Division 5 — Production and royalties

85. Interpretation of Division

- (1) In this Division, unless the contrary intention appears —
- “**allowable deductions**”, in relation to a mineral, means —
- (a) the amount, in Australian currency, of any reasonable costs incurred in transporting the mineral, in the form in which it is first sold, where those costs —
 - (i) are incurred after the shipment date by the person liable to pay the royalty for the mineral; and

- (ii) relate to transport of the mineral by a person other than the person liable to pay the royalty for the mineral;

and

- (b) the price, in Australian currency, paid or to be paid by the person liable to pay the royalty for the mineral, for packaging materials used in transporting the mineral, in the form in which it is first sold;

“concentrate” means the product of a process of extraction of metal or a metallic mineral from mineral ore that results in substantial enrichment of the metal or metallic mineral concerned;

“gross invoice value”, in relation to a mineral, means the amount, in Australian currency, obtained by multiplying the quantity of the mineral, in the form in which it is first sold, for which payment is to be made (as set out in invoices relating to the sale) by the price for the mineral in that form (as set out in those invoices);

“nickel by-product” means a by-product or co-product of nickel mining or processing;

“purchaser”, in relation to a mineral, means the person to whom the mineral is first sold;

“quarter” means any one of the 3 monthly periods of any year ending on 31 March, 30 June, 30 September or 31 December;

“related corporation”, in relation to a body corporate (the **“first body corporate”**), means a body corporate that, under section 50 of the Corporations Act, is related to the first body corporate;

“royalty value”, in relation to a mineral other than gold, means the gross invoice value of the mineral less any allowable deductions for the mineral;

“shipment date”, in relation to a mineral, means —

- (a) if the mineral is exported from Australia, the day on which the aircraft or ship transporting the mineral first leaves port in this State; or
- (b) if the mineral is not exported from Australia, the day on which the mineral is first loaded on a vehicle for transport to the purchaser;

“**sold**” includes transferred, shipped or otherwise disposed of, and “**sale**” has a corresponding meaning.

- (2) In this Division a reference to a mineral includes a reference to a material containing that mineral.

[Regulation 85 inserted in Gazette 16 Jun 2000 p. 2953; amended in Gazette 28 Sep 2001 p. 5357-8; 14 Dec 2001 p. 6403-4; 23 Jul 2002 p. 3425; 13 Dec 2002 p. 5803; 17 Jan 2003 p. 113.]

85AA. Effect of GST etc. on royalties

- (1) For the purposes of this Division, a reference to a royalty value, or a price, of a mineral is to be treated as a reference to that value or price, reduced by an amount equal to the net GST (if any) payable on the supply to which the value or price relates.
- (2) For the purposes of this Division, a reference to the value of a mineral at a particular point in its production (other than its supply), or in a particular form, is to be treated as a reference to that value, reduced by an amount equal to the amount of GST that would be payable if the mineral were supplied at that point, or in that form.
- (3) If, when determining a value or price of a mineral (for the purposes of this Division), an amount (an “**expense**”) that relates to obtaining that mineral may be deducted from another amount, the amount that may be deducted is reduced by an amount equal to the net input tax credit (if any) that arises in relation to the expense.

Mining Regulations 1981

Part V General regulations

Division 5 Production and royalties

r. 85AB

- (4) The **“net input tax credit”** that arises in relation to an expense is —
- (a) the input tax credit that arises in relation to that expense; plus
 - (b) the sum of any decreasing adjustments in relation to that expense; minus
 - (c) the sum of any increasing adjustments in relation to that expense.
- (5) In this regulation, **“decreasing adjustment”**, **“GST”**, **“increasing adjustment”**, **“input tax credit”**, **“net GST”** and **“supply”** have the respective meanings given by section 195-1 of the *A New Tax System (Goods and Services Tax) Act 1999* of the Commonwealth.

- (1) In this regulation —
- “RBA rate”** means the daily representative rate used by the Reserve Bank of Australia.
- (2) Where, for the purposes of determining the amount of royalty payable for a mineral, it is necessary to convert an amount or a price (other than a price to which subregulation (3) applies) to Australian currency, the conversion is to be calculated using the average of the RBA rates for the quarter in which the shipment date for the mineral occurred.
- (3) Where, for the purposes of the definition of **“gold spot price”** in regulation 86AA(11), it is necessary to convert a price to Australian currency, the conversion is to be calculated —
- (a) using the RBA rate for the day on which the price was fixed; or
 - (b) if there is no RBA rate for that day, using the last RBA rate before that day.

