### Complete Specifications.

Patent Office, Perth,  
27th May, 1904.

NOTICE is hereby given that the undermentioned Applications for the Grant of Letters Patent, and the complete Specifications annexed thereto, have been accepted, and are now open to public inspection at this Office.

Any person or persons intending to oppose such applications must leave particulars, in writing, in duplicate (on Form D), of his or their objections thereto, within two calendar months from the date of this Gazette. A fee of Ten shillings (10s.) is payable with such notice.

Application No. 4518.—JOSEPH GEORGE NASH, of Hindmarsh Square, Adelaide, in the State of South Australia, Engineer, "*Improvements in Totalisators.*"—Dated 21st July, 1903.

#### Claims:—

1. In totalisators the combination with a press of a horizontal rocking shaft having cranked arms one of which is connected to the press and the other to the recording apparatus substantially as described and for the purposes indicated.
2. In totalisators the combination with a series of presses of a horizontal swinging shaft arranged across the front of the said series of presses, said shaft being connected to a recording apparatus for recording the total number of operations of such series of presses substantially as described and for the purposes indicated.
3. In totalisators the combination with a press having a punch operating with a recess in the bed plate of the recess of a receptacle for collecting the pieces of ticket punched out substantially as described and for the purposes indicated.
4. In totalisators the combination of a press (such as B) a horizontal rocking shaft (such as D) cranked arms (such as D<sup>1</sup> and D<sup>2</sup>) one connecting to the press and the other to the recording apparatus, a horizontal swinging shaft (such as E) arranged across the front of the series of presses and connected to a recording apparatus, a punch (such as J) and a tray or receptacle (such as M) substantially as described and for the purposes indicated.

Specification, 5s. Drawings on application.

Application No. 4583.—FRANK COTTON, of Hornsby, in the State of New South Wales, gentleman, "*Improvements in gas furnaces.*"—Dated 1st September, 1903.

#### Claims:—

1. A gas furnace with an inner and an outer wall separated by a body of sand or other suitable packing, so constructed that its interior chamber is circular in form and having its outlet and intake adjoining and on the same plane.

2. In a gas furnace the combination of a concaved floor, a domed roof, a circular inner wall and an outer wall separated therefrom by a mass of suitable packing, with a chimney having the flue thereto adjoining and on the same plane as the gas intake.

Specifications, 5s. Drawings on application.

R. G. FERGUSON,

Registrar of Patents.

### Applications Abandoned.

\*No. 4512.—JOHN SIMPSON, of 71 George Street, Sydney, in the State of New South Wales, Works Manager, "*An improved Pipe Union.*"—Dated 15th July, 1903.

\*No. 4515.—GUSTAV KOCHENDORFFER, of Little Florence Street, Melbourne, in the State of Victoria, Commonwealth of Australia, Engineer, "*An improved machine for cutting off the overplus tobacco from cigarette ends.*"—Dated 21st July, 1903.

\*No. 4517.—CHARLES HOWE BISSAKER, of Cootamundra, in the State of New South Wales, Australia, Licensed Gas-fitter, "*Improved Acetylene Gas Generator.*"—Dated 21st July, 1903.

\*No. 4520.—JOHN THOMAS INNES, of Sutton Town, in the State of South Australia, Engineer, "*Improvements in and connected with Steam Generators.*"—Dated 21st July, 1903.

\* Denotes "Accompanied by Provisional Specification."

R. G. FERGUSON,

Registrar of Patents.
