Guide for using this reprint

What the reprint includes

Endnotes, Compilation table, and Table of provisions that have not come into operation

1. Details about the original Act and legislation that has amended its text are shown in the Compilation table in endnote 1, at the back of the reprint. The table also shows any previous reprint.
2. Validation, transitional, savings, or other provisions identified in the Compilation table may be important. The table may refer to another endnote setting out the text of these provisions in full.
3. A table of provisions that have not come into operation, to be found in endnote 1a if it is needed, lists any provisions of the Act being reprinted that have not come into operation and any amendments that have not come into operation. The full text is set out in another endnote that is referred to in the table.

Notes amongst text (italicised and within square brackets)

1. If the reprint includes a section that was inserted, or has been amended, since the Act being reprinted was passed, editorial notes at the foot of the section give some history of how the section came to be as it is. If the section replaced an earlier section, no history of the earlier section is given (the full history of the Act is in the Compilation table).
Notes of this kind may also be at the foot of Schedules or headings.
2. The other kind of editorial note shows something has been —
 - removed (because it was repealed or deleted from the law); or
 - omitted under the *Reprints Act 1984* s. 7(4) (because, although still technically part of the text, it no longer has any effect).

The text of anything removed or omitted can be found in an earlier reprint (if there is one) or one of the written laws identified in the Compilation table.

Reprint numbering and date

1. The reprint number (in the footer of each page of the document) shows how many times the Act has been reprinted. For example, numbering a reprint as “Reprint 3” would mean that the reprint was the 3rd reprint since the Act was passed.
Reprint numbering was implemented as from 1 January 2003.
2. The information in the reprint is current on the date shown as the date as at which the Act is reprinted. That date is not the date when the reprint was published by the State Law Publisher and it is probably not the date when the most recent amendment had effect.

 - (b) refuse to grant a licence,and if, within the period of 30 days beginning with the date when an application for a disposal licence is received, or within such longer period as the Commission may by notice in writing to the applicant allow, the Commission has neither granted or refused to grant a disposal licence the application shall be deemed to have been refused.
- (4) The Commission shall determine any application for a disposal licence authorising the discharge or deposit of any matter having regard to all the circumstances of the case and in particular to the type of industry, the quantity, composition and temperature of the matter to be discharged or deposited, the condition and usage of the waters, the ability of the waters to absorb the matter without detriment or deterioration, and the number of similar or other types of matter already being discharged in the waters.
- (5) In considering any application, the Commission shall have regard to broad principles, and generally shall endeavour to ensure that any matter which it is proposed to discharge into the waters shall not contain —

s. 47

- (1) The provisions of this section apply to and in relation to any waters or any land for the time being subject to the powers of the Commission, save where the exercise of the powers conferred by this section would be inconsistent with the provisions of any Agreement to which the State is a party and which, or the execution of which, is or has been ratified or approved by an Act and the Governor, by Order in Council published in the *Gazette*, declares that any or all of the provisions of this section shall not apply according to the Order in respect of any or all of the places, premises, acts or things to which that Agreement relates.

- those waters, or will tend (either directly or in combination with other matter which he or another person causes or permits to enter those waters) to impede the proper flow of those waters in a manner leading or likely to lead to a substantial aggravation of pollution due to other causes or of the consequences of such pollution; or
- (b) any industrial effluent, waste or other matter from any mine, treatment plant, processing establishment, or factory, whether treated or otherwise, to be discharged or deposited so as to run or otherwise enter into waters to which this section applies, or any subterranean source of those waters; or

- (4) A person shall not be guilty of an offence by virtue of subsection (3) if —

- (b) the entry of the matter into the waters is attributable to an act or omission which is in accordance with good agricultural practice and the Commission has not, by notice in writing given not less than 3 months previously, required the owner or occupier of the place where the act or omission occurred, or any previous owner or occupier of that place, to apply for a licence in respect of that act or omission;
- (c) the discharge or deposit is caused or permitted in an emergency in order to avoid danger to the public and, as soon as reasonably practicable after it occurs, particulars of the discharge or deposit are furnished to the

(6) Provision may be made from time to time by by-laws as to the precautions to be taken by any person having the custody or control of any poisonous, noxious or polluting matter for the purpose of preventing the matter from entering waters to which this section applies and the by-laws may provide that any prescribed contravention shall be an offence to which subsection (9) applies.

- (7) Where it appears to the Commission that with a view to preventing poisonous, noxious or polluting matter from entering waters to which this section applies, it is appropriate to prohibit or restrict the carrying on in a particular place of activities which the Commission considers to be likely to result in pollution of those waters, provision may be made by by-laws that prescribed activities shall not be carried on in that place except under licence from the Commission (which shall not be unreasonably refused) and the by-laws may provide that any prescribed contravention shall be an offence to which subsection (9) applies.

the Commission may apply to the Supreme Court or The District Court of Western Australia for an order with respect to the disposal of that structure or other matter or thing and the Court may authorise the Commission or a Management Authority, upon such terms as the Court thinks fit, to undertake the removal and to dispose of that matter or thing in any manner authorised by the Court.

52. Remedial works

Where it appears to the Commission or a Management Authority that any poisonous, noxious or polluting matter is likely to enter or is or was present in waters subject to its control and the Commission or that Authority has reason to believe that an order served under section 50 would not be effective or effective within the time required, the Commission or that Authority may carry out such works as may be necessary for the purpose of preventing the matter from entering the waters or for the purpose of removing and disposing of the matter or remedying or mitigating any pollution thereby caused.

53. Recovery of expenses

Any expenses reasonably incurred by the Commission or a Management Authority pursuant to section 50, section 51 or section 52 may be defrayed out of any money obtained by the Commission or that Authority from the disposal of any matter so dealt with and, in so far as they are not so defrayed, shall be recoverable as a debt due to the Commission or that Authority, as the case may be, from any person in default under the order or injunction or who caused or knowingly permitted the circumstances to occur which gave rise to the necessity for the expenditure.
