~~This certificate is not to be regarded as a guarantee of cure, for the reason that it is frequently impossible to definitely detect evidence of sexual disease. By it, the medical attendant implies that as a result of his observations he can no longer detect signs or symptoms of sexual disease.~~

~~No one should regard himself cured of syphilis unless he has been under active treatment for at least 2 years.~~

~~In the case of gonorrhoea, the cessation of all visible discharge does not of itself definitely indicate that the patient is non-infectious.~~
