— an attendance of more than 45 minutes duration	8
Post anaesthesia patient care following a day procedure	2

**EMERGENCY ATTENDANCES**

After hours — where immediate attendance is required after 6 pm and before 8 am on any weekday, or at any time on a Saturday, Sunday or a public holiday 6

**Note: No after hours loading applies to the above item**

Attendance on a patient in imminent danger of death requiring continuous life saving emergency treatment to the exclusion of all other patients 6

Call back from home, office or other distant location for the provision of emergency services 4

**PROCEDURES AND SERVICES**

All anaesthesia fees in relation to procedures and services are to be charged on the relative value guide (RVG) system. In most cases, the RVG system comprises 3 elements: base units (BUs), modifying units (MUs) and time units (TUs).

In Division 1, the fee for a procedure is calculated by adding the base units for the procedure, the time units, and any modifying units and multiplying the result by the \$ value per unit allocated by this Schedule.

$$(BUs + TUs + MUs) \times \$ \text{ value per unit} = \text{Fee}$$

Medical specialists and other medical practitioners **Part 1**

---

In Division 2, the fee for a therapeutic or diagnostic service only includes modifying units (MUs), and time units (TUs) if the item notes that service as including either or both.

**Base units**

The appropriate number of base units for each procedure has been established and is set out in this Schedule.

[The number of base units for each procedure has been calculated so as to include usual postoperative visits, the administration of fluids and/or blood incidental to the anaesthesia care and usual monitoring procedures.]

**Time units**

For the first 2 hours, each 15 minutes (or part thereof) of anaesthetic time constitutes 1 time unit. After 2 hours, time units are calculated at 1 per 10 minutes (or part thereof).

**Modifying units**

Many anaesthetic services are provided under particularly difficult circumstances depending on factors such as the medical condition of the patient and unusual risk factors. These factors significantly affect the character of the anaesthetic services provided. Circumstances giving rise to additional modifying units are set out in this Schedule.

[Note: The modifying units are, in the main, derived from the modifying units set out in the AMA's "List of Medical Services and Fees".]

A 50% loading should apply to emergency after hours anaesthesia. It is calculated using the "total relative value". The 50% loading and the emergency surgery modifier should not be used together.