86AA. Rates of royalty in respect of gold

- (1) When gold metal is produced from gold bearing material that was produced or obtained from a mining tenement, royalties shall be paid by the holder of, or applicant, for the mining tenement.

- (2) No royalty is payable in respect of gold metal produced before the commencement of the period referred to in subregulation (3).
- (3) The rate of royalty payable for gold metal produced during the period commencing on 1 July 1998 and ending on 30 June 2000 is 1.25% of the royalty value of the gold metal produced.
- (4) Subject to subregulation (5), the rate of royalty payable for gold metal produced after 30 June 2000 is 2.5% of the royalty value of the gold metal produced.
- (5) If, during the period commencing on 1 July 2000 and ending on 30 June 2005, the average gold spot price for a quarter is less than \$450 per ounce in Australian currency, the rate of royalty payable for gold metal produced during that quarter is 1.25% of the royalty value of the gold metal produced.
- (6) Despite anything in this regulation, no royalty is payable in respect of the first 2 500 ounces of gold metal produced during a financial year from gold bearing material produced or obtained from the same gold royalty project.
- (7) The royalty value of gold metal produced shall be calculated for each month in the relevant quarter by multiplying the total gold metal produced during that month by the average of the gold spot prices for that month.
- (8) If gold bearing material is delivered to a refinery within 3 months after it, or gold bearing material from which it was produced, was taken from the ground —
 - (a) gold metal is to be regarded as being produced from the gold bearing material at the time of delivery to the refinery; and
 - (b) the amount of gold metal that is to be regarded as being produced from gold bearing material delivered within a particular period is to be —
 - (i) the amount actually produced as ascertained by the Director General of Mines from the deliverer

Mining Regulations 1981

Part V General regulations

Division 5 Production and royalties

r. 86AA

after that amount has been verified by the refiner;
or

- (ii) the amount determined by the Director General of Mines, after consultation with the deliverer, to be a reasonable estimate of the gold metal content.

(9) If gold bearing material is produced or obtained in a form that is acceptable for delivery to a refinery but subregulation (8) does not apply —

- (a) gold metal is to be regarded as being produced from the gold bearing material at the time that a determination is made under paragraph (b) as to the amount of gold metal that the gold bearing material contained; and
- (b) the amount of gold metal that is to be regarded as being produced from the gold bearing material is to be the amount determined by the Director General of Mines, after consultation with the person liable to pay the royalty, to be a reasonable estimate of the gold metal content.

(10) If —

- (a) after an amount has been determined under subregulation (8)(b)(ii) to be a reasonable estimate of the gold metal content of gold bearing material delivered to a refinery, the Director General of Mines is satisfied by information given by the deliverer that the amount of gold metal actually produced from that gold bearing material differs from the estimated amount; or
- (b) after an amount has been determined under subregulation (9)(b) to be a reasonable estimate of the gold metal content of gold bearing material, the Director General of Mines is satisfied by information given by the deliverer that the gold bearing material was delivered to a refinery and the amount of gold metal

actually produced from that gold bearing material differs
from the estimated amount,

any necessary adjustment is to be made and may be taken into
account in the next royalty payment made after that information
is given to the Director General of Mines.

(11) In this regulation —

“deliverer” means the person who produces the gold bearing
material that is delivered to a refinery;

“gold bearing material” is material of any kind containing
gold;

“gold metal” means gold that is at least 99.5% pure;

“gold royalty project” means —

(a) subject to subregulation (12), the mining tenement or,
if there is more than one, all mining tenements from
which anyone produces or obtains gold bearing
material that is treated or processed at a common —

(i) treatment facility; or

(ii) combination of treatment facilities;

or

(b) such other arrangement for producing, obtaining or
treating of gold bearing material as is designated by
the Minister under subregulation (13)(a);

“gold spot price” means —

(a) the price fixed on the London Bullion Market for
gold metal and known as the “London PM Fix”, as
converted to Australian currency; or

(b) such other price as is determined by the Minister
under subregulation (13)(b);

“mining tenement” includes land the subject of an application
for a mining tenement;

“refiner” means the operator of a refinery;

“refinery” means a place where gold metal is produced;

“treatment facility” means any plant at which gold bearing material is treated or processed, but does not include a refinery.

