---

**PROCEDURES AND SERVICES**

All anaesthesia fees in relation to procedures and services are to be charged on the relative value guide (RVG) system. In most cases, the RVG system comprises 3 elements: base units (BUs), modifying units (MUs) and time units (TUs).

In Division 1, the fee for a procedure is calculated by adding the base units for the procedure, the time units, and any modifying units and multiplying the result by the \$ value per unit allocated by this Schedule.

$$(BUs + TUs + MUs) \times \$ \text{ value per unit} = \text{Fee}$$

**Workers' Compensation and Injury Management (Scales of Fees)  
Regulations 1998**

Scale of fees: medical specialists and other medical practitioners **Schedule 1**  
Medical specialists and other medical practitioners **Part 1**

---

In Division 2, the fee for a therapeutic or diagnostic service only includes modifying units (MUs), and time units (TUs) if the item notes that service as including either or both.

**Base units**

The appropriate number of base units for each procedure has been established and is set out in this Schedule.

[The number of base units for each procedure has been calculated so as to include usual postoperative visits, the administration of fluids and/or blood incidental to the anaesthesia care and usual monitoring procedures.]

**Time units**

For the first 2 hours, each 15 minutes (or part thereof) of anaesthetic time constitutes one time unit. After 2 hours, time units are calculated at one per 10 minutes (or part thereof).

**Modifying units**

Many anaesthetic services are provided under particularly difficult circumstances depending on factors such as the medical condition of the patient and unusual risk factors. These factors significantly affect the character of the anaesthetic services provided. Circumstances giving rise to additional modifying units are set out in this Schedule.

[Note: The modifying units are, in the main, derived from the modifying units set out in the AMA's "List of Medical Services and Fees".]

Anaesthesia in the prone position (not applicable to lower intestinal endoscopic procedures)	3

---

Anaesthesia for after-hours emergencies

A 50% loading should apply to emergency after-hours anaesthesia. It is calculated using the "total relative value". The 50% loading and the emergency surgery modifier should not be used together.

*after-hours* is defined as that period between 6.00 p.m. and the following 8.00 a.m. on weekdays and between 8.00 a.m. and the following 8.00 a.m. on weekend days and public holidays.
