD signs should be used on the side roads, to alert motorists entering the road that there is an agricultural combination crossing the road. The location of the FARM MACHINERY sign should be based on a distance from the crossing as shown in **Table 1**.

**3.2.1 Use during Periods of Poor Visibility**

Towed agricultural implements crossings must not be used during periods of poor visibility that do not allow the crossing point to be visible to an approaching motorist from a distance of at least 300 metres.

Table 1—Placement of Farm Machinery Signs

POSTED SPEED LIMIT km/h	MINIMUM SPACING DISTANCE METRES
60	120
70	140
80	160
90	180
100	200
110 / State Limit	220

Table 2—Placement of Reduce Speed Signs

Posted Speed Limit km/h	Minimum Spacing Distance
60	30
70	35
80	40
90	45
100	50
110 / State Limit	55

**3.3 Signs**

Signs should be erected in accordance with these guidelines and Main Roads Standard Drawing 9548-090. All signs shall be rigid. The class of retro-reflective material used must be Class 1. Signing should be displayed prior to and during the movement. Signs and flashing orange warning lights should be positioned and erected so that—

- they are properly displayed and firmly secured to prevent them being blown over by the wind or passing traffic; and
- signs may be placed on the roadside or road shoulder and should be at least 1 metre clear of the road lanes.

The signs and any flashing orange lights should be displayed or installed immediately prior to the agricultural combination being driven on to the road reserve and folded over or removed as soon as the agricultural combination is no longer in the road reserve, as per **Section 3.1**.

Signs are a specified treatment in this guideline, and the required signs are listed in **Table 3**.

**TABLE 3—List of typical signs for Agricultural Combination Crossings**

<p><b>“FARM MACHINERY”</b> Main Roads’ Designation MR-TAW32 Sign Size: 900 mm x 900 mm</p>	
<p><b>“REDUCE SPEED”</b> AS 1742.2 Designation G9-9A Sign Size: 1500 mm x 750 mm</p>	
<p><b>“ON SIDE ROAD”</b> AS 1742.2 Designation W8-3B Sign Size: 750 mm x 500 mm</p>	

### 3.4 Flashing Orange Warning Light

The flashing orange warning light shall comply with the equipment described in the *Road Traffic (Vehicle Standards) Regulations 2002*. Vehicle indicator lights do not constitute a flashing orange warning light.

### 3.5 Compliance

The conditions of the following publications have been described in this guideline—

- Main Roads’ Signs Index and relevant guidelines;
- *Occupational Safety and Health Regulations 1996 Act*; and
- Relevant Australian Standards.

Therefore, this guideline provides sufficient guidance for a person operating a towed agricultural implements crossing and complies with the necessary standards. If required, further information can be obtained by contacting Main Roads’ Heavy Vehicle Operations on (08) 9311 8450.