(12) The Director General of Mines may approve in writing of mining tenements being treated as separate gold royalty projects, as specified in the approval, if satisfied that they are not all held by the same person or by persons between whom the Director General of Mines considers there to be a connection such that the mining tenements can fairly be treated as forming part of the same gold royalty project.

(13) The Minister may, by notice published in the *Gazette* —

(a) designate an arrangement for producing, obtaining or treating gold bearing material for the purposes of paragraph (b) of the definition of “gold royalty project” in subregulation (11), or amend or revoke any such designation; or

(b) determine a price for the purposes of paragraph (b) of the definition of “gold spot price” in subregulation (11), or amend or revoke any such determination.

86AB. Optional royalty rate for cobalt sold as a nickel by-product

(1) In this regulation —

“optional royalty period” means the period beginning on 1 July 2000 and ending on 30 June 2005;

“optional royalty rate” means the rate of royalty calculated in accordance with the formula set out in paragraph (c)(ii) of the item relating to cobalt in column 3 of the Table to regulation 86.

- (2) A person liable to pay royalties for cobalt during the optional royalty period may elect, in writing, to pay the optional royalty rate in respect of all cobalt sold as a nickel by-product by that person.
- (3) An election under subregulation (2) is to be made —
 - (a) in the manner and form approved by the Director General of Mines; and
 - (b) before the end of the first quarter in respect of which the optional royalty rate is to apply.
- (4) An election under subregulation (2) cannot be revoked.
- (5) Despite anything in regulation 86, if a person makes an election under subregulation (2), no royalty is payable in respect of the first 300 tonnes of cobalt sold as a nickel by-product by that person during —
 - (a) the period beginning on the first day of the first quarter in respect of which the optional royalty rate applies and ending on the next 30 June; or
 - (b) any subsequent financial year in the optional royalty period.
- (6) If an election is made under subregulation (2) by 2 or more persons who are —
 - (a) the holders of, or applicants for, the same mining tenement; or

- (3) When ilmenite feedstock is produced from ilmenite that was obtained from a mining tenement, royalties shall be paid by the holder of, or applicant for, the mining tenement.
- (4) The rate of royalty payable for ilmenite feedstock that is of marketable quality is —
- (a) if it is produced in the period beginning on 1 July 2005 and ending on 30 June 2006, 3.5% of its value;
 - (b) if it is produced in the period beginning on 1 July 2006 and ending on 30 June 2007, 4% of its value;
 - (c) if it is produced in the period beginning on 1 July 2007 and ending on 30 June 2008, 4.5% of its value; or

86F. Royalty relief

- (1) Despite anything in regulation 86, 86AA or the *Mining (Ellendale Diamond Royalties) Regulations 2002*, if the Minister is satisfied in a particular case that there are circumstances justifying royalty relief, the Minister may determine that in that case the rate of royalty payable —
 - (a) under regulation 86, for any mineral produced or obtained while the determination is expressed to apply;
 - (b) under regulation 86AA, for gold metal produced while the determination is expressed to apply; or

- (1) Where a royalty has been paid under regulation 86 or 86AA and the Minister is of the opinion that the royalty value on which the royalty was based was not a true or fair value on which to calculate the royalty because —
 - (a) the royalty value does not reflect the market value of the mineral at the date the mineral was first sold;
 - (b) the allowable deductions used to calculate the royalty value are excessive having regard to the type of sale; or
 - (c) the holder of, or applicant for, the mining tenement has not shown to the satisfaction of the Minister, within the

time specified by the Minister, that the first sale of the mineral was a genuine commercial transaction and was not principally for the purpose of minimising the royalty payable,

the Minister shall determine the value of the mineral having regard to the market value for that type of mineral assessed at an arm's length basis, at the date the mineral was first sold, for the type of sale concerned.

- (2) Where a value is determined by the Minister under subregulation (1), the royalty shall be assessed at the relevant rate under regulation 86 or 86AA as if that value was the royalty value.
