Workers' Compensation and Injury Management (Scales of Fees) Regulations 1998

Reprint 5: The regulations as at 17 May 2013

Guide for using this reprint

What the reprint includes

Endnotes, Compilation table, and Table of provisions that have not come into operation

1. Details about the original regulations and legislation that has amended its text are shown in the Compilation table in endnote 1, at the back of the reprint. The table also shows any previous reprint.
2. Transitional, savings, modifying or other provisions identified in the Compilation table may be important. The table may refer to another endnote setting out the text of these provisions in full.
3. A table of provisions that have not come into operation, to be found in endnote 1a if it is needed, lists any provisions of the regulations being reprinted that have not come into operation and any amendments that have not come into operation. The full text is set out in another endnote that is referred to in the table.

Notes amongst text (italicised and within square brackets)

1. If the reprint includes a regulation that was inserted, or has been amended, since the regulations being reprinted were made, editorial notes at the foot of the regulation give some history of how the regulation came to be as it is. If the regulation replaced an earlier regulation, no history of the earlier regulation is given (the full history of the regulations is in the Compilation table).

Notes of this kind may also be at the foot of Schedules or headings.

2. The other kind of editorial note shows something has been —
 - removed (because it was repealed or deleted from the law); or
 - omitted under the *Reprints Act 1984* s. 7(4) (because, although still technically part of the text, it no longer has any effect).

The text of anything removed or omitted can be found in an earlier reprint (if there is one) or one of the written laws identified in the Compilation table.

Reprint numbering and date

1. The reprint number (in the footer of each page of the document) shows how many times the regulations have been reprinted. For example, numbering a reprint as “Reprint 3” would mean that the reprint was the 3rd reprint since the regulations were published. Reprint numbering was implemented as from 1 January 2003.
2. The information in the reprint is current on the date shown as the date as at which the regulations are reprinted. That date is not the date when the reprint was published by the State Law Publisher and it is probably not the date when the most recent amendment had effect.

EMERGENCY ATTENDANCES

After hours — where immediate attendance is required after 6 p.m. and before 8 a.m. on any weekday, or at any time on a Saturday, Sunday or a public holiday	6
--	---

Note: No after hours loading applies to the above item

Attendance on a patient in imminent danger of death requiring continuous life saving emergency treatment to the exclusion of all other patients	6
---	---

Call back from home, office or other distant location for the provision of emergency services	4
---	---

PROCEDURES AND SERVICES

All anaesthesia fees in relation to procedures and services are to be charged on the relative value guide (RVG) system. In most cases, the RVG system comprises 3 elements: base units (BUs), modifying units (MUs) and time units (TUs).

In Part A, the fee for a procedure is calculated by adding the base units for the procedure, the time units, and any modifying units and multiplying the result by the \$ value per unit allocated by this Schedule.

$$(BUs + TUs + MUs) \times \$ \text{ value per unit} = \text{Fee}$$

In Part B, the fee for a therapeutic or diagnostic service only includes modifying units (MUs), and time units (TUs) if the item notes that service as including either or both.

Base units

The appropriate number of base units for each procedure has been established and is set out in this Schedule.

[The number of base units for each procedure has been calculated so as to include usual postoperative visits, the administration of fluids and/or blood incidental to the anaesthesia care and usual monitoring procedures.]

Time units

For the first 2 hours, each 15 minutes (or part thereof) of anaesthetic time constitutes one time unit. After 2 hours, time units are calculated at one per 10 minutes (or part thereof).

**Workers' Compensation and Injury Management (Scales of Fees)
Regulations 1998**

Schedule 1 Scale of fees: medical specialists and other medical practitioners

Part 1 Medical specialists and other medical practitioners

Modifying units

Many anaesthetic services are provided under particularly difficult circumstances depending on factors such as the medical condition of the patient and unusual risk factors. These factors significantly affect the character of the anaesthetic services provided. Circumstances giving rise to additional modifying units are set out in this Schedule.

[Note: The modifying units are, in the main, derived from the modifying units set out in the AMA's "List of Medical Services and Fees".]

Description	Units
A normal healthy patient	0
A patient with a mild systemic disease	0
A patient with a severe systemic disease	1
A patient with a severe systemic disease that is a constant threat to life	4
A moribund patient who is not expected to survive for 24 hours with or without the operation	6
A patient who is morbidly obese (body mass index is more than 35)	2
A patient who is in the 3 rd trimester of pregnancy	2
A patient declared brain dead whose organs are being removed for donor purposes	0
Where the patient is aged under 1 year or over 70 years old	1
Emergency surgery (i.e. When undue delay in treatment of the patient would lead to a significant increase in a threat to life or body part)	2
Anaesthesia in the prone position (not applicable to lower intestinal endoscopic procedures)	3

Anaesthesia for after-hours emergencies

A 50% loading should apply to emergency after-hours anaesthesia. It is calculated using the "total relative value". The 50% loading and the emergency modifier should not be used together.

Anaesthesia for all open procedures on the heart, pericardium, and great vessels of the chest	20
Anaesthesia for heart transplant	20
Anaesthesia for heart and lung transplant	20
Cadaver harvesting of heart and/or lungs	8
Spine and spinal cord	
Anaesthesia for all procedures on the cervical spine and/or cord unless otherwise specified (for myelography and discography see items in 'Other Procedures')	10
— posterior cervical laminectomy in sitting position	13
Anaesthesia for all procedures on the thoracic spine and/or cord unless otherwise specified	10
— thoracolumbar sympathectomy	13
Anaesthesia for all procedures in the lumbar region unless otherwise specified	8
— lumbar sympathectomy	7
— chemonucleolysis	10
Anaesthesia for extensive spine and spinal cord procedures	13
Anaesthesia for manipulation of spine	3
Anaesthesia for percutaneous spinal procedures	5
Upper abdomen	
Anaesthesia for all procedures on the skin or subcutaneous tissue of the upper abdominal wall unless otherwise specified	3

Description of procedure, etc.	Units
Anaesthesia for all closed procedures on radius, ulna, wrist, or hand bones	3
Anaesthesia for all open procedures on radius, ulna, wrist, or hand bones unless otherwise specified	4
— total wrist replacement	7
Anaesthesia for arthroscopic procedures of the wrist joint	4
Anaesthesia for all procedures on the arteries of the forearm, wrist, and hand unless otherwise specified	8
— embolectomy	6
Anaesthesia for all procedures on the veins of the forearm, wrist, and hand unless otherwise specified	4
Anaesthesia for forearm, wrist, or hand cast application, removal or repair	3
— for microsurgical reimplantation of forearm, wrist or hand	15
— for microsurgical reimplantation of a finger	8
Burns	
Anaesthesia for excision of debridement of burns with or without skin grafting	
— where the burnt area involves not more than 3% of total body surface	3
— where the burnt area involves more than 3% but less than 10% of total body surface	5
— where the burnt area involves 10% or more but less than 20% of total body surface	7
